The Undergraduate Program

The Undergraduate Program

At New Mexico Tech, the undergraduate program has two principal objectives:

1) to provide a strong general education in:

a) the humanities and social sciences, and

b) the basic sciences and mathematics; and

2) to offer specialization appropriate to a chosen major field of interest.

Specific requirements for each major are listed under the academic department concerned. It is your responsibility to work out with your advisor a program that meets both the general degree and major specific requirements. In some instances, wide flexibility is allowed in choosing electives; in others, the choice of electives is restricted.

Undergraduate Student Status

NMT offers many opportunities as an undergraduate student. Enrollment opportunities include:

- Degree-Seeking Students
- Classification of Degree-seeking Students
- Certificate-seeking Students
- Non-Degree Students
- Transfer Students
- Veteran Students
- Change of Student Status

Here you will find the requirements of Admission for:

- Applying to New Mexico Tech
- Regular Admission of First-year Freshman
- Home-Schooled Students
- Transfer Students
- International Students
- Non-Degree Students (Undergraduate Level)
- Admission Denial Appeal Procedure

Dual-Credit Program

For information regarding NMT's Dual-Credit program please see our High School Dual Credit Program catalog page.

Accelerated Master's of Science Programs

New Mexico Tech offers programs that allow advanced undergraduate students to earn both a Bachelor's and Master's degree, possibly within five years. Please refer to the catalog section on Accelerated Master's degree for more details about who qualifies. Not every program has an Accelerated Master option. If the department you are interested in offers this option they may also have additional requirements on top of what is described in the graduate section of the catalog.

Research Opportunities

Tech has a wealth of research projects on campus, many of which employ students for pay or class credit. Since over 99% of our faculty have PhDs and conduct research, many professors hire undergraduate students to assist them. In addition, Tech has several divisions dedicated to research.

Study Abroad Opportunities

Arrangements for all types of study abroad are made through the Office for International Programs (Joseph A. Fidel Student Services Center, Suite 262). To be eligible to apply for participation, students must, at a minimum:

- be full-time, degree-seeking student at Tech for at least one year,
- completed at least 30 credit hours at Tech,
- have a cumulative G.P.A. of at least 2.5,
- be in good academic standing,
- have a clean disciplinary record,
- and be in good financial standing.

International Student Exchange

New Mexico Tech has exchange agreements in place with multiple universities, allowing students to study in various countries around the world. Information about these opportunities is available in the Office for International Programs (Fidel 262).

The Undergraduate Program

International Exchange through NMIEC

Through the New Mexico International Education Consortium, students at any of New Mexico's public universities may gain access to study abroad programs available at other New Mexico universities. Students who participate in study abroad through NMIEC will pay tuition and fees to the New Mexico host university, not to New Mexico Tech.

Degree-Seeking Students

Degree-seeking Students

Undergraduate students who are pursuing a degree program are classified as regular students. Full-time regular students are those who enroll for 12 or more credit hours during the fall and spring semesters; part-time regular students are those who enroll for fewer than 12 credit hours. (This designation does not apply to graduating seniors.) These students shall be subject to the following:

- Part-time students will be eligible for financial aid only in proportion to their course loads and will be subject to restrictions imposed by federal and/or state guidelines.
- In order to maintain satisfactory progress and remain in good standing, the part-time student must meet the same standards as full-time regular students.

Degree-Seeking Students

Classification of Degree-seeking Students

Classification of Degree-seeking Students

Undergraduate students are classified by the number of credit hours they have completed:

	Freshman	0 to 29 credit hours
	Sophomore	30 to 59 credit hours
	Junior	60 to 89 credit hours
	Senior	90 credit hours and above

Degree-Seeking Students

Non-Degree Students

Non-Degree Students

Students who are not pursuing a degree program are classified as non-degree students. While non-degree students are free to choose program courses best suited to meet their individual needs, they are expected to meet the prerequisite or corequisite requirements for chosen academic courses. Non-degree undergraduate students may enroll for no more than six credit hours per semester. Non-degree students must change to regular status in order to graduate.

Degree-Seeking Students

Transfer Students

Transfer Students

Students in good academic standing at other colleges and universities (2.0 minimum GPA) are eligible for transfer admission to New Mexico Tech. Credits taken at another institution will be evaluated and transferred on a course-by-course basis. See transfer section for information on how to apply for admission and transfer of credit.

Degree-Seeking Students

Veterans

Veterans

The Veterans Administration requires students on the GI Bill to carry a minimum of 12 credit hours (6 credit hours in summer) to qualify for full benefits. The minimum credit hours must apply toward the student's degree requirements. Physical Recreation (PHED), Studio Arts (ARTS), and Community Education (designated by the letter "C" in the course number) courses do not count toward the minimum credit hours for veterans.

If, for some reason, the student desires to drop a course during the semester that would bring the load below 12 credit hours, permission must first be obtained from the student's academic advisor. NMT's VA Representative must be notified that the student is dropping from full-time enrollment at the time the change of program card is returned to the Office of the Registrar.

Further information can be obtained from the VA Representative, located in the Office of Registrar Office. Joseph A. Fidel Student Services Center, Suite 288.

In accordance with Title 38 US Code 3679(e), this educational institution adopts the following additional provisions for any students using the U.S Department of Veterans Affairs (VA) Post 9/11 G.I Bill® (Chapter 33) or Vocational Rehabilitation & Employment (Chapter 31) benefits, while payment to the institution is pending for VA.

This educational institution will not:

- Prevent the student's enrollment;
- Assess a late penalty fee to the student;

- Require the student to alternative or additional funding;
- Deny the student access to any resources (access to classes, libraries, or other institutional facilities) available to other students who have satisfied their tuition and fee bills to the institution.

However, to qualify for this provision, such students may be required to:

- Produce the student's enrollment;
- Provide a written request to be certified;
- Provide additional information needed to properly certify the enrollment as described in other institutional policies.

GI Bill® is a registered trademark of the U.S Department of Veterans Affairs (VA). More information about education benefits offered by VA is available at the official U.S. government website at https://www.benefits.va.gov/gibill

Degree-Seeking Students

Certificate-seeking Students

Certificate-seeking Students

Undergraduate certificates are available to degree and non-degree seeking students. Certificate applicants must meet the certificate admission requirements. Completed applications are submitted to the Community Education program. For Admission information to the certificate program, please refer to the Community Education Program.

Degree-Seeking Students

Change of Student Status

Non-degree to Degree-seeking Status

To change from non-degree to regular student status, the student must meet all regulations governing regular admission and must submit an *Application for Undergraduate Admission and Scholarship* through the Office of Admission. Students admitted under non-degree status, who do not otherwise qualify for regular admission, may apply to the Office of Admission for degree-seeking status after successful completion of 30 credit hours at Tech.

Degree-seeking to Non-degree Status

A degree-seeking student who is no longer pursuing a degree program may petition to change to non-degree student status at the Office of the Registrar.

Welcome to Admissions

https://www.nmt.edu/admission/

The following is a summary of undergraduate admissions standards and policies. If you have not applied for admission, please apply through our website https://apply.nmt.edu/register/application_undergrad_admission.

New Mexico Tech seeks to admit students who have demonstrated, through previous education, aptitude tests, and interests, that they are qualified to complete a degree. Tech subscribes to the National Association for College Admission Counseling's Statement of Principles of Good Practice. All official documents sent to New Mexico Tech become the property of the college and will not be returned, nor can copies be provided to entities other than the student.

Applying to New Mexico Tech

Regular Admission

Freshmen/First-year Admission Requirements

First-time, entering students must meet the following minimum admission requirements:

1. The student must be a graduate of an accredited high school with a minimum grade-point average (GPA) of 2.5 (on a 4.0 scale) in high school course work **or** have passed the general equivalency diploma (GED) examination with an average score of 500 **or** greater **or** achieve a HiSet combined score of 75 or greater to demonstrate College and Career readiness.
2. The student must have successfully completed the following high school courses (one unit equals one year of high school study):
    - English: a minimum of four units with at least one unit earned in composition at the junior or senior level.
    - Science: a minimum of two units of sciences, with laboratories, chosen from among biology, physics, chemistry, and earth science.
    - Mathematics: a minimum of three units chosen from among Algebra I, Algebra II, Geometry, Trigonometry, or higher mathematics. Pre-calculus and calculus are recommended.
    - Social Science: a minimum of three units, one of which must be history.
3. The student must submit an official ACT, Inc. (formerly American College Test) or SAT (Scholastic Aptitude Test) score reports. Normally, an ACT composite score of 21 or higher or a combined SAT Critical Reading and Math score of 1070 or higher is required. (Recent ACT scores for entering freshmen averaged 26; SAT, 1080.) ACT and SAT scores are also used for course placement and advising purposes. ACT/ SAT scores are not required for adult learners over the age of 23.

Test Optional Admission

The minimum admission requirement for a student classified as a first-time freshman using test optional admission.

1. A high school GPA of 3.0 **without** ACT or SAT scores.

- Students will need test scores to be considered for scholarships.
- Math Placement test eill be madatory prior to entry of first term.

Applying to New Mexico Tech

Home-Schooled Students

In order to qualify for admission to New Mexico Tech, the home-schooled student:

1. Must supply documentation of courses completed. The student must be a graduate of an accredited home-school with a minimum grade-point average (GPA) of 2.5 (on a 4.0 scale) in high school course work or have passed the general equivalency diploma (GED) examination with an average score of 500 or greater or achieve a HiSet combined score of 75 or greater to demonstrate College and Career readiness.
2. Must have successfully completed the following courses (one unit equals one year of study):
    - English: a minimum of four units with at least one unit earned in composition at the junior or senior level
    - Science: a minimum of two units of sciences, with laboratories, chosen from among biology, physics, chemistry, and earth science
    - Mathematics: a minimum of three units chosen from among Algebra I, Algebra II, Geometry, Trigonometry, or higher mathematics. Pre-calculus and calculus are recommended.
    - Social Science: a minimum of three units, one of which must be history.
3. The student must submit an official ACT, Inc. (formerly American College Test) or SAT (Scholastic Aptitude Test) score reports. Normally, an ACT composite score of 21 or higher or a combined SAT Critical Reading and Math score of 1070 or higher is required. (Recent ACT scores for entering freshmen averaged 26; SAT, 1080.) ACT and SAT scores are also used for course placement and advising purposes. ACT/SAT scores are not required nor reviewed for adult learners over the age of 23.
4. If you are deemed academically qualified, then you will receive a letter of admission and the *Acceptance of Admission* form. You must complete this form and return it with the non refundable admission fee of $100 to the Office of Admission before you are allowed to register for classes.

Test Optional Admission

The minimum admission requirement for a student classified as a first-time freshman using test optional admission.

1. A high school GPA of 3.0 **without** ACT or SAT scores.

- Students will need test scores to be considered for scholarships.
- Math Placement test eill be madatory prior to entry of first term.

Applying to New Mexico Tech

Transfer Students

You will be considered a transfer student if you have a minimum of 30 credit hours transfer from an accredited college or university you have attended after graduating high school or completing your GED. (If you have fewer than 30 credit hours of transfer credit, or if you completed college credit as dual credit, follow the regular Freshman/first-year Admission section above.)

Admission Requirements

The minimum admission requirements for a student who is classified as a transfer student are as follows:

- The student transferring from another college or university must have completed the same high school coursework requirements as freshman/first -year student admission (either from high school or from equivalent courses taken since high school).
- The applicant must present official college transcripts showing a cumulative GPA of 2.0 or better.
- The applicant must place in Math 1240 (Pre-Calculus) or higher.
- The student must be in good academic standing at the last institution attended.
- The student must be eligible to re-enroll at the institutions from which they wish to transfer. An applicant who cannot re-enroll at that institution is not eligible to enter New Mexico Tech.

Procedure

To be considered for admission, a Transfer student applicant must:

1. Complete an Application for Undergraduate Admission and Scholarship.
2. May be asked to provide an official high school transcript at the discretion of the Office of Admission (although a high school transcript may not be needed for the admission process, an official High School transcript showing date of graduation will need to be provided to the Office of the Registrar; required of all students)
3. Provide official transcripts from all colleges attended, (official awarding of transfer credit cannot be completed until the university has received the official college transcripts)
    - Coursework completed at universities/colleges outside of the United States, will require transcripts to be submitted through WES: https://www.wes.org/ for a Comprehensive Course by Course Report. In addition course information in English may be requested
4. May be asked to provide an official ACT or SAT student Profile Report; and
5. If you are deemed academically qualified, then you will receive a letter of admission and the Acceptance of Admission form. You must complete this form and return it with the non refundable admission fee of $100 to the Office of Admission before you are allowed to register for classes.

Applying to New Mexico Tech

International Students

New Mexico Tech is authorized under federal law to enroll nonimmigrant alien students.

International Undergraduate Admission Requirements

1. International students must meet the basic secondary-education requirements for entering first-year students:
    - Science: at least two years of science (biology, physics, chemistry, earth science), with laboratory work
    - Mathematics: at least three years, including algebra, geometry, trigonometry, or higher mathematics. Pre-calculus and calculus are recommended.

    - Social Science: at least three years, one of which must be history.
    - Language: at least four years of language instruction in the native or national language.
2. The student's grade average must equal at least a GPA of 2.5 on a 4.0 scale.
3. A student whose native language is not English must submit a TOEFL score of at least 76 or an IELTS of at least 6.5. Information and application forms for this test may be obtained from: The College Board at https://www.ets.org/toefl
4. An international student transferring from another US post-secondary college or university must have completed the same secondary coursework as required of incoming first-year students. If all application materials are submitted before the deadline, official transcripts from previous post-secondary institutions will be evaluated for possible credit transfer before enrollment.

Medical Insurance

International students are required to show proof of medical insurance coverage before registration each semester. Specific requirements for students entering on J1 visas are explained at the time of admission. Failure to provide proof of insurance can lead to disenrollment.

Applying to New Mexico Tech

Non-Degree Students (Undergraduate Level)

New Mexico Tech accepts, on a non-degree basis, part-time undergraduate students who are not pursuing a degree program. Non-degree seeking undergraduate students may take up to 6 credit hours or two classes (whichever is greater) per semester. International students in F or J status must be degree-seeking and full-time students.

Applicants for non-degree undergraduate admission who wish to take academic courses for college credit and who have previously attended an institution of higher education must have a transcript or letter sent from the registrar of their most recently attended institution. This letter, addressed to the New Mexico Tech Office of Admission, should attest that they are in good standing at that institution. Students under probation or suspension at New Mexico Tech or any other institution of higher education will not be admitted as non-degree students except by appeal to the Academic Standards and Admission Committee.

Appeals should be addressed to the committee in care of the Office of the Registrar. To review the appeal process, please see page

Non-degree students not seeking a bachelor's degree from New Mexico Tech are expected to meet the prerequisite or corequisite requirements of academic courses but are otherwise free to choose program courses best suited to meet their individual needs with approval from the Associate Dean of Student Success

Non-degree seeking students who have a bachelor's degree are regarded by New Mexico Tech as Non-degree Graduate Students. Non-degree Graduate Students will be charged tuition at undergraduate rates for courses numbered less than 3000 and graduate tuition for all courses numbered 3000 and above.

Non-degree students who wish to begin a degree seeking program must apply for regular degree-seeking admission. To apply for admission please review the Admission policies and Application of Admission on page

Applying to New Mexico Tech

Admission Denial Appeal Procedure

Appeal of Admission Decisions

If you have been denied admission to New Mexico Tech, but believe that you have the skills to succeed at New Mexico Tech, you may appeal your admission decision.

To appeal an admission decision please provide supporting documents to the Director of Admission to include:

- A completed Application forAdmission and Scholarship with supporting documents. These supporting documents must include:
    - Letter of appeal (A statement from you indicating why you believe that you should be considered for admission and why you can succeed at Tech)
    - A minimum of two letters from people (e.g., high school science and math teachers) who are very familiar with your potential for study at a technical university; and
    - Other documentation (e.g., participation in science fairs, Science Olympiad, and other relevant technical activities) that you believe bears on the matter of your preparation for bachelor's-level study
- Official HS transcript if needed
- Official college transcripts if the student has taken any college courses
- SAT/ACT score report if needed

Dual Credit Program for High School Students

Dual credit is a program that provides public high school students the opportunity to receive credit for both a high school course and a college course by taking a single qualifying course. Dual credit is a state statute, revised in 2007 by the State Legislature – Senate Bill 943, Statutory Authority, Section 9-25-8 NMSA (01/01/08). Concurrent enrollment functions similarly but does not require that the college course be aligned with a corresponding high school course. Consequently, the student is not guaranteed that the high school will accept the college credit toward the high school graduation requirement.

The primary purpose of the Dual Credit Program at New Mexico Tech is to increase the educational opportunities and options for high school students and increase the overall quality of instruction and learning available through secondary schools. The Dual Credit Program allows students to earn credit at the secondary and postsecondary levels simultaneously and provides students an early glimpse of college life and college-level studies. Enrolling in college coursework is a commitment of your time and energy. Please consider whether enrolling in the Dual Credit Program is a realistic option based on your extracurricular activities and family schedules.

Students interested in participating in the Dual Credit Program at New Mexico Tech must be prepared for the following:

- Students are responsible for their own transportation to and from New Mexico Tech's campus.
- Students are expected to adhere to New Mexico Tech's student handbook while on New Mexico Tech's campus and attend the class or classes in which they are registered even if the high school is not in session that day.
- New Mexico Tech's academic calendar starts and ends differently than most high school calendars.
- Students who take courses that are not part of the approved course list agreed upon between the District and New Mexico Tech will be responsible for all costs of attendance including tuition, fees, and textbooks.
- Students must follow New Mexico Tech's Registration schedule each semester.

- Students are required to participate in the Dual Credit Program Orientation the first semester they participate in the Dual Credit Program.
- Grades earned through the Dual Credit Program at New Mexico Tech are part of your permanent academic record.

Types of Dual Credit

Dual credit courses provide an accelerated path to success in college or career. Developmental or remedial courses and physical education courses cannot be taken for dual credit.

College-Offered

One form of dual credit, referred to as college-offered, requires that the student attend regularly scheduled New Mexico Tech courses, either on campus or at an off-site location, which may include the high school site after hours.

School-Offered

Another form of dual credit, referred to as school-offered, allows students to receive college credit for courses they are taking at the high school.

Eligibility & Application Process

Admission to the dual credit program does not constitute regular admission to New Mexico Tech. To be considered for dual credit or concurrent enrollment it is necessary for the student to meet the following minimum eligibility requirements:

To qualify for college-offered or school-offered dual credit, a high school student must:

1. Be a public high school, private high school, or home school student;
2. For college-offered courses, be at least 16 years old (exceptions can be made in certain situations with approval of a parent, high school principal, and college dean or Associate Vice President for Academic Affairs);
3. For college-offered courses, achieve minimum qualifying score on the ACT, PSAT, SAT, or take the appropriate departmental placement exam;
4. For school-offered courses, there are no age or grade restrictions; and
5. Have a minimum 2.5 GPA;
6. Submit the following each semester:
    - Completed Dual Credit Request Form (signed by your high school counselor)
    - Current official high school transcript
    - Family Educational Right to Privacy Act Release Form (signed by the student and the student's parent/guardian) Copies of the forms are available at the high school counseling office.

Students who are denied participation in the dual credit program may appeal through the same process as regular NMT students, or through the New Mexico Public Education Department's Dual Credit Committee.

Continued Eligibility

In accordance with the New Mexico State Public Education Policy & Procedures for Dual Credit, in order to maintain dual credit eligibility, students must:

- continue to demonstrate readiness for college coursework;
- make continued progress toward high school graduation;
- maintain half-time high school enrollment until graduation requirements are completed;
- obtain a course grade of C or better for each course taken, not obtain withdrawals or incompletes for dual credit courses, and not enroll in a dual credit course to audit or for an S/U grade.

If these conditions are met, students may enroll in two dual credit courses per semester (including recitation and labs) until all core high school graduation requirements (other than electives) are completed. Students who have completed all core high school courses may enroll in up to four dual credit courses. Home school and private school students are limited to two courses per semester according to the New Mexico Public Education Department's Dual Credit Policy & Procedures.

Students who have not met the above requirements will retain "provisional dual credit eligibility." Students with provisional eligibility may register and enroll in one dual credit course per semester until they meet the above requirements.

Financial Aid

Dual Credit students are not eligible for federal financial aid.

Course Selection

Course selection will vary based on the Master Agreement with each high school district and New Mexico Tech. Students interested in enrolling in a math class are required to take the Math Placement Exam to determine course placement prior to registering for the class. Students are also required to meet with the Associate Dean for Student Success at New Mexico Tech prior to enrolling in any course and must satisfy prerequisite/corequisite requirements for the class.

Accelerated Master's of Science Programs

New Mexico Tech offers programs that allow advanced undergraduate students to earn both a Bachelor's and Master's degree possibly within five years. Please refer to the catalog section on Accelerated Master Option for more details about who qualifies. Not every program has an Accelerated Master option. If the department you are interested in offers this option they may also have additional requirements on top of what is described in the graduate section of the catalog.

Research Opportunities

Tech has a wealth of research projects on campus, many of which employ students for pay or class credit. Since over 99% of our faculty have PhDs and conduct research, many professors hire undergraduate students to assist them. In addition, NM Tech has several divisions dedicated to research.

Study Abroad Opportunities

Arrangements for all types of study abroad are made through the Office for International Programs (Joseph A. Fidel Student Services Center, Suite 262). To be eligible to apply for participation, students must, at a minimum:

- be full-time, degree-seeking student at Tech for at least one year,
- completed at least 30 credit hours at Tech,
- have a cumulative G.P.A. of at least 2.5,
- be in good academic standing,
- have a clean disciplinary record,
- and be in good financial standing.

International Student Exchange

New Mexico Tech has exchange agreements in place with multiple universities, allowing students to study in various countries around the world. Information about these opportunities is available in the Office for International Programs (Fidel 303).

International Exchange through NMIEC

Through the New Mexico International Education Consortium, students at any of New Mexico's public universities may gain access to study abroad programs available at other New Mexico universities. Students who participate in study abroad through NMIEC will pay tuition and fees to the New Mexico host university, not to New Mexico Tech.

The Graduate Program

(www.nmt.edu/gradstudies)

The graduate program provides opportunities for advanced study and research in the Basic Sciences, Computer Science and Mathematics, the Earth Sciences, and several Engineering fields at both the Masters and Doctoral level. Our Master of Science for Teachers program provides a growing number of New Mexico secondary school teachers with science and mathematics tools to challenge students in their classrooms. The Master of Engineering and Professional Masters programs provide a unique opportunity for working engineers and scientists to obtain the skills needed for expanding responsibilities in the technology fields. Students are provided the opportunity to learn the spirit as well as the methods of productive scholarship.

Graduate Admissions

Applying for Graduate Admission

Regular Admission (Degree-Seeking)

Interested persons who have completed or will complete a Bachelor's degree prior to admission and have a record that indicates good potential for advanced study and research in Tech's programs (undergraduate GPA of 3.0 is used as a general guideline) are encouraged to apply for admission to graduate study. All applications for degree seeking admission must be submitted via our online system found at www.nmt.edu/gradstudies. Questions about NMT's graduate school can be directed by e-mail to graduate@nmt.edu or by mail to:

Center for Graduate Studies

New Mexico Tech

801 Leroy Place

Socorro, New Mexico 87801

For full consideration for assistantships and fellowships, completed applications must be received by specific dates for individual departments as listed on https://www.nmt.edu/gradstudies/programs.php.

To be assured of consideration for admission, completed domestic applications must be received no later than August 1 for the fall semester, January 2 for the spring semester, and May 1 for the summer semester. To allow enough time for the admission decision and the acquisition of passports and visas, international students are advised to make sure their application, supporting documents, and application fee are submitted to the Center for Graduate Studies by March 15 (for summer and fall semesters) or by September 15 (for spring semester).

Admission to graduate study at New Mexico Tech and the award of financial aid are made to qualified individuals without regard to race, color, creed, sex, or national origin.

Non-Degree or Pre-Degree Admission

Those who have earned Baccalaureate degrees and wish to earn graduate credits without immediately pursuing a graduate degree may apply as non-degree or pre-degree seeking students. The application process does not require the submission of official academic credentials, reference letters, or test scores; however, transcripts from prior institutions are required for review. Non-degree or pre-degree applicants must submit unofficial transcripts showing completion of a Bachelor's degree or higher from a U.S. regionally accredited institution or from an international institution officially recognized by that country.

Admission as a non-degree or pre-degree student does not guarantee registration in specific courses or acceptance of these courses for credit toward future degree programs. Students are encouraged to contact the department offering the courses they are interested in to determine eligibility and any additional requirements.

Non-degree or pre-degree students are not eligible for most forms of financial aid, including assistantships, fellowships, and student employment. International students on an F-1 visa typically do not qualify for in-person non-degree or pre-degree study.

If non-degree or pre-degree students later decide to pursue a formal degree program, they may apply for degree-seeking status using the online application system found at www.nmt.edu/gradstudies.

Admission as a non-degree or pre-degree student does not guarantee acceptance into a degree program.

Graduate Admissions

Application Requirements

Students seeking regular admission are required to provide, in addition to completed application forms, the following:

1. Transcripts
    - Unofficial transcripts may be uploaded to the online application system but official transcripts are required before matriculation.
    - Official transcripts from universities in the United States are to be submitted directly to the online system.
    - Sealed, official transcripts of all international college work must be mailed directly to the Center for Graduate Studies at the address below:
      Center for Graduate Studies
      New Mexico Tech
      801 Leroy Place
      Socorro, New Mexico 87801
2. References from three professors and/or employers familiar with the applicant's academic, professional, and/or research performance. The following programs have the following exceptions
    - Master of Science for Teachers (MST) only two letters of reference are required, preferably at least one from the student's department chair or principal, indicating the student's interest and abilities related to the pursuit of their MST degree.
    - Master of Engineering Management (MEM) it is preferred to have at least one reference out of the required three forms/letters be submitted by a past or current supervisor. If the applicant is an entrepreneur with no supervisor, a reference form/letter from a business associate is acceptable.
    - For certificates only two reference letters are required.
3. The required application fee.
4. Official Graduate Record Examination (GRE) scores. Please refer to the listings at http://www.nmt.edu/gradstudies/programs.php for the GRE general examination requirements for each program. If the student's GRE scores are required by the program to which the student is applying, but they are no longer available because they were taken too long ago, the student must retake the GRE examination. (Unofficial copies may be used for application, but official copies are required before matriculation.)
    - A few departments may also require a subject test score. Information related to departmental requirements for the subject GRE may be on the programs page listed above. The subject test must be in the same field in which the applicant intends to major.
    - GRE is not required for the Master of Science for Teachers.
5. A statement of the applicant's goals. This short (two pages or less) statement should summarize the applicant's career goals and briefly describe what they seek to gain by pursuing their specific program of interest.
6. Domestic applicants seeking financial aid of any kind are strongly encouraged to submit a completed Free Application for Federal Student Aid (FAFSA) form. The FAFSA form is available online from https://studentaid.gov/h/apply-for-aid/fafsa.

International Students

New Mexico Tech is authorized under federal law to enroll nonimmigrant alien students. International applicants whose native language is not English are required to take, in addition to the GRE, one of the following:

- The Test of English as a Foreign Language (TOEFL). An internet-based TOEFL (iBT) score of 76, computer administered score of 207 or paper-administered score of 540; Or
- The International English Language Testing System (IELTS) examination. IELTS score of 6 is used as a minimum for admission.

Financial statements need to be uploaded in the online application system as part of the admission process. Applications from international students, complete with supporting documents and application fee, must be submitted by March 15 (for summer and fall semester) or by September 15 (for spring semester) to allow enough time for the admission decision and the acquisition of passports and visas. To be assured of consideration for assistantships and fellowships, completed applications must be received by the appropriate deadlines as listed on https://www.nmt.edu/gradstudies/programs.php Tuition and fees are payable upon registration. Deferred payment plans are available for those holding assistantships.

Graduate Admissions

Admission Types

Regular

Degree seeking applicants that meet admission requirements and have been accepted into a degree program are classified as regular students.

Provisional

Applicants for regular admission may be granted provisional admission if their previous work is deficient in either quality or quantity. Subject to the major department's approval, students admitted provisionally may be advanced to regular graduate student status after one or more semesters of satisfactory academic performance and completion of the designated deficiencies. Credits earned for designated deficiencies may not be used towards a graduate degree. Students admitted or placed on provisional status must advance to regular status before a degree can be conferred. Students admitted or placed on provisional status are not eligible for financial support including assistantships and cannot work on campus.

Non-Degree or Pre-Degree

Those who have Baccalaureate degrees and who wish to earn graduate credits as their qualifications warrant may be admitted as Non-Degree or Pre-Degree Graduate students. If a student identifies either a certificate or a degree program that they would like to pursue eventually they will be considered pre-degree graduate students and will help their advisor guide them through the process of transitioning towards a regular status and how to pursue either a certificate or a degree program. Requests for transfer to regular status must be made using the application for regular admission. No more than 6 credit hours earned as a Non-Degree or Pre-Degree graduate student may be applied toward a graduate program.

Accelerated Master / Dual Registration

Simultaneous registration as a graduate student and undergraduate student may be approved subject the following conditions:

1. Admission to an Accelerated Master's Program:
    1. The student must have a minimum grade-point average of 3.0, and
    2. The student must apply to one of the approved Accelerated Master's programs and be admitted to the graduate program.

Once admitted to the graduate program, the Accelerated Master's student will spend his or her senior year as a dual registered student. After completion of the undergraduate program and earning the bachelor's degree the student transitions to graduate student standing and will be eligible for graduate assistantships.

2. In the last semester before graduation, any student may apply for dual registration in his or her last semester before graduation under the following criteria:
    1. The student has applied for admission and been accepted to the graduate program;
    2. The student is within nine credit hours of the undergraduate degree;
    3. The required undergraduate credits must be completed in the first semester;
    4. The student has a minimum grade-point average of 3.0; and
    5. Where more than one department is involved, the approval of the undergraduate's major department must be obtained.

Dual registration students and Accelerated Master Students are charged undergraduate tuition and are not eligible for assistantships and fellowship appointments but may have work authorizations.

Cost of Attendance

For the 2022-2023 academic year graduate students paying out-of-state tuition at New Mexico Tech may expect to spend $42,000 (including tuition, fees, room and board, and reasonable personal expenses) for one calendar year of study. Visit the web page at NMT Tuition and Fees for up to date information on costs. In-state tuition rates, which reduce the total by about $14,000, are available to non-resident and international students only if they:

- Have been granted assistantships,
- Have been selected for qualified fellowships that cover the entire period of the semester, or
- They request participation in the Western Regional Graduate Program with their acceptance of admission and are documented residents of a state in the Western Interstate Commission for Higher Education: Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada, New Mexico, North Dakota, Oregon, South Dakota, Utah, Washington, Wyoming, the Commonwealth of Northern Mariana Islands, or Guam.

Graduate Cost and Assistance

Financial Assistance for Graduate Students

The majority of regular graduate students at New Mexico Tech receive financial aid in the form of assistantships, fellowships, study grants, or part-time employment. Requests for financial support should be made on the application form or in writing to the department if the student is already registered.

To qualify for these aids, the student must first be admitted as a *regular full-time student*. Continuation of the award is contingent upon the student maintaining the minimum level of registration (at least 12 credits each fall and spring semester and 3 credits during the summer semester; 3000-5000 level courses; courses such as physical recreation, health and wellness, fine arts, and community education never count toward full-time or contract (12 credits) registration.) and satisfactory academic progress as described below.

A student failing to complete the length or terms of his or her contract forfeits the right to obtain a new or replacement contract during the interval covered by the original contract. A student failing to maintain registration requirements while on contract forfeits the right to obtain a contract during the *next registered semester*. A student failing to satisfactory academic progress forfeits the right to all funding support and may or may not be funded subject to determination of the sponsor. Fellowships are grants-in-aid for full-time study and research leading to an advanced degree. Assistantships normally require half-time service in teaching or research. Quarter-time appointments may be made in some cases. Students holding assistantship appointments qualify for resident tuition.

Assistantships and fellowships are awarded to qualified U.S. citizens and international students to support them in their educational objectives. The advisor, the department chair, and the Dean of Graduate Studies must approve any additional employment or remuneration.

Graduate Cost and Assistance

Assistantships

Assistantships

Teaching Assistantships

Teaching assistants are typically appointed for nine months at competitive stipend levels. Additional teaching duties or research opportunities during the summer available. Teaching assistants will have from six to ten contact hours per week plus preparation and grading of assigned recitation, laboratory, or tutorial duties. The maximum teaching load for regular instructional duties is six credit hours. Students with teaching assistantships must attend teaching training the week before the fall semester begins.

Research Assistantships

Many graduate students are supported on grants, contracts, or division research funds under the supervision of a faculty member. Research done under the assistantship may or may not be applicable to thesis or dissertation requirements. Research assistants commonly receive summer appointments as well as nine-month academic year appointments.

Assistantship Eligibility

Regular, full time graduate students are eligible for assistantships. Part-time students, dual- registered, 5-year, provisional students, and Non-Degree and Pre-Degree graduate students are not eligible for assistantships.

Causes for Revocation

A graduate student may lose their appointment if they are placed on warning, if they take a leave of absence, or if they do not adequately perform their required duties. Upon the students return from a leave of absence, they must reapply for the assistantship. A graduate student may also lose their appointment by exceeding the financial time limits for completion of the requirements for their degree (1.5 times the credits required for the student's degree). If the student has been making good progress and has the support of their advisor and department chair, the Graduate Dean may authorize an extension of support.

Graduate Deferred Payment Plan

To lessen the amount of money required for tuition and fees at the beginning of each semester, graduate assistants may elect to take advantage of the Graduate Deferred Payment Plan. This plan allows eligible students to distribute payment of tuition and some fees over the course of the semester.

The Contract

Contracts are processed electronically. Once fully signed the student will get a copy with all the relevant information when they will be paid and when the contract is fully signed. Pay will not commence until after the contract is fully signed and eligibility requirements have been met.

Annual Leave

Graduate students on twelve-month assistantship or fellowship contracts are allowed two weeks of annual leave. Scheduling of the vacation period will be worked out with the advisor. Teaching assistants follow the regular academic calendar, with some variation in programs that hold special summer sessions.

Academic Freedom and Tenure

Graduate student teaching and research assistants are included in New Mexico Tech's academic freedom and tenure policy.

Graduate Cost and Assistance

Employment

Part-time, on-campus employment is sometimes available to regular, full-time graduate students for up to 20 hours per week. Hourly campus employment requires a minimum registration of six credits in the fall and spring semesters, while assistantships require a minimum registration of 12 credits. Students who are not progressing towards their degree over the summer may have campus employment if they are pre-registered full-time for the fall semester.

Graduate Cost and Assistance

Financial Aid for Graduate Students

For the most up to date information please visit the page for Financial Aid or visit their webpage at https://www.nmt.edu/finaid/

Financial Aid for Graduate Students

Graduate students who are U.S. citizens or resident aliens are eligible to apply for Direct Stafford Unsubsidized Student Loans and Direct Graduate PLUS Loans. Regular graduate students must be registered for at least six hours per semester to be eligible for federal aid.

Satisfactory Academic Progress for Financial Aid

Financial Aid offices are required to have a policy regarding Satisfactory Academic Progress. The purpose of this policy is to measure a student's academic progress in both a quantitative and qualitative way. This is done by measuring both credit hours earned and cumulative grade point average. To continue receiving Federal Financial Aid students must meet the minimum requirements set in New Mexico Tech's Satisfactory Academic Progress Policy. Be aware that these standards are not the same as New Mexico Tech's standards for academic probation and suspension.

At New Mexico Tech, satisfactory academic progress is reviewed at the end of each payment period (semester). The Satisfactory Academic Progress Policy applies to graduate students that participate in the Federal Work Study, Federal Direct Loan, or Federal Direct Grad PLUS Loan programs.

To be in good standing for Financial Aid purposes a graduate student must earn at least 67% of the hours they attempt with a cumulative GPA of at least 3.0. If a graduate student falls below this standard, the student will be placed on financial aid warning for the following semester. During this semester, the graduate student will still be eligible to receive aid. To get back in good standing, the graduate student will need to meet the policy requirements by the end of the working semester. If the graduate student does not meet the policy requirements by the end of the warning semester, the graduate student will be placed on financial aid suspension. Once a student is on financial aid suspension, he/she is not eligible for any Federal Financial Aid until the standards of the Satisfactory Academic Progress Policy have been met or an appeal is approved.

Students have the opportunity to appeal the determination that they are not making satisfactory academic progress. To appeal the student will need to complete an Appeal Form. On that form the student will need to explain why he\she failed to meet our Satisfactory Academic Progress standards and what has changed that will allow him\her to meet the standards by the end of the next semester. If an appeal is approved the student's Satisfactory Academic Progress status will change to either Probation (1 semester of eligibility) or Probation with a plan (Continued eligibility as long as conditions of individual plan are met).

There is also a maximum financial aid timeframe that a student has to complete a graduate degree. The maximum is 1.5 times as many credit hours as the minimum required for the specific degree. This includes all hours attempted at that level.

Graduate Cost and Assistance

Fellowships

Fellowships for the support of graduate students are available from the Institute, professional and industrial organizations, and certain federal agencies. Amounts range from those covering tuition and fees to full support including monthly stipends. Fellows must devote full time to studies and research.

Research Opportunities

Outstanding opportunities for a wide range of field investigations in the sciences and engineering disciplines are made possible by New Mexico Tech's location in the Southwest and through partnerships with local and national agencies including:

- The **Energetic Materials Research and Testing Center (EMRTC)** provides opportunities for graduate work in Materials and mineral engineering, mechanical engineering, chemistry, physics, geophysics, computer science, and applied mathematics.
- **Langmuir Laboratory**: at an elevation of 3,240 m (10,630 ft) in the nearby Magdalena Mountains, is a unique facility for the study of thunderstorms and other atmospheric phenomena.
- The **Institute for Complex Additive Systems Analysis (ICASA)** is dedicated to studying the behavior, vulnerabilities, and predictability of complex systems. ICASA's unique, interdisciplinary, strategic approach harnesses information-age relevant research, applies that research to real-world problems, develops key enabling technologies, and trains and educates our nation's next generation of critical systems thinkers.
- The Computer Science and Engineering Department in collaboration with ICASA has been designated as a **National Center of Excellence in Information Assurance Education and Research** by the National Security Agency and the Department of Homeland Security. The associated Scholarship for Service program provides funding for student education and training in cyber security to prepare them for government service in the broad transdisciplinary field of cybersecurity.
- The **New Mexico Bureau of Geology and Mineral Resources** and the **Petroleum Recovery Research Center** on campus make New Mexico Tech especially attractive for graduate study in the Earth, mineral science, and engineering fields.
- The **Playas Training and Research Center** provides a unique setting for research related to urban combat, drug interdiction and border security training programs, complete with state-of-the-art surveillance and monitoring equipment.
- The **Program for Array Seismic Studies of the Continental Lithosphere (PASSCAL)**, a National Science Foundation research consortium, located on campus affords graduate students in the earth sciences research and funding opportunities by exploring the Earth's interior through the collection, distribution, and analysis of seismic data.
- The **Very Large Array (VLA)** radio telescope on the plains to the west of Socorro and the **Magdalena Ridge Observatory** located on the mountain near the Langmuir Laboratory, provide extraordinary opportunities for astronomical research. Headquarters for the VLA and **Very Long Baseline Array (VLBA)** radio telescopes are located on campus in facilities of the National Radio Astronomy Observatory, distinct from New Mexico Tech.

Additionally, faculty and facilities from all divisions of Tech provide advanced courses and research opportunities for graduate students.

Graduate Program Policies & Procedures

HERE YOU WILL FIND INFORMATION REGARDING GRADUATE PROGRAM POLICIES AND PROCEDURES OF THE FOLLOWING.		
• Graduate Student Status • Changing Student Classification • Changing Departments or Majors • Advisor and Advisory Committee • Registration & Enrollment • Readmission	• Time Limits • Leave of Absence • Graduate Co-op Experience • Graduate Degrees for Faculty & Staff • Satisfactory Academic Progress • Thesis, Independent Study, & Dissertation	• Transfer Credits • Tuition & Fees • Appeals • Work Authorizations • Postdoctoral & Visiting Scholars • Research Integrity Policy

Graduate Program Policies & Procedures

Graduate Student Status

Regular

A regular graduate student is a degree-seeking student admitted to a graduate degree program at New Mexico Tech.

Regular Full-Time

A regular full-time student is one enrolled for nine to thirteen credit hours per fall or spring semester (three credit hours in the summer semester). In the fall and spring semesters, graduate students may register for a 13th credit of Community College or Physical Recreation courses at the 1000-2000 levels. Such registrations carry no additional tuition charge. Courses numbered 3000 level or above to be counted for the graduate degree, non-credit Community College classes and 1000/2000- level classes required as deficiency courses do not qualify for the tuition free 13th credit. Graduate students on assistantships must register for 12 qualifying credits in fall and spring and 3 credits in summer (3000-5000 level).

Regular Part-Time

A regular part-time student is one enrolled for eight or fewer credit hours per semester and is *not eligible* for financial support. To be admitted as a part-time graduate student, an applicant must meet the same standards for admission as a regular full-time graduate student. Changes in full-time/part-time status are only granted in extraordinary circumstances for students who are in good standing, with the exception of students who have completed all degree courses and credit requirements, who may request becoming part-time with the approval of their advisor. See the student handbook for details on changing status.

Regular Distance

A regular distance student is one admitted to one of the graduate degree programs that incorporate distance delivery as a major component of its instructional offerings. Distance graduate students are typically place bound or employed full-time. To be admitted as a regular distance graduate student, an applicant must meet the same standards for admission as a regular full-time or part-time graduate student.

Distance students register for as many credits as are necessary, but typically not for more than 13 credits. Each distance student must register for at least one semester in each academic year to be regarded as a continuing student. Failure to do so will require that the student reapply for admission to the graduate program and if readmitted, the student will be required to meet the requirements of the current catalog.

Provisional

Provisional (full-time, part-time, or distance) graduate status may be granted to students whose previous work is deficient in either quality or quantity. Subject to the major department's approval, students admitted provisionally may be advanced to regular graduate student status after one or more semesters of satisfactory academic performance and completion of the designated deficiencies. Credits earned for designated deficiencies cannot be used towards a graduate degree. Students admitted or placed on provisional status must advance to regular status before a degree can be conferred. Provisional students are not eligible for financial support and cannot work on campus.

Non-Degree or Pre-Degree

A non-degree or pre-degree graduate status provides an opportunity for those who have baccalaureate degrees to earn up to nine graduate credits hours per semester. Students in either of these statuses are not degree candidates and are not eligible for assistantships, fellowships, and student employment. The Graduate Dean will either serve as the advisor for non-degree and pre-degree graduate students or designate a faculty member as advisor. Requests for transfer to regular status must be made using the application for regular admission. This status does not guarantee registration in certain courses. The student may need to contact the department offering the courses they intend to take to ensure eligibility.

No more than 6 credit hours earned as a non-degree or pre-degree graduate student may be applied toward a graduate program.

Graduate Program Policies & Procedures

Changing Student Classification

Part-time to Full-time

A student in good standing (cumulative GPA of at least 3.0 and not on warning), may petition the Center for Graduate Studies to be changed from part-time to full-time. The petition must bear the endorsements of the student's advisor and department chair.

Full-time to Part-time

A great deal of importance on getting graduate students through their programs quickly as full- time students so that they can begin their careers. A graduate student's chances of earning their degree are dramatically reduced if they depart Tech before they have completed all requirements and have their completion signed off on.

Changing to part-time status is available after all coursework for the student's degree has been completed if and only if the student's advisor approves this change and the student is not receiving financial support for their degree. To request this change, write a petition requesting the change. The petition must bear the endorsements of the student's advisor and department chair.

If extraordinary circumstances suggest that a student might better complete their degree as a part-time student, the student may request a change in their status. If the student is in good standing (cumulative GPA of at least 3.0 and not on warning), the student may petition the Dean of Graduate Studies to be changed from full-time to part-time. To receive consideration, the petition should explain the student's extraordinary circumstances, why the student finds it necessary to prolong their studies and details the student's plan for completion. The petition must bear the endorsements of the student's advisor and department chair.

Provisional to Regular

After at least one semester of satisfactory academic progress, a student may petition the Dean of Graduate Studies for a change in status to regular graduate student status. Ideally, the student's department will have specified the conditions required for admission to regular status at the time a student was admitted to provisional status. Such specific conditions must be met prior to conversion to regular graduate student status. The petition must be endorsed by the student's department chair.

Regular to Non-Degree or Pre-Degree

If a student has been dropped from their graduate program for academic reasons and they are a US Citizen or Permanent Resident, they may apply to the Center for Graduate Studies for non-degree or pre-degree student status. This is not done automatically. There is a limit of 6 credits taken as a non-degree or pre-degree graduate student that may apply, with committee approval, to any graduate program.

Non-Degree or Pre-Degree to Regular

If a student was not previously in a graduate degree program at Tech, they must apply for regular admission and be accepted by the department where they would like to study.

If a student seeks readmission to a graduate degree program, their requirements for readmission depend on their status before they transition to non-degree or pre-degree status (i.e., whether the student is full-time or part-time). If the student was full-time, they must first complete six credit hours within a single semester in courses approved for the degree program with a grade-point average of 3.0 or better and no grade less than C. If the student were part time, they must complete two or three credit hours within a single semester with a grade-point average of 3.0 or better and no grade less than C. The petition for readmission will then be considered by the department the student wishes to rejoin. The request must be approved and endorsed by the department chair before it will be considered by the Dean of Graduate Studies.

Graduate Program Policies & Procedures

Changing Departments/Majors

If a student is admitted to one program and later decides that they would like to change to another program, they may do so, but there are some requirements. If the student is in good standing in their current program, they may transfer departments with the approval of their advisor, department chair, and the Dean of Graduate Studies as long as the new program has granted them admission. This requires an application to the new program.

Should the student wish to change departments after being dropped from a program, they must wait one semester before the new department may consider their application. During this waiting period, the student may enroll in classes at New Mexico Tech only as a pre-degree student.

Graduate Program Policies & Procedures

Advisor and Advisory Committee

Each regular and provisional graduate student will be assigned a temporary advisor by the department from the student's major field of study at the time of first registration. The student's academic advisor must be a ***regular faculty member*** (tenured, tenure-track, or emeritus) of the department in which the student is pursuing their degree.

The full time student in a research-based program will formalize a thesis, dissertation, or independent-study advisor and an advisory committee by the end of the student's second semester of residency. Part-time and distance education students must formalize their committees by the time they complete 18 credits. The student's academic advisor must be a ***regular faculty member*** (tenured, tenure-track, or emeritus) of the department in which the student is pursuing his or her degree. The academic advisor will typically serve as the student's research advisor, however, in some cases a separate research advisor may be designated. The research advisor is responsible for guiding the student to the completion of their research project and for supervision of the preparation of the research report (thesis, dissertation, or independent study paper). A research advisor need not be a regular departmental faculty member. Regular faculty members from the department or interdisciplinary program may not be in the minority on a committee. The department chair and the Graduate Dean must approve the advisor and members of the advisory committee. Committee forms are available in banweb under the Student and Financial Aid tab after login.

At the Master's level, the advisory committee consists of at least the academic advisor and two other members. At the doctoral level, the advisory committee consists of at least the advisor and three other members; one of these members must be from outside the department and must be assigned or approved by the Dean of Graduate Studies. Some departments require five members on the doctoral advisory committee. The academic advisor serves as chair of the advisory committee. The student should meet with his or her advisory committee at least once a year.

All graduate committees must be approved by the Department Chair and the Dean of Graduate Studies.

Students enrolled in graduate certificate or professional master's programs are only required to have an academic advisor and do not have graduate committees.

Although a graduate student has an academic advisor and an advisory committee, they are responsible for making sure that they meet all of the requirements for graduation. The student's committee committee and academic advisor should review the student's progress towards their degree and inform them if they notice missing requirements; however, the academic advisor and committee members are not at fault if they fail to notice a missing requirement. If the student has any concerns, they need to meet with their academic advisor. The academic advisor is responsible for helping the graduate student satisfy requirements. The student's course program will be checked when they submit it to the Center of Graduate Studies to ensure their approved program meets the degree requirements.

Graduate Program Policies & Procedures

Registration and Enrollment

Course Program

Courses to be used towards each of the graduate degrees at New Mexico Tech must meet the requirements of the degree being pursued and must have prior approval of the student's advisory committee. These courses constitute the student's Course Program. The approved Course Program must be on file in the Center for Graduate Studies no later than the middle of the semester before the semester of graduation for Masters students and by the fifth semester for Doctoral students (prior to candidacy). Part-time and distance education students must formalize their committees by the time they complete 18 credits. The course program is reported on a form, available online and from the Center for Graduate Studies. Graduate course programs must be approved by the Dean of Graduate Studies.

Course Load

Regular and provisional full-time and part-time graduate students are required to continue registration each semester until certified for the degree. Regular distance students must register for a minimum of one semester each academic year (summer, fall, and spring) and their registrations must conform to the plan of study developed with their advisory committee and on file in the Center for Graduate Studies. Students whose registration lapses will be required to meet the requirements of the current catalog if they are readmitted to a graduate program. The minimum course load for a full-time graduate student is nine credit hours (12 credit hours if on support) per fall or spring semester; three credit hours during the summer semester if they are progressing towards the degree. Part-time graduate students normally register for eight or fewer credits per semester, but may register for more as offerings and time permits. Credits taken to satisfy minimum registration requirements must be numbered 3000 or above and must be applicable to the graduate program as determined by the advisory committee. Written permission from the advisor, the department head, and the Dean of Graduate Studies is required for exceptions to the described course load. Regular and provisional graduate students registered for other classes may audit at most one class and associated lab if applicable. Audit credits apply to the semester credit requirements, but do not earn credits toward a degree, and are limited to three credits or four if the audited course has an associated laboratory. All course credits counted toward credit hour requirements in graduate programs must be earned with letter grades (A-F), except for independent study, thesis, and dissertation (e.g., 30 credits for Masters degree). Some programs require seminar courses, which may be graded S/U, but do not count toward program credits hours.

For resident students, part-time status may be granted after a student has completed all required courses and credits while completing the final research requirements leading to their degree, but only with the approval of their advisor. A full-time graduate student in good standing who has two or more years of residence, has completed all coursework, has filed an Intent to Graduate, and who has no assistantship or fellowship support, may request reduced registration for only one semester. The request is accomplished via a reduced registration request form, available in the Center for Graduate Studies and online, which must be approved by the advisor (acknowledging that it is expected that the student will finish in that semester) and the Dean of Graduate Studies. While in this category, the student must enroll for at least three credit hours of thesis, independent study, or dissertation.

After successful defense of the thesis or dissertation, with advisor approval, and the dean of Graduate Studies a full-time student may register for one credit for one semester only to complete corrections to the thesis or dissertation.

Students with an approved reduces registration are allowed a one-time work authorization See the Center for Graduate Studies web page for all graduate deadlines (http://www.nmt.edu/gradstudies).

Grades and Eligible Credits

At the time of graduation, the cumulative GPA must be 3.0 or higher for all 3000-level courses or above. Only 3000-5000 level courses with a grade of "C" or higher may count towards the graduate degree (courses that are numbered using four digits and start with 1 or 2 will not count as they are considered 1000- or 2000-level, respectively). Independent study (5900), thesis (5910), or dissertation (595) courses will be graded with either PR (progress) or U (unsatisfactory). A student will be

placed on probation for earning a "U" in independent study, thesis, or dissertation. A second "U" in independent study, thesis, or dissertation may result in dismissal from graduate school. Only those credits graded PR (progress) accumulate toward the minimum required number of credits for research. Directed research (5000) and courses taken on a S/U basis may not be used to fulfill graduate degree requirements, with the exception of the required research course for research based degrees, specifically independent study (5900), thesis (5910), or dissertation (5950).

Continuous Registration

If a student is admitted to a degree program, they are required to maintain continuous enrollment until they have completed the degree. The student may not elect to take a semester off, even if all they have to complete is writing their thesis. Under certain circumstances, the student may qualify for a Leave of Absence for a semester. If the student fails to maintain continuous enrollment, they must apply for readmission and they must meet all of the requirements of the new catalog if they are readmitted.

Summer Registration Requirements and Employment

New Mexico Tech requires that graduate students register for the summer semester if they are in residence. A graduate student is "in residence" if they are making progress toward their degree or using the facilities (i.e., library, computers, lab, office) or staff (i.e., advisor, committee) of the Institute. If the student will be receiving an assistantship, fellowship, or other support that is disbursed to them through NMT, they must register.

If a graduate student is:

1. Not in residence for the summer (see above), but they are
2. pre-registered as a full-time student for the fall semester, they may qualify for a Work Authorization (on-campus employment up to 40 hours per week) for the summer. The student and their academic advisor must indicate that the on-campus employment is unrelated to degree progress and that the student will not be using the facilities or staff of the Institute to progress toward their degree during the summer semester. The job may be related to the degree program, but not directly related to their degree progress or research project.

Graduate assistants may be registered full-time and carry full-time (40 hour) contracts during the summer session.

Students may also consider summer off-campus employment. If the student decides to take the summer off from their studies and get a job in an area unrelated to their interests, they don't need to register. If the student is working off-campus on a summer job that is related to completion of their degree (i.e., at a research lab at Sandia, Los Alamos, or even a private company), they are required to be registered.

Lower Level Courses

Generally, a graduate student will be granted permission to register for lower level courses if they are pertinent to their graduate program; however, these courses may not be used toward the students graduate requirements. The student is required to return and have approved by the Graduate Dean a completed Lower Level Class Approval form in the Center for Graduate Studies before taking a lower level course.

Graduate students who are registered for 12 credits of approved coursework for a given semester, may register for a 13th credit of classes without completing the Lower Level permission (i.e., graduate students may take a physical recreation, health & wellness, or fine arts class).

Registration Check

Graduate students are responsible for proper registration. Failure to properly register can lead to the cancellation of all forms of financial aid and/or an academic warning/probation.

The Center for Graduate Studies may check the students registration each semester. A registration hold may be put on the student's account if any of their forms are late, missing, or if there are discrepancies in their records. Be sure to inform the Center for Graduate Studies of all changes. Approximately one week after the close of registration, the Center for Graduate Studies may check student registration.

Graduate students may audit one course with up to three or four credit hours per semester (this may be a course with a lab), but because audits are not graded, they cannot be used toward the 30 credit hours required for graduation. Community college and physical recreation and similar courses do not count toward full-time registration and may not be used to complete degree requirements. It is up to the student and their academic advisor to see that they meet requirements and that their progress is updated on the Advisory Committee Form (forms for certificate, MS, Professional Masters, and PhD are located at https://www.nmt.edu/gradstudies). The form must be present at each advisory committee meeting; get it from the Center for Graduate Studies before, and return it after each meeting.

Readmission

A student who is readmitted is subject to all university requirements at the time of readmission and is required to complete her or his degree under the current catalog unless an appeal is granted based on severe extenuating and documented circumstances.

A student who has not been continuously enrolled (excluding summer session) must submit an application for readmission to the Center for Graduate Studies. In addition to the application, a student who left while on academic probation or suspension must submit the following documents:

- A one-page appeal letter that persuasively makes a case for readmission and documents the student's plan for success;
- A supporting letter or email from the student's advisor;
- A supporting letter or email from the student's department chair; and
- Any other relevant documents, such as medical documents or letters of support from faculty or counselors.

A student in good standing will be readmitted by the Center for Graduate Studies. Students who left while on academic probation or suspension will not be readmitted without supporting letters from the academic advisor and the department chair. Application and material submitted by a student who left while on academic probation or suspension will be reviewed by the Dean of Graduate Studies and written notice of the decision will be given to the petitioner. Students who left on probation or submission will be readmitted on probation if readmission is granted. Readmission materials may be submitted via email to graduate@nmt.edu

A student who has abandoned their studies may return to those studies only after successfully seeking readmission to the program. In the readmission process, the student should expect to provide all of the information required of any applicant. The department may or may not readmit the student. If the student is readmitted, they will be required to follow the current NMT Program and Course Catalog requirements, which may include course work and/or research beyond that expected of under their original catalog.

Graduate Program Policies & Procedures

Time Limits

Master Degree

There are limits placed on a graduate student's time here at New Mexico Tech. The master's degree represents at least 30 credit hours (for Master of Science, this includes research) of approved courses beyond the bachelor's degree. A Master's degree is traditionally regarded as a two-year degree, but the student's degree program might take longer. After the student's initial graduate enrollment, they have three years to complete a Master's degree.

PhD Degree

The doctoral program represents the equivalent of at least three years of full-time study and research. This normally requires from 48 to 66 credit hours of courses beyond the bachelor's degree and a minimum of 24 hours of dissertation credit. Typically, earning a doctorate degree takes significantly longer than this minimum. If the student enters the doctoral program with a master's degree, they have up to five years to complete their degree; if they have not yet earned their master's degree, they have eight years.

Funding Limits

Funding offers for graduate students holding fellowship or assistantship appointments are typically two years for a master's level degree or four years for the doctoral degree. Funding is limited to three years for a master's level degree or three years beyond the masters for the doctoral degree. Consideration for extension beyond these limits can be given through petition to the Dean of Graduate Studies.

Extension of Degree Time Limits

Extensions of these time limits can be made in special cases, but only with approval by the student's academic advisor, their department chair, and the Dean of Graduate Studies. Time limits and extensions for part-time students are considered on a case-by-case basis. To be considered for any extension, a student must be making satisfactory research progress and demonstrate a plan for completion including a reasonable timeline. To request an extension, write a memo addressing the student's reason for taking longer, their plan, and their timeline, have the memo endorsed by their academic advisor and department chair, and deliver it to the Dean of Graduate Studies for consideration.

Graduate Program Policies & Procedures

Leave of Absence

All regular graduate students are required to register every fall and spring semester and in summer semesters, when in residence, until certified for their degree. Occasionally, factors make it necessary for a graduate student to interrupt their studies for a short period of time. If they find themselves in one of these situations, they may request a leave of absence if they are in good academic standing and have written approval from their advisor, the department chair, and the Dean of Graduate Studies. There is no established form for a leave request. The leave request may be a memo or letter on paper or in digital form (an email). The request must include an explanation for why the leave is needed, and a time frame (calendar) for their return to complete all remaining degree requirements. This should be routed to the Dean of Graduate Studies via the advisor and department chair with endorsements added by each.

During the student's leave of absence, they do not have access to the staff (their advisor and committee members) or facilities of the institute, and it is assumed that they are not progressing towards their NMT graduate degree. Normally leaves are approved for one semester, but may be approved for up to one year. If the student takes a leave of absence, their assistantship will not necessarily be held for them. The student should consult with their department and supervisor to discuss possible arrangements for support on their return.

If a student does not register as required and no leave of absence is requested prior to non-enrollment or such an approved leave expires, the student will be removed from their graduate program for failure to enroll. After such failure to enroll, the student must apply for readmission to resume the graduate program and if readmitted will have to meet the requirements of the newest catalog for the program.

Graduate Program Policies & Procedures

Graduate Co-Op Experience

Graduate students may choose to gain research experience as part of their graduate program by performing sponsored work away from campus. To be involved in co-op experiences students must:

1. Submit a letter of application to the Dean of Graduate Studies with supporting letters from the student's advisor or graduate committee;
2. be a regular full-time student in the semester of application;
3. enroll in a Directed Research course (5000) in their department during the co-op period, maximum of 12 months;
4. provide a final report and any other requirements placed on the student to their graduate committee on completion of the co-op experience.

The student is responsible for arranging the co-op experience with both their advisor and with the work sponsor.

Graduate Program Policies & Procedures

Graduate Degrees for Faculty and Staff

Instructors in the College Division and staff members of the Bureau of Geology and Mineral Resources, Petroleum Recovery Research Center, Institute for Complex Additive Systems Analysis, and Research and Economic Development Office who are not on tenure may pursue programs leading to Master's or Ph.D. degrees. NMT policy does not permit administrative officers and members of the faculty with the rank of assistant professor or above to take advanced degrees. Employees who wish to pursue a degree program should apply for admission to the department desired by using standard applications available online. Time limits for degree programs apply.

Graduate Program Policies & Procedures

Satisfactory Academic Progress

To demonstrate satisfactory academic progress, each regular graduate student must:

1. Maintain an overall GPA of 3.0 or better.
2. Earn no grade less than "C" for courses using a standard letter grade.
3. Earn a PR or S for research courses (independent study, thesis, dissertation and directed research).
4. Formalize their committee (unless pursuing a Graduate Certificate or in a course-based only program)
    1. Full-time Masters's student must formalize their advisory committee by the end of their third semester.
    2. Full-time PhD students must formalize their advisory committee by the end of their third semester.
    3. Part-time students must formalize their advisory committee before the completion of 18 credits.
5. Formalize their course plan
    1. Full-time Master's students must formalize their Course Plan no later than the middle of the semester before graduation, e.g., mid-term of the Fall semester for graduation in the following Spring semester.
    2. Full-time PhD students must formalize their Course Plan no later than the third semester.
    3. Part-time students must establish their Course Plan before the completion of 18 credits.
6. Satisfactorily complete sufficient credits
    1. Full-time students must satisfactorily complete a minimum of nine credit hours (12 credit hours if on an assistantship) each fall or spring semester; three credit hours must be completed during the summer semester if in residence (as describe under Academic Load, page 57).
    2. Part-time students typically register for eight or fewer credits each semester; distance education students must register according to the course plan on file with the Center of Graduate Studies.
    3. Each semester, all graduate students may audit at most one course (unless they have completed all course requirements for their degree) with the requirement of "SA" for satisfactory progress.
7. Successfully pass the preliminary and/or qualifying exams, candidacy exam, and oral defense based on the requirements of their graduate program.
8. Satisfy the time limit for graduation.

Probation, Contract Termination and Suspension

If a student fails to make satisfactory progress during a semester, they will be placed on academic probation and receive a warning letter from the Office of Graduate Studies. If the student fails to make satisfactory academic progress in a second, consecutive semester, they will be placed on academic suspension and be dropped from their graduate degree program.

If the student's probation or suspension was prompted by not registering for sufficient credits while on a contract, they will not be eligible for a contract in their next full-time semester. See the section on "Changing Student Classification," for more information on alternatives.

Assistantships or fellowships are subject to immediate termination if satisfactory academic progress is not achieved. Any student who is struggling with academic performance is encouraged to discuss the situation with their instructor(s), advisor(s), and the Dean of Graduate Studies. Any student who fails to maintain satisfactory progress for two consecutive semesters will be dropped from regular graduate student status. Such students (citizens and permanent residents) may apply for readmission to the same department after one semester has passed from the term of suspension. During that time the student may apply for pre-degree status.

Warning Letters

Students earning a GPA of less than 3.0 or a grade less than a "B" in any given semester will receive a warning letter that they are at risk of not meeting the requirement of Satisfactory Academic Progress.

Thesis, Independent Study, and Dissertation

The thesis or dissertation is to be written with the intention of publication. The thesis or dissertation must include a preliminary, roman-numbered section containing the title page, acknowledgments, abstract, table of contents, list of figures, and list of tables. The acceptance sheet, signed by the members of the committee, is included at the end of the preliminary section of the thesis or dissertation. Arabic page numbering should begin with page 2 of the body of the thesis. Appendices may be included. The last appendix, entitled Permissions, must contain permissions for any substantial copyrighted material used in the publication (figures, tables, etc.). The bibliography should include only references cited in the text. Templates and detailed instructions for completion of the thesis manuscript are available online at: http://www.nmt.edu/gradstudies/grad-survival-guide.php

Master’s theses and Ph.D. dissertations must be publicly presented and defended. After a successful defense and completion of all changes required by the student’s committee, a thesis or dissertation must be submitted to the Center for Graduate Studies for publication online, in the Joseph R. Skeen Library, and be submitted for publication elsewhere. The thesis or dissertation submitted to the Center for Graduate Studies must be the version approved by the graduate committee. No changes can be made to theses or dissertations after submission to the graduate school for degree completion. As a result, no changes can be made to any thesis or dissertation that has been delivered for public dissemination. Note that students have not officially met all requirements until designated as complete by the Center for Graduate Studies (including iThenticate check and final formatting approval of the submission to ProQuest).

As is the case throughout the United States, New Mexico Tech is increasingly involved in contract research for corporations and governmental entities, and many times portions of these research projects cannot be published because of commercial or national security concerns. While a research assistant may complete conditions of employment by working on such projects, there must be a prior understanding between the student, advisory committee and funding source regarding precisely what will be available for the student’s thesis or dissertation, and what will not be available. Documentation of such understanding is to be signed by all parties (student, supervisor, and funding agency/agent) and filed with the Center for Graduate Studies prior to the beginning of graduate student involvement in the research project. Students who fail to file such documentation, may be required to restart research on a different topic if there is a disagreement with the corporation or agency.

Thesis and Dissertation Completion

Manuscript Preparation

Complete guidelines and templates for manuscript preparation are available online at https://www.nmt.edu/gradstudies/completion_info.php. Students are strongly encouraged to use the provided LaTeX template and may use Overleaf as a free online resource.

Completion

Completed digital and printed theses or dissertations and digital copies of independent study abstracts must be submitted to and approved by the Center for Graduate Studies no later than two weeks prior to the end of the semester in which the requirements for the degree are to be completed. Although students may complete their degree at any time, students must allow two weeks processing time before a letter of completion can be guaranteed. Further, degree conferral takes approximately two months from the date of final submission of all Materials to the Center for Graduate Studies. During the winter holiday, degree conferral typically takes three months. Academic dishonesty in a thesis or dissertation has severe consequences. See the Academic Honesty and Research Integrity Policy in the Graduate Student Handbook for full details.

Digital Thesis and Dissertations

Students writing theses or dissertations must deposit complete digital copies of their manuscripts with the Institute's online digital thesis and dissertation database. Theses and manuscripts or portions thereof that are published must be uploaded and circulated locally, pending receipt of approval from the publisher for global circulation. If the publisher denies permission, only those portions affected will be limited to local circulation. Please visit the Graduate Studies web pages or the Center for Graduate Studies for information on submission of digital manuscripts.

Digital manuscripts must be submitted and approved by the Center for Graduate Studies two weeks prior to the end of the semester in which the requirements for the degree are to be completed. A copyright form must be completed and signed at time of submission of the digital manuscript.

Independent Study

Formats for the preparation of Independent Study papers should conform to the requirements of the advisor, advisory committee and department where the student is enrolled, but may follow the guidelines for theses and dissertations (above). A digital version of the independent study abstract must be submitted to the Center for Graduate Studies no later than two weeks before the end of the semester. If for any reason, an Independent Study report is published through the New Mexico Tech Library, it must also be checked using iThenticate and submitted to the New Mexico Tech online digital thesis and dissertation database.

Graduate Program Policies & Procedures

Transfer Credits

New Mexico Tech credits that have not been used to satisfy a previous degree may be transferred to the graduate transcript with the approval of the academic advisor and the Dean of Graduate Studies. Only courses 3000-level or above with a letter grade of C or higher and research or seminar credits with a satisfactory grade may be transferred. Approved credits will be transferred with their respective grade and will be used in the GPA calculation of the graduate degree. Application of these transfer credits to the graduate degree are subject to the approval of the student's advisory committee.

A maximum of 12 credit hours of course work with grade B or better earned at another accredited institution may be approved by the student's advisory committee and major department for transfer credit into the Master's program. The student's advisory committee considers transfer credit in doctoral programs on an individual basis. To be approved, such credits must not have been used to satisfy the requirements for a previous degree.

For details of the transfer credit policy applicable to the Master of Science for Teachers program, please see the MST program.

Graduate Program Policies & Procedures

Tuition and Fees

Please refer to Tuition & Fees page for information on the costs of tuition, housing, medical insurance, and other fees affecting graduate students. Those on a one-quarter or one-half time contract (TA or RA) issued by New Mexico Tech will be charged tuition at in-state rates provided that their contract starts before the census date and continues throughout the entire semester. This means students that sign contracts written for less than 10 hours per week or that start after close of registration or end before the end of final exams will be charged tuition based on their legal residence (their home state/country).

Graduate Program Policies & Procedures

Appeals

For the most up to date Appeal policy information please visit University Policies and see **NMT Student-Specific Policies.**

- Appeals Requirements for graduate degrees may be appealed to the Dean of Graduate Studies or to the Graduate Council through the appropriate department.

Graduate Program Policies & Procedures

Work Authorizations

Full-time graduate students may obtain hourly employment from various campus entities. Such employment is accommodated under a Student Work Authorization (SWA). During the fall and spring semesters, students holding a SWA must satisfactorily complete at least 9 credits of approved (upper division or graduate) coursework. To work during the summer, students must be taking at least three credit hours in the summer session or be pre-registered for the fall courses. The only exception is made one time, in a student's final semester, with a reduced registration approval from the Center for Graduate Studies., For information on accommodation for reduced registration for full- time students, see the section on Course Loads. When classes are in session, students on SWA may work no more than 20 hours per week on all on-campus employment. As one example, if a student has a ¼-time RA position and a SWA, they may work for only 10 hours on the SWA, since they are obligated for 10 hours to their RA. Working more than this maximum may be cause for dismissal from their job.

During the summer, students may have on-campus jobs unrelated to their degrees and avoid the necessity of registration if the benefits of employment are financial and not directly related to their degree progress or research project. A student who is: 1) not in residence for the summer, but is 2) pre-registered as a full time student for the fall semester, may qualify for a Student Work Authorization (on-campus employment up to 40 hours per week). The student's academic advisor must indicate that, to the best of their knowledge, the on- campus employment is unrelated to degree progress and that the student will not be using the facilities or staff of the Institute during the summer semester.

Taxes

All students receiving assistantships or otherwise employed on-campus, even students from other countries, are required to pay taxes on their employment. Taxes are automatically deducted from their pay. Domestic students and international students who are resident aliens for tax purposes may qualify for an education tax credit. This tax credit is claimed on the student's federal tax return. This IRS tax credit is not guaranteed to continue in the future and is subject to change in the tax regulation.

Graduate Program Policies & Procedures

Postdoctoral & Visiting Scholars

Postdoctoral fellows, research associates, and visiting scholars are accommodated as appropriate in research programs within departments. The faculty host and department negotiate arrangements, with an official appointment made by the NMT administration. International guests may visit classes on an informal basis by arrangement with the instructor. If credit or audit privileges are desired, application must be made through the Center for Graduate Studies.

Graduate Program Policies & Procedures

Research Integrity Policy

To find Policy information, please see University Policies page.

The Policy to Assure the Integrity of Research is found on the NMT Research and Economic Development webpage. This policy establishes the process for dealing with misconduct in research and creative activities associated with external funding. This policy applies to every researcher who is funded on any grant or contract; if the student is funded externally, the student is responsible for knowing and following the policy.

Graduate Degree Requirements

HERE YOU WILL FIND INFORMATION REGARDING GRADUATE DEGREE REQUIREMENTS.

- **Graduate Minors**
- **Graduate Certificates**
- **Master of Science Degree**
- **Professional Masters Degree**
- **Master of Engineering Management**
- **Master of Science for Teachers**
- **Accelerated Master Option**
- **Second Master of Science Degree**
- **Doctor of Philosophy Degree**
- **Completion of Degree Requirements**
- **Final Semester**
- **Ethics & Plagiarism**
- **The Graduate Student Association (GSA)**

Graduate Degree Requirements

Graduate Minors

A graduate minor at the master's level requires at least 12 hours in the minor area with at least 6 of them at the 5000 level. Courses used for a bachelor degree or bachelor minor may not be used for a graduate minor. Specific requirements for a graduate minor must be approved by the Graduate Council and faculty senate.

Graduate Degree Requirements

Graduate Certificates

The following are the general requirements for a graduate certificate. Additional requirements for specific curricula are listed under the appropriate department.

1. A minimum of 12 credits with at least 9 credits, excluding research credits, at the 5000 level.
2. More than half of the credits must be at the 5000-level excluding research credits.

Graduate Degree Requirements

Master of Science Degree

Master of Science Degree

General requirements common to all Masters of Science degree curricula in the sciences and engineering fields are listed below. Additional requirements for specific curricula are listed under the appropriate department.

General Requirements

It is required that a student preparing to complete the M.S. degree:

1. have a minimum of six credit hours of approved out-of-program upper-division or graduate course work,
2. declare a major with at least 12 credit hours of coursework at the 5000-level, exclusive of research credits,
3. complete a research project culminating in a thesis or independent study paper, and
4. have Thesis checked with iThenticate by the academic advisor before they will be accepted.

Note: Students pursuing a Master's degree in a different discipline than their Bachelor's degree may request a waiver for the out-of-program requirement. Waivers must be approved by the student's advisor, committee, department chair, and the Dean of Graduate Studies.

These general requirements do not apply to students in the Master of Science for Teachers (MST) program.

Approvals

1. The appropriate department grants admission to its graduate program.
2. The appropriate department and the Dean of Graduate Studies must approve the composition of each graduate student's advisory committee.
3. The graduate student's advisory committee must approve the student's thesis or independent study research project. The MS degree will not be awarded until the thesis or independent study paper has been approved by the advisory committee.
4. Coursework to be applied toward the degree must meet the associated degree requirements and be approved by the graduate student's advisory committee and the Dean of Graduate Studies.

Research Options

There are two research options, M.S. with Independent Study and M.S. with Thesis. Each option requires a minimum of 30 credit hours. Some departments do not recognize the Independent Study option.

M.S. with Independent Study Requirements:

1. Completion of at least 27 credit hours of approved course work, with at least 15 credit hours of 5000-level courses, exclusive of research credits;
2. Completion of at least three credit hours of independent study;
3. Submission of a formal paper describing the results of the research to the candidate's advisor and advisory committee; and
4. Submission of a digital abstract of the independent study to the Center for Graduate Studies.

M.S. with Thesis Requirements:

1. Completion of at least 24 credit hours of approved course work, with at least 12 credit hours of 5000-level courses, exclusive of research credits;
2. Completion of at least six credit hours of thesis work;
3. Satisfactory oral defense of the thesis research; and
4. Submission of the digital thesis to the Center for Graduate Studies via ProQuest.

Graduate Degree Requirements

Professional Masters Degree

General requirements are common to all Professional Master's degree curricula in the science and engineering fields. Specific requirements are listed under appropriate departments. Professional Master's degrees include Professional Master of Hydrology, Professional Master of Transdisciplinary Cybersecurity, Master of Engineering in Chemical Engineering and Master of Engineering in Mechanical Engineering.

General Requirements

It is required that a student preparing to complete a professional Master's degree:

1. Have a minimum of six credit hours of approved out-of-program upper-division or graduate course work.
2. Declare a major with at least 18 credit hours of coursework at the 500-level.

Approvals

1. The appropriate department grants admission to its graduate program.
2. Coursework to be applied toward the degree must meet the associated degree requirements and be approved by the graduate student's advisor, chair, and the Dean of Graduate Studies.

Graduate Degree Requirements

Master of Engineering Management

New Mexico Tech's Master of Engineering Management graduate program is a Master's degree program designed for students interested in developing their management and leadership skills as practitioners in their respective fields. The MEM is a course-based degree program. The curriculum is designed to be innovative and can be delivered both on campus and via distance education. Specific requirements related to the Master of Engineering Management degree curricula are listed in the program information.

General Requirements

- 30 credit hours of 5000-level Engineering Management courses and approved out-of-program upper-division electives.

Approvals

1. The Management Department grants admission to its graduate program.
2. Coursework must be approved by the graduate student's advisor, chair, and the Dean of Graduate Studies.

Graduate Degree Requirements

Master of Science for Teachers

The graduate program in science for teachers provides graduate-level classroom and laboratory instruction for secondary school teachers of science and mathematics and leads to the Master of Science for Teachers (MST) degree. Courses for science teachers are offered on the campus during the summer session and through distance education during the academic year.

All MST research products (independent study or thesis) must be checked with iThenticate before being accepted.

General Requirements

- 30 credits following the requirements listed in the Master of Science for Teachers section.

Approvals

1. The Master of Science for Teachers program grants admission to its graduate program.
2. If pursuing research option, the Master of Science for Teachers program and the Dean of Graduate Studies must approve the composition of each graduate student's advisory committee.
3. If pursuing research option the graduate student's advisory committee must approve the student's thesis or independent study research project. The MST degree will not be awarded until the thesis or independent study paper has been approved by the advisory committee.
4. Coursework to be applied toward the degree must be approved by the graduate student's advisory committee.

Research Options

There are two research options, MST with Independent Study and MST with Thesis. Each option requires a minimum of 30 credit hours.

M.S. with Independent Study Requirements:

1. Completion of at least 27 credit hours of approved course work, with at least 15 credit hours of 5000-level courses;
2. Completion of at least three credit hours of independent study; and
3. Submission of a formal paper describing the results of the research to the candidate's advisor and advisory committee.
4. Independent study must be checked with iThenticate.
5. Submission of a digital abstract of the independent study to the Center for Graduate Studies.

M.S. with Thesis Requirements:

1. Completion of at least 24 credit hours of approved course work, with at least 12 credit hours of 5000-level courses;
2. Completion of at least six credit hours of thesis work;
3. Satisfactory oral defense of the thesis research; and
4. Thesis must be checked with iThenticate.
5. Submission of digital thesis to the Center for Graduate Studies via ProQuest.

Graduate Degree Requirements

Accelerated Master Option

Well prepared advanced students with a GPA of 3.0 or higher, or with a recommendation from the department chair, may apply for an accelerated Master's degree. The Accelerated Master's option allows accepted students to fulfill the requirements for both Bachelor's and Master's degrees, potentially within 5 years. Students who are enrolled in the Accelerated Masters program may count at most 12 credits of 5000-level courses total towards both their undergraduate and graduate degrees (individual departments may impose lower limits); no undergraduate courses may be counted toward both degrees. In partial fulfillment of the Master's degree, students must have an approved course plan by the student's graduate committee; therefore, qualified students are highly encouraged to apply when they reach junior standing within their major to ensure all requirements are being timely met. If admitted, graduate status will be granted upon fulfillment of the requirements for the Bachelor's degree. Please refer to participating departments' corresponding section for additional requirements and restrictions.

Graduate Degree Requirements

Second Master of Science Degree

Students who wish to earn a second Master's degree at NMT must fulfill the requirements for both degrees. Twelve credits may be applied to both degrees. Independent study, directed study or thesis credits may not be counted twice. Second degrees may not be available from some departments.

Graduate Degree Requirements

Doctor of Philosophy Degree

The degree of Doctor of Philosophy requires a high level of competence in a recognized field of learning, and only those students showing unusual promise are accepted. A dissertation that contributes to the general field of knowledge must be written and defended before a committee of the faculty. No doctoral degree will be awarded without full committee approval of the doctoral dissertation and its defense.

The doctoral student can expect to spend at least five or more years of study and research beyond the bachelor's degree in order to complete the program. In addition to dissertation credits, course requirements for each specialty are listed under the programs and courses of instruction for each department.

Doctoral degree programs are available in chemistry, computer science, the earth science fields, electrical engineering, Materials, mathematics, mechanical engineering, petroleum engineering, and physics. Faculty, courses, research fields, and specific requirements for these programs are given under the appropriate department listing.

Preliminary Examination

Each department may require a preliminary or qualifying examination for the students admitted to its doctoral degree program. Students contemplating doctoral studies at the university should contact the respective department regarding the administration of these examinations.

Candidacy Examination

The purpose of the candidacy examination is to evaluate the student's ability to complete dissertation research. The exam is taken before enrollment in or accumulation of dissertation credits, typically after completion of the majority of graduate course work. The candidacy exam is the responsibility of the individual department; the graduate student should consult their department about candidacy exams. Passing the candidacy exam is one of several steps that must be completed prior to Admission to Candidacy. Graduate committees can and should require additional coursework and/or other remediation for deficiencies discovered during the candidacy exam. Any such remediation is to be added to the student's graduate file in the Center for Graduate Studies.

Admission to Candidacy

A doctoral student may apply for candidacy upon completion of a minimum of one year of graduate study at NMT. A student qualifies for admission to candidacy by:

1. averaging B or better in coursework taken;
2. passing the preliminary or qualifying examination at an approved level;
3. passing the candidacy examination; and
4. showing preliminary work under way on a dissertation subject; typically this is done through the defense of a dissertation proposal.

Once admitted, the student becomes a PhD Candidate. Candidacy must be achieved at least one year prior to the time the degree is conferred.

Dissertation

The doctoral dissertation demonstrates the candidate's capacity for independent research. The student may register for dissertation hours only after successfully advancing to candidacy. A minimum of 24 credit hours of dissertation distributed over one or more years must be devoted to the dissertation after candidacy has been achieved. No dissertation credits taken before approval of candidacy will count toward a doctoral degree. The student is encouraged to explore the various current research projects in his or her field of interest before choosing a dissertation subject. The dissertation must be defended before the NMT faculty under the supervision of the student's advisory committee. An external examiner will be included on the defense committee. The candidate must be registered during the semester in which the completed dissertation is defended and submitted to the Center for Graduate Studies. Students may pay a fee to defend between semesters, but they must have been registered the semester before and they must have permission of their full committee. Between semester defense and all requirements including final formatting and inclusion of required permissions must be completed two weeks before the first day of class for the subsequent semester or the student must enroll and pay for registration. Doctoral candidates are required to present at least one departmental or general seminar on the dissertation during their tenure as a graduate student. Before the degree is approved and granted, at least one paper on the subject matter of the dissertation must be submitted to a recognized journal acceptable to the doctoral committee of the student. Generally, significantly more research publication is expected.

Departmental Certification

The appropriate department must certify to the Center for Graduate Studies that the general requirements are being satisfied and that the candidate is making required progress. The method of evaluation varies with the department. Certification is transmitted to the Center for Graduate Studies on forms provided by the Center for Graduate Studies.

These forms are:

1. The Advisory Committee Form, and
2. The Report of the Advisory Committee, which records the actions of the student's advisory committee.

Graduate Degree Requirements

Completion of Degree Requirements

- During the final semester of residence, the student must have on file a Declaration of Intent to Graduate with the Registrar's Office. Deadlines are July 1 for those completing their degrees in December and December 1 for those completing their degrees in May and August. The Declaration communicates the candidate's intent to fulfill the degree requirements. When completing this form, the student is recommended to verify with their advisor and the Center for Graduate Studies that they will have met all degree requirements prior to completion of their next semester.
- Generally, at least eight weeks prior to the end of the candidate's planned defense, preliminary copies of the candidate's thesis, independent study, or dissertation must be in the hands of the advisor.
- Two weeks prior to the defense, the complete defense draft (with all sections, figures, bibliography, and appendices) must be in the hands of the committee.
- The student must be registered for the semester during which the thesis or dissertation is defended, or the independent study is approved. Students may pay a fee to defend/present between semesters, but they must have been registered the semester before and they must have permission of their full committee. The student must also be registered in the semester that they complete all corrections, including formatting. Between semester defense and all requirements must be completed two weeks before the first day of class for the subsequent semester or the student must enroll and pay for registration. After defense, with the permission of the advisor, the student may register for just one credit as a full time student after their successful defense to complete corrections that do not require significant experiments.
- The chair of each graduate advisory committee will submit a written report to the student with copies to the chair of the department and Dean of Graduate Studies within five days of the defense of a thesis or dissertation. In this report, the chair shall state that the thesis or dissertation is accepted as submitted and defended or explain at a high level what needs to be done in order for the thesis or dissertation to be accepted. The report will be initiated by the members of the advisory committee or they must be cc'ed if the report is submitted via email (email to graduate@nmt.edu).
- Two weeks prior to the end of the semester the completed report of the advisory committee, iThenticate report from academic advisor, and ProQuest submission of the final thesis/dissertation must be submitted to the Center for Graduate Studies or one final copy of an accepted independent study paper must be submitted to the student's advisor and advisory committee. Student degrees are not complete until final materials have been approved by the Center for Graduate Studies and the student receives final acceptance via email from the ProQuest system.

Graduate Degree Requirements

Final Semester

Three Credit Option

If a student is an unsupported full-time graduate student in good standing who has completed two or more years in residence in their graduate program, finished their coursework, and filed an Intent to Graduate, they may register for as few as three credit hours of independent study, thesis or dissertation during their final semester at Tech. This level of registration will provide the student with access to their committee for advising and degree approval, office space, laboratories, library services, computers, and the like. If the student fails to complete their degree during this semester, they will be required to register as a full-time student without reduced registration during all subsequent terms. Graduate students are highly encouraged to make every effort to complete all of the requirements for their degree before they depart campus.

One Credit Option

Students who miss the completion deadline for the end of the semester, but who have successfully defended their independent study, thesis, or dissertation before the first day of the subsequent semester, may be allowed to register for one (1) credit for one (1) semester only one time to complete corrections to the independent study, thesis, or dissertation. For this to apply, the research advisor must submit the defense report to the Center for Graduate Studies before the first day of the semester. If a student does not complete their corrections during that semester, they must return to full-time registration.

Defense Fee Option

If a student met the eight-week deadline (see Completing the Graduate Degree and Thesis and Dissertation sections) for getting a preliminary copy of their thesis, or dissertation to their committee, but cannot schedule a defense before the end of the semester because one or more members of their committee are unavailable, the student may qualify for the "defense fee option." If the student is able to defend their work before the first day of the following semester, they may pay a $50.00 defense fee to defend before the next semester at which point they will need to register for one (1) credit to complete their corrections to their independent study, thesis, or dissertation. (Note: no completions are processed during the first two weeks of classes or immediately prior to the semester; that time is reserved for new admissions, registration, and processing graduate contracts.)

To qualify for the defense fee option, the student's committee must first certify that they have judged the student's thesis to be defensible before the first day of the semester. For this to apply, the student's advisor must send this certification to the Center for Graduate Studies before the end of the semester. If the student fails to satisfactorily complete all of the remaining requirements for their degree before the close of registration, the student will be required to register full-time for the semester and to pay all full-time tuition and fees. Students considering these options should keep in mind that members of their advisory committee are not obliged to provide them with feedback on their research when school is not in session and when the student is not registered. If the student is not registered in a semester, they cannot complete their degree.

Completion Record

A record of all steps completed in a particular student's program is kept in the Center for Graduate Studies. When all the requirements are completed, the record of the program is sent to the Registrar for the student's permanent file. If the graduation and other fees have been paid and a Declaration of Intent has been filed and approved by the Registrar, the candidate's name will be presented to the Faculty Senate for recommendation of conferral of degree to the Regents.

Graduate Degree Requirements

Ethics & Plagiarism

Ethics are a code which guides conduct. A breach of ethics causes harm to someone. Ethics are involved when people cheat on tests, fail to attribute information used in term papers and theses, or falsify research results. Graduate students are expected to act ethically. This includes not cheating, falsifying information, or plagiarizing – actions which may cause their instructor or department to report ethics violations. Other non-ethical acts may also be cause for disciplinary action as outlined within the Student Handbook.

Graduate Degree Requirements

The Graduate Student Association (GSA)

The Graduate Student Association (GSA) is comprised of all enrolled graduate students who have paid the Student Activity Fee. GSA represents graduate students on policy-making committees, including Graduate Council, Faculty Senate, and the Student Association. The association works with the administration to address issues relating to graduate student life at Tech. They award travel grants for graduate students to present research at professional meetings and provide for extracurricular activities for graduate students and their families. The governing body for the GSA consists of officers and representatives from each department.

The Graduate Student Association (GSA)

The Graduate Student Association (GSA) is comprised of all enrolled graduate students who have paid the Student Activity Fee. GSA represents graduate students on policy-making committees, including Graduate Council, Faculty Senate, and the Student Association. The association works with the administration to address issues relating to graduate student life at Tech. - G.M in Applied & Ind. Math
- G.M in Operat Research & Stats
- Graduate Minor in Physics

New Mexico General Education Requirements for Undergraduate Students

The following 31 credits are required to fulfill the New Mexico General Education Curriculum as described on the New Mexico Higher Education Department Website: https://hed.nm.gov/resources-for-schools/public_schools/general-education. Students transferring to New Mexico Tech having completed courses in the New Mexico General Education Curriculum at other New Mexico universities schools will receive credit for completing these General Education requirements. However, students will still be required to complete New Mexico Tech Institute Requirements (next section) if they did not complete these courses as part of fulfilling their general education requirement.

- Area 1– Communications (6 credit hours)
- Area 2 - Mathematics (3 credit hours)
- Area 3 - Basic Laboratory Sciences (4 credit hours)
- Area 4 - Social Sciences (3 credit hours)
- Area 5 - Humanities (3 credit hours)
- Area 6 – Creative and Fine Arts (3 credit hours)
- Area 7 (Flexible 9) - Additional Social Sciences or Humanities (9 credit hours). To include at least 3 credit hours from each of Area 4 and Area 5, and three additional hours from either Area 4, 5, or 6

Transfer students are expected to meet these general requirements in principle but are not required to present the exact duplicate of these courses. Their transcripts will be evaluated by the Office of the Registrar. Students readmitted will meet with and be reviewed by the Office of the Registrar and faculty advisor to determine requirements to complete their General Education requirements.

Students transferring to New Mexico Tech having completed courses in the New Mexico General Education Curriculum at other New Mexico universities schools will receive credit for completing these General Education requirements. However, students completing a Bachelor of Science or Bachelor of Arts will still be required to complete New Mexico Tech Institute requirement or may need to complete other prerequisites courses for their major.

New Mexico Tech views its general education core curriculum requirements as the foundation for a broad and meaningful educational experience for all its undergraduates. The New Mexico Tech general education core curriculum requirements prepare students to communicate and reason well, evaluate and apply information, understand human societies and cultures, deepen their sense of values and ethics, and enrich their personal lives. Additionally, the general education core curriculum requirements equip students with the analytical, language, science, and mathematics skills necessary for the specific degree requirements of their majors. The courses and their sequence in the general education core curriculum requirements are designed specifically to achieve these objectives and to prepare students for success in subsequent courses.

NM General Education Requirements for UG

New Mexico Tech Institute Requirements

In addition to the required New Mexico General Education Curriculum, New Mexico Tech students completing a Bachelor's degree at New Mexico Tech (Bachelor of Science, Bachelor of Arts, and Bachelor of General Studies) will have Institute Requirements to fulfill. Institute Requirements may be either specific classes NMT students must take to receive a degree (e.g., students completing a BS degree must take MATH 1510 and 1520) or additional credits required in certain content areas.

For students originating at New Mexico Tech, these Institute Requirements should be taken to satisfy the New Mexico General Education Curriculum. Students transferring to NMT who satisfied their New Mexico General Education requirement using other classes will receive credit for completing the General Education but will still need to complete the Institute Requirements for their degree.

The following table shows the courses needed to complete the General Education and Institute Requirements for each bachelor's degree. Changes in the educational program are made from time to time by action of the Faculty Senate. Students in continuous residence area can be assured that care will be taken to avoid unnecessary hardship caused by such changes.

	NM GEN ED + NMT INSTITUTE REQUIREMENTS FOR NMT BACHELOR'S DEGREE PROGRAMS	

	Bachelor of Science Degrees	Bachelor of Arts Degrees	Bachelor of General Studies	Associate of General Studies
Area 1: Communications	**9 credits** ENGL1110 g: Composition I (3)* ENGL1120 g: Composition II (3)* ENGL3041 g:Technical Writing/MENG3041 Mech Eng Technical Writing (3)*	**9 credits** ENGL1110 g: Composition I (3)* ENGL1120 g: Composition II (3)* ENGL3041 g:Technical Writing/MENG3041 Mech Eng Technical Writing /TCOM4011 g:Persuasive Com & Grant Wrtng (3)*	**9 credits** ENGL1110 g: Composition I (3)* ENGL1120 g: Composition II (3)* COMM1130 g:Public Speaking or ENGL3041 g:Technical Writing (3)*	**6 credits** ENGL1110 g: Composition I (3)* ENGL1120 g: Composition II (3)*

Area 7: Additional Courses	**3 credits taken from** Areas 4, 5, or 6	**3 credits taken from** Areas 4, 5, or 6	**3 credits taken from** Areas 4, 5, or 6	**3 credits taken from** Areas 4, 5, or 6
Total credits	**53**	**A minimum of 51**	**38**	**31**

* Denotes a class that is an Institute Requirement for one of the degree types.

NOTE: Specific Bachelor of Arts (BA) degree programs may require specific classes to complete certain content areas. Please refer to your degree program description and talk to your advisor about program-specific requirements.

Degree Requirements

Undergraduate Degree Requirements

In order to graduate, every student enrolled in a Bachelor degree program must complete NM Tech's General Education Core Curriculum Requirements. This core set of requirements contains courses in Humanities, Mathematics, and Basic Science or Engineering. In addition, each program has its own set of course requirements as well as the minimum number of credit hours needed to graduate.

Graduate Degree Requirements

Graduate students must also complete a set of general requirements. In addition, each program has its own set of courses you must complete to earn the degree, as well as the minimum number of credit hours needed to graduate. In order to graduate, every student must complete the General Degree Requirements.

Sample Curricula

Most programs provide sample curricula to help you set your schedule. While you will graduate at the end of four years if you follow the sample curriculum faithfully, these curricula are meant to be guides only. Talk with your advisor to chart your individual curriculum and select electives to round out your degree program.

Academic Policies

[Contact: Office of the Registrar, New Mexico Tech, 801 Leroy Place, Socorro, NM 87801; 575.835.5133; fax: 575.835.6511; registrar@nmt.edu],

Grading System

A grade is reported for each course in which a student has enrolled to indicate the quality of performance in that course. The grading system used at NM Tech is as follows:

Grade Point Per Semester Hours	Grade	Definitions
4.00	A	
3.67	A-	
3.33	B+	
3.00	B	
2.67	B-	
2.33	C+	
2.00	C	
1.67	C-	
1.33	D+	
1.00	D	
0	F	
n/a	S	Satisfactory (C– or better)
n/a	U	Unsatisfactory (D+ or worse)
n/a	SA	Satisfactory Audit
n/a	UA	Unsatisfactory Audit
n/a	W	Withdrawal
n/a	WO	Withdrawal without Prejudice
n/a	PR	Progress
n/a	NR	Not Reported
n/a	NG	Not Graded

Grade Point Average (GPA)

The total institutional semester hours in which grades of A, A-, B+, B, B-, C+, C, C-, D+, D, and F have been received are divided into the corresponding total grade points earned to determine the student's cumulative grade-point average (GPA). Likewise, the student's GPA for any time period is found by dividing the credit hours in which grades other than S, U, SA, or UA were received into the total grade points earned during that period. The student's GPA indicates scholastic standing. Results of challenge examinations shall not be included in the student's class load for the semester in which the exam is taken. Transfer credit is not included in the GPA.

Grade Options

Auditing a Class

Students may attend classes as auditors; that is, they may enroll in a course for as a grade option as an auditor, with the permission of the instructor of the course. Auditors pay tuition and fees on the same basis as those who enroll for credit. No student will be allowed to change registration from credit to audit or from audit to credit after the tenth week of a regular semester or the fifth week of the summer session. Students may not change from credit to audit or audit to credit more than once in a class. Auditors receive grades of SA (satisfactory audit) or UA (unsatisfactory audit) as determined by the instructor. The grade of Audit does not affect a students GPA; however, course credit load may be affected. Please see financial aid for additional information.

Graduate Auditing a Class

Graduate students may attend at most one three credit class as an auditor per semester.

Satisfactory/Unsatisfactory (S/U)

Courses may not be taken S/U without consent of the student's academic advisor, the student's major department, and the department in which the course is taken. Approval for the S/U grade basis must be obtained within the first ten weeks of classes. Decisions made at that time for either letter grade or S/U grade evaluation may not be subsequently changed. Students who receive a grade of S will receive credit for the course but that credit will not be applied to any graduate program requirements. The student is not eligible to repeat the course unless the course description specifically says they may. Students who receive a grade of U will not receive credit for the course. Some programs may not allow S/U to be applied towards courses in their programs (i.e. MENG dept requires graded courses) or use S/U for graduations, before changing a grade option to S/U, check with your major department chair for any course grade restrictions to avoid any unwanted graduation issues.

Undergraduate S/U

Students may take up to a total of 18 credit hours on an S/U basis in courses not normally graded S/U, with a limit of 7 credits in any one semester. Some degree programs do not allow courses taken S/U to count for degree requirements.

Graduate S/U

Courses that are normally graded may not be taken on an S/U basis and applied to any graduate program. Graduate students in good standing may take up to a total of 3 credit hours on an S/U basis in courses not normally graded S/U in a given semester. However, such courses cannot be applied to any graduate program requirements.

PR (Progress)

A grade of "PR" for independent study, thesis, or dissertation is given when satisfactory progress on research has occurred during the semester. If research progress has not been satisfactory, a grade of "U" (unsatisfactory) is issued. Students who earn unsatisfactory grades are not making satisfactory academic progress.

Withdrawing from a Course

Withdraw (W)

A student may not **withdraw (W)** from a class after the tenth week of a fall or spring semester, or the fifth week of a summer session. A W can only be assigned after consulting with the instructor and completing and submitting the appropriate form to the Office of the Registrar. Under no circumstances can an instructor assign a W in a course. A withdrawal does not have any negative impact on a student's GPA, the student is also relieved from attending any further classes for the course they have withdrawn from. Students withdrawing from a course or all courses are still financially responsible for the courses they withdrew from, no refunds are given for withdrawals.

Graduate Withdrawing from a Course

(see also withdrawal without Prejudice)

Graduate students must ensure that they successfully complete sufficient credits each semester; check with the Center for Graduate Studies if you have questions before withdrawing from a class.

Repeating a Class

A computable grade is a grade with a numerical equivalent: A, A-, B+, B, B-, C+, C, C-, D+, D, or F. A non-computable grade is a grade with no numerical equivalent: SA, UA, S, or U. **Students may not repeat courses at other institutions**.

Undergraduate Repeating a Class

If you received; Then

A, A-, B+, B, B−,	You may **not** repeat the class for a grade or credit unless the course description specifically states that it is repeatable.
C+, C, or S;	
C-, D+, D, or F;	You may repeat the class for a new letter grade and credit. (You may not repeat on an S/U basis.) The original grade will remain on your permanent record. The new grade will replace the old grade in calculation of your GPA, even if the new grade is lower. If you receive an F, you will receive 0 credit hours for the course, **even if you previously received credit.** ***You may not repeat the class at an institution other than New Mexico Tech.***
SA, UA, or U;	You may repeat the course for a grade and credit. If you repeat a course in which you received a U, you **must** take it for a computable grade.

Graduate Repeating a Class

If you received; Then

A, A-, B+, B, B−,	You may not repeat the class for a grade or credit unless the course description specifically says you may. If a student's overall graduate GPA is below a 3.0, permission to repeat specific courses (with grades of B-, C+ or C) may be requested from the Graduate Dean to meet graduation requirements.
C+, C, or S;	
C-, D+, D, or F;	You *must* repeat the class for a new letter grade and credit. (You may not repeat on an S/U basis.) The original grade will remain on your permanent record. The new grade will replace the old grade in calculation of your GPA, even if the new grade is lower. If you receive an F, you will receive 0 credit hours for the course, **even if you previously received credit.** ***You may not repeat the class at an institution other than New Mexico Tech.***
SA, UA, or U;	You may repeat the course for a grade and credit. If you repeat a course in which you received a U, you **must** take it for a computable grade.

Accessing Final Grades

Final grades are viewable in the secure area of Banweb (https://banweb7.nmt.edu) at the end of every semester. Grades are viewable shortly after the instructor submits them; however, the students' GPA and academic standing are not official until the Friday following the last day of the semester.

Change of Grade

The instructor of a course has the responsibility for any grade reported. Once a grade has been reported to the Office of the Registrar, it may be changed only in the case of clerical error or in the case of documented extenuating circumstances. The instructor who issued the original grade must submit in writing the reasons for the change. The change of grade must also be approved by the department chair. Changes in grade must be made within five weeks after the start of the next semester. After this date grade changes can only be done with the approval from the Vice President of Academic Affairs.

Grade Appeal Procedure

A grade must be appealed no later than the end of the semester following the semester in which the student took the class. All questions can be referred to the Office of the Registrar.

Undergraduate Grade Appeal Procedure

Undergraduate students seeking grade changes must speak first with the instructor, next with the department chair, next the Dean of the department, and finally with the Associate Vice President of Academic Affairs.

Graduate Grade Appeal Procedure

Graduate students seeking grade changes must speak first with the instructor, next with the department chair, and finally with the Dean of Graduate Studies.

Withdrawal without Prejudice (WO)

(See also Withdrawing from a Course, above)

Under extremely unusual circumstances (for example, serious illness or death in the student's immediate family), a student may petition for a withdrawal without prejudice. Students may not withdraw without prejudice from a course they are failing due to plagiarism, cheating, or other disciplinary issues. Charges for tuition and fees are not altered by such a withdrawal.

Undergraduate Withdrawal without Prejudice

A petition for an undergraduate withdrawal without prejudice should be submitted to the Dean of Students for review and consideration. The petition must include the completed Withdrawal Without Prejudice Request Form, a written letter explaining the circumstances, and supporting documents (a statement from a physician, obituary, etc.). The deadline for submission of the petition is the Friday before the start of final exams. In rare cases the Dean of Students may consider requests after the deadline.

Graduate Withdrawal without Prejudice

A petition for a graduate withdrawal without prejudice should be submitted to the Graduate Dean for review and consideration. The petition must include the completed Withdrawal Without Prejudice request form, a written letter explaining the circumstances, and supporting documents (a statement from a physician, obituary, etc.). The deadline for submission of the petition is the Friday before the start of final exams. In rare cases the Graduate Dean may consider requests after the deadline.

Transfer Credits

New Mexico Tech accepts academic credits from regionally accredited institutions of higher education. All credits will be evaluated and transferred on a course-by-course basis. Credit earned at any institution while a student is on academic suspension will be accepted following our standard transfer policy after a student serves the suspension, is readmitted to New Mexico Tech, and returns to good standing. Credit for courses previously attempted at New Mexico Tech will not be accepted.

Undergraduate Transfer Credits

A letter grade of "C" or higher is required for all transfer credit.

Graduate Transfer Credits

For graduate degrees, NMT accepts, at most, 12 academic credits from regionally accredited institutions of higher education. All credits will be evaluated and transferred on a course-by-course basis. Only courses at the 3000 level and above with a grade of "B" or higher are eligible for transfer credit for graduate degrees.

Academic Policies

Academic Probation and Suspension

Note: Disciplinary probation and suspension are different than academic probation and suspension. Please see the Responsible Conduct section of the Guide to Conduct and Citizenship for Students at https://www.nmt.edu/studenthandbook/policies.php for information about disciplinary probation and suspension.

Academic Regulations

The academic regulations have a two-fold purpose:

1. to prevent the dissipation of the resources and time of students who fail to make reasonable progress in their academic programs at New Mexico Tech, and
2. to facilitate the maintenance of high academic standards at New Mexico Tech.

Academic Probation

Undergraduate Academic Probation

A student whose semester GPA falls below the minimum requirements needed for good standing will be placed on academic probation for the next regular semester of enrollment. Students are continued on probation if they withdraw from New Mexico Tech while on probation.

Graduate Academic Probation

A graduate student who fails to achieve satisfactory academic progress will be placed on academic probation for the next regular semester of enrollment. Students are continued on probation if they withdraw from New Mexico Tech while on probation. See the Graduate Program for information.

Academic Suspension

Undergraduate Academic Suspension

Students who fail to achieve the minimum semester GPA for a second consecutive semester will be placed on academic suspension unless their cumulative GPA is 2.0 or better. A student on academic suspension is denied the privilege of enrolling at New Mexico Tech for the specified period of time.

Graduate Academic Suspension

Graduate students who fail to achieve satisfactory academic progress for a second consecutive semester will be placed on academic suspension. A graduate student on academic suspension is denied the privilege of enrolling at New Mexico Tech for the specified period of time.

Notification of Academic Suspension

Notification to the student of academic suspension will be made in writing to the address on file in the Registrar's Office. Academic probation and suspension will appear on the student's official transcript at the end of each grading period.

Duration of Academic Suspension

The first academic suspension from New Mexico Tech will be for one regular (fall or spring) semester. Second and subsequent academic suspensions will be for one calendar year. A student academically suspended after the fall semester is suspended for the following spring and summer semesters. A student academically suspended after the spring semester is suspended for the following summer and fall semesters. A student academically suspended after the summer semester is suspended for the following fall semester. Credit earned at any institution while a student is on academic suspension will be accepted following our standard transfer policy after a student serves the suspension, is readmitted to New Mexico Tech, and returns to good standing. Credit for courses previously attempted at New Mexico Tech will not be accepted.

Academic Policies

Withdrawing from the University

Students leaving New Mexico Tech, including those who are graduating or transferring to another institution, must withdraw from the university.

Before withdrawing from the university, you must

1. check in all NM Tech property (laboratory keys, gymnasium equipment, etc.);
2. settle or make arrangements for all financial obligations to the university;
3. complete a withdrawal form along with the withdrawal survey (the form and survey is available from the office of the Registrar;
4. complete an exit interview with the Financial Aid Office; and
5. notify the Office of the Registrar if you have preregistered for classes offered the next semester. If you withdraw during the semester, you must complete the above steps and:
6. withdraw from all classes.

If you do not complete these steps, your transcript and/or diploma may be withheld.

A student may petition for Withdrawal without Prejudice under extremely unusual circumstances, such as serious illness or a death in the student's immediate family.

Academic Policies

Academic Issues & Appeal Policy and Procedure

Occasionally, students may have reason to disagree with an academic decision or feel that they have a legitimate concern about an instructor or staff member at Tech. Students should be aware that the Associate Vice President of Academic Affairs (for undergraduate students) and the Dean of Graduate Studies (for graduate students) are available to discuss and advise on any troublesome matter of academic concern and frequently help to expedite resolution of such matters.

The following procedure applies equally to grades or any other academic issues:

- The student first should discuss the issue, orally or in writing, with the instructor or staff member.
- If the student is not satisfied, they should then consult with the instructor's department chair or the staff member's supervisor. Every effort should be made to resolve the issues at this level. If the issue or concern is with the department chair, the student should meet with the Associate Vice President of Academic Affairs or the Dean of Graduate Studies.
- If no satisfactory resolution has yet been reached, the student should then present the issue or concern to the Vice President for Academic Affairs or their designated representative.
- Non-academic issues must be brought to the Dean of Students (for undergraduate students) and the Dean of Graduate Studies (for graduate students).
- Sexual harassment issues must be brought to the Title IX Coordinator.

Academic Honesty

New Mexico Tech has an outstanding academic reputation and excels as a teaching and research university specializing in areas of science, engineering, and related fields. This reputation is contingent on an environment of academic honesty and integrity. Indeed, the institute's mission statement recognizes integrity as a core value along with creative excellence, collegiality, service, and leadership. New Mexico Tech must honor integrity as a fundamental value. "Dishonesty, cheating, and plagiarism have no place in a respected institution of higher education. But real integrity goes further than these negatives. Integrity means having the courage to defend the truth, to act fairly and honestly in all our endeavors, and to be responsible citizens of the community" (NMT Institutional Values Statement). Academic dishonesty is therefore unacceptable and will not be tolerated at this Institute.

New Mexico Tech's procedures for handling Academic Honesty violations may be found on the website https://www.nmt.edu/academicaffairs/avpaa/academic_honesty.php It includes important information about cheating and plagiarism, consequences of violating the Academic Honesty Policy, and the judicial process if charges are brought. All New Mexico Tech students are strongly encouraged to be familiar with this document.

Additional Policies

Students who enroll at New Mexico Tech should do so with the realization that they are presumed to be serious in purpose, and they are expected to conduct themselves as good citizens of the college community. An effective guardianship of the health, general safety, and welfare of all students must be maintained.

The final responsibility for the accomplishment of these purposes must rest upon the administration and faculty of the institution, who may, therefore, prescribe certain rules and enforcement procedures for guidance toward these ends. Information concerning such rules and additional procedures can be found on the website.

New Mexico Tech is committed to the full support of the constitutional rights of its students, including due process in student disciplinary matters. Detailed procedures designed to safeguard students' rights and to guarantee fair and impartial treatment of any disciplinary cases are outlined on the website https://www.nmt.edu/studenthandbook/policies.php. Methods developed to provide due process in student disciplinary matters are based on the 1967 joint recommendations of the American Association of University Professors, the National Association of Students, and the National Association of Student Personnel Administrators, conforming to Title IX—Educational Amendments of 1972.

Continued enrollment in New Mexico Tech is dependent upon the maintenance of satisfactory grades and conformity to the rules of NM Tech.

Check the **Guide to Conduct and Citizenship for Students** for General Campus Rules and Policies on:

	Discipline	Privacy Rights
	Drugs and Alcohol	Quiet
	Grievance	Vehicle

Academic Policies

STUDENT RECORD REGULATIONS

"Student Record" means all material concerning an individual student maintained in any form by New Mexico Tech or its employees, or Board of Regents, or contracted Third Party, except personal notes maintained by academic or other school personnel solely for their own individual use and not communicated to any other person. If these personal notes are transmitted to any dean, department, chairperson, academic program director, advisor, or administrator, they become student records to be treated in accordance with these rules and regulations. "Student" means any individual currently or previously enrolled in any academic offering of New Mexico Tech.

Transcripts and other documents in a student's file from other institutions, organizations or individuals submitted to New Mexico Tech for admission, credit transfer, or under control of the Registrar's Office become the property of New Mexico Tech, and cannot be returned to the student or forwarded to other institutions. Under Federal policy, the student has the right to view the documents in their file; New Mexico Tech does not provide copies of these documents.

RETENTION AND SECURITY OF RECORDS

Records managers shall have the overall responsibility for maintaining and preserving the confidentiality and security of student records. The records managers may, however, designate another professional employee of the school to perform the duties of records manager.

- The Director of Human Resources shall be the records manager for records maintained regarding on-campus employment
- The Registrar shall be the records manager for academic records maintained by the central administration of the school
- The Director of Alumni Relations shall be the records manager for the records maintained by the Alumni Office
- The Director of Operations of the Career Management Center shall be the records manager for records maintained by the Career Management Center
- The Controller shall be the records manager for records maintained by the Accounting Office
- The Director of Financial Aid shall be the records manager for the records maintained by the Financial Aid Office
- The Academic Program Chairs shall be records managers for the records maintained by their programs

- The Director of International Students & Scholars Office shall be the records manager for the records maintained by the International Students & Scholars Office.

STUDENT RECORD CONFIDENTIALITY

Notification of Rights Under FERPA

The Family Educational Rights and Privacy Act of 1974 (FERPA) affords eligible students certain rights with respect to their education records. An “eligible student” under FERPA is a student who is 18 years of age or older or who attends a postsecondary institution. These rights include:

1. **The right to inspect and review the student's education records within 45 days of the date that New Mexico Institute of Mining and Technology (New Mexico Tech) receives a request for access**.
    - Current and former students who wish to make a FERPA-related request to view records should submit an online or written request to the Office of the New Mexico Tech Registrar that identifies the record(s) the student wishes to inspect.
    - Applicants do not have FERPA rights unless and until they are admitted and are in attendance at the New Mexico Tech.
    - Students are advised to provide complete information in order to assist the New Mexico Tech in following up on the request. Federal law requires that the New Mexico Tech provide access to requested extant records within 45 days.
    - A Registrar's Office official will make arrangements for access and notify the student of the time and place where the records may be inspected. If the records requested are not under the control of the Registrar's Office, the Registrar's Office will make arrangements for the relevant office to provide the records within the time frame established under the law.
2. **The right to request the amendment of the student's education records that the student believes are inaccurate, misleading, or otherwise in violation of the student's privacy rights under FERPA.**
    - A student may ask the New Mexico Tech to amend the record that he or she believes is inaccurate or misleading. The student should write the New Mexico Tech official responsible for the record (with a copy to the New Mexico Tech Registrar), clearly identify the part of the records he or she wants changed, and specify why it should be changed.
    - If the New Mexico Tech decides not to amend the record as requested by the student, the New Mexico Tech will notify the student in writing of the decision and advise the student of his or her right to a hearing regarding the request for amendment.
    - Additional information regarding the hearing procedures is provided to the student when notified of the right to a hearing.
3. **The right to consent to disclosures of personally identifiable information contained in the student's education records, except to the extent that FERPA authorizes disclosure without consent.**
    1. FERPA contains various exceptions to the general rule that the New Mexico Tech should not disclose education records without seeking the prior written consent of the student. The following circumstances are representative of those in which education records (and information drawn from education records) may be disclosed without the student's prior written consent:
    2. Upon request, the New Mexico Tech may release Directory Information (see the "FERPA Directory Information" section below).
    3. School officials who have a legitimate educational interest in a student's education record may be permitted to review it. A school official has a legitimate educational interest if the official needs to review an education record in order to fulfill his or her responsibility to NMT or to the student.
        - a school official is: a person employed by the New Mexico Tech in an administrative, supervisory, academic or research, or support staff position (including law enforcement unit personnel and health staff);
        - a person or company with whom the New Mexico Tech has contracted (such as an attorney, auditor, or collection agent);
        - a person serving on the Board of Trustees/Board of Regents; or a student or volunteer serving on an official committee (or representing a recognized student group), such as a disciplinary or grievance committee, or assisting another school official in performing his or her tasks.
4. **FERPA permits disclosure of personally identifiable information (PII) from students’ educational records, without consent of the student, if the disclosure meets certain conditions found in FERPA regulations. Some examples are:**
    - New Mexico Tech must provide records in response to lawfully issued subpoenas, or as otherwise compelled by legal process.
    - New Mexico Tech discloses education records without consent to officials of another school, in which a student seeks or intends to enroll, upon request of officials at that other school.
    - The New Mexico Tech may choose to disclose education records (and information drawn from education records) to either supporting parent(s) or guardian(s) where the student is claimed as a dependent under the Internal Revenue Code.
    - The New Mexico Tech may inform persons including either parent(s) or guardian(s) when disclosure of the information is necessary to protect the health or safety of the student or other persons.
    - For students under the age of 21, the New Mexico Tech may notify either parent(s) or guardian(s) of a violation of any law or policy relating to the use of alcohol or controlled substances.
5. **The right to file a complaint with the U.S. Department of Education concerning alleged failures by New Mexico Tech to comply with the requirements of FERPA.**

The name and address of the office that administers FERPA is:

Student Privacy Policy Office

U.S. Department of Education,

400 Maryland Avenue, SW,

Washington, DC 20202-4605.

FERPA Directory Information

- Student's name
- Address (local and campus box number)
- Telephone listing
- Electronic mail address

- Photographs, videos and other similar information
- Major field of study
- Dates of attendance
- Class (freshman, sophomore, junior, senior)
- Degrees, honors, and awards received
- The most recent educational agency or institution attended
- Student ID number, user ID, or other unique personal identifier used to communicate in electronic systems but only if the identifier cannot be used to gain access to education records except when used in conjunction with one or more factors that authenticate the user's identity, such as a PIN, password, or other factor known or possessed only by the authorized user
- A student ID number or other unique personal identifier that is displayed on a student ID badge, but only if the identifyer cannot be used to gain access to education records except when used in conjunction with one or more factors that authenticate the user's identity, such as a PIN, password, or other factor known or possessed only by the authorized user.

The student is entitled to request that this information not be made publicly available by a request, in writing, to the Registrar at least one week prior to the beginning of Fall, Spring, or Summer. Requests received after the beginning of the term will be effective for the next term.

NOTE: It is still permissible for the school to release information to lenders, guarantee agencies, or the Department of Education concerning the enrollment status or address of any student or previous student who has obtained a loan under the Federal Perkins Loan, Federal Stafford Student Loan, Federal Graduated PLUS Loan and/or Private Education/Alternative Loan Programs.

Students Opting for no Release in the Classroom Setting:

Students cannot choose to be anonymous in the classroom setting. If a student has chosen "no release" for their directory information, that does not mean that an instructor cannot call on the student by name in class or that the student's email address cannot be displayed on an electronic classroom support tool such as a discussion board, blog, or chat feature. In addition, courses or sections offered through distance learning require a student photograph as identification similar to a student wearing and ID in an in-person class and is not subject to "no release" in a "classroom setting."

Consent to Use of Photographic Images:

Registration as a student and attendance at or participation in classes and other campus and New Mexico Tech activities constitutes an agreement by the student to the New Mexico Tech's use and distribution (both now and in the future) of the student's image or voice in photographs, video or audio capture, or electronic reproductions of such classes and other campus and New Mexico Tech activities.

If any student in a class where such photographing or recording is to take place does not wish to have his or her image or voice so used, the student should raise the matter in advance with the instructor.

Lecture Capture Videos: FERPA does not prohibit instructors from making a recording of virtual lectures or class sessions available to students controlled in the course. However, sharing the recordings beyond students enrolled in the course would generally require prior written consent.

Social Security Numbers in Student Records

As required by law, social security numbers are collected from prospective and current students who plan to seek employment on campus or wish to receive financial aid. In addition, the university is mandated by federal tax regulations to provide tuition and fee payment information to the student and the Internal Revenue Service, so that applicable educational tax credits may be computed. The social security number will be necessary to submit this tax reporting. The social security number is a confidential record and is maintained as such by the university in accordance with the Family Educational Rights and Privacy Act.

Sharing Information with Parents

Students are encouraged to maintain an ongoing, open dialogue with parents throughout their careers at NMT about academic progress and personal development. Most student difficulties are resolved at NMT without involving parents. tudents may sign a release for Parents to discuss specific information with one of NMT student offices. The consent form can be found on the Registrar's Home page under FERPA. The New Mexico Tech does recognize, however, that there are some exceptional situations where parental involvement may be appropriate to assist a student through a difficult circumstance. Under those circumstances, NMT may (but is not required to) choose to disclose information to parents if permitted by law.

Under the Family Educational Rights and Privacy Act (FERPA), NMT is permitted to disclose information drawn from education records to parents if one or more parent claims the student as a dependent for federal tax purposes. Some laws, especially those relating to medical and mental health care, prohibit the disclosure of information without the student's consent, even where the student is a tax dependent.

PROCEDURE FOR INSPECTION OF RECORDS

Step 1. Students may request, in writing, the opportunity to inspect personal records. The request should be made to the records manager or designee in the department in which the records are on file.

Step 2. Such requests must specify records to be inspected. A request to inspect the pertinent records will be granted within a reasonable period of time, but such time is not to exceed forty-five days after the request has been made. Records will be inspected by the student or other authorized individual in the presence of the records manager or designee. Students may take notes but not remove, photo copy or photograph actual documents.

Step 3. A notation will be placed in the file each time it is inspected by anyone other than authorized school personnel

PROCEDURES FOR CHALLENGE OF RECORDS

Step 1: In the event that a student objects to any decision of a records manager regarding the retention of any student data, in whole or in part, such student shall make the objection known in writing to the records manager of those records.

Step 2: If the objection is not satisfied by discussion with the records manager, the student shall have the right to appeal to the Vice President of Academic Affairs. The student may challenge the retention of any data in the student record on the basis that it is inaccurate, misleading, or otherwise a violation of the privacy or other rights of the student. Request for appeal shall be in writing and must identify the specific portion(s) of the record to be challenged and state the reason for the challenge. Grades may be challenged under this procedure only on the basis of the accuracy of their transcription.

Step 3: The Vice President of Academic Affairs (VPAA), or designee, shall create a review panel composed of the one Dean and two faculty members. Additional staff members may be involved, but will not be voting members of the committee. The review panel shall decide, upon appeal of the student, whether the challenged student data should be destroyed or amended.

Step 4: The review panel shall, within four weeks after being notified of such appeal, or longer should the appellant request delay, conduct a fair hearing to decide the issues presented by the appellant.

The records manager shall have the burden of proof with regard to the issues presented by the appellant

The appellant and the records manager shall have the right to be represented by an advocate of his or her choosing, cross-examine witnesses, present evidence, make a tape recording of the proceedings, and request a written decision supported by reasons

Potential Outcomes

- If the student appeals according to the provisions set forth above and obtains a favorable ruling, the contested data shall be expunged from the student's record or corrected.
- If the student receives an unfavorable ruling upon appeal, then the objection must be noted in the student's record and the student be given the opportunity to insert a written rebuttal into the record.

The Department of Education has designated the following office to investigate, process and review violations and complaints. Any student who feels, after a hearing, that the school has not acted in accordance with the law may contact this office:

Student Privacy Policy Office

U.S. Department of Education

400 Maryland Avenue, SW

Washington, D.C. 20202-4605

PROCEDURE FOR INSPECTION OF FINANCIAL AID RECORDS

- The general procedure for inspection of records also applies to financial aid records and follows the same procedure for inspection
- The records and conversations between any aid applicant, his/her family, and the staff of the Financial Aid Office are confidential
- As a rule, all currently enrolled and former students have the right to review their financial aid records to determine their content and accuracy with the exception of those records including parental information and confidential references or recommendations for scholarships received from prior institutions attended, other individuals or from faculty and staff of New Mexico Tech
- A student who wishes to obtain access to his/her financial aid records is able to do so in the presence of a Financial Aid Office full-time employee.
- Information may be disclosed to other institutional employees, if deemed appropriate, and representatives of Federal and state agencies, auditors and accrediting organizations

Students, faculty, and others with questions regarding student records should contact the Office of the New Mexico Tech Registrar.

Other Policies

Cross-Enrollment

The purpose of Cross Enrollment Agreement(s) are to allow qualified and approved students to concurrently enroll in a limited number of undergraduate or graduate courses/credit hours at another College/University within the State of New Mexico while reducing admissions processes and fees should a student apply to both institutions separately. While the primary concept was to allow graduate students to enroll in courses at another institution to enhance their learning experience and leverage access to expertise, some agreements have been made that select specific undergraduate courses. To inquire about Graduate Cross enrollments please speak with the Dean of Graduate Studies. To inquire about undergraduate cross-enrollment, please speak with the Office of the Registrar.

Academic Load

The academic year at NM Tech consists of two semesters. A class hour is 50 minutes in length; ordinarily, a laboratory period is about three times as long. One class hour or laboratory period a week through a semester gives one credit hour.

The Veterans Administration requires students on the GI Bill to carry a minimum of 12 credit hours (6 credit hours in summer) to qualify for full benefits. Physical Recreation (PHED), Studio Arts (ARTS), and Community Education (designated by the letter "C" in the course number) courses do not count toward the minimum credit hours for veterans. Complete information can be obtained from the Veteran's Administrator.

Undergraduate Academic Load

A full-time undergraduate should carry an academic load of approximately 16 credit hours per semester for the fall and spring semesters. During the summer session, 6 credit hours is a full-time academic load; 3 credit hours is half- time.

Graduate Academic Load

Full-time graduate students must carry a load of at least 9 credits each fall and spring semester. Graduate students on assistantships must carry at least 12 credits in the fall and spring. Graduate students who are in residence during the summer must register for 6 credits. Physical Recreation (PHED), Studio Arts (ARTS), Lifestyle Activities (LIFE), and Community Education (CED) courses (designated by the letter "C" in the course number) do not count toward the minimum credit hours for graduate students. Graduate loads normally only count courses numbered 300 and above.

Part-time graduate students must register each fall and spring semester for 1-8 credits. If in residence during the summer, part-time graduate students must register for 1-6 credits.

Directed Study Course

Undergraduate Directed Study Course

To be included as part of student declaration of courses fulfilling degree requirement, directed study courses (courses numbered 491 and 581) require the approval of the department chair in the major department, the chair of the department offering thecourse, and the student's advisor. Approval must be obtained before the student takes the course.

Graduate Directed Study Courses

Directed study courses (courses numbered 491 and 581) are not typically accepted to meet graduate requirements. To be included as part of a student's declaration of courses fulfilling degree requirements, directed study courses require the approval of the student's graduate committee, the department chair in the major department, and the Graduate Dean unless the use of directed study is explicitly listed as applicable in the graduate student's degree program requirements. Approval must be obtained before the student takes the course and recorded in the student's graduate file in the Center for Graduate Studies.

Attendance

A student is responsible for all material covered in class; however, it is the decision of the individual instructor whether attendance is mandatory or optional. It is the student's responsibility to ascertain this.

Undergraduate Attendance

Illness or other circumstances that necessitate extended absence from class work should be reported as promptly as possible to the Dean of Students or designated representative who will notify the student's instructors on valid and confirmed situations. Students called to Military Active Duty must notify the Dean of Students or designated representative and provide appropriate documentation.

Graduate Attendance

Illness or other circumstances that necessitate extended absence from class work should be reported as promptly as possible to the Graduate Dean or designated representative who will notify the student's instructors. Students on Military Active Duty must notify the Graduate Dean or designated representative and provide appropriate documentation.

Student Use of New Mexico Tech Facilities

Many Tech facilities are available for student use. In order to be eligible, a club or organization must be officially recognized by the Dean of Students, or designated representative and by the Student Association. Facilities may only be used for legal and otherwise legitimate purposes, and that use must not in any way hinder the academic mission of NM Tech. Further details regarding use of classrooms and other facilities may be found in the New Mexico Tech Student Handbook.

Credit Hour

The institutionally established equivalencies to the Federal definition of the credit hour at New Mexico Tech are below. These standards apply to all undergraduate and graduate degree programs and courses bearing academic credit.

1. For each semester hour of credit, classes that meet in a person-to-person format are nominally one 50-minute period with the instructor and two hours of outside of class work per week for the length of the semester. Similarly, one hour of credit may be awarded for a laboratory period that meets for 150 minutes per week for the length of the semester. Other variations, including a combination of the above examples, are possible.
2. Classes that do not have the required person-to-person contact time (for example, hybrid or online courses) meet the credit hour standard if they meet one of the following criteria: (a) the course covers the same material in the same depth as a person-to-person version of the same course or (b) the course has been evaluated by the department for content, level and depth of coverage, and the department has approved the course credit to be awarded; this approval must be documented by the department.
3. This credit-hour policy will also be used to guide the offering of independent/directed study, internships, coops, teaching practicum courses, clinical placements, field courses, studio and lab courses, research study, thesis/dissertation work, and other kinds of for-credit experiential learning, recognizing these experiences may be more difficult to quantify than a traditional in-person course with a structured meeting schedule.
4. Any course offered during an abbreviated term must be equivalent in both contact and outside work total hours as a semester length course. If outside work is not assigned, lost hours must be made up through additional contact time.
5. Departments continue to be responsible for the consistent application of the credit hour, credit-hour policy, and for ensuring that a stated credit-hour standard is maintained as courses and instructors and mode of instruction or course formats change.
6. All courses are required to have stated student learning outcomes. Learning outcomes serve as a basis to determine if the amount of learning is consistent across different formats, instructors, and modes of instruction.
7. During each program review, all courses offered by the program will be reviewed by its program faculty for compliance with NMT's and the U.S. Department of Education's credit hour definition. The results will be shared with the Registrar and the Office of Academic Affairs to ensure ongoing compliance of assignment of credit hours to courses.

Student Identity Verification Policy

This policy aims to ensure that New Mexico Institute of Mining and Technology operates in compliance with the United States Federal Higher Education Opportunity Act (HEOA) provisions concerning the verification of student identity in distance education as well as any requirements set forth by accrediting bodies (e.g., Higher Learning Commission).

All credit-bearing courses and programs offered through distance education methods must verify that the student who registers for a distance education course or program is the same student who participates in and completes the course or program and receives academic credit. According to the HEOA, one or more of the following methods must be used:

- An individual secure login and password (e.g., Canvas),
- Proctored examinations, and/or
- Other technologies or practices that are effective in verifying student identification.

Any student work, assignments, or activities that are graded or contribute to a student's grade must be submitted via a system that verifies the student's identity as noted above.

The institution complies fully with the provisions of the Family Education Rights and Privacy Act (FERPA). All methods of verifying student identity in distance education must protect the privacy of student information. Additional information on FERPA and student record access can be found on the Institution's website.

If any fees associated with the verification of student identity will be charged to students, they will be indicated in the academic catalog, as part of the term's course offerings, or on the "Cost of Attendance" website.

All users are responsible for maintaining the security of usernames, passwords, and other access credentials as required. An account is given to an individual for the exclusive use by that individual. Attempting to discover another user's password or attempts to gain unauthorized access to another person's files is prohibited. Users are not permitted to give someone their password or allow others to use their account. Users are responsible for all activity on their accounts.

Failure to comply with this policy will be addressed using the appropriate personnel and conduct policies and procedures of the institution (e.g., Student Code of Conduct, Academic Honesty Policy, or Employee Handbook). Failure to comply may also be a violation of civil/criminal law and may cause the violator to be subject to applicable penalties.

Waivers

Waivers do not constitute a reduction in the minimum hours required in a New Mexico Tech degree or certificate program. Waived courses must be replaced with an equal number of elective credits or an approved core course from another approved New Mexico Tech program that does not duplicate a course already completed.

The New Mexico Tech waiver policy applies to all credit-bearing programs (degrees, certificates, etc.). A waiver is official recognition that a graduation requirement has been satisfied through previous course work (waiver by documentation) or testing (ACT/SAT/AP/IB/Challenge exams). All documentation for a waiver must be submitted and approved the week before classes begin.

College Level Examination Program

The College Level Examination Program (CLEP) is a national program of credit by examination that offers the opportunity for college level achievement wherever or however the student learned. NMT does not accept CLEP exams and No credit is given for CLEP exams. However, challenge exams may be available in select courses at the discretion of the department for lower-level courses. Contact the Office of the Registrar for more information: registrar@nmt.edu.

Course Waivers

Placement

ACT/SAT English Waiver and Placement

Students who score 27 or higher on the ACT English test or 610 or higher on the SAT Critical Reading or 650 or higher on the Redesigned SAT Writing/Critical Reading test will have English 1110 waived as a requirement. Adult learners age 23 or older are not required to, but may submit an SAT/ACT score, and will be placed into entry level courses unless the student can provide adequate evidence that they can succeed in higher level courses, such as placement exams, transfer coursework, or challenge exams.

ACT/SAT Math Placement

Mathematics is the backbone of all coursework at New Mexico Tech, and the selection of your initial math course is critical to your success at Tech. Placement is determined by your ACT/SAT math score or the optional math placement test, described below.

ACT MATH SCORE	SAT REDESIGN MATH SCORE	INITIAL MATH COURSE	TEST OUT EXAM & SCORE
24 or lower	580 or below	MATH 1220	MPAA 20
25 to 29	590 to 690	MATH 1240	MPCR 20
25 to 29	590 to 690	MATH 1230	MPTR 24
30 or above	700 or above	MATH 1510	

You may also enroll in MATH 1510 (Calculus I) if:

1. You are transferring college credit in precalculus and trigonometry.
2. You have earned a 3 on the Advanced Placement (AP) Calculus AB exam . Earning a 3 on the AP exam will fulfill prerequisites and place the student into Math 1510 (calculus)

Placement based on AP Math Score

Students with a 3, 4 or 5 on Calculus AB exam: Students scoring a 3 will receive credit for Math 1240, Pre-Calculus. Students will have pre-reqs fulfilled, placement into MATH 1510, Calculus I. Students scoring a 4 or 5 will receive credit for MATH 1510, Calculus I , and place into MATH 1520 (Calculus II).

Students with a 3, 4, or 5 on the Calculus BC exam: Students scoring a 3 will receive credit for Math 1510, Calculus I and place into MATH 1520 Calculus II. Students scoring a 4 or 5 will receive credit for MATH 1510, Calculus I, and MATH 1520, Calculus II.

Optional math placement test(s), covering college algebra (MPAA), pre-calculus (MPCR), and trigonometry (MPTR), are available to students who score below 30 on the ACT math test or received below 670 on the SAT mathematics test or below 700 on the SAT redesigned mathematics test. **Waivers into 1000 level math classes are not granted. You must take the math placement exam if you want to enroll in any math class other than those listed above for your ACT or SAT math score.** Please contact mathplacement@nmt.edu for information about the math placement test. A score of 80% or higher is required to pass each placement test.

Course Waivers

Transfer Credit

Undergraduate Transfer Credits

New Mexico Tech accepts academic credits from regionally accredited institutions of higher education. All credits will be evaluated and transferred on a course-by-course basis.

- Courses to be considered for transfer credit must have been taken for a letter grade.
- Courses must be passed with a grade of "C" or higher to be considered for transfer credit at the undergraduate level.
- Grades earned at other universities are not transferred to New Mexico Tech.
- Credit earned at any institution while a student is on academic or disciplinary suspension will not be accepted at New Mexico Tech.

A list of courses offered at other New Mexico colleges and universities and their Tech equivalents is online at https://ccns.nmhed.us/.

Coursework completed at universities/colleges outside of the United States, will require transcripts to be submitted through WES: https://www.wes.org/ for a Comprehensive Course by Course Report.

Graduate Transfer Credits

For graduate degrees, NMT accepts at most 12 academic credits from regionally accredited institutions of higher education. All credits will be evaluated and transferred on a course-by-course basis. Only courses at the 3000 level and above with a grade of "B" or higher are eligible for transfer credit for graduate degrees.

Terminal Transfer Credits

Terminal transfer credits, credits earned at another college or university in order to complete the last degree requirements at NMT, are not allowed except when specified by a particular degree program, or when unusual circumstances appear to justify it. In no case will more than 12 credit hours of terminal transfer credits be allowed. A student who anticipates the need for requesting terminal transfer credit should do so as soon as practical and in no event later than the time of filing the Intent to Graduate for a degree. The request should be addressed to the Vice President for Academic Affairs. It should contain a statement of the circumstances which, in the student's judgment, justify the request and a specific statement of the program proposed for obtaining the terminal credits. Approval, if granted, will be of a specific program.

Transfer Credits among New Mexico Higher Education Institutions

During the 2005 New Mexico legislative session (Senate Bill 161), and continuing with the passing of SB 103 in 2017 legislative session, courses successfully completed with a grade of C or higher at any regionally accredited public institution of higher education in New Mexico and recognized through a state approval process as general education at that institution are guaranteed to transfer to any other New Mexico two- or four-year public institution as general education coursework. Effective in fall 2019, New Mexico requires a minimum of 30-31 hours of general education coursework for students to be designated as "General Education Complete" at any NM institution for all Associates or Bachelor's degrees, taken from the approved General Education areas listed on the New Mexico Higher Education Department (HED) website (https://hed.state.nm.us/). Students who have decided on a major and/or an institution at which to complete their studies should consult with an academic advisor at that particular institution to determine the most appropriate course selections. Students enrolling for the first-year of study at a New Mexico college or university and considering possible transfer into a certificate and/or degree program at another institution are encouraged to take the courses approved for transfer during their first and sophomore year of study. Students transferring to NMT should also be aware that while they may have completed their New Mexico General Education requirements at the originating school, they may still be required to complete Institute Requirements for New Mexico Tech degree programs.

Student Responsibility

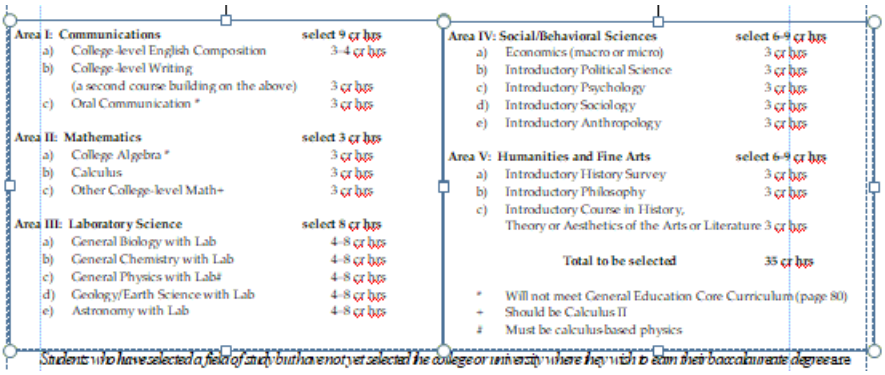
New Mexico's colleges and universities have collaborated to produce guides to assist students who plan to transfer before completing a program of study. Course modules are designed to help students select courses carefully so that they may transfer with little or no loss of credit. However, planning for effective transfer with maximum efficiency is ultimately the student's responsibility. Responsible transfer planning includes early and regular consultation with the intended degree-granting institution to assure that all pre-transfer coursework will meet the requirements of the desired degree.

Transferable Lower-Division General Education Common Core

Students enrolling for first-year study who have not yet selected either an academic focus or the institution where they wish to graduate are advised to take courses during their first year outlined in the Lower Division General Education Common Core. For students enrolled at any public institution in New Mexico, the following courses are guaranteed to transfer to any other New Mexico public college or university, and apply toward Associate and Baccalaureate degree program requirements if the student passes the classes with a grade of C or higher. Students should consult advisors at their current institutions regarding which specific courses fit these categories. Students preparing for careers in Engineering, Health Sciences, or other profession-related fields are advised that some of this coursework may not transfer toward general education requirements but in most cases will apply toward elective requirements.

The core matrix of approved courses guaranteed to transfer and meet general education requirements at any New Mexico college or university can be found on the New Mexico Higher Education Department website. Follow the "Colleges and Universities" link to the drop down menu and select "Transferring Credits," then select "Core Matrix." Courses are listed by institution, whether university or community college, under each of the five general education areas. Students may also be able to access this list by going directly to https://hed.nm.gov/resources-for-schools/public_schools/general-education

Lower-Division 64-hour Transfer Modules



Area I: Communications		**select 9 cr hrs**
a)	College-level English Composition	3-4 cr hrs
b)	College-level Writing (a second course building on the above)	3 cr hrs
c)	Oral Communication *	3 cr hrs
Area II: Mathematics		**select 3 cr hrs**
a)	College Algebra *	3 cr hrs
b)	Calculus	3 cr hrs
c)	Other College-level Math+	3 cr hrs
Area III: Laboratory Science		**select 8 cr hrs**
a)	General Biology with Lab	4-8 cr hrs
b)	General Chemistry with Lab	4-8 cr hrs
c)	General Physics with Lab#	4-8 cr hrs
d)	Geology/Earth Science with Lab	4-8 cr hrs
e)	Astronomy with Lab	4-8 cr hrs

Area IV: Social/Behavioral Sciences		**select 6-9 cr hrs**
a)	Economics (macro or micro)	3 cr hrs
b)	Introductory Political Science	3 cr hrs
c)	Introductory Psychology	3 cr hrs
d)	Introductory Sociology	3 cr hrs
e)	Introductory Anthropology	3 cr hrs
Area V: Humanities and Fine Arts		**select 6-9 cr hrs**
a)	Introductory History Survey	3 cr hrs
b)	Introductory Philosophy	3 cr hrs
c)	Introductory Course in History, Theory or Aesthetics of the Arts or Literature	3 cr hrs
	Total to be selected	**35 cr hrs**

* Will not meet General Education Core Curriculum (page 80)
\+ Should be Calculus II
\# Must be calculus-based physics

Students who have selected a field of study but have not yet selected the college or university where they wish to earn their baccalaureate degree are

Students who have selected a field of study but have not yet selected the college or university where they wish to earn their baccalaureate degree are advised to take courses during their first and sophomore years outlined in the General Education modules. For students enrolled at any public institution in New Mexico, these courses are guaranteed to transfer to any New Mexico university and apply toward Bachelor's degree program requirements. Students should consult advisors at their current institutions regarding which specific classes fit these categories. Lower-division transfer modules currently exist for:

- Biological Sciences
- Business
- Early Childhood Education
- Engineering
- Physical Sciences
- Social and Behavioral Studies

New Mexico Common Course Numbering System (NMCCNS)

A common course numbering system has been devised by New Mexico colleges and universities in compliance with the New Mexico Post-Secondary Education Articulation Act. The purpose of the system is to assist New Mexico students who are transferring between institutions within the state. The system provides a neutral state wide course identifier for those courses that are similar in nature and considered to be equal in transfer. To view the common courses between the University's in New Mexico please visit New Mexico Higher Education's common course crosswalk at https://ccns.nmhed.us/.

Inter-institutional Transfer Guides and Catalogs

Students who have selected a field of study and/or the institution where they wish to graduate are advised to consult the transfer guide or catalog for that institution for current and detailed advice to guide their course selection.

Complaint Procedure for Transfer Students

All New Mexico public post-secondary institutions are required to establish policies and practices for receiving and resolving complaints from students or from other complainants regarding the transfer of course work from other public institutions in the state. Complaints can be filed with:

New Mexico Higher Education Department

2044 Galisteo Street,

Santa Fe, NM 87505- 2100

505.476.6500

http://hed.state.nm.us/

Course Waivers

Challenge Examinations

Challenge exams are available to students who are able to demonstrate proficiency in the course learning outcomes. Students may request an opportunity to receive credit for a course by passing a comprehensive test of the course material (challenge examination). Each department determines what courses are eligible for a challenge exam. This information is updated annually and provided to the registrar's office. There is a challenge examination fee charged.

The following regulations will apply to all challenge examinations:

- The individual is a NMT student in good standing.
- Students who have attempted and received a grade in a class including "W" and "Audit" offered at NMT, have transferred in credit for a course, or have unsuccessfully challenged a course, may not take a challenge exam in that course.
- The form of the examination (written, oral, practical, combination, etc.) will be determined and scheduled by the department chairperson or program director.
- Information as to the nature of the challenge examination will be made available to a student upon request. The responsibility for preparatory study for these examinations rests entirely with the student; faculty members are under no obligation to assist with such preparation.
- Credit hours earned in this way are exactly equivalent to those credits transferred into the institution.
- Exams must be taken, graded, and processed before the last day to add a course for the Fall and Spring terms.
- Results of challenge examinations shall not be included in the student's class load.

Course Waivers

Advanced Placement

Advanced Placement

Students who have completed college-level courses in secondary schools and have taken the Advanced Placement Examinations of the College Examination Board with resulting composite scores of 3, 4, or 5 may receive college level credit. The amount of credit and the equivalent university courses for which credit will be granted is listed in the table below. Such credit will be treated as transfer credit without a grade, will count toward graduation, and may be used in fulfilling specific curriculum requirements.

ADVANCED PLACEMENT PROGRAM New Mexico Tech participates in the Advanced Placement Program of the College Entrance Examination Board. Credit and/or advanced placement are granted according to the departmental policies listed below. Advanced Placement credit is not awarded for **scores** of 1 or 2.

Course Waivers

Military Training

Military Training

NMT is dedicated to ensuring the success of our active duty and veteran students. If you attended a military service school, received training, or served in an occupation specialty you may be able to earn credit towards your program at NMT.

In order to request credit or an evaluation of your military experiences, you must:

- Be accepted as a student at NMT
- Have a declared program of study to which the credit awarded will apply
- Request your official Joint Service Transcript (JST) and have it submitted directly to the NMT Articulation and Transfer Office if you are or were a member of the Army, Coast Guard, Navy, Marine Corps, or Reserve.

Call to Active Duty Service

Call to Service is appreciated and respected at NMT. If you are called to Active Duty during your enrollment at NMT please contact the Veterans Education Benefits Office and the Registrar's office located in Fidel Center, Suite 289.

Veterans Education Benefits

NMT is dedicated to the success of our Armed Service Members and Dependents using Veterans Education Benefits.

Steps to receive and utilize these benefits are as follows:

- Apply for VA Education Benefits through https://www.va.gov/education/how-to-apply/
- Apply to and be accepted to NMT
- Register for Classes
- Supply a copy of your Certificate of Eligibility to the Veterans Education Benefits, School Certifying Official upon receipt.
- Comply with School Certifying Officials requests. I.E Semester by semester request to continue to utilize benefits, any changes in credit hours, withdrawal from classes, etc.

Email and Telephone contacts can be found at https://www.nmt.edu/veterans/

Attendance

A student is responsible for all material covered in class; however, it is the decision of the individual instructor whether attendance is mandatory or optional. It is the student's responsibility to ascertain this.

Undergraduate Attendance

Illness or other circumstances that necessitate extended absence from class work should be reported as promptly as possible to the Dean of Students or designated representative who will notify the student's instructors on valid and confirmed situations. Students called to Military Active Duty must notify the Dean of Students and Registrar's Office and provide appropriate documentation.

Graduate Attendance

Illness or other circumstances that necessitate extended absence from class work should be reported as promptly as possible to the Graduate Dean or designated representative who will notify the student's instructors. Students on Military Active Duty must notify the Graduate Dean and Registrar's Office and provide appropriate documentation.

Dean of Students

Dean of Students https://www.nmt.edu/studentlife/dos/

The Dean of Students Office (DOSO), serves as a resource network for faculty, staff, students and their families, and is committed to helping all students at NMT reach their fullest potential. The office provides a variety of student support services along with opportunities for leadership experience, diverse student work environments, engaging programming and specialized resources.

The Office of the Dean of Students includes four specialized areas:

- Center for Student Leadership and Engagement
- Performing Arts Series
- Housing and Residential Life
- Student Accountability

The DOSO handles issues that can range from unresolved roommate conflicts, complaints, concerns or grievances, and University policy violations. The goal is to treat students with dignity, and provide educational interventions as appropriate to assist students in accomplishing their aspirations, and successfully persist to graduation. Whatever the issue, the DOSO is an excellent place to begin seeking out advice, information and services on the following areas:

- Absentee Notification
- Student Funding Request
- Withdrawal Without Prejudice
- NMT Student Handbook
- NMT Student Code of Conduct
- Student Support Resources

Dr. Aly El Osery, the Dean of Graduate Studies, specializes in our graduate student needs.

Dean of Students email: deanofstudents@nmt.edu

Residential Life

Housing and Residential Life

https://nmt.edu/reslife/

Housing and Residential Life is centrally located on the second floor of Joseph A. Fidel Student Services Center. During normal University business days, Residential Life is open between 8 a.m. and 5 p.m., Monday through Friday. You can contact us at 575-835-5900 or by email at residential_life@nmt.edu. After hours, an on-call housing professional can be reached for urgent matters by contacting the Campus Police Dispatcher at 575-835-5434.

New Mexico Tech housing consists of six traditional residence halls and one student pod complex. All are within walking distance to classrooms, labs, the computer center, child care, research facilities, food service, and the bookstore. If you are a regular, full-time student, you are eligible to live on campus. Four halls – Driscoll, Presidents, West, and South – sit on Tech's tree-lined Campus Drive, close to the gym, Joseph A. Fidel Student Services Center, the athletic field, Student Activity Center, swimming pool, and sport courts. Torres Hall, Baca Hall, and Altamirano Apartments are on the south side of campus.

Auxiliary Services manages 2 apartment communities for graduate students, families, and upper-class students. Mountain Springs Apartments are located on the southwest corner of Bullock Blvd. and El Camino Real St. and offer campus living closer to the community. Desert Willow Apartments are located in the southwest corner of campus on Romero Dr. off of Neel Dr. More information can be found at **https://www.nmt.edu/studentlife/apartments.php**.

If you live on campus, you are expected to abide by Residential Life rules and procedures, which are found in the Room and Board Agreement, and the **Community Standards for Residence Halls** webpage.

Dining and Meal Plans

Dining Possibilities at New Mexico Tech

Dining at New Mexico Tech is a great aspect to living on campus. NMT Dining, our food service provider, continually strives to improve the dining services to students at New Mexico Tech. We have several meal plan options available to our residents and student population. Every student who lives in a residence hall must purchase a meal plan and there are many options available sure to fit your needs.

The New Mexico Tech food service operations are located on the ground floor of the Joseph A. Fidel Student Services Center, and include the main dining room and Fire and Ice coffee shop. Both are operated by Chartwells, a division of the Compass Group. The main dining room features a variety of stations with food options ranging from international cuisines to burgers and fries to home-style cooking. Special events and theme meals are offered on a regular basis. For more information about dining and specific meal times, please visit the **NMT Dining website.**

It is mandatory for all undergraduate residents to purchase a meal plan. The size of the meal plan required depends on the student's living arrangements. The number of meals in a meal plan are for an entire semester. Meals remaining at the end of the semester cannot be carried over to the next semester. No refunds will be given for meals not eaten. Dollars work like cash and are accepted at the Fire and Ice coffee bar, which is just outside the dining room on the ground floor of Fidel. For more information about meal plan choices, please visit our **Dining at New Mexico Tech webpage.**

Housing & Meal Plans

Room (Apartment or Residence Hall) Cancellation Policy Entering Students

Tuition and Applicable Fees, Summer Semester		
• Prior to 5 p.m. on the second Tuesday after summer classes begin	The student who drops any or all summer classes at New Mexico Tech prior to 5 p.m. on the second Tuesday after classes begin will receive a 100% refund.	
• After the second Tuesday after classes begin	No refunds are made to students who drop or withdraw from any or all summer classes after the second Tuesday after classes begin.	
• Financial Aid Implications	Student receiving financial aid who withdraw from all classes are subject to a Return of Title IV Funds policy, which returns funds to the financial aid programs. For further information, see Return of Title IV Funds.	

Students entering University housing for the proceeding semester may cancel their Room & Board Application and License Agreement without financial penalty by June 1 (for the proceeding fall term), December 1 (for the proceeding spring term), and May 1 (for the proceeding summer term).

Between above dates and Opening Day for those respective terms, the student will be charged a $400 fee for breaking the Agreement/ not checking in by the first day of classes.

Room cancellations made after the first day of classes are not eligible for refund of room or board. Fall semester residents who request cancellation of their room & board for the following Spring semester will still be charged for room & board if they remain enrolled at the University.

Term dates are available on the current Residential Life Rates Sheet.

Cancellations must be in writing. No cancellations will be accepted over the phone. Students with extenuating circumstances for canceling the Agreement may request a waiver of the cancellation fee and/or room & board charges by submitting a written waiver request to Residential Life. The request will be reviewed by a committee.

Returning Students

- Returning students may cancel their agreement for the upcoming academic year prior to June 1st without penalty.
- Agreements canceled after June 1st will incur a $400 penalty.
- Room cancellations made after the beginning of the Apartment/Residence Hall term will receive no refund on their room rent.
- Fall semester residents who cancel their room for the following Spring semester will still pay the cost of the room.
- Term dates are available on the Residential Life web site. https://www.nmt.edu/reslife/

Cancellations must be in writing. No cancellations will be accepted over the phone. Students with extenuating circumstances for canceling their residence hall agreement must request a waiver of the penalty fee in writing to the Residential Life Office. The request will be reviewed by a committee.

Boarding Plans

You may not cancel or make any changes to your meal plan after the first week of classes each semester. Students with extenuating circumstances who wish to cancel their meal plan must send a request, in writing, to the Office of Housing & Residential Life (HRL). For more information on HRL's cancellation policy, please follow the associated link: https://www.nmt.edu/reslife/policies/cancellation-policy.php

Student Health Center

The Student Health Center is a convenient and confidential way to meet the health needs of Tech students. The medical staff provides primary medical care, which includes history taking, physical examination, and lab testing as needed for both acute and chronic health problems. The nurse practitioner can diagnose, prescribe, and provide treatment. Medical care outside the center's scope of practice will be referred to a physician, nurse practitioner, or registered nurse off-campus.

Children's Center

The New Mexico Tech Children's Center is 5-star accredited and offers full-time and part-time quality and developmentally appropriate education and care for children of New Mexico Tech students and employees, as well as community members. Our staff has an uncompromising commitment to excellence. The Children's Center equally places a high priority on responsiveness and close working relationships with each child and family. We offer a relaxed and casual setting for children ages 2 through 6 in our two preschool classrooms. The program in these rooms focuses on active learning and social engagement to build appropriate skills and knowledge in young children. We also have after-school care for children attending the public schools in grades kindergarten through fourth grades. We also have an infant care program for babies starting 6 weeks old. Our center is open year-round, from 7:45 a.m. to 5:15 p.m., Monday through Friday, with the exception of New Mexico Tech holidays/closures. Please contact the Children's Center at 575-835-5240 or autumn.haworth@nmt.edu, or visit the center located on Olive Lane next to Macey Conference Center for more information.

Student Leadership & Engagement

Center for Student Leadership and Engagement

The goal of the Center for Student Leadership and Engagement is to help Tech students succeed in college and become global citizens with the skills necessary to be leaders and innovators. The Center for Student Leadership and Engagement includes The Office for Career Services, The Office for Multicultural Programs, and The Office for International Programs. Staff is available to provide students with information and advice on resume writing, developing interviewing skills, and preparing for the biannual Career and Graduate School Fair. Students may apply to study abroad, find Co-op and internship opportunities, and find ethnic related scholarships. All students will find access to resources that promote a just, equitable, and holistic approach to education. NMT students and staff can participate in leadership programs specifically designed for STEM students. Located in the Joseph A. Fidel Student Services Center, Suite 262, offices are open 8 a.m. to 5 pm daily.

Student Leadership & Engagement

Career Service

Career Services

The Office for Career Services provides career counseling; resume, cover letter, and interviewing skills assistance; and listings of permanent, temporary, on-campus, internship, fellowship, and research positions. The Office for Career Services is responsible for Career Fairs, the Cooperative Education program, maintaining placement records, sponsoring workshops on aspects of graduate school and job search processes, and providing assistance to employers, including scheduling information sessions and on campus interviews. Information is available at https://www.nmt.edu/studentaffairs/careerservices/index.php.

Student Leadership & Engagement

Cooperative Education Program

Cooperative Education Program

The Cooperative Education/ Internship Program is a three-way partnership among the employer, the student, and NMT. The program is designed to provide experienced based learning to New Mexico Tech students through employment in practical, curriculum-related work assignments structured to meet students' interests, abilities, and aptitudes while meeting employers' staffing needs. Information is available at https://www.nmt.edu/studentaffairs/careerservices/index.php

Counseling Services

Counseling Services

The Office of Counseling and Disabilities (OCDS) is located in the Joseph A. Fidel Student Services Center and is open weekdays from 8 a.m. to 5 p.m. OCDS provides students with individual and couples counseling, outreach programs, consultation and crisis intervention. We adhere to the Code of Ethics of the New Mexico Board of Clinical Mental Health Counselors. All services are strictly confidential and are free to students enrolled at NMT.

To schedule an appointment, email counseling@nmt.edu or call (575) 835-6619. Please fill out the Counseling Intake form before your appointment; it can be found on our website at www.nmt.edu/cds/counseling.php.

For after hours emergencies, please contact Campus Police at 575-835-5434.

Student Leadership & Engagement

Student Access Services

Student Access Services

Student Access Services arranges academic accommodations for students who have documented disabilities that affect their ability to participate on an equal basis with students who do not have disabilities. Students with sensory, mobility, learning, psychological, or other recognized disabilities are encouraged to contact this office to assist with accommodations. The office is located in the Joseph A. Fidel Student Services Center and is open from 8 a.m. to 5 p.m. weekdays. Students are encouraged to request services well in advance of the start of the semester to allow adequate time to make needed arrangements. Students must provide current documentation to be eligible for accommodations. New Mexico Tech is committed to ensuring that the campus is accessible to all individuals.

Student Leadership & Engagement

Multicultural Programs

Multicultural Programs

The Office for Multicultural Programs supports student chapters of the American Indian Science and Engineering Society (AISES) and the Society of Hispanic Professional Engineers (SHPE), as well as administering the Louis M. Stokes Alliance for Minority Participation. The Office for Multicultural Programs works to provide academic and financial support as well as providing information about opportunities within and outside NMT. The Office for Multicultural Programs is housed in the Center for Student Leadership and Engagement on the second floor of the Joseph A. Fidel Student Services Center, Suite 262. https://www.nmt.edu/studentaffairs/multicultural/index.php

Student Leadership & Engagement

International & Exchange Programs

International and Exchange Programs

The Office of Admissions oversees International Student Services. The office provides advice and compliance to international students, especially with regard to visa-related matters. It also coordinates activities, both on and off campus, designed to help students from other countries make the transition to living in the United States and Socorro. These activities include orientations, international receptions, and Global Village Day.

In addition, the office maintains information about study abroad opportunities in other countries, coordinates Tech's student exchange program with a number of foreign universities, and participates in the New Mexico International Education Consortium. The Office for International Student Services is located in the Joseph A. Fidel Student Services Center, room 303. www.nmt.edu/studentaffairs/intlprograms/index.php

Student Services Listings are:

- NMT Office of the Registrar
- NMT Financial Aid Services
- NMT Veteran Affairs
- NMT Academic Support Services

Welcome to Office of the Registrar!

Registrar Office

Readmission for regular degree-seeking undergraduate students who left on good standing

A student who has not been continuously enrolled for an Academic year (Fall and Spring excluding summer session) must submit an application for readmission to the Office of the Registrar. A student who left on good academic standing must submit the following:

- A completed **readmission application.**
- If you attended another institution while away from NMT, an official transcript will be required with the submission of your readmission application. A student will not be considered for readmission unless all transcripts have been received.
- Readmission applications are processed beginning in November for the Spring semester, beginning in July for Fall semester, and beginning in May for the Summer semester. Readmission applications must be completed and submitted the Friday before classes begin for each semester.

Readmission for regular degree-seeking undergraduate students who left on academic probation or suspension

A student who has not been continuously enrolled for an Academic year (Fall and Spring excluding summer session) must submit an application for readmission to the Office of the Registrar. A student who left while on academic probation or academic suspension must submit the following documents:

- **Readmission Application**.
- A one-page Appeal Letter that persuasively makes a case for Readmission. Please include the following:
    - An explanation of why you did poorly.
    - An explanation of what you plan to do differently to be successful.
    - Any other information that shows the committee you are ready to be a successful student at NMT.
- A Supporting Letter from the Student's Advisor. If you are changing majors, this letter can be from your old advisor, new advisor, or both.
- An **Academic Warning Packet**. If you are changing majors, the packet must be completed with and approved by your new advisor.
- Any documents the student thinks are relevant, such as medical documents or letters of support from faculty, counselors, or the Dean of Students.
- Official transcripts for any colleges/universities attended since leaving New Mexico Tech.

You can mail, fax, or email these document to our office:

- Email: registrar@nmt.edu
- Fax: # 575.835.6511
- Address: 801 Leroy Place, Socorro, NM, 87801

When readmitted from suspension status the student will be on probation and subject to all the rules and regulations of a student on probation. Failure to meet the minimum grade point average for academic good standing will result in a second suspension from the Institute for a period of a Full Academic year (Spring, Summer, and Fall). Credits earned at another institution during duration of suspension will not be accepted for transfer.

A student in good standing will be readmitted by the Registrar. Application and material submitted by a student who left while on academic probation or academic suspension will be reviewed by the Academic Standards and Admission Committee and written notice of the decision will be given to the petitioner.

Students will not be readmitted after their third suspension except in very unusual circumstances on a case-by-case basis.

Conditions of Readmission

A readmitted student must choose degree requirements to be satisfied from the catalog in effect when the student was readmitted or any subsequent catalog, provided the student is continuously enrolled after readmission. A student readmitted by the Academic Standards and Admission Committee must follow the guidelines set by the committee. If accepted for readmission, a student on academic probation will be automatically placed on academic probation for 1 semester excluding the summer semester. A student accepted for readmission from suspension will be automatically placed on academic probation for 3 semesters excluding summer semesters and subject to all the rules and regulations of a student on probation.

Appeal Deadlines

Deadlines for appealing admission decisions are on the 10th of every calendar month. Students may appeal one time per semester, fall, spring, and summer. Appeal applications submitted after the 10th will be reviewed the following month. The Academic Standards and Admissions Committee will meet within 5 business days of each appeal application deadline to evaluate the cases and make a determination. The Associate Vice President for Academic Affairs will be an active participant in the monthly meetings and will make recommendations on the student's situation to the committee. All decisions will be final.

Registrar Office

Orientation

Undergraduate Orientation

Undergraduate orientation is held over the summer months for incoming students and begins the transition from high school or other colleges to New Mexico Tech. An abbreviated version of orientation will be offered to students starting in the spring semester. Students will have a chance to meet with other students; learn about the campus, the requirements, and support offices for students in their undergraduate studies. Students will be able to meet with the different major department representatives and/or advisors, pay their tuition, and register for classes.

Graduate Orientation

Graduate orientation for incoming students begins the transition to New Mexico Tech graduate school. You'll have a chance to meet other graduate students, learn about requirements and support for graduate studies, and meet staff who will assist you during your studies. Orientation is held at the beginning of fall semester. If you begin during the summer or spring semester, contact the Center for Graduate Studies to watch the orientation video.

Teaching assistantship (TA) orientation is required for all teaching assistants before they begin teaching and is held at the beginning of fall semester. If you begin during the summer or spring semester, contact the Center for Graduate Studies to watch the TA orientation video.

Academic Advising

Academic advising is one of the most important keys to a student's success. Academic advising provides the student with the necessary information about courses and degree requirements, but more importantly, the academic advisor serves as a mentor as the student explores the discipline and develops his or her professional identity.

The advising system is designed so that:

- Each student is assigned a faculty advisor from the major department.
- Each student works with their academic advisor each semester to plan the next semester's courses. The advisor must approve the selected coursework and sign the registration form or provide the student with an Alternate PIN (APIN) to register in Banweb.
- Students seeking to minor in a subject must obtain a faculty advisor for the minor.

Undergraduate Advising

The advising system is designed so that:

- Undecided students work with the Associate Dean of Student Success to determine the best placement until the major is declared.
- Advisor/Major changes are also initiated in the Office of the Registrar.
- It is the responsibility of the student, in cooperation with the appointed academic advisor, to arrange programs so as to satisfy the common requirements for all bachelor's degrees and the specific requirements of the major department.

Graduate Advising

The advising system is designed so that:

- Each student is assigned a faculty advisor from the major department. Your academic advisor must be a regular (full-time or emeritus) faculty in your home department. Your academic advisor may or may not be the same as your research advisor. The default advisor assigned by the department upon graduate admission may be changed when you designate your committee in Banweb.
- Each student works with their academic advisor each semester to plan the next semester's courses. The advisor must approve the selected coursework and sign the registration form or provide the student with the Alternate PIN (APIN) to register in Banweb.
- Students seeking to minor in a subject must obtain a faculty advisor for the minor.
- It is the responsibility of the student, in cooperation with the appointed academic advisor, to arrange programs so as to satisfy the common requirements for all graduate degrees and the specific requirements of the graduate program.

Registering for Courses

Regular students can register online at **http://banweb.nmt.edu**. You must obtain your Alternate PIN (APIN) from your advisor before registering. Instructions for registering online can be found at the **registrar's web page.**

Specific days are set aside for registration (see **Academic Calendar**). You may register online or in person through the second Tuesday of instruction which is also the last day to add any classes to a student's schedule.

The last day to drop any courses without financial responsibility is the third Friday of the semester. After this date no schedule changes will be allowed and will only be considered under extreme or unusual circumstances and on a case-by-case basis, after consultation and approval from the Vice President of Academic Affairs.

Schedules of course offerings, with time and place of meeting and the name of the instructor in charge, are available at **http://banweb.nmt.edu** before the registration period of each semester or summer session.

A course may be cancelled if demand or resources are insufficient. Students are encouraged to discuss with their advisors their interest in courses not currently offered. You must be enrolled in a class to attend that class. Students may not "sit in" on a class for which they are not registered at New Mexico Tech.

Course Prerequisites and Corequisites

Some courses have prerequisites, courses you must successfully complete before enrolling in that course. Exceptions can be made for extenuating circumstances with the approval of your advisor and instructor; however, please be mindful that an override is not guaranteed. If you enroll in a course in which you do not have the prerequisites without permission from your advisor and instructor, you will be disenrolled from the course with notification.

Corequisites are courses that should be taken during the same semester.

Prerequisites and corequisites are not determined by the student's individual catalog, but rather by the catalog in effect at the time that the course is taken.

Course Grade options

If a student would like to change the option of the grade from their course they may be do so with the appropriate documentation completed: for more information regarding grade option please see **academic policies**.

Cross-Enrollment between NMT and Other Universities

NMT offers cross-enrollment with select institutions who participate in the program with NMT. For further information please see **cross-enrollment**.

Changes in Registration

A student may change their registered courses by filing a Change-of-Registration form with the Registrar. No classes may be added after the second Tuesday following the beginning of classes. During the first three weeks of a fall or spring semester, and through the second Tuesday of the summer session, a student may drop a class and the course will not appear on the permanent record. After the third week of classes in a fall or spring semester or the second Tuesday of a summer session, the student must file a Withdrawal Authorization Form and pay the withdrawal fee. The grade "W" will appear on the student's permanent record. A student may not withdraw (W) from a class after the tenth week of a fall or spring semester, or the fifth week of a summer session. You may change to audit or S/U up to the end of the tenth week of the semester or the fifth week of the summer session.

Late Registration Fee

Students who fail to register for at least one course by the first 3 days of class during the designated registration period are charged a late fee per day. This stipulation applies to all regular undergraduate and graduate students who have not registered for any courses by the first Wednesday of the semester, changing registration is excluded. Non-degree seeking students are not charged this fee.

Validation

Undergraduate Validation

You must settle your financial status (validate) with the NM Tech Business Office before your registration will be considered complete. Students who have not validated by the Wednesday (fall and spring semesters) and on Friday (summer semester) before the close of registration are subject to disenrollment from classes.

Graduate Validation

If you have a teaching or research assistantship contract, you may validate through the Graduate Deferment Payment plan with Student Accounts.

Financial Aid for Undergraduate Students

Contact: Financial Aid Office, New Mexico Tech, 801 Leroy Place, Socorro, N.M. 87801; 575.835.5333; email: financial_aid@nmt.edu

New Mexico Tech makes every effort to make our undergraduate education affordable for everyone: new students, returning students, and transfer students. Assistance comes in the form of institutional scholarships, state scholarships, financial aid, and student employment.

1. **Institutional scholarships** are based solely on your grades (high school GPA, standardized test scores, and college GPA if you are a transfer student). Institutional scholarships include
    - First-Time Students (Presidential, Gold, Silver, Copper)
    - Transfer Students (Phi Theta Kappa, Regents, Transfer Excel, Tech Transfer)
    - Tuition Reduction Programs for Non-Residents (Competitive, Colorado Reciprocity, Western Undergraduate Exchange, Tuition Reduction Program)

You do not need to demonstrate financial need for an institutional scholarship—only your own academic merit.

2. **State scholarships** are awarded to New Mexico residents and include the Legislative Lottery Scholarship and the New Mexico Opportunity Scholarship.
3. In addition to scholarships, we offer **financial aid**, which includes
    - Federal grants (e.g., Pell Grant and Supplemental Educational Opportunity Grant)
    - Federal loans (e.g. Direct Stafford Loan, PLUS Loan)
    - Federal work study
    - New Mexico grants (State Student Incentive Grant, College Affordability Grant)
    - New Mexico work-study

Details on this year's institutional scholarships and financial aid programs, including dollar amounts, are available at http://www.nmt.edu/finaid/index.php or in a brochure available from the Office of Admission.

Institutional Scholarships

When you are admitted to New Mexico Tech, your application is automatically reviewed for an institutional scholarship. ***(Tech gives only one institutional scholarship per person. If, by accident or oversight, you are offered two institutional scholarships, you may keep only one.)***

The deadline for consideration of scholarships for the fall semester for first-time students is March 1.

For consideration for a scholarship for the spring semester, the deadline is November 1. The deadline for scholarships for transfer students is April 1 for the following fall semester and November 1 for the spring semester. If you did not qualify for an institutional scholarship when you entered Tech and you complete two semesters at Tech, earning a minimum of 24 credit hours with at least a 3.0 GPA, you may be eligible for an Endowed Scholarship. Inquire at the Financial Aid Office.

Generally for scholarship consideration, a student must:

- Be a U.S. citizen or an eligible non-citizen; or be an international student in legal F1 or J1 student status. (International students are eligible only for transfer scholarships and certain tuition reduction programs.)
- Be pursuing a first bachelor's degree;
- Be enrolled in a regular degree program at New Mexico Tech; and

- Carry at least 12 credit hours per semester. Students receiving the Legislative Lottery Scholarship must carry at least 15 credit hours per semester.
- Have a High School Diploma or a recognized equivalent.

Institutional Scholarship Renewal

Each year, your institutional scholarship is automatically renewed. You must maintain the GPA specified by your specific scholarship to keep the scholarship and have earned a minimum of 24 credit hours in the regular academic year. The requirements for your institutional scholarship are listed below under the Scholarship Conditions and Requirements. Please note that you may not qualify for a scholarship higher than the one you were awarded when you entered New Mexico Tech.

Scholarship Conditions and Requirements:

Students must earn 24 credit hours in the academic year (fall & spring), in addition to the GPA Requirements listed below, to meet retention criteria. Credit hours completed during the summer semester may count as completed credit hours for purposes of Institutional scholarship reinstatement. It is your responsibility to request reinstatement at the end of the summer semester.

CUMULATIVE GRADE POINT AVERAGE REQUIRED FOR RETENTION OF SCHOLARSHIP				
	CATEGORY OF SCHOLARSHIP			
	Presidential	Endowed	Silver	Copper
	Gold	NM Scholars	Transfer Excel	Tech Transfer
	PTK	International	Competitive	CORE
	Regents	Competitive*	(U.S. Citizens)	WUE
				NM Lottery**
GPA Requirement	3.25	3.00	3.00	2.50

RETENTION OF AWARD :

1. Scholarship recipients must maintain a minimum of twelve (12) credit hours of course work for each Fall and Spring semester. *Lottery Students and International Competitive recipients must maintain fifteen (15) credit hours per semester. Grades of *U, F, W,* and audits do not count as completed credits for scholarship retention purposes.
2. Scholarship eligibility is reviewed yearly at the end of the spring semester. (If a student attends summer school, eligibility will be reviewed again at the end of the summer semester to ensure GPA requirements are maintained.)
3. Inability to meet minimum requirements by the end of the spring semester will result in scholarship loss for the following academic year.
4. Students who lose scholarship eligibility may submit a written appeal (by the posted deadline) of extenuating circumstances with appropriate documentation.
5. If a scholarship is cancelled for academic ineligibility and the student later regains eligibility, it is the student's responsibility to request reinstatement of the scholarship. Renewal of a scholarship is made only if the originally specified consecutive time period has not expired. Reinstatement requests are only accepted after the spring and summer semesters.

Competitive Scholarships, CORE, WUE, and Tuition Reduction Program participants will lose their respective awards if the established retention criteria are not met; no scholarship replacement will be offered. The student's tuition rate will then revert to non-resident status.

Note: Students awarded the Competitive Scholarship or who are participating in the CORE, WUE, or Tuition Reduction Program are not eligible to establish New Mexico residency while on the program or use any time in New Mexico while on the program toward meeting the requirement for New Mexico residency.

Time Limits

Institutional scholarships are offered for a maximum of four years for first-time students and a maximum of three years for transfer students. The length of your scholarship is listed on your scholarship offer. Work closely with your advisor and check with the Registrar's Office to make sure you are on track to finish your program in the time specified. If you need additional funding to finish your bachelor's degree, you should consider applying for financial aid.

If your scholarship is cancelled due to academic ineligibility, and you then re-establish eligibility, you may apply for reinstatement of the scholarship. This request should be made as soon as possible after the spring or summer semester, whichever is applicable. The originally specified time period of the scholarship is not extended.

State Scholarships

Legislative Lottery Scholarship

The Legislative Lottery Scholarship pays a portion of tuition at NM Tech for students who meet the following requirements: Must be a New Mexico resident; must have graduated from a New Mexico public high school, an accredited New Mexico private high school, or have obtained a New Mexico GED; must be enrolled in and earn 15 or more credit hours at an eligible New Mexico public college or university in the first regular semester immediately following their high school graduation; must obtain a 2.5 GPA during their first college semester. Eligible students do not begin receiving the award until their second semester of full-time enrollment, provided that all eligibility requirements have been met. A student may be eligible for up to seven consecutive semesters of support or until the student graduates with a bachelor's degree from an eligible institution, whichever is sooner.

Renewal

The Legislative Lottery Scholarship is renewable for up to seven (7) semesters with the following conditions/requirements:

1. Successfully complete the first semester (eligibility semester) with 15 credit hours and a GPA of 2.5 or higher. Grades of U, F, W, I and audits do not count as completed credits for scholarship retention purposes.
2. Completion of 15 credit hours with a cumulative GPA of 2.5 or higher each semester thereafter. Scholarship eligibility is reviewed at the end of each semester.
3. Students who do not meet these requirements can appeal and provide documentation of exceptional mitigating circumstances beyond the student's control.
4. Approved appeals for first semester requirements will result in deferring the qualifying semester to the semester immediately following the semester in which the student did not meet the eligibility requirements.
5. All appeals will be held to state regulations.
6. All students attending summer school will be evaluated to ensure GPA has been maintained.

Extenuating Circumstances

Students who have exceptional mitigating circumstances as determined by the Director of Financial Aid may have their scholarship reinstated with conditions under the following circumstances:

1. student shall submit an appeal certifying the nature of their exceptional mitigating circumstances to the Financial Aid Office.
2. Director of Financial Aid shall exercise professional judgment to determine whether the exceptional mitigating circumstance was beyond the student's control and precluded the student from meeting the requirements of the scholarship.

Financial Aid

To apply for financial aid you must complete the **Free Application for Federal Student Aid (FAFSA)**.

You may apply online at ***www.fafsa.gov***. New Mexico Tech's Title IV code for the FAFSA is 002654.

For maximum consideration, please submit your FAFSA for processing before March 1, if you plan to enter the following fall.

Approximately 30 percent of all applications are selected for review in a process called verification. If your file is selected for verification, additional documents will be needed. The financial aid office will notify you if additional paperwork is needed and inform you what that paperwork is. Verification must be completed before a financial aid package will be calculated for the student.

The FAFSA results from the federal processor contain your Expected Family Contribution (EFC) number.

This number is used to determine your eligibility for the various financial aid programs.

We will offer you a package to try to meet your needs at New Mexico Tech. Our offer to you may include grants, loans, work-study, and/or an institutional scholarship. To accept our offer, please log into your New Mexico Tech BanWeb account.

To qualify for financial aid at Tech, you must:

1. Be a U.S. citizen or an eligible non-citizen
2. Show satisfactory academic progress
3. Be enrolled in a regular degree program at Tech
4. Not be in default on a federal student loan or owe a repayment on a federal grant
5. Have a High School Diploma or a recognized equivalent

Continuing Your Financial Aid at Tech

Each year, you must fill out the FAFSA. This form should be filed as soon as possible after October 1.

For maximum consideration you should fill out the FAFSA before our priority deadline of March 1.

Satisfactory Academic Progress for Financial Aid

Financial Aid Offices are required to have a policy regarding Satisfactory Academic Progress. The purpose of this policy is to measure a student's academic progress in both a qualitative and quantitative way. This is done by measuring both cumulative grade point average and credit hours earned. To continue receiving Federal and/or State Financial Aid, students must meet the minimum requirements set in New Mexico Tech's Satisfactory Academic Progress Policy. Be aware that these standards are not the same as New Mexico Tech's standards for academic probation and suspension.

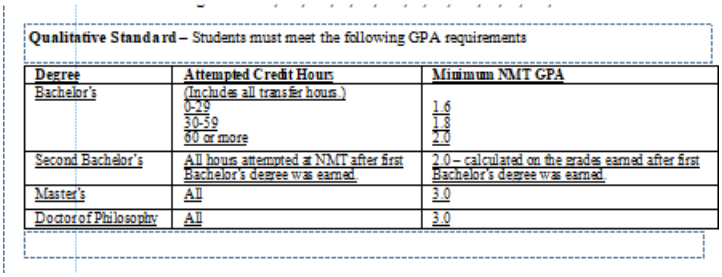
At New Mexico Tech, satisfactory academic progress is reviewed at the end of each payment period (semester). The Satisfactory Academic Progress Policy applies to both undergraduate and graduate level students who participate in the following programs: Federal Pell Grant, Supplemental Grant, New Mexico State Student Incentive Grant, College Affordability Grant, Federal Work Study, New Mexico Work Study, New Mexico

Non-need Work Study, Perkins Loan, Federal Direct Stafford Loan, Federal Direct Grad PLUS Loan, and Direct PLUS loan.

Satisfactory Academic Progress Status

Result of SAP measurement	Status	Description	Eligibility
Never received Title IV aid before	X	Not reviewed	Eligible
Meeting SAP policy standards	OK	Satisfactory	Eligible
1st Failure to meet SAP policy standards	WARN	Warning	Eligible for 1 payment period
Failure to meet SAP policy standards at end of warning period	SUSP	Suspension	Not eligible

Qualitative Standard– Students must meet the following GPA requirements



Qualitative Standard – Students must meet the following GPA requirements

Degree	Attempted Credit Hours	Minimum NMT GPA
Bachelor's	(Includes all transfer hours.) 0-29 30-59 60 or more	 1.6 1.8 2.0
Second Bachelor's	All hours attempted at NMT after first Bachelor's degree was earned.	2.0 – calculated on the grades earned after first Bachelor's degree was earned.
Master's	All	3.0
Doctor of Philosophy	All	3.0

Quantitative Standard

Students must earn (successfully complete) at least 67% of the total credit hours they attempt. This is calculated

Cumulative hours successfully completed Cumulative hours attempted

Total hours attempted includes grades of A, A-, B+, B, B-, C+, C, C-, D+, D, F, S, U, W, WO, IN, SA, UA, PR, NG and all transfer credits.

Total hours earned includes grades of A, A-, B+, B, B-, C+, C, C-, D+, D, S, PR, and all transfer credits.

Repeat courses - count as attempted hours, but the hours can only be earned once. For example, if a student takes a 3 credit hour course one semester and earns a D, the hours are counted as attempted and earned. If the student later repeats the course, the 3 hours are added to the attempted, but hours earned will not increase because of the repeat; however, because a grade of F does not count as earned hours, a student repeating a grade of F at a later time and earning a D will have the hours count as attempted and earned when the course is repeated.

NR, NG grades - It is the student's responsibility to notify the Financial Aid Office when a grade of NR, NG is changed to a grade by the instructor so Satisfactory Academic Progress can be re-evaluated.

Maximum Time Frame

- Students seeking their first bachelor's degree may be eligible for Title IV aid up to a maximum of 195 attempted credit hours.
- Students pursuing a second bachelor's degree have a maximum timeframe of 150% of the number of hours needed to complete the degree. This is determined through a credit evaluation done by the Registrar's Office.
- For instance, if the student has 140 credit hours and needs 60 hours to earn a second degree, the student will have financial aid eligibility for a maximum of 90 attempted credit hours.
- Students pursuing a master's degree may be eligible up to a maximum of 45 attempted credit hours. This includes all hours attempted as a graduate Master student regardless of the course level.
- Students pursuing a doctor of philosophy degree may be eligible up to a maximum of 75 attempted credit hours. This includes all hours attempted as a graduate PhD student regardless of the course level.
- When you fall below the SAP policy requirements, you will automatically be placed on financial aid warning for your next semester of enrollment. During this semester you will be eligible to receive aid.
- If you are still below the policy standards after the financial aid warning semester, you are no longer eligible for Title IV aid.
- Once a student is on financial aid suspension, he/she is not eligible for any Federal or State Financial Aid until the standards of the Satisfactory Academic Progress Policy have been met or an appeal is approved.

Appeals for Exception to Standards of Satisfactory Academic Progress Policy

Students have the opportunity to appeal the determination that they are not making satisfactory academic progress. To appeal, the student will need to complete an Appeal Form. On that form, the student will need to explain why he/she failed to meet our Satisfactory Academic Progress standards and what has changed that will allow him/her to meet the standards by the end of the next semester.

If an appeal is approved the student's SAP status will change to either Probation or Probation with a plan.

A student can remain eligible for aid once they have had an appeal approved with conditions (probation with a plan) as long as the student continues to meet the individual "plan" that was set forth for them in the appeal response. Satisfactory Academic Progress is measured at the end of each semester. Summer is considered a separate semester. If a student's earned hours or cumulative GPA falls below the minimum standard indicated in the policy, they will be notified in writing. The student will also be notified if they have met the maximum time frame.

Financial Aid Policies

Return of Title IV Funds Policy

This policy applies to all students that participate in the following Title IV financial aid programs.

- Federal Pell Grant
- Supplemental Grant
- Federal Direct Stafford Loan
- Federal Direct GradPLUS Loan
- PLUS Loan

Federal regulations require that if a recipient of Title IV financial aid funds (those programs listed above) withdraws from New Mexico Tech after beginning attendance for the semester, the amount of Title IV assistance earned by the student must be determined. This is done through a calculation developed by the United States Department of Education. If the amount disbursed to the student is greater than the amount the student earned, unearned funds must be returned. If the amount disbursed to the student is less than the amount the student earned, and for which the student is otherwise eligible, they are eligible to receive a post-withdrawal disbursement of the earned aid that was not received.

The amount of assistance the student has earned is based upon the percentage of the semester in which the student was enrolled.

Enrolled days / total number of days in the semester = % of aid earned. Once the student has completed more than 60% of the semester, they are considered to have earned all of the funds awarded and is not subject to the calculation.

There are two types of withdrawals for Title IV financial aid purposes:

- **Official Withdrawals—**If the student officially notifies New Mexico Tech of their intentions to withdraw, this date is considered to be your last date of attendance and will be the official withdrawal date for calculating the amount of Title IV financial aid funds earned. This applies to both withdrawal (W) and withdrawal without prejudice (WO).
- **Unofficial Withdrawals**—If a student receives grades of all F, U, or UA for a semester, the student is considered to have unofficially withdrawn from New Mexico Tech. The midpoint of the semester is used as the student's unofficial withdrawal date unless documentation is submitted to show a different last date of attendance at an academically related activity.

Entrance Loan Counseling Policy

According to federal law, if you intend to borrow money on the Perkins Loan or Federal Direct Loan programs, you must complete entrance loan counseling. Go to ***www.studentloans.gov*** and sign in to complete Entrance Loan Counseling. Complete the entrance loan counseling for the type(s) of student loans you intend to borrow or have been offered.

Exit Loan Counseling Policy

If you receive an education loan and you graduate, withdraw, drop below six credit hours, or do not re-enroll; you must complete exit loan counseling. Go to ***www.studentlloans.gov*** and click Student Loan Counseling interview on the left side. Complete the exit loan counseling for the type(s) of student loans you borrowed.

Student Employment Policy

All student employment is limited to a maximum of 20 hours per week during the fall and spring semesters. Maximum hours per week during the summer semester depend on the number of credit hours the student is taking. Any student employed under the work-study program must demonstrate satisfactory academic progress for financial aid. Students employed on a part-time basis must be enrolled as regular, full-time students. Students attending less than full-time are subject to IRS regulations regarding FICA/Medicare deductions.

A Student Employee Handbook is available online at http://www.nmt.edu/finaid/index.php and at the Financial Aid Office.

(A cooperative education program is available, in which students alternate periods of off-campus, full-time employment with on-campus, full-time study. See the Director of the Center for Student Leadership and Engagement for more information.)

Veteran Affairs

NMT is dedicated to ensuring the success of our active duty and veteran students. If you attended a military service school, received training, or served in an occupation specialty you may be able to earn credit towards your program at NMT.

In order to request credit or an evaluation of your military experiences, you must:

- Be accepted as a student at NMT
- Have a declared program of study to which the credit awarded will apply
- Request your official Joint Service Transcript (JST) and have it submitted directly to the NMT Articulation and Transfer Office if you are or were a member of the Army, Coast Guard, Navy, Marine Corps, or Reserve.

Call to Active Duty Service

Call to Service is appreciated and respected at NMT. If you are called to Active Duty during your enrollment at NMT please contact the Veterans Education Benefits Office and the Registrar's office located in Fidel Center, Suite 289.

Veteran Affairs

Veterans Education Benefits

NMT is dedicated to the success of our Armed Service Members and Dependents using Veterans Education Benefits.

Steps to receive and utilize these benefits are as follows:

1. Apply for VA Education Benefits through https://www.va.gov/education/how-to-apply/
2. Apply to and be accepted to NMT
3. Register for Classes
4. Supply a copy of your Certificate of Eligibility to the Veterans Education Benefits, School Certifying Official upon receipt.
5. Comply with School Certifying Officials requests. I.E. semester-by-semester request to continue to utilize benefits, any changes in credit hours, withdrawal from classes, etc.

Email and Telephone contacts can be found at https://www.nmt.edu/veterans/

Attendance

A student is responsible for all material covered in class; however, it is the decision of the individual instructor whether attendance is mandatory or optional. It is the student's responsibility to ascertain this.

Undergraduate Attendance

Illness or other circumstances that necessitate extended absence from class work should be reported as promptly as possible to the Dean of Students or designated representative who will notify the student's instructors on valid and confirmed situations. Students called to Military Active Duty must notify the Dean of Students and Registrar's Office and provide appropriate documentation.

Graduate Attendance

Illness or other circumstances that necessitate extended absence from class work should be reported as promptly as possible to the Graduate Dean or designated representative who will notify the student's instructors. Students on Military Active Duty must notify the Graduate Dean and Registrar's Office and provide appropriate documentation.

Academic Support Services

The areas of Academic Support Services you can find here on campus are:

- The NMT Skeen Library
- The Information Technology Center (ITC)
- The Academic Center of Technology (ACT)
- The Office of Student Learning (OSL)
- The Writing & Communication Lab (WCL)
- Academic Advising
- Academic Counseling

Joseph R. Skeen Library

The Joseph R. Skeen Library's collection and services support the educational, research, public service, and economic development mission of New Mexico Tech. The library maintains a collection of over 1.1 million eBooks and printed books, maps, government documents, and periodicals. A majority of the items in the library's collection are digital and accessible 24/7 through the library's website. Skeen Library also works to protect its users' right to privacy, supports intellectual freedom, and upholds intellectual property rights.

Housed in an attractive, three-story building with a prominent clock tower, the Skeen Library actively works to provide a safe, welcoming, and friendly environment. Food, drink, and talking are all allowed in the library. Skeen Library provides a free coffee bar; seven reservable study rooms and other study rooms; a presentation seminar room; a variety of flexible technology-equipped group study areas; a computer lab; a popular DVD collection; and a popular reading collection. The library provides the general public with free access to internet-connected computers and WiFi internet connections, as well as having 40 computers dedicated only for student use. Also available are a Virtual/Augmented Reality system, connected with the Drone Lab in cooperation with the Mechanical Engineering Department.

The library provides inter-library loan services to students and faculty members allowing access to the collections of over 75,000 libraries worldwide. and faculty who wish to visit other libraries may also request Passports to attain borrowing privileges at other university libraries in New Mexico.

The library is the custodian of archival materials relating to the history of the institution; an extensive map collection; a historical microform collection of Socorro newspapers; an comprehensive collection of historical geologic and mining materials; the President Workman Papers; and the personal library of the late U.S. Representative Joseph R. Skeen.

To learn more about the library and its staff and services, please visit our website at **www.nmt.edu/library/.**

Information Technology and Communications Center (ITC)

The **ITC** is open to students, faculty, and staff while classes are in session. Students in all disciplines are encouraged to use the facility as a normal part of their course work. The center provides computer access to any regularly New Mexico Tech matriculated student who requests it, subject to ITC regulations and the New Mexico Tech Computer Usage Policy. Each user is given an e-mail address and access to the Internet, as well as an initial storage space. The ITC has a wide range of scientific software available.

ITC operates a network of Linux, Macintosh, and Windows workstations. At the time of publication, there are more than 300 workstations, all equipped with color screens, on the academic network. In addition, there are PC labs connected to a Samba server on the campus network. There are also several computer classrooms with computers and integrated projection systems. Several labs have scanners, and all are connected to the network printing system.

The campus network is connected to the National Science Foundation Internet II nationwide computer network. The network connection gives Tech access to other New Mexico colleges, Sandia and Los Alamos national laboratories, and thousands of other sites worldwide.

In addition to the facilities found in the ITC there are many other computer systems on campus used in conjunction with departmental programs and funded research.

The ITC is an integral part of major research projects at Tech. Students and faculty who desire to use of the facilities are encouraged to contact the director of the center at 575.835.5735 or via email at ***help@nmt.edu***.

ITC also offers free classes each semester to acquaint students with how to use the Tech Computer Center (TCC) and the World Wide Web.

Academic Center for Technology

www.nmt.edu/act/

New Mexico Tech provides students access to synchronous and asynchronous online courses as well as courses offered in a hybrid modality that permit remote students to engage in courses offered on campus in one of Tech's many multimedia-enabled classrooms. Students may enroll in select courses or programs (at the graduate level) that are offered online.

The Academic Center for Technology, which assists departments in managing their distance education courses, operates a growing number of technologically enhanced classrooms around campus that can be used for distance education, videoconferencing, and remote speakers. Distance education students must be admitted to the university to take distance education courses. Admission and registration can be handled online.

For more information on distance education courses and programs, call the Academic Center for Technology at 575-835-6700 or email at ***act@nmt.edu***.

Office for Student Learning (OSL)

The **Office for Student Learning**, located in the Joseph R. Skeen Library, is a nexus for student academic support initiatives and includes the following services:

Peer Tutoring, Homework Help, Group Work, and Moral Support

The OSL offers drop-in peer tutoring and homework help for most undergraduate classes. Additionally, the OSL works with several of the academic departments to provide ways for students to rework test problems for better comprehension. Students looking for extra help with an assignment, seeking deeper understanding of a challenging subject, or wanting to join a study group are encouraged to contact the OSL team. Learning Coaches work together to provide a welcoming environment with resources for academic success. Services are free.

Academic and Professional Development Workshops

The OSL hosts workshops that complement academic coursework, with the goal of providing students with additional skills for academic success and for future professional careers in science and engineering. Workshop topics have included MATLAB, LATEX, Excel, Reading and Retention, Building a Competitive Resumé, Applying for Internships and REU Programs, and more.

The Writing and Communication Lab (WCL)

Located in Skeen Library, WLC assists both graduate and undergraduate students with many forms of writing, including technical papers, resumes, and everything in between. The WCL assists with oral presentations and research posters. The WCL offers both in-person tutoring and online tutoring during the fall and spring semesters, with hours and further information online at **www.nmt.edu/academics/class/center.php**. Services are free.

Academic Advising

Academic advising is one of the most important keys to a student's success. Academic advising provides the student with the necessary information about courses and degree requirements, but more importantly, the academic advisor serves as a mentor as the student explores the discipline and develops their professional identity.

The advising system is designed so that:

Each student is assigned a faculty advisor from the major department.

Each student works with their academic advisor each semester to plan the next semester's courses. The advisor must approve

the selected coursework and sign the registration form or provide the student with an alternate pin (APIN) to register in Banweb.

Students seeking to minor in a subject must obtain a faculty advisor for the minor.

Undergraduate Advising

The advising system is designed so that:

Students who have not declared a major are assigned a faculty advisor in one of several academic departments until the student decides upon a major.

Advisor/Major changes are initiated in the Office of the Registrar.

It is the responsibility of the student, in cooperation with the appointed academic advisor, to arrange programs so as to satisfy the common requirements for all Associate and Bachelor degrees, and the specific requirements of the major department.

Graduate Advising

The advising system is designed so that:

Each student is assigned a faculty advisor from the major department. Your academic advisor must be a regular (tenure-track or emeritus) faculty in your home department. Your academic advisor may or may not be the same as your research advisor. The default advisor assigned by the department upon graduate admission may be changed when you designate your committee in Banweb.

Each student works with his or her academic advisor each semester to plan the next semester's courses. The advisor must approve the selected coursework and sign the registration form or provide the student with the alternate pin (APIN) to register in Banweb.

Students seeking to minor in a subject must obtain a faculty advisor for the minor.

It is the responsibility of the student, in cooperation with the appointed academic advisor, to arrange programs so as to satisfy the common requirements for all graduate degrees and the specific requirements of the graduate program.

Advisor/Student Responsibilities

Academic Advisors and students are expected to develop a professional and confidential partnership to foster a collaborative advising process leading to success at New Mexico Tech. The following is a list of responsibilities both for the Advisor and student to be mindful of to effectively facilitate this partnership.

Advisor Responsibilities

Assist students with developing a realistic educational plan that is consistent with their career path.

Monitor and document student progress toward program completion.

Maintain student advising files.

Review a student's eligibility to engage in a registered Internship/Module Abroad/Exchange Program.

Inform and/or refer students to resources, services, and opportunities to enhance their learning experience.

Treat students with courtesy, dignity, and respect.

Uphold the integrity of New Mexico Tech by enforcing all school and department policies and procedures.

Student Responsibilities

Read the Catalog and become knowledgeable about and adhere to institutional policies, procedures, and requirements.

Clarify personal values, abilities, career interests, and goals.

Make an appointment with an Advisor when required or when in need of professional advising.

Notify an Advisor when you cannot make your appointment.

Prepare for your advising session and bring appropriate materials.

Follow through on actions identified during your advising session.

Accept final responsibility for all decisions.

Attend and participate in courses, workshops, advising seminars, etc.

Meet with an Advisor to determine eligibility for an Internship/Module Abroad/Exchange Program.

Obtain the necessary visa documents to travel to other countries.

Academic Counseling

Office of the Associate Dean for Student Success

Contact: Elaine DeBrine Howell, MA, LPCC

Associate Dean for Student Success

Email: Elaine.debrinehowell@nmt.edu, 575.835.5208, Speare 132

The Office of the Associate Dean for Student Success provides many services to assist students in achieving their academic goals at New Mexico Tech, including:

Academic Success Planning: Academic counseling with a focus on identification of academic strengths, learning style preference, and navigating university policies and procedures.

Degree planning: assistance with degree audits, understanding degree requirements and departmental policies, academic advising.

Grade Extension Agreements: At the instructor's discretion and in the case of extenuating circumstances, additional time may be given to a student to complete additional work and/or exams in a course after the final grade is submitted. The grade extension agreements are monitored by the Associate Dean for Student Success.

Early Intervention: An Academic Referral Program designed to identify students who are experiencing academic difficulty with the aim to assist them with those emerging problems before they become insurmountable. The teaching faculty is asked to refer students to the Associate Dean for Student Success at the beginning of the 3rd week of the semester, if not earlier. Interventions continue throughout the semester. Typical issues of concern include:

- Absences/lateness
- Missed homework, quizzes or tests
- Poor performance on homework, quizzes or tests
- Inappropriate classroom behavior
- Change in behavior
- Any other concerns

Academic Warning Program: the program allows all undergraduate students whose cumulative or semester GPA falls below 2.0 the opportunity to identify and rectify obstacles to their academic success. Students on warning work with their academic advisor to complete an Academic Success plan that is reviewed and approved by the Academic Standards and Admissions Committee. A registration hold remains on the students' account for the duration of the warning semester to help ensure that the student is following through on their academic plan. Academic Warning is not an official Academic Standing and does not appear on the transcript.

Additional Support:

- Academic Advising for Dual Credit and Non-degree Undergraduate students
- New Faculty Advisor Training
- TA training
- Macey Scholars Program Advisor
- Fulbright Scholar Program Advisor

Transfer Students

Students in good academic standing at other colleges and universities (2.0 minimum GPA) are eligible for transfer admission to New Mexico Tech. Credits taken at another institution will be evaluated and transferred on a course-by-course basis.

You will be considered a transfer student if you have a minimum of 30 credit hours transfer from an accredited college or university you have attended after graduating high school or completing your GED. (If you have fewer than 30 credit hours of transfer credit, or if you completed college credit as dual credit, follow the regular Freshman/first-year Admission process).

Admission Requirements

The minimum admission requirements for a student who is classified as a transfer student are as follows:

- The student transferring from another college or university must have completed the same high school coursework requirements as freshman/first -year student admission (either from high school or from equivalent courses taken since high school).
- The applicant must present official college transcripts showing a cumulative GPA of 2.0 or better.
- The applicant must place in Math 1240 (Pre-Calculus) or higher.
- The student must be in good academic standing at the last institution attended.
- The student must be eligible to re-enroll at the institutions from which they wish to transfer. An applicant who cannot re-enroll at that institution is not eligible to enter New Mexico Tech.

Procedure

To be considered for admission, a Transfer student applicant must:

1. Complete an Application for Undergraduate Admission and Scholarship.
2. May be asked to provide an official high school transcript at the discretion of the Office of Admission (although a high school transcript may not be needed for the admission process, an official High School transcript showing date of graduation will need to be provided to the Office of the Registrar; required of all students)
3. Provide official transcripts from all colleges attended, (official awarding of transfer credit cannot be completed until the university has received the official college transcripts)
    - Coursework completed at universities/colleges outside of the United States, will require transcripts to be submitted through WES: https://www.wes.org/ for a Comprehensive Course by Course Report.In addition course information in English may be requested
4. May be asked to provide an official ACT or SAT student Profile Report; and
5. If you are deemed academically qualified, then you will receive a letter of admission and the Acceptance of Admission form. You must complete this form and return it with the non refundable admission fee of $100 to the Office of Admission before you are allowed to register for classes.

Transfer

Transfer Credit

Undergraduate Transfer Credits

New Mexico Tech accepts academic credits from regionally accredited institutions of higher education. All credits will be evaluated and transferred on a course-by-course basis.

- Courses to be considered for transfer credit must have been taken for a letter grade.
- Courses must be passed with a grade of "C" or higher to be considered for transfer credit at the undergraduate level.
- Grades earned at other universities are not transferred to New Mexico Tech.
- Credit earned at any institution while a student is on academic or disciplinary suspension will not be accepted at New Mexico Tech.

A list of courses offered at other New Mexico colleges and universities and their Tech equivalents is online at https://ccns.nmhed.us/.

Coursework completed at universities/colleges outside of the United States, will require transcripts to be submitted through WES: https://www.wes.org/ for a Comprehensive Course by Course Report.

Graduate Transfer Credits

For graduate degrees, NMT accepts at most 12 academic credits from regionally accredited institutions of higher education. All credits will be evaluated and transferred on a course-by-course basis. Only courses at the 3000 level and above with a grade of "B" or higher are eligible for transfer credit for graduate degrees.

Terminal Transfer Credits

Terminal transfer credits, credits earned at another college or university in order to complete the last degree requirements at NMT, are not allowed except when specified by a particular degree program, or when unusual circumstances appear to justify it. In no case will more than 12 credit hours of terminal transfer credits be allowed. A student who anticipates the need for requesting terminal transfer credit should do so as soon as practical and in no event later than the time of filing the Intent to Graduate for a degree. The request should be addressed to the Vice President for Academic Affairs. It should contain a statement of the circumstances which, in the student's judgment, justify the request and a specific statement of the program proposed for obtaining the terminal credits. Approval, if granted, will be of a specific program.

Transfer Credits among New Mexico Higher Education Institutions

During the 2005 New Mexico legislative session (Senate Bill 161), and continuing with the passing of SB 103 in 2017 legislative session, courses successfully completed with a grade of C or higher at any regionally accredited public institution of higher education in New Mexico and recognized through a state approval process as general education at that institution are guaranteed to transfer to any other New Mexico two- or four-year public institution as general education coursework. Effective in fall 2019, New Mexico requires a minimum of 30-31 hours of general education coursework for students to be designated as "General Education Complete" at any NM institution for all Associates or Bachelor's degrees, taken from the approved General Education areas listed on the New Mexico Higher Education Department (HED) website (https://hed.state.nm.us/). Students who have decided on a major and/or an institution at which to complete their studies should consult with an academic advisor at that particular institution to determine the most appropriate course selections. Students enrolling for the first-year of study at a New Mexico college or university and considering possible transfer into a certificate and/or degree program at another institution are encouraged to take the courses approved for transfer during their first and sophomore year of study. Students transferring to NMT should also be aware that while they may have completed their New Mexico General Education requirements at the originating school, they may still be required to complete Institute Requirements for New Mexico Tech degree programs.

Student Responsibility

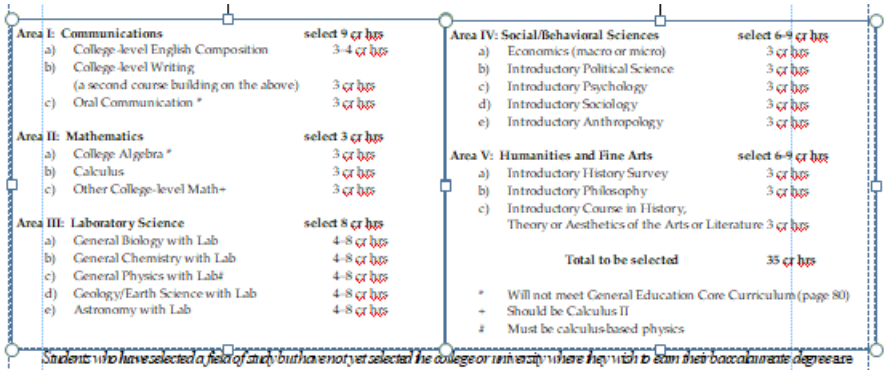
New Mexico's colleges and universities have collaborated to produce guides to assist students who plan to transfer before completing a program of study. Course modules are designed to help students select courses carefully so that they may transfer with little or no loss of credit. However, planning for effective transfer with maximum efficiency is ultimately the student's responsibility. Responsible transfer planning includes early and regular consultation with the intended degree-granting institution to assure that all pre-transfer coursework will meet the requirements of the desired degree.

Transferable Lower-Division General Education Common Core

Students enrolling for first-year study who have not yet selected either an academic focus or the institution where they wish to graduate are advised to take courses during their first year outlined in the Lower Division General Education Common Core. For students enrolled at any public institution in New Mexico, the following courses are guaranteed to transfer to any other New Mexico public college or university, and apply toward Associate and Baccalaureate degree program requirements if the student passes the classes with a grade of C or higher. Students should consult advisors at their current institutions regarding which specific courses fit these categories. Students preparing for careers in Engineering, Health Sciences, or other profession-related fields are advised that some of this coursework may not transfer toward general education requirements but in most cases will apply toward elective requirements.

The core matrix of approved courses guaranteed to transfer and meet general education requirements at any New Mexico college or university can be found on the New Mexico Higher Education Department website. Follow the "Colleges and Universities" link to the drop down menu and select "Transferring Credits," then select "Core Matrix." Courses are listed by institution, whether university or community college, under each of the five general education areas. Students may also be able to access this list by going directly to https://hed.nm.gov/resources-for-schools/public_schools/general-education

Lower-Division 64-hour Transfer Modules



Area I: Communications		**select 9 cr hrs**
a)	College-level English Composition	3-4 cr hrs
b)	College-level Writing (a second course building on the above)	3 cr hrs
c)	Oral Communication *	3 cr hrs
Area II: Mathematics		**select 3 cr hrs**
a)	College Algebra *	3 cr hrs
b)	Calculus	3 cr hrs
c)	Other College-level Math+	3 cr hrs
Area III: Laboratory Science		**select 8 cr hrs**
a)	General Biology with Lab	4-8 cr hrs
b)	General Chemistry with Lab	4-8 cr hrs
c)	General Physics with Lab#	4-8 cr hrs
d)	Geology/Earth Science with Lab	4-8 cr hrs
e)	Astronomy with Lab	4-8 cr hrs

Area IV: Social/Behavioral Sciences		**select 6-9 cr hrs**
a)	Economics (macro or micro)	3 cr hrs
b)	Introductory Political Science	3 cr hrs
c)	Introductory Psychology	3 cr hrs
d)	Introductory Sociology	3 cr hrs
e)	Introductory Anthropology	3 cr hrs
Area V: Humanities and Fine Arts		**select 6-9 cr hrs**
a)	Introductory History Survey	3 cr hrs
b)	Introductory Philosophy	3 cr hrs
c)	Introductory Course in History, Theory or Aesthetics of the Arts or Literature	3 cr hrs
	Total to be selected	**35 cr hrs**

* Will not meet General Education Core Curriculum (page 80)
\+ Should be Calculus II
\# Must be calculus-based physics

Students who have selected a field of study but have not yet selected the college or university where they wish to earn their baccalaureate degree are

Students who have selected a field of study but have not yet selected the college or university where they wish to earn their baccalaureate degree are advised to take courses during their first and sophomore years outlined in the General Education modules. For students enrolled at any public institution in New Mexico, these courses are guaranteed to transfer to any New Mexico university and apply toward Bachelor's degree program requirements. Students should consult advisors at their current institutions regarding which specific classes fit these categories. Lower-division transfer modules currently exist for:

- Biological Sciences
- Business
- Early Childhood Education
- Engineering

- Physical Sciences
- Social and Behavioral Studies

New Mexico Common Course Numbering System (NMCCNS)

A common course numbering system has been devised by New Mexico colleges and universities in compliance with the New Mexico Post-Secondary Education Articulation Act. The purpose of the system is to assist New Mexico students who are transferring between institutions within the state. The system provides a neutral state wide course identifier for those courses that are similar in nature and considered to be equal in transfer. To view the common courses between the University's in New Mexico please visit New Mexico Higher Education's common course crosswalk at https://ccns.nmhed.us/.

Inter-institutional Transfer Guides and Catalogs

Students who have selected a field of study and/or the institution where they wish to graduate are advised to consult the transfer guide or catalog for that institution for current and detailed advice to guide their course selection.

Complaint Procedure for Transfer Students

All New Mexico public post-secondary institutions are required to establish policies and practices for receiving and resolving complaints from students or from other complainants regarding the transfer of course work from other public institutions in the state. Complaints can be filed with:

New Mexico Higher Education Department

2044 Galisteo Street,

Santa Fe, NM 87505- 2100

505.476.6500

http://hed.state.nm.us/

Student Government Association (SGA)

Student Government Association

Students at New Mexico Tech assume important responsibilities for the regulation of their affairs. The Student Government Association provides opportunities for undergraduate students to improve their leadership skills as well as to be more involved with the New Mexico Tech campus.

The Student Government Association is made up of three branches; Executive, Legislative, and Judicial. The Executive Branch includes the President, Vice President, Chief Financial Officer, Student Activities Technical Director, Student Activities Director, and the Paydirt Editor and Chief. The Judicial Branch includes the Chief Justice and a minimum of two justices. The Legislative Branch is the governing body of the Student Government Association which is also the Student Senate, whose members are elected twice a year for one-year terms. The Student Senate regulates extracurricular activities, organizations, campus/community events, appropriating money, voicing student concerns, and improving student life on campus. The Student Senate carries out its functions through the creation of its own committees, and its deliberations are open to all students and other interested persons.

Any enrolled student may serve in the Senate if properly elected and any undergraduate student may participate in the Student Government Association through volunteering. To view more information about SGA please visit **https://www.nmt.edu/sga/**.

Student Government Association (SGA)

Student Clubs

A host of student clubs, organizations, and activities flourish at Tech. These are as broad as student interests themselves.
To view club lists and information, please visit the Student Government Association's website at **https://www.nmt.edu/sga/clubs.php**.

Student Activities

A host of student clubs, organizations, and activities flourish at Tech. These are as broad as student interests themselves.
To view club lists and information, please visit the Student Government Association's website at **https://www.nmt.edu/sga/clubs.php**.

Tuition

Undergraduate Students

Any undergraduate who registers for 12 to 18 credit hours pays full tuition. Additional tuition for all hours carried above 18 credit hours will be charged at the semester hourly rate for residents or nonresidents as applicable. Students registered for 11 credit hours or less pay tuition at the semester hourly rates.

Graduate Students

Any graduate student who registers for 9 to 13 credit hours pays full tuition. Additional tuition for all hours carried above 13 credit hours will be charged at the semester hourly rate for residents or nonresidents as applicable. Graduate students registering for fewer than nine credit hours pay tuition at the semester hourly rates.

Auditors, Non-Degree Students, and Senior Citizens

Students who **audit** courses (those who enroll in one or more courses for no credit) pay the same tuition and fees as credit students.

Non-degree-seeking undergraduate students, as classified by the Office of Admission or Registrar, pay required tuition and fees per credit hour. Non-degree students may not register for more than six credit hours per semester. Non-resident tuition is waived for non-degree students enrolled for no more than six credit hours.

Non-degree-seeking students who have a bachelor's degree are regarded by New Mexico Tech as a **Non-degree Graduate Student.** Non-degree Graduate Students will be charged tuition at undergraduate rates for courses numbered less than 3000 and graduate tuition for all courses numbered 3000 and above.

Tuition for **senior citizen students** (65 or older) is $5.00 per credit hour and must be requested at time of registration. Applicable fees must also be paid.

Tuition Fees Workbook 2024- 2025 pdf of the below image.

Tuition & Fees Summary as of Fall 2024 & Spring 2025

Full-Time Students	**Resident**	**Non-Resident**	
Tuition			
Undergraduate (12 to 18 hours)	3,946.80	12,832.56	
Graduate (9 to 13 hours)	4,122.54	13,636.53	
Part-time Students			
Undergraduate Tuition (6 hours or fewer) - per hour	328.90	328.90	
Graduate Tuition (6 hours or fewer) - per hour	458.06	458.06	
Undergraduate Tuition (7-11 hours) - per hour for hours 1-11	328.90	1,069.38	
Graduate Tuition (7-8 hours) - per hour for hours 1-8	458.06	1,515.17	
Special Students (6 hours or fewer, non-degree seeking)			
Undergraduate Tuition - per hour	328.90	328.90	
Graduate Tuition (courses numbered 299 or below) - per hour	328.90	328.90	
Graduate Tuition (courses numbered 300 or above) - per hour	458.06	458.06	
Required Fees			
Student Activity Fee (undergraduate students)			
(7 hours or more)	93.00	FEAC	
(6 hours or fewer)	46.50	FEAC	
Student Activity Fee (graduate students)			
(7 hours or more)	82.84	FEAG	
(6 hours or fewer)	41.43	FEAG	
Technology Support Fee - per semester **	250.00	FEWS	
Student Center Fee - *per hour*	7.50	FESC	
Student Center Base - *per semester*	8.00	FESB	
Institute Activity Fee - *per hour*	2.00	FEIA	
Sports Activity Fee - *per hour*	5.50	FESP	
Auxiliary Fee- *per hour*	7.00	FEAX	
Bond Retirement Fee - *per semester* **	90.00	FEBR	
Health Center Fee - *per semester*	60.00	FEHC	
Student Counseling Fee - *per semester*	26.00	FECD	
Other Charges			
Late Registration Fee - *per day*	30.00		
Withdrawal Fee	-		

NOTE: Late Fees begin the Thursday after registration day

Resident UG students carrying more than 18 hours will be charged for each hour over 18.	3,946.80	plus	328.90
Non-res UG students carrying more than 18 hours will be charged for each hour over 18.	12,832.56	plus	1069.38
Resident GR students carrying more than 13 hours and non-res GR students with assistantships carrying more than 13 hours will be charged for each hour over 13.	4,122.54	plus	458.06
Non-res GR students carrying more than 13 hours will be charged for each hour over 13.	13,636.53	plus	1,515.17

Senior Citizens pay $5 per credit hour.

**Special Students taking 6 hrs or less pay 7.50 per cr hr for Bond Retirement Fee and 16 per cr hr for Technology Support Fee.

Distance Education students pay Technology Support Fee of 250.00 and Bond Retirement Fee of 90.00 for 6 or less. For 7+ DE pay all fees.

Tuition

Residency

You are considered a resident of New Mexico if your parents or legal guardians are residents of New Mexico. If you are over 18 years of age, you may become a legal resident of New Mexico while attending New Mexico Tech. Non-resident aliens cannot obtain New Mexico residency.

With the exception of graduate students employed as teaching or research assistants, international students do not qualify for in-state tuition.

Tuition

Navajo Residency

Registered members of the Navajo Tribe who reside anywhere within the Navajo Nation are considered New Mexico residents for tuition purposes.

Tuition

Refunds

Fall and Spring Semesters

The student who drops all fall and spring classes at New Mexico Tech prior to 5 p.m. on the third Friday after classes begin will receive a refund according to the following schedule:

REFUND PERIOD	PERCENT REFUND	
First week (days 1 through 5)	100%	
Days 6 through 12	75%	
Days 13 through 19	70%	
Days 20 and beyond	0%	
After the third Friday after classes begin	No refunds are made after the third Friday after classes begin for fall or spring semester	

Students who drops some, but not all, classes (reduction in class load) prior to 5 p.m. on the third Friday after classes begin will receive a 100% refund for the classes dropped.

Summer Semester

The Student who drops any or all summer classes at New Mexico Tech prior to 5 p.m. on the second Tuesday after classes begin will receive a 100% refund.

No refunds are made to students who drop or withdraw from any or all summer classes after the second Tuesday after classes begin.

Tuition

Payment of Fees

1. Tuition and fees must be paid by the first day of classes or the student must be enrolled in a payment plan available on NMT's secure TouchNet site accessed through their account on Banweb (see no. 4). Financial aid that has been awarded to the student will be credited to the student's account at this time.
2. Students with delinquent accounts will not be allowed to register for a new semester.
3. Payment for bookstore merchandise must be made in full at the time of purchase. (The bookstore accepts most major credit cards.)
4. Students are able to set up deferred payments for the semester and have the option to sign up through New Mexico Tech's e- billing system. Currently, a three installment plan is available. Students can establish a payment plan on all costs – tuition, room-and-board and student fees – with a 20 percent down payment due on the first day of classes. A non-refundable $25 setup fee will be charged for students who elect to enroll in the deferred payment plan.
   To log in to the Tech e-billing page, visit **https://secure.touchnet.com/C22533_tsa/web/login.jsp**
5. Students whose accounts are not paid in full by the due date or who have not made alternate arrangements with the Student Accounts Office are subject to permanent loss of academic credit, as well as disenrollment from all classes. Students have the right to appeal to the Dean of Students in writing no later than one week (five working days) before the final payment date.
6. A refund will automatically be issued to students with a credit balance of $100 or more. Refund checks will be issued twice during the first week of classes (actual days will be determined on a semester-by-semester basis) and every Friday afternoon thereafter. Students who have a credit balance of less than $100 must request the refund at the Student Accounts office. Checks will be held at the Cashier's window for pick up by the student. A current, valid student ID must be presented. Students can also elect to have their refunds direct deposited to their checking or savings account via the e-billing system.
7. All financial aid—including scholarships, loans, and grants—is applied during the semester in which it is awarded. Aid cannot be applied retroactively.
8. Rent for Student Family Housing must be paid in advance. Students with delinquent housing accounts may be asked to vacate campus residences.

Tuition

Definitions of Fees

Admission Fee

An Admission Fee is payable when the applicant is admitted and ensures the student's inclusion in the registration procedures. The fee is not refundable.

Application Fee

Each student applying for admission to New Mexico Tech must submit an application fee for undergraduate or graduate admission. This nonrefundable fee must be received before the application can be processed.

Auxiliary Services Fee

This fee defrays expenses of various auxiliary services on the campus, including the Swim Center, Macey Center, Golf Course, Children's Center, and Student Activity Center.

Bond Retirement Fee

This fee goes toward paying off bonds issued for general purpose facilities built on campus.

Challenge Examination Fee

Challenge examinations must be arranged in advance and a fee per semester hour is charged for each.

Computer Usage Fee

The Tech Computer Center charges a basic fee to each student who uses the machines. Additional fees for file storage space and printouts beyond the minimum will also be charged.

Deferred Payment Plan Fee

A fee is charged to students who qualify for a deferred payment plan covering room and board. If the student chooses not to use the online payment plan system for these charges, one-third of the total amount is due on the first day of classes and the balance is due in accordance with a schedule set by the Business Office. Students will not be allowed to register for a new semester until their accounts are paid in full for the previous semester. Students who have delinquent accounts are subject to administrative withdrawal of current registration and loss of credits for the semester.

Graduation, Thesis, and Dissertation Fees

When candidates for the associate's or bachelor's degree file their candidacy declaration, they pay a graduation fee to cover the cost of diploma and other expenses related to graduation. Students completing the master's and doctoral degrees are charged designated graduation fees.

Health Center Fee

The Health Center Fee provides a base for the support of the Student Health Center including staffing.

I.D. Card Replacement

A fee is charged for the replacement of lost student identification cards. Broken or worn cards are replaced for no charge but must be turned in to the Registrar's Office at the time that the new card is issued.

Institute Activities Fee

The Institute Activities Fee provides a base for the support of student social and cultural activities and corresponding facilities.

Late Registration Fee

Students who fail to register during the designated period are charged a late fee. This stipulation applies to all regular undergraduate and graduate students. Non-degree students are not charged this fee.

Orientation Fee

A fee is charged for new student orientation.

Readmission Fee

A fee is charged for processing readmission to Tech for students who are readmitted through the Academic Standards and Admission Committee.

Room and Board

Room and board are charged through the Residential Life Office. The total amount varies depending upon the type of room occupancy and meal contract. The base rate is calculated for double occupancy of room with 150 block meal plan. Other meal plans are available. At an additional charge, single occupancy is offered when space permits. Students must supply all linens, including a mattress pad protector. More information is provided in the housing agreement, which must be executed for each academic year.

The semester charge for room and board does not include meals during recesses nor during the few days at the beginning and end of each semester when most students are away from the campus. The student may only occupy the room during break periods if they live in an apartment (Altamirano, Desert Willow, and Mountain Springs). The traditional halls (Driscoll, Presidents, West, South, Baca, and Torres) are closed between fall and spring semesters and may be closed at other times between terms when conditions warrant. Schedules for residence halls and dining facilities are published on the Residential Life rate sheet.

Room Reservation/Damage Deposit Fee

A Room Reservation/Damage Deposit is required before housing will be assigned. The deposit will be refunded under the following conditions:

1. The student has been declared academically ineligible to enter, continue, or return to New Mexico Tech.
2. The term of the student's Room and Board Agreement has been completed (i.e., the student has remained in the Residence Hall the entire academic year), and no damage has been noted.

If the student has filled out the necessary paperwork to ensure himself/herself a room for the semester but cancels the room reservation or does not show up for check-in by the first day of classes, the student is subject to the Room Cancellation Policy. If a student is unable to check in by the first day of classes, he or she must request, in writing, to have the room set aside for a specific day. This specific day should not exceed a week from the first week of classes.

Sports Activities Fee

This fee is charged each semester in support of the intramurals program and corresponding facilities.

Student Activities Fee

All students pay a Student Activities Fee each semester. The funds collected are disbursed to the student organizations and activities according to a budget prepared by the Student Association and approved by the administration.

Student Center Fee

A Student Center Fee provides monies to amortize and support the Joseph A. Fidel Center.

Student Counseling Fee

Approved by the Student Association, this fee provides a base to make counseling and support available to the students of New Mexico Tech.

Technology Support Fee

The Technology Support Fee provides a base for the support and services to maintain wireless and computer technology across the campus.

Withdrawal Fee

Students who withdraw from a class or classes after registration closes must pay a withdrawal fee for every withdrawal authorization form.

Tuition

Dining and Meal Plans

Dining Possibilities at New Mexico Tech

Dining at New Mexico Tech is a great aspect to living on campus. NMT Dining, our food service provider, continually strives to improve the dining services to students at New Mexico Tech. We have several meal plan options available to our residents and student population. Every student who lives in a residence hall must purchase a meal plan and there are many options available sure to fit your needs.

The New Mexico Tech food service operations are located on the ground floor of the Joseph A. Fidel Student Services Center, and include the main dining room and Fire and Ice coffee shop. Both are operated by Chartwells, a division of the Compass Group. The main dining room features a variety of stations with food options ranging from international cuisines to burgers and fries to home-style cooking. Special events and theme meals are offered on a regular basis. For more information about dining and specific meal times, please visit the NMT Dining website: **http://www.dineoncampus.com/nmt/.**

It is mandatory for all undergraduate residents to purchase a meal plan. The size of the meal plan required depends on the student's living arrangements. The number of meals in a meal plan are for an entire semester. Meals remaining at the end of the semester cannot be carried over to the next semester. No refunds will be given for meals not eaten. Dollars work like cash and are accepted at the Fire and Ice coffee bar, which is just outside the dining room on the ground floor of Fidel. For more information about meal plan choices, please visit our website: **https://nmt.edu/reslife/dining.php.**

Tuition

Room (Apartment or Residence Hall) Cancellation Policy Entering Students

Tuition and Applicable Fees, Summer Semester		
• Prior to 5 p.m. on the second Tuesday after summer classes begin	The student who drops any or all summer classes at New Mexico Tech prior to 5 p.m. on the second Tuesday after classes begin will receive a 100% refund.	
• After the second Tuesday after classes begin	No refunds are made to students who drop or withdraw from any or all summer classes after the second Tuesday after classes begin.	
• Financial Aid Implications	Student receiving financial aid who withdraw from all classes are subject to a Return of Title IV Funds policy, which returns funds to the financial aid programs. For further information, see Return of Title IV Funds.	

Students entering University housing for the proceeding semester may cancel their Room & Board Application and License Agreement without financial penalty by June 1 (for the proceeding fall term), December 1 (for the proceeding spring term) and May 1 (for the proceeding summer term).

Between above dates and Opening Day for those respective terms, the student will be charged a $400 fee for breaking the Agreement/not checking in by the first day of classes.

Room cancellations made after the first day of classes are not eligible for refund of room or board. Fall semester residents who request cancellation of their room & board for the following Spring semester will still be charged for room & board if they remain enrolled at the University.

Term dates are available on the current Residential Life Rates Sheet.

Cancellations must be in writing. No cancellations will be accepted over the phone. Students with extenuating circumstances for canceling the Agreement may request a waiver of the cancellation fee and/or room & board charges by submitting a written waiver request to Residential Life. The request will be reviewed by a committee.

Returning Students

- Returning students may cancel their agreement for the upcoming academic year prior to June 1st without penalty.
- Agreements canceled after June 1st will incur a $400 penalty.
- Room cancellations made after the beginning of the Apartment/Residence Hall term will receive no refund on their room rent.
- Fall semester residents who cancel their room for the following Spring semester will still pay the cost of the room.
- Term dates are available on the Residential Life web site. https://www.nmt.edu/reslife/

Cancellations must be in writing. No cancellations will be accepted over the phone. Students with extenuating circumstances for canceling their residence hall agreement must request a waiver of the penalty fee in writing to the Residential Life Office. The request will be reviewed by a committee.

Boarding Plans

You may not cancel or make any changes to your meal plan after the first week of classes each semester. Students with extenuating circumstances who wish to cancel their meal plan must send a request, in writing, to the Office of Housing & Residential Life (HRL). For more information on HRL's cancellation policy, please follow the associated link: https://www.nmt.edu/reslife/policies/cancellation-policy.php

Community Education

New Mexico Tech Community Education

www.nmt.edu/ce

The New Mexico Tech Community Education Program provides credit and non-credit enrichment courses in Physical Recreation, Studio Arts, Lifestyle Activities, general Community Education, and Certification programs. Courses are open to New Mexico Tech students, faculty, staff, and the surrounding community. No degrees are offered through the Community Education Program.

Community Education courses may be found on Banweb class schedules with the following prefixes:

- CONC (Community Education Non-Credit)
- CERT (Certification programs non-credit)
- CEFA (Studio Art Enrichment courses)
- LIFE (Lifestyle non-credit)
- MUSV (Music Performance enrichment courses)
- CEPR (Physical Recreation enrichment courses)

Community Education classes, which are signified by a "C" following the course number, are graded on an satisfactory/unsatisfactory (S/U also known as pass/fail) basis and can be used as elective credit in most majors. Community Education credit classes do not count towards Core General Education requirements. The Community Education Program also offers non-credit courses such as Wine Tasting and cooking classes.

Full-time undergraduate students do not pay extra tuition when these courses are part of their 12-18 hour course load. Full-time graduate students may enroll for 1 credit of Community Education coursework beyond their 12 hour credit limit, at no extra charge (see graduate catalog for restrictions).

Students who are not pursuing a degree program, such as community members or staff, are classified as non-degree seeking students. They are limited to a maximum of six credit hours per semester. Non-degree students who have never taken a class at Tech need to complete an Application for Admission Form and can do this application through the office of Community Education. After being admitted, students will be able to register for courses and can do so through the Office of the Registrar or Community Education.

A great deal of information may be found at the department website at www.nmt.edu/ce including downloadable catalogs with course descriptions. To speak with someone about the Community Education program, please visit the offices in Fidel 288 or call 575.835.6581

Residency

Applying for and Changing your Residency

Requirements to establish New Mexico residency: If you are over 18 years of age, you may become a legal resident of New Mexico for tuition purposes by meeting each of the following requirements as defined by the New Mexico Higher Education Department.

1. **Twelve month durational requirement.**

A person must physically reside in New Mexico for the twelve consecutive months immediately preceding the term for which the resident classification is requested.

2. **Financial independence requirement.**

Only persons who are financially independent may establish residency apart from parents or guardians. A student cannot be approved for residency who is financially dependent upon his or her parents or legal guardians who are nonresidents of New Mexico. Dependency is always determined by the status of the student on their parent's or guardians previous year federal income tax form. If the student is shown to be dependent, they will not be considered financially independent or eligible for residency during the current year.

3. **Written declaration of intent requirement.**

The student or person must sign a written declaration of intent to relinquish residency in any other state and to establish it in New Mexico, this is also known as the Application for In-State Residency.

4. **Overt acts requirement.**

Overt acts are required as evidence support of the written declaration of intent to establish permanent residency in New Mexico. The required overt acts are evidence of any two of the following:

- If the applicant is financially dependent, a copy of the parent or guardians' previous year income tax showing the applicant as a dependent and the parent address as New Mexico; or
- A New Mexico high school transcript issued in the past year confirming attendance at a New Mexico public or private high school completing as least 2 semesters (12) months; or
- A transcript from an online high school showing a New Mexico address confirming attendance with the completion of 2 semesters twelve (12) months; or
- A New Mexico driver's license or ID card with an original date of issue or a renewal date issued prior to the application date for admission; or
- Proof of payment of New Mexico state income tax for the previous year; or
- Evidence of employment within the state of New Mexico; or
- New Mexico vehicle registration; or
- Voter registration in New Mexico; or
- A bank account established in New Mexico prior to the application date for admission; or
- Proof of residential property ownership in New Mexico; or
- A rental agreement within New Mexico; or
- Utility bills showing the applicant name and a New Mexico address; or
- Other evidence which would reasonably support the individual's intent to establish and maintain New Mexico residency.

Any act considered inconsistent with being a New Mexico resident will cause the request for resident classification to be denied. As such, other relevant factors may be considered in addition to the items listed in this section.

The Higher Education Department recognizes that there may be circumstances in which a student would not be able to fulfill the requirements of an overt act as listed in this section, such as: 1) individual is physically disabled and does not have a driver's license, or 2) individual is a convicted felon and therefore cannot vote, etc. In instances such as these, the institution will afford the student an opportunity to provide other documentary evidence or reasonable explanation which demonstrates that permanent residency in New Mexico has been established by the student.

All petitions for New Mexico residency are due on registration day and in no case later than the 21st day of the fall or spring semester. You will not be entitled to any refund of tuition if you become a resident during a semester, summer session, or other term. Detailed information concerning residency requirements is available from the Registrar on NMHED at https://hed.nm.gov/financial-aid/residency-requirements.

Requesting Transcripts

In order for your official transcript to be released, you must have a zero balance or a credit balance at New Mexico Tech. Should you have a balance, contact NMT's Student Accounts by phone at 575.835.5338.

New Mexico Tech has partnered with Parchment Send to fulfill transcript orders. Transcripts are ordered online at **http://www.nmt.edu/registrar/transcripts.php**. The student will initially need to create an account with Parchment using an email and password of choice.

Information Needed to Create a Parchment Account

You must provide the following information:

- Your name, address and phone number.
- The name you had when you attended NM Tech
- Your NM Tech ID and last 4 digits of your Social Security number or your full Social Security number if Tech ID is unknown.
- The approximate years you attended NM Tech

Ordering a Transcript

You can order an official transcript through Parchment to be delivered at **https://www.nmt.edu/registrar/transcripts.php**:

- Transcripts can be ordered electronically or by mail.
    - There is a search feature in Parchment to look up institution information.
    - When using this feature, if the institution name, acronym, location, or email does not match the address you would like to send it to, please use the "Send to Yourself, Another Individual, or Third Party" option.
- For pickup by the student (or authorized individual) in the Office of the Registrar. Note that you must request the transcript through the "Send to Yourself, Another Individual, or Third Party" option for pickup.
- There is an option to "Hold for Grades" or "Hold for Degree." When selected, the order will be processed once final grades have been processed or degree has been conferred, respectively.

There is an option to upload attachments to the transcript if needed.

With the exception of transcripts ordered for pickup, all transcript orders are processed and fulfilled through Parchment. Once the order has been processed, the Office of the Registrar cannot track transcripts. Parchment will notify the student once the order has been fulfilled.

Unofficial Transcripts

Unofficial paper transcripts are available for in-person pickup only; the student must provide a valid photo ID. The Office of the Registrar cannot provide electronic unofficial transcripts. Unofficial transcripts can also be obtained by the student through Banweb.

Terms & Abbreviations

Terms and abbreviations of academic policies at New Mexico Tech. Click the terms on the left.

Terms & Abbreviations

Academic Load

The academic year at Tech consists of two semesters. A class hour is 50 minutes in length; ordinarily, a laboratory period is about three times as long. One class hour or laboratory period a week through a semester gives one credit hour.

Terms & Abbreviations

Undergraduate Student Load

A full-time undergraduate should carry an academic load of approximately 16 credit hours per semester for the fall and spring semesters. During the summer session, 6 credit hours is a full-time load; 3 credit hours is half-time.

Terms & Abbreviations

Graduate Student Load

Full-time graduate students must carry a load of at least 9 credits each fall and spring semester. Graduate students on assistantships must carry at least 12 credits. Fine Arts (FA), Community Education courses (CED), Health and Wellness (HW), and Physics Recreation (PR), do not count toward the minimum credit hours for graduate students. Graduate loads only count courses numbered 3000 and above, except when preapproved with a lower division course approval signed by the Graduate Dean.

Terms & Abbreviations

Veteran Student Load

The Veterans Administration requires students on the GI Bill to carry a minimum of 12 credit hours (6 credit hours in summer) to qualify for full benefits. Physical Recreation (PR), Fine Arts (FA), and Community Education courses (designated by the letter "C" in the course number) do not count toward the minimum credit hours for veterans. Complete information can be obtained in Veterans Affairs located in the Financial Aid Office.

Terms & Abbreviations

Auditing a Class

If you wish to participate in a course to learn about the subject but not be required to earn a letter grade, you can audit the course. You will receive a grade of satisfactory audit (SA) or unsatisfactory audit (UA) as determined by the instructor, but no credit. Payment is the same as for a credit class. Professors will expect you to attend class and to be prepared to participate in the course.

Graduate Auditing a Class

Graduate students who earn unsatisfactory audits are not making satisfactory academic progress. Graduate students may only audit at most one (3-4 credit) course.

Terms & Abbreviations

Challenge Exams

If you think you already know the material in a course you are required to take, ask the department chair for a challenge exam. For a fee, you will be tested on the course material. Please refer to **Course Waivers** for more information on challenge exams.

Terms & Abbreviations

Course Numbers

Courses numbered from 100 -199/1000-1999 are intended primarily for first-year students; 200-299/2000-2999 for second-year students (sophomores); 300-399/3000-39999 for third-year students (juniors); 400-499/4000-4999 for fourth-year students (seniors); and 500-599/5000-5999 for graduate students. Graduate students may be allowed credit for courses numbered 3000 and above. Exceptions for undergraduate students may be made with the approval of the major advisor and instructor, Exceptions for Graduate students may be made with the approval of the Academic advisor, instructor and Dean of Graduate studies.

Terms & Abbreviations

Credit Hours

Credit hours for all courses, including synchronous and asynchronous distance delivery courses, are measured in class hours (cl hrs), lab hours (lab hrs), or recitation/discussion hours (recitation hrs). “1 cl hr” and “1 recitation hr” correspond roughly to one hour spent in class each week during a standard 16-week semester and is equivalent to one (1) credit hour. “3 lab hrs” equals about three hours per week in the laboratory during a standard 16-week semester and is also equivalent to one (1) credit hour. In addition to class and lab time, students can expect to spend about two hours of study and preparation for each credit hour of class. Most one-semester classes average three credit hours.

Summer courses and other compressed-format courses are required to meet the requirements stated above regardless of their shortened term.

To graduate with a bachelor’s degree, you will need a minimum of 120 credit hours, depending on your chosen major.

Terms & Abbreviations

Directed Study

Directed studies are specialized independent created courses and are usually self-paced 3000- to 5000-level classes. Typically, a directed study is research-oriented and allows you to work and progress in a relatively unstructured situation. To sign up, you will need the instructor's permission, the approval of the department chair, and a special form from the Office of the Registrar.

Terms & Abbreviations

Graduate Directed Study

Directed Study may only be counted toward graduate degrees with earned letter grades of A through C and permission of the student's graduate committee.

Terms & Abbreviations

Electives

Electives are courses taken in addition to the specific courses required by your major. Electives bring your credit hours up to the required number for graduation. Some majors allow students to choose many electives; others, few. Please refer to the specific degree requirements for your major.

New Mexico Tech's Community Education classes (designated by the letter "C" in the course number) may not be used to fulfill the General Education Core Curriculum Requirements for an Undergraduate Degree. However, some majors allow students to use these classes to fulfill elective credit.

Terms & Abbreviations

Graduate Electives

All graduate electives must be 3000-level or above and graded with a letter grade (A through C). See your program requirements for further restrictions.

Terms & Abbreviations

General Education Core Curriculum Requirements

These are courses in humanities, mathematics, and basic science which all undergraduate students must complete in order to graduate. The general degree requirements are generally met by the end of your sophomore year.

Terms & Abbreviations

Good Academic Standing (Undergraduate)

Graduate students: see information on Satisfactory Progress.

A regular degree-seeking undergraduate student will be considered to be in good standing if the student maintains the minimum semester grade-point average (GPA) listed below:

TOTAL SEMESTER HOURS ATTEMPTED (CUMULATIVE)	MINIMUM SEMESTER GPA NEEDED TO MAINTAIN GOOD STANDING
0-29	1.60
30-59	1.80
60 or more	2.00

For determination of academic standing, "semester hours attempted" means courses in which a student earns grades of A, A-, B+, B, B-, C+, C, C-, D+, D, F, S, U, and all transfer credits. SA, UA, W, or WO. Transfer credits are not used in computing the GPA, but are used to calculate attempted credit hours.

A student whose semester GPA falls below the minimum requirements needed for good standing will be placed on **Academic Probation**.

Terms & Abbreviations

Academic Warning

Academic Warning is an intervention program designed to help students get back on track with their academics. Students are placed in the Warning program if either their semester or cumulative GPA falls below 2.0 regardless of their academic standing. Students on Warning are required to complete an Academic Success Plan, which is submitted to the Associate Dean for Student Success. A member of the Academic Standards and Admissions Committee will review and approve the plan. A registration hold is placed on the students' account and will be removed once the student is off Warning. While on Warning, all registration processes are done with the appropriate registration form.

Terms & Abbreviations

Grade Point Average (GPA)

Your semester GPA is found by multiplying the number of credit hours for each course with a number corresponding to your grade in the course and then dividing by the total number of credit hours in the semester. A=4, B=3, C=2, D=1, F=0. For example, a student taking two three-hour courses who received an A and a B would have a GPA for that semester of 3.5.

([(3 x 4.0) + (3 x 3.0)]/[3 + 3]=21.0/6=3.5)

See **Academic Policies** for a complete list of possible grades and their grade points.

Courses taken for grades of S, U, SA, and UA are not calculated in your GPA.

Your cumulative GPA is an average over your entire Tech career. Transfer credits are not included in your cumulative GPA.

Terms & Abbreviations

Major

Your major is your primary field of study. The number of credit hours required in your major varies by program. Since your choice of major determines which courses you are required to take, it is advisable to declare your major as soon as possible. You may change majors at any time, but the earlier the better.

You must declare a major and be assigned a major advisor prior to completing the coursework for the major. You may declare or change your major in the Office of the Registrar.

Terms & Abbreviations

Minor

New Mexico Tech awards minors for your secondary field of study. (See **Degrees Offered** for a list of minors.) The number of credits required for a minor vary from department to department, a minimum of 18 credit hours is required. Students cannot earn a minor with either the Associate of General Studies or Bachelor of General Studies.

You must declare a minor and be assigned a minor advisor prior to completing the coursework for the minor. You may declare or change your minor in the Office of the Registrar. Minors cannot be earned or added after a degree has been conferred.

Terms & Abbreviations

Prerequisites and Corequisites

Some courses have prerequisites, courses you must successfully complete before enrolling in that course. Exceptions may be made with approval of the instructor and advisor. If you enroll in a course in which you do not have the prerequisites without the proper approval, you may be disenrolled.

Corequisites are courses taken during the same semester.

Prerequisites and corequisites are not determined by the student's individual catalog, but rather by the catalog in effect at the time that the course is offered.

Terms & Abbreviations

Satisfactory Academic Progress for Financial Aid

To be in good standing for financial aid purposes, a student must earn at least 67 percent of Total hours attempted with a cumulative G.P.A. of:

- 1.6 if you have attempted 0 to 29 credit hours
- 1.8 if you have attempted 30 to 59 credit hours
- 2.0 if you have attempted 60 or more credit hours

See **Financial Aid** for further information about satisfactory academic progress for financial aid purposes.

Terms & Abbreviations

Validation

Validation is acceptance of your financial responsibilities to New Mexico Tech for all courses you are registered for. You must validate with the New Mexico Tech Business Operations before your registration process can be considered complete. Students who are not validated by the Wednesday before the drop deadline (fall and spring semesters) and on Friday (summer semesters) are subject to disenrollment from classes.

Air Force Aerospace Studies (program) Department

Air Force ROTC

(AFROTC)

AFROTC Detachment 510
(Aerospace Studies Building 159)
MSC02 1650 / 1901 Las Lomas NE
1 University of New Mexico
Albuquerque, NM 87131-0001
(505) 277-4502

http://afrotc.unm.edu/

The mission of the Air Force ROTC is to provide instruction and experience to all cadets in a diversified college or university environment, so they can graduate with the knowledge, character, and motivation essential to becoming leaders in the United States Air Force. The Air Force ROTC approach to education encourage inquiry, analysis, critical thinking, imagination, judgment, and individual participation on the part of each student.

Air Force ROTC Commissioning Program

The Air Force ROTC commissioning program is open to qualified students in all academic majors that will allow for the necessary AFROTC attendance and participation requirements. The program is divided into a General Military Course (GMC) and a Professional Officer Course (POC). The latter is the final commissioning phase for those students who qualify and desire a commission in the United States Air Force or United States Space Force. Both the GMC and POC programs require students to enroll in an Aerospace Science Leadership Laboratory each semester.

This department is administered by personnel of the United States Air Force and/or United States Space Force under rules promulgated by the Department of the Air Force and the University of New Mexico.

Students may enter Air Force ROTC from any high school, college, or university. Transfer students with a ROTC background can receive credit for previous ROTC experience.

Following successful completion of the Air Force ROTC program, each individual is commissioned as a second lieutenant in the United States Air Force or United States Space Force. Full pay and benefits begin upon initial assignment to active duty.

- ***Professors:*** *DeVeaux (Chair of the Department)*

- ***Associate Professor:*** *Duval*
- ***Assistant Professor:*** *Sharbrough*
- ***Instructor:*** *Goncz*
- ***Emeritus Faculty:*** *Reiss, Smoake , Kieft, Rogelj*

Degree Programs Offered: *BS-BIOLOGY, B.A. in Biology; B.S. in Biomedical Sciences with options in Biology, Chemistry, and Psychology & Neuroscience; M.S. in Biology; and M.S. in Biology with Specialization in Biochemistry*

Additional Program Offered: *Accelerated M.S. Program*

The mission of the Biology Department is to provide students with a relevant education for Biomedical and Biotechnological careers; to lead in molecular, biological, and environmental life science research; and to serve the university and the scientific community. The Biology program prepares undergraduate students for graduate education in the medically allied professions and in the specialized fields of the biological sciences. **Students who are interested in pre-medical, pre-dental, and pre-veterinary science programs should discuss appropriate course electives with their advisor.**

A wide variety of career opportunities is currently available for those individuals possessing advanced knowledge and skills, particularly in the areas of biochemistry, molecular biology, microbiology, ecology, genetics, endocrinology, and immunology. Market demand in these areas will likely remain strong for the foreseeable future.

Undergraduate majors typically have diverse career goals and objectives. To accommodate these differences, the undergraduate program is very flexible; only a minimal number of technical core courses is required. Through the selection of appropriate technical electives, each student customizes their education based on personal academic needs and career objectives.

The main approach in the classroom is to stress the highly quantitative and analytical nature of modern biological inquiry, which utilizes sophisticated biochemical and biophysical techniques to answer fundamental questions about living organisms. Undergraduates are encouraged to undertake research through various directed study and special topics offerings and are often employed as technicians in the research laboratories of the faculty.

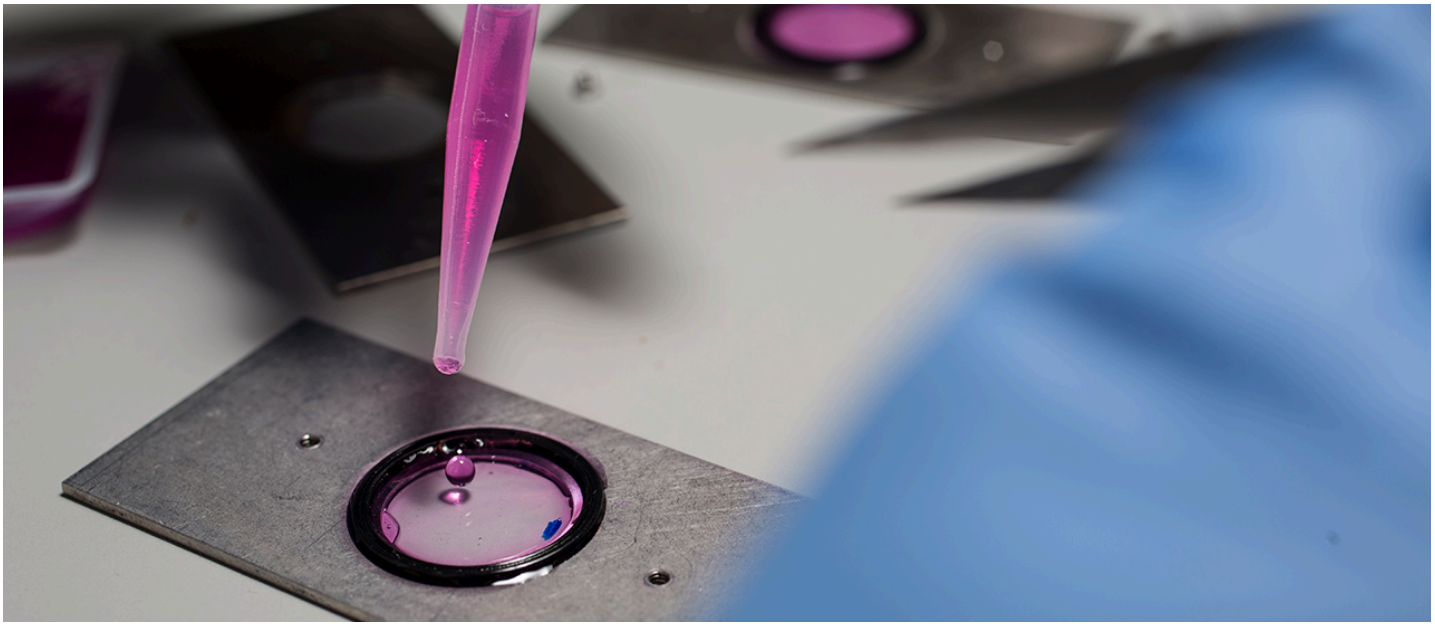
Programs

Accelerated M.S. in Biology (pathway)
Biology (minor)
BA- BIOLOGY - Bachelor of Arts in Biology
BS-BIOLOGY - B.S. in Biology
BS-BMS - B.S. in Biomedical Sciences
MS-BIOLOGY - M.S. in Biology

Courses

BIOL1131 - Intro to Biology & BMS
BIOL1141 - A Survey of Anatomy & Physiology for Allied Health
BIOL2110 - Pinciples of Biology: Cellular & Molecular
BIOL2110L - Pinciples of Biology: Cellular & Molecular Lab
BIOL2141 - Seaphage: Phage Discovery
BIOL2142 - SEAPHAGE: Phage Genome Annotation
BIOL2331 - Psychobiology of Sex
BIOL2610 - Principles of Biology: Biodiversity, Ecology, and Evolution
BIOL2610L - Principles of Biology: Biodiversity, Ecology, and Evolution Lab
BIOL3001 - Genetic Engineering: At the Bench
BIOL3011 - Genetics
BIOL3011L - Genetics Lab
BIOL3031 - Cell Biology
BIOL3041 - Intro Microbiology
BIOL3041L - Introductory Microbiology Lab
BIOL3043 - Environmental Microbiology
BIOL3043L - Environmental Microbiology Lab
BIOL3044 - Introductory Ecology
BIOL3044L - Introductory Ecology Lab
BIOL3045 - Evolutionary Biology
BIOL3050 - Psychobiology of Sex
BIOL3051 - Anatomy & Physiology
BIOL3051L - Anatomy and Physiology Lab I
BIOL3052 - Anatomy and Physiology II
BIOL3052L - Anatomy & Physiology II Lab
BIOL3062 - Animal Behavior
BIOL4002 - Ecosystem Biology
BIOL4009 - Cell and Molecular Neuroscience
BIOL4010 - Neurology
BIOL4011 - Advanced Genetics
BIOL4019 - Ecotoxicology
BIOL4031 - Virology
BIOL4035 - Bioinformatics
BIOL4037 - Infection and Immunity
BIOL4043 - Molecular Biology
BIOL4043L - Molecular Biology Lab
BIOL4049 - Astrobiology
BIOL4055 - Molecular Ecology
BIOL4070 - Biology CURE
BIOL4071 - Life Sciences Seminar
BIOL4081 - FreeStyle Biosciences
BIOL4091 - Special Problems
BIOL5000 - Directed Research
BIOL5001 - Graduate Seminar
BIOL5002 - Ecosystem Biology
BIOL5011 - Advanced Genetics
BIOL5019 - Ecotoxicology
BIOL5031 - Virology
BIOL5035 - Bioinformatics
BIOL5037 - Infection and Immunity
BIOL5042 - Advanced Microbiology
BIOL5043 - Molecular Biology
BIOL5043L - Molecular Biology Lab
BIOL5049 - Astrobiology
BIOL5064 - Molecular Ecology
BIOL5081 - Directed Study
BIOL5082 - FreeStyle Bio Sciences
BIOL5090 - Independent Study
BIOL5091 - Thesis
BMST3000 - Biomedical Sciences Seminar
BMST3001 - Genetic Engineering: At the Bench
BMST4095 - Biomedical Research & Design: Science
BMST4096 - Biomedical Research & Design: Engineering
BMST5093 - Biomedical Research & Design: Science
BMST5094 - Biomedical Research & Design: Engineering

Biology Dept/ Biomedical Sciences (program) Department



Bachelor of Science in Biomedical Sciences (all options)

The Bachelor of Science in Biomedical Sciences (BMS) is a broadly interdisciplinary degree, drawing on knowledge from both science and engineering. Students take a common set of core courses from several disciplines. For more in-depth study, they select an option in Biology, Chemistry, or Psychology & Neuroscience along with a concentration in one of four engineering fields: Biochemical Engineering, Bioinformatics, Biomaterials Engineering, or Biomechanical Engineering.

Minimum credit hours required—120

Program Educational Objectives:

Our graduates will

- Acquire breadth of knowledge spanning biological sciences and engineering.
- Design and conduct scientific research and conduct engineering design projects.
- Understand research and career opportunities in BMS.

Science Options:

- Biology Option
- Chemistry Option
- Psychology & Neuroscience Option

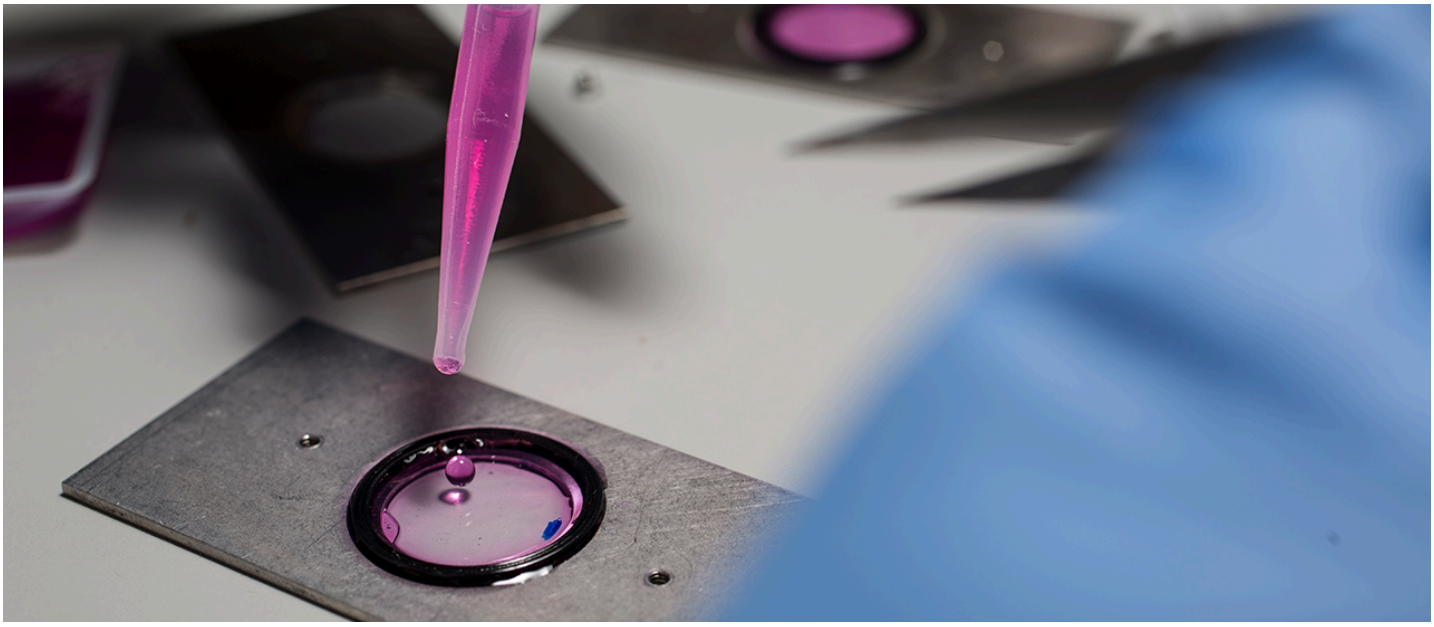
Engineering Concentrations:

- Biochemical Engineering
- Bioinformatics
- Biomaterials Engineering
- Biomechanical Engineering

Programs

BS-BMS - B.S. in Biomedical Sciences

Biotechnology (program) Department



Degree Offered: *Doctor of Philosophy in Biotechnology*

Graduate Program

Doctor of Philosophy in Biotechnology

Students of exceptional ability, as demonstrated in previous courses or in a Master's degree program, may pursue a program leading to the Doctoral degree.

The prospective doctoral candidate in biotechnology should develop a good background in biology, chemistry, and mathematics plus at least one of the following: computer science, mechanical engineering, chemical engineering, or materials engineering. Additionally, students should achieve a high level of competence in the field of specialization defined by their dissertation research. Additional information is found in the Graduate Program section of the catalog.

Research fields appropriate for the biotechnology candidate include bioengineering, molecular biology, microbiology, tissue engineering, pathogen detection, drug discovery, drug delivery, medical instrument development, neuroscience, and biochemistry. Interdisciplinary projects are strongly encouraged.

Programs

PHD-BIOT - Ph.D. in Biotechnology

Courses

BIOT5000 - Directed Research
BIOT5000 - Directed Research
BIOT5002 - Molecular Biotechnology
BIOT5003 - Biochemical Technology
BIOT5004 - Biophysical Technology
BIOT5005 - Biomechanical Technology
BIOT5010 - Behavioral Neuroscience
BIOT5015 - Geomicrobiology
BIOT5031 - Experimental Cell Biology & Biotechnology
BIOT5031L - Experimental Cell Biology Lab
BIOT5035 - Bioinformatics
BIOT5041 - Applied Microbiology
BIOT5076 - Drug Delivery
BIOT5078 - Principles of Drug Design
BIOT5080 - Entrepreneurial Biotechnology
BIOT5081 - Directed Study
BIOT5095 - Dissertation

CEE Dept/ Civil Engineering Department

Civil Engineering

(Civil and Environmental Engineering)

- ***Professors:*** *Richardson (Chair of the Department)*
- ***Associate Professor:*** *Wilson, Cook*
- ***Assistant Professor:*** *Morris*
- ***Adjunct Faculty:*** *Ghosh, Kuhn, Razavi*

Degree Offered: *B.S. in Civil Engineering*
M.S. in Civil & Environmental Engineering

Department Mission Statement

The primary objective of this program is to produce well-balanced civil engineers capable of entering the Civil Engineering profession or continuing their studies at the graduate level. Graduates will be well-prepared to solve current Civil Engineering problems, and they will have the ability to adapt to problems of the future.

The achievements of civil engineers are well-known to the general public, because civil engineers build the world's infrastructure. In doing so, they can shape the history of nations. Projects that civil engineers work on include: airports, bridges, buildings, dams and waterways, drainage and sewer systems, city roads, and highways.

The undergraduate program offers a balanced approach to civil engineering education. Students take a common core of Civil Engineering courses, and they can specialize in the areas of geotechnical, water resources, or structural engineering. The program is also designed to give students a solid foundation in engineering and science. Students take courses in chemistry, physics, and math, in addition to a core set of engineering courses common to most engineering disciplines.

The civil engineering courses teach students the fundamentals of engineering design, as well as potential applications. Students are taught how to use computer software to expedite the design process, and they are also taught how to balance engineering designs with economic constraints. During their senior year, undergraduate students work with a professor on a design project.

Program Educational Objectives

1. To develop graduates that function successfully in the fundamental areas of civil engineering, and within a specialty, such as structural, geotechnical or water resources engineering.

2. To prepare graduates for advanced education in civil engineering and related fields, and for professional licensure.

Faculty Interests:

Cook — Full-scale infrastructure destructive testing, bridge risk assessment (observed failures).

Ghosh — Macro behavior of composites, structural health monitoring and restoration.

Kuhn — Geotechnical engineering.

Morris — Geophysical methods and applications, structural health monitoring.

Richardson — Environmental assessment, groundwater contamination, site remediation.

Wilson — Structural vibration control, fuzzy control, earthquake engineering.

Programs

Accelerated M.S. in Civil & Environmental Engineering (pathway)
Civil Engineering (minor)
BS-CE - B.S. in Civil Engineering
MS-CEE - M.S. in Civil & Environmental Engineering

Courses

CE101 - Civil Engineering Seminar
CE201 - Construction Matl/ Prop/Test
CE3001 - Introduction to Construction Engineering
CE3002 - Introduction to Structural Engineering
CE4001 - Finite Element Analysis for Civil Engineers
CE4002 - Introduction to Transportation Engineering
CE4003 - Infrastructure
CE4006 - Design of Steel Structures
CE4007 - Design of Concrete Structures
CE4010 - Reinforced Masonry and Wood Design
CE4011 - Minimum Design Loads Buildings
CE4012 - Adv. Design Of Steel Struct.
CE4013 - Foundation Design & Analysis
CE4014 - Adv Design of Concrete Struct
CE4015 - Green Building
CE4016 - Non-Destructive Testing & Structural Health Monitoring
CE4018 - Structural Dynamics
CE4022 - Geotechnical Waste Containment
CE4023 - Open Channel Hydraulics
CE4081 - Senior Engineering Design I
CE4082 - Senior Engineering Design II
CE4091 - Special Topics
CEE5001 - Finite Element Analysis for Civil Engineers
CEE5002 - Intro to Transport Engineering
CEE5003 - Risk Assessment
CEE5004 - Reinforced Masonry and Timber
CEE5005 - Infrastructure
CEE5006 - Design of Steel Structures
CEE5007 - Design of Concrete Structures
CEE5009 - Adv Des of Concrete Structures
CEE5010 - Advanced Water Chemistry
CEE5011 - Water quality management
CEE5012 - Industrial Water and Wastewater Treatment
CEE5013 - Air Resources Engineering
CEE5014 - Energy & Environment
CEE5015 - Green Building
CEE5016 - NDT & SHM
CEE5018 - Structural Dynamics
CEE5020 - Hazardous Waste Site Remediation
CEE5021 - Green Engineering
CEE5022 - Geotechnical Waste Containment Design
CEE5023 - Open Channel Hydraulics
CEE5024 - Physicochemical and Biological Processes
CEE5041 - Min Design Loads for Buildings
CEE5043 - Foundation Design & Analysis
CEE5051 - Graduate Seminar
CEE5071 - Special Topics in Environmental Engineering
CEE5081 - Directed Study
CEE5090 - Independent Study
CEE5091 - Thesis

- ***Professors:*** *Richardson (Chair of the Department)*
- ***Associate Professor:*** *Carrico*
- ***Assistant Professor:*** *Harb*
- ***Adjunct Faculty:*** *Brady, Cal, Schluep*

Degrees Offered: B.S. in Environmental Engineering; M.S. in Civil and Environmental Engineering (please refer here for additional information on the graduate degree)

Department Mission Statement

The primary objective of this program is to produce well-balanced environmental engineers capable of entering the environmental engineering profession or continuing their studies at the graduate level. Graduates will be well-prepared to solve current environmental engineering problems, and they will have the ability to adapt to problems of the future.

By providing relevant experiences and building requisite technical skills and judgment cumulatively through rigorous problem solving, the program will instill the confidence needed for students to emerge as leaders in the field of environmental engineering

Program Educational Objectives

1. To develop graduates that function successfully in areas of environmental engineering, such as air pollution, water and wastewater treatment, and solid and hazardous waste engineering.
2. To prepare graduates for advanced education in environmental engineering and related fields, and for professional licensure.

The achievements of environmental engineers are well-known to the general public, because environmental engineers are charged with producing clean water, disposing of waste responsibly, and maintaining air quality. Projects that environmental engineers work on include: design of water and wastewater treatment facilities, landfill design, design of air pollution control devices, and environmental law and permitting. The undergraduate program offers a balanced approach to environmental engineering education.

Students take a common core of engineering science and environmental engineering courses, including courses in environmental law, water and wastewater treatment, soil mechanics, soil and hazardous waste, hydrology and air pollution control. The environmental engineering courses teach students the fundamentals of engineering design, as well as potential applications. Students are taught how to use computer software to expedite the design process, and they are also taught how to balance engineering designs with economic constraints. During their senior year, undergraduate students work with a professor on a design thesis

Programs

Accelerated M.S. in Civil & Environmental Engineering (pathway)
Environmental Engineering (minor)
BS-ENVE - B.S. in Environmental Engineering
MS-CEE - M.S. in Civil & Environmental Engineering

Courses

ENVE101 - Environmental Engineering Seminar
ENVE201 - Introduction to Environmental Science & Engineering
ENVE3001 - Applied Priciples of Environmental Engineering
ENVE3002 - Environmental Law & Regulations
ENVE3003 - Water Treatment Process Design
ENVE3004 - Wastewater Treatment Process Design
ENVE4006 - Environmental Engineering Unit Operations
ENVE4011 - Solid & Hazardous Waste Engineering
ENVE4013 - Air Resources Engineering
ENVE4014 - Energy & Environment
ENVE4021 - Green Engineering
ENVE4080 - Environmental Engineering Senior Design
ENVE4090 - Senior Design Thesis I
ENVE4091 - Special Topics
ENVE4092 - Senior Design Thesis II

- **Professor:** Simpson (Dean of Arts & Sciences)
- **Associate Professors:** ChoGlueck, Dotson, Durao, Elliott (Chair of the Department), Kramer-Simpson, Mikhailova, Samuels, Thompson

- **Assistant Professors:** ChoGlueck, Elliott, Johnson, McCullough, Spruill
- **Instructors:** Apodaca, Benalil, Clattenburg, Cruz, Kieffer, Lackey, Olson
- **Adjunct Faculty:** Bouchey, de Dios Piñeda Guadarrama, Gabor Da Silva, Garcia Guillen Phillips, Sewell, Pias, Rowe, Smith, Stringer, Thomas, Wilkinson.
- **Emeritus Professors:** Campbell, Corey, Deming, Dezember, D. Dunston, S. Dunston, Etscorn, Holson, Lara-Martínez, Olsen, Wilson, Yee
- **Music Director:** Benalil

Degrees Offered: *B.S and B.A in Interdisciplinary Sciences, B.S and B.A in Psychology, B.S. in Technical Communication, Bachelor of General Studies (BGS), and Associate of General Studies (AGS). Minors Offered: Creative Thinking and Practice, Secondary Education, Hispanic Studies, History, Literature, Music, Philosophy, Psychology, Science Technology and Society, Technical Communication, Graduate Certificates: Scientific & Professional Communication. M.S. in Public Engagement in Science, Design, and Communication.*

The multidisciplinary Department of Communication, Liberal Arts, and Social Sciences develops students' ability to learn, reason, and communicate in diverse fields of study and areas of human experience. The CLASS Department's mission is threefold: to help students write well, think critically, and read widely; to provide an intellectual experience that increases students' awareness of human history, human cultures, and human values; and to encourage the lifelong study of human experience.

The Department provides virtually all courses in four of the six areas of the General Education Core. Curriculum required by the New Mexico Higher Education Department for the comprehensive education of undergraduates enrolled in New Mexico state institutions of higher education.

These areas are:

- Area 1: Communications (English Composition and Technical Writing)
- Area 4: Social Sciences (Political Science, Psychology, Social Science, Women's and Gender Studies);
- Area 5: Humanities (Communication, Creative Writing, Hispanic History, History, Languages, Literature, Media Studies, Philosophy, Popular Culture, Public Speaking, Technical Communication, Visual Art);
- Area 6 : Creative and Fine Arts (Art History, Music, Theater).

The Department offers degrees: an industry-endorsed Bachelor of Science in Technical Communication; both a Bachelor of Arts and Bachelor of Science in Psychology; a Bachelor of Arts and Bachelor of Science in Interdisciplinary Sciences, a Bachelor of General Studies, and Associate of General Studies. It also offers a Graduate Certificate in Scientific and Professional Communication; a Master of Science in Public Engagement in Science, Design, and Communication; and several minors, allowing students to enrich their studies at Tech to become successful professionals and knowledgeable members of society.

The programs in Psychology are designed to provide students with a scientific foundation in the methods and basic data in psychology and neuroscience and to prepare students for further work in all specializations within the field. The B.A. degree program allows more flexibility and breadth whereas the B.S. degree program emphasizes depth in quantitative skills. Psychology students acquire the fundamentals of learning and memory, perception, attention, reason and problem solving, emotion, thought, language and communication, the development of all these processes and their pathology. In addition, we apply psychology to other fields and teach techniques for measuring and studying psychological variables. Students conduct laboratory experiments on the psychological and physiological bases of behavior. The department has an invertebrate vivarium for laboratory classes and research. There are student opportunities for independent research.

Faculty Interests:
ChoGlueck—Philosophy of Science, Biomedical Ethics, Feminism.
Dotson — Scientific Controversies, Governing Risky Technology, Community Life.
Elliott — Neuroethology, Animal Communication, Psycholinguistics, Music Cognition, Auditory Perception, Educational Assessment.
Johnson—Modern Latin American Culture and Literatures.
Kramer -Simpson — Feedback, Transitioning from college to the workforce, Students developing research interests.
McCullough—Storytelling and Culture Linguistics Analysis, Integrative Complexity.
Mikhailova — Medieval History, Gender, Russian History, History of Science.
Samuels — Cognitive Development, Reasoning and Problem Solving, Memory, Brain Injury and Rehabilitation.
Simpson — ESL Writing, Graduate Student Communication, Technical and Scientific Communication.
Thompson — Risk perception in cybersecurity; Regulation of physiology and behavior by light; health effects of exposure to artificial light and eye disease.

Programs

Creative Thinking and Practice (Minor)
Hispanic Studies (minor)
History (minor)
Literature (minor)
Music (minor)
Philosophy (minor)
Psychology (minor)
Science, Technology, and Society (minor)
Technical Communication (minor)

Description:

This degree allows a student to plan a program of courses according to individual educational goals and career plans. The Bachelor of General Studies degree will be awarded after completion of 120 credit hours with a grade-point average of 2.0 or more.

The multidisciplinary Department of Communication, Liberal Arts, and Social Sciences develops students' ability to learn, reason, and communicate in diverse fields of study and areas of human experience. The CLASS Department's mission is threefold: to help students write well, think critically, and read widely; to provide an intellectual experience that increases students' awareness of human history, human cultures, and human values; and to encourage the lifelong study of human experience.

The Department provides virtually all courses in four of the six areas of the General Education Core. Curriculum required by the New Mexico Higher Education Department for the comprehensive education of undergraduates enrolled in New Mexico state institutions of higher education.

These areas are:

- Area 1: Communications (English Composition and Technical Writing)
- Area 4: Social Sciences (Political Science, Psychology, Social Science, Women's and Gender Studies);
- Area 5: Humanities (Communication, Creative Writing, Hispanic History, History, Languages, Literature, Media Studies, Philosophy, Popular Culture, Public Speaking, Technical Communication, Visual Art);
- Area 6 : Creative and Fine Arts (Art History, Music, Theater).

The Department offers degrees: an industry-endorsed Bachelor of Science in Technical Communication; both a Bachelor of Arts and Bachelor of Science in Psychology; a Bachelor of Arts and Bachelor of Science in Interdisciplinary Sciences, a Bachelor of General Studies, and Associate of General Studies. It also offers a Graduate Certificate in Scientific and Professional Communication; a Master of Science in Public Engagement in Science, Design, and Communication; and several minors, allowing students to enrich their studies at Tech to become successful professionals and knowledgeable members of society.

The programs in Psychology are designed to provide students with a scientific foundation in the methods and basic data in psychology and neuroscience and to prepare students for further work in all specializations within the field. The B.A. degree program allows more flexibility and breadth whereas the B.S. degree program emphasizes depth in quantitative skills. Psychology students acquire the fundamentals of learning and memory, perception, attention, reason and problem solving, emotion, thought, language and communication, the development of all these processes and their pathology. In addition, we apply psychology to other fields and teach techniques for measuring and studying psychological variables. Students conduct laboratory experiments on the psychological and physiological bases of behavior. The department has an invertebrate vivarium for laboratory classes and research. There are student opportunities for independent research.

Interdisciplinary Sciences Program

Degrees Offered: B.S. or B.A. in Interdisciplinary Sciences

The degree in Interdisciplinary Sciences is intended for the student who desires a science-focused Bachelor's degree but wishes more latitude in the selection of courses than is available otherwise. The BS is more suited to those who want a quantitative focus and the BA more suited to those who want to focus on social and life sciences or wish to have more exposure to non-STEM subjects (e.g., the humanities and arts). Both degrees pair well with the Undergraduate Minor in Secondary Education (UMSE), and students with this minor would discuss with their advisor which degree (BA or BS) is best suited for disciplines they wish to teach.

The multidisciplinary Department of Communication, Liberal Arts, and Social Sciences develops students' ability to learn, reason, and communicate in diverse fields of study and areas of human experience. The CLASS Department's mission is threefold: to help students write well, think critically, and read widely; to provide an intellectual experience that increases students' awareness of human history, human cultures, and human values; and to encourage the lifelong study of human experience.

The Department provides virtually all courses in four of the six areas of the General Education Core. Curriculum required by the New Mexico Higher Education Department for the comprehensive education of undergraduates enrolled in New Mexico state institutions of higher education.

These areas are:

- Area 1: Communications (English Composition and Technical Writing)
- Area 4: Social Sciences (Political Science, Psychology, Social Science, Women's and Gender Studies);
- Area 5: Humanities (Communication, Creative Writing, Hispanic History, History, Languages, Literature, Media Studies, Philosophy, Popular Culture, Public Speaking, Technical Communication, Visual Art);
- Area 6 : Creative and Fine Arts (Art History, Music, Theater).

The Department offers degrees: an industry-endorsed Bachelor of Science in Technical Communication; both a Bachelor of Arts and Bachelor of Science in Psychology; a Bachelor of Arts and Bachelor of Science in Interdisciplinary Sciences, a Bachelor of General Studies, and Associate of General Studies. It also offers a Graduate Certificate in Scientific and Professional Communication; a Master of Science in Public Engagement in Science, Design, and Communication; and several minors, allowing students to enrich their studies at Tech to become successful professionals and knowledgeable members of society.

The programs in Psychology are designed to provide students with a scientific foundation in the methods and basic data in psychology and neuroscience and to prepare students for further work in all specializations within the field. The B.A. degree program allows more flexibility and breadth whereas the B.S. degree program emphasizes depth in quantitative skills. Psychology students acquire the fundamentals of learning and memory, perception, attention, reason and problem solving, emotion, thought, language and communication, the development of all these processes and their pathology. In addition, we apply psychology to other fields and teach techniques for measuring and studying psychological variables. Students conduct laboratory experiments on the psychological and physiological bases of behavior. The department has an invertebrate vivarium for laboratory classes and research. There are student opportunities for independent research.

Psychologists study behavior and mental experience. Neuroscientists study how brain activity leads to conscious experience and action. Many professionals in the field of psychology help people when something is going wrong with their mood, perception, behavior, or the nervous system. Psychology is a broad degree that can lead to jobs in diverse fields!

Degree Highlights:

- Develop analytical skills that employers seek, by learning to apply the scientific method to behavior.
- Psychology complements any other kind of learning or work with people.
- Psychology helps you understand yourself and others. It prepares you for professions that improve interactions between people.

The multidisciplinary Department of Communication, Liberal Arts, and Social Sciences develops students' ability to learn, reason, and communicate in diverse fields of study and areas of human experience. The CLASS Department's mission is threefold: to help students write well, think critically, and read widely; to provide an intellectual experience that increases students' awareness of human history, human cultures, and human values; and to encourage the lifelong study of human experience.

MS in Science, Design, and Communication in Public Engagement

This 30-credit hour graduate program trains students through real-world projects to research, critically analyze, and communicate information and technology to diverse communities. Students in this proposed program may follow four pathways through the program, or may construct a path that meets their own career objectives:

1. Communication, branding, and project management for nonprofits and small businesses.
2. Science Communication, policy, and public outreach.
3. User experience (UX/UI) research and design.
4. STEM Career promotion and advancement.

These pathways are built upon the core courses for the master's program in conjunction with electives from both within and outside the CLASS Department.

The multidisciplinary Department of Communication, Liberal Arts, and Social Sciences develops students' ability to learn, reason, and communicate in diverse fields of study and areas of human experience. The CLASS Department's mission is threefold: to help students write well, think critically, and read widely; to provide an intellectual experience that increases students' awareness of human history, human cultures, and human values; and to encourage the lifelong study of human experience.

The Department provides virtually all courses in four of the six areas of the General Education Core. Curriculum required by the New Mexico Higher Education Department for the comprehensive education of undergraduates enrolled in New Mexico state institutions of higher education.

Bachelor of Science in Technical Communication.

The Technical Communication (TCOM) curriculum combines courses from three fields of study to prepare students for technical communication positions upon graduation:

1. The TCOM courses introduce students to document design, graphics, and computer documentation, created online and for multimedia. These courses also develop students' writing, speaking, and editing abilities.
2. The humanities and social science courses improve students' understanding and appreciation of history, literature, philosophy, psychology, and the arts.
3. The science and technology courses provide students a background in one specific science or engineering discipline.

The multidisciplinary Department of Communication, Liberal Arts, and Social Sciences develops students' ability to learn, reason, and communicate in diverse fields of study and areas of human experience. The CLASS Department's mission is threefold: to help students write well, think critically, and read widely; to provide an intellectual experience that increases students' awareness of human history, human cultures, and human values; and to encourage the lifelong study of human experience.

The Department provides virtually all courses in four of the six areas of the General Education Core. Curriculum required by the New Mexico Higher Education Department for the comprehensive education of undergraduates enrolled in New Mexico state institutions of higher education.

These areas are:

- **Professors:** Jeffery (Chair of Department), Liebrock, Mazumdar, Shin, Soliman, Zheng
- **Associate Professors:** Ramyaa
- **Instructors:** Algaraibeh, Knowles

Degrees Offered: *B.S., M.S., and Ph.D. in Computer Science*

The Department of Computer Science and Engineering is focused on an exciting and rapidly growing body of knowledge with constantly changing emphasis.

The curriculum of the department includes courses in both theory and application. It prepares students to apply the principles of logic and mathematics to the design and construction of hardware and software systems using current engineering paradigms and also exposes them to major applications of computing.

The Bachelor of Science in Computer Science program is accredited by the Computing Accreditation Commission of ABET. The program emphasizes fundamental principles while striking a careful balance between the applications of computer technology and the theory of computing. In addition to the required fundamental computer science courses, students must also take technical electives to broaden their knowledge in major computer science application areas. Graduates of this program will be well prepared for both industry employment and graduate study.

Our graduate programs provide students the opportunity to take courses, select advisory committee members, and pursue research in an area of interest to a faculty supervisor. The Master of Science in Computer Science program is designed for students who wish to further broaden or deepen their knowledge of computer science and applications. Master's students usually participate in faculty research projects to complete their thesis or (non-thesis) independent study report.

New Mexico Tech's Department of Computer Science and Engineering also offers a Ph.D. in Computer Science program. The Ph.D. program is appropriate for students with motivation for research and either a superior track record in coursework or substantial experience in industrial research and development.

The department has been certified, since 2002, by the National Security Agency and the Department of Homeland Security as a National Center of Academic Excellence in Information Assurance Education. Since 2009, the department has also been certified as a National Center of Academic Excellence in Information Assurance Research.

The department has its own network of computers and servers plus a variety of other equipment in several laboratories. Computing equipment at the research labs associated with Tech includes both symmetric multiprocessors, GPU compute servers and special purpose massively parallel computers. The department also has access to massively parallel machines at national laboratories and supercomputing centers.

Mission

Our mission is to produce computer science graduates who, trained in the design, implementation, and analysis of computational systems and skilled in technical communication, will contribute towards the advancement of computing science and technology.

Program Educational Objectives

Within a few years of graduating with a B.S. degree in Computer Science, our students should be able to demonstrate that they have:

1. the ability to design, implement, and analyze computational systems;
2. the capability to tackle complex computer science related problems in the real world;
3. contributed towards the advancement of computing science and technology;
4. the capacity to work effectively with peers in computational tasks; and
5. cognizance of ethical, social, and legal issues pertaining to computer science.

Student Outcomes

By the time of their graduation, the undergraduate academic program in Computer Science should enable our graduates to:

1. analyze a complex computing problem and to apply principles of computing and other relevant disciplines to identify solutions;
2. design, implement, and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline;
3. communicate effectively in a variety of professional contexts;
4. recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles;
5. function effectively as a member or leader of a team engaged in activities appropriate to the program's discipline; and
6. apply computer science theory and software development fundamentals to produce computing-based solutions.

Programs

Accelerated M.S. in Computer Science (pathway)
Data Science (minor)
M.S. in Computer Science
Computer Engineering (minor)
BS-CS - B.S. in Computer Science
BS-IT - B.S. in Information Technology
CS - Computer Science (minor)
PHD-COMP. SC - Ph.D. in Computer Science

Degrees offered: A.S. of Business; B.S. of Management, B.S. of Management of Technology, B.A in Business Management, Master of Engineering Management (MEM), and M.S in Engineering Management

The Business and Technology Management (BTM) program provides undergraduate and graduate degree programs that draw heavily on Tech's strengths in science, engineering, technology, and math (STEM). The aim of the department is to develop in students substantive decision-making and analytical skills and tools, as well as the functional knowledge required to effectively lead complex technology-based organizations in today's competitive global economy.

The program offers an additional career path that prepares students to be future technology innovators and entrepreneurs. Students will take courses in accounting, economics, human resources, finance, management, business strategy, marketing, operations research, statistics, and entrepreneurship.

New Mexico Tech offers three undergraduate degree options:

1. The B.A. in Business Management degree provides students with the knowledge and skills required to manage complex projects and functional areas of an enterprise, i.e. accounting, finance, logistics, marketing, or human resources.
2. The B.S. in Management prepares potential technology entrepreneurs to start their own companies.
3. The B.S. Management of Technology integrates management course work with study in an engineering or science field of the student's choice, providing specific knowledge and skills required to lead those organizations.

Whichever degree option a student may choose, BTM students are problem solvers across disciplines, to include natural resources, energy, manufacturing, information systems, and environmental management. Students may also pursue a minor in management in addition to their major course of study. Each management student is assigned a faculty advisor who will help him or her select a degree option and recommend courses to be taken.

The BTM program also offers an A.S. degree in Business. This program is designed for students seeking to complete a two-year degree in business (potentially in addition to their major B.S. degree) and/or those who may wish to transfer to a four-year college or university. Required courses are often transferable among participating New Mexico colleges and universities.

The department also offers a Master of Engineering Management (MEM) graduate degree that prepares students with a B.S. degree in science or engineering for leadership positions in engineering, science, and technology organizations. Please see the "Engineering Management" degree program section of this catalog for further information.

Programs

Management (minor)
Undergraduate Certificate in Business
AS-BUS - Associate of Science in Business
BA-BUS - B.A. in Business Management
BS-MGMT - B.S. in Management
BS-MGTT - B.S. in Management of Technology

Degrees offered: Master of Engineering Management (course-based), Master of Science in Engineering Management, Graduate Certificate in Technology Leadership

The degree programs in Engineering Management are specifically designed for engineers, scientists, managers, and technologists holding a bachelor's degree in their respective disciplines who seek the knowledge and practical skills required to lead project teams and technical organizations through today's competitive and fast-changing business environment. Our focus is to provide students with a challenging educational experience that builds on their background and career interests. Our innovative and rigorous curriculum is delivered live via interactive webcasts both on campus and globally through the internet. Students are encouraged to participate in the live course lectures, with accommodation (e.g. recordings) available when work or personal schedules do not permit in-class participation. The program is designed with a student's technical degree and background in mind, as few undergraduate engineering and science degree programs prepare their graduates for their transition to management and leadership roles. Meanwhile, our programs welcome and prepare students with non-STEM backgrounds to the realm of engineering management and corporate leadership.

The graduate programs are 30 credit hours with three degree options: the course-based Master of Engineering Management (MEM) degree designed for professional managers and the Master of Science in Engineering Management (MSEM) degree with an independent study project or thesis designed to provide more analytical and research training for interested students.

Admission to the Graduate Program

Entrance into the MEM and MSEM requires competence in engineering, science, and mathematics comparable to a calculus-based bachelor's degree in a management, economics, engineering, or science discipline. For the MEM, preference will be given to individuals with professional work experience in an engineering, technology, or science field. The Graduate Record Examination (GRE) is required for admission but may be waived depending on the applicant's transcript and professional experience. Engineering Management faculty will evaluate program applicants and recommend admission to the Office of Graduate Studies. For complete information on applying to the Graduate Engineering Management Program, see the New Mexico Tech Center for Graduate Studies website.

Master of Engineering Management (MEM)

Each MEM student will be assigned a faculty advisor to guide the student in course selection and meeting program requirements. The final product should demonstrate the ability to identify a project objective (or research question), plan, and conduct research.

Program Requirements for MEM

Total credit hours required: 30.

The following courses are required (18 credits): EMGT 501 (3), EMGT 502 (3), EMGT 503 (3), EMGT 504 (3), EMGT 505 (3), and EMGT 506 (3).

12 additional credits of electives (at least 9 credits should be 5000-level EMGT courses).

Master of Science in Engineering Management (MSEM) Graduate Advisory Committee

In addition to the general requirements for the Master of Science degree, MSEM (both Independent Study and Thesis options) students need to form a three-member committee that is composed of at least two New Mexico Tech management faculty members and one other qualified individual with knowledge of the student's research project. Examples of qualified individuals include faculty members at New Mexico Tech, faculty members at other higher-education institutions, workplace supervisors, and/or professional peers with a master's or doctoral degree. The student should identify a committee chair, who usually also serves as the student's research advisor. The primary role of the committee is to assist the student in course selection and advise and approve the final independent study project or thesis.

Independent Study Option:

An independent study project should be supervised by the graduate advisory committee. The chosen project should be implemented with a clearly identified project objective (or research question), sound methodology, and rigorous analysis. Each project will be accompanied by a written project report and an oral presentation to a diverse audience in a professional setting.

Thesis Option:

The student must clearly demonstrate the ability to plan, organize, and pursue research. Thesis research is expected to be carried out in at least two semesters and shall be supervised by the graduate advisory committee. A written research report and a public oral presentation are required.

Program Requirements for MSEM

In meeting the general requirements for the Master of Science degree, the requirements for one of the following options must be met:

MSEM degree with an independent study project:

Total credit hours required: 30.

The following courses are required (18 credits): EMGT 501 (3), EMGT 502 (3), EMGT 503 (3), EMGT 504 (3), EMGT 505 (3), and EMGT 506 (3).

3 credits of 5000-level EMGT courses

6 credits of upper-division or graduate out of program course work

3 credits of EMGT 590 (Independent Study)

MSEM degree with a thesis:

Total credit hours required: 30.

The following courses are required (18 credits): EMGT 501 (3), EMGT 502 (3), EMGT 503 (3), EMGT 504 (3), EMGT 505 (3), and EMGT 506 (3).

6 credits of upper-division or graduate out of program course work

6 credits of EMGT 591 (Thesis)

Degree Offered: B.S. in Information Technology

Information Technology (IT) is an evolving interdisciplinary subject that has been driven and shaped by the rapid development of computing, communication, and Internet-related technologies and their tremendous impact on our daily lives.

In contrast to the more traditional Information Systems discipline, Information Technology deals with the development, utilization, interrelation, and confluence of computers, networking, telecommunication, business, and technology management in the context of the global Internet. As we enter the Information Age of the 21st century, society is increasingly dependent on Information Technology and demand for IT professionals will remain high throughout the decades to come.

The Bachelor of Science in Information Technology program at New Mexico Tech is administered jointly by the Computer Science and Business Management faculty in the Computer Science and Engineering department. The curriculum includes relevant computer science, management, and engineering courses and emphasizes secure information systems and information assurance that are among the areas of research at Tech's Institute for Complex Additive Systems Analysis (ICASA) where IT students may find employment or internship opportunities. Students must also take a sequence of 6 hours of technical electives to broaden or deepen their knowledge in an IT area of their interest.

Graduates of the IT program are well prepared for immediate industry employment or graduate study in an IT-related discipline.

Chemical Engineering

The Chemical Engineering Department at NMT is among the fastest growing departments. A degree in chemical engineering is a highly flexible and adaptable education. Graduates work in virtually every field and command the highest wages.

The chemical engineering program at New Mexico Tech is accredited by the engineering accreditation commission of ABET.

- ***Professor*** *- Leclerc (Dean of Engineering) and Tartis*
- ***Associate Professors****—Choudhury (Chair of the Department), Lee and Chowdhury*
- ***Assistant Professor*** *- Yu*
- ***Adjunct Faculty*** *- Frolova*

- ***Laboratory Associate*** *- Price*

Degree Offered: B.S. in Chemical Engineering

M.S. in Chemical Engineering with specialization in Surface Engineering, M.Eng. in Chemical Engineering with specialization in Surface Engineering, Ph.D. in Chemical Engineering with dissertation in Surface Engineering

Chemical engineering is one of the most fundamental engineering disciplines that impacts nearly every facet of life. The efficient production of food, pharmaceuticals, fuels, semiconductors, polymers, and various chemicals, as well as research in sustainable environment and energy, biomedical technology and nanotechnology are driven by the ingenuity of chemical engineers.

Graduates from the Chemical Engineering department will find employment in a variety of industry and research facilities, as well as government, medicine, patent law, technical marketing, and other such fields. Students have worked in food production, pharmaceuticals, energetic materials, semiconductor processing, biofuels, and have also pursued research at the national laboratories. Throughout the Chemical Engineering curriculum, students will be able to foster innovation and champion ideas through effective communication. They learn how to design solutions to answer the questions, such as “how can this process be made safer?”, “how can this process be made more efficient?”, and so on. This is accomplished through a combination of insightful teaching, challenging laboratory experiences, unique research opportunities and internships. Furthermore, the program is reviewed by an external advisory board of industry and research professionals to ensure that students are well-prepared for successful careers in the modern scientific world To learn more, the Student Handbook on the Chemical Engineering website (***www.nmt.edu/academics/chemeng***) is an excellent resource with quick links and great insights to taking advantage of the outstanding educational opportunities at New Mexico Tech.

Program Educational Objectives

The following objectives have been established by the program faculty in conjunction with our students and advisors from industry. They describe the characteristics and expected accomplishments of our future alumni.

1. Our graduates will be engaged in careers in academia, national labs and industry that cover a spectrum of fields, which require a command of the principles of Chemical Engineering, or pursue/complete post graduate degrees in fields such as engineering, the sciences, business, law, or medicine.

2.Our graduates will be active in the professional community by participating in professional societies, obtaining licensure, and other related activities.

Graduate Programs

The chemical engineering department offers a Master of Science and a Master of Engineering in Chemical Engineering with Specialization in Surface Engineering, and Doctor of Philosophy in Chemical Engineering with Dissertation in Surface Engineering.

Students in the graduate program in chemical engineering with specialization in surface engineering will be required to take a significant course load in surface engineering fundamentals where they will advance knowledge from science and basic engineering to surface engineering. Students will also have the opportunity to explore applications in surface engineering through coursework and research.

Upon completion of a graduate degree in chemical engineering with specialization in surface engineering, students will demonstrate the ability to:

1. apply experimental and/or calculation based techniques in order to solve a research question in the field of surface engineering

2. Science and basic engineering to the field of surface engineering in order to solve upper level problems

3. Effectively present their research through oral presentations, posters, and publications

The following courses are considered core courses:

1. ChE 5051 Advanced mathematical modeling
2. ChE 5052 Surface characterization techniques
3. ChE 5053 Advanced Separation Processes
4. ChE 5063 Design and Analysis of Experiments
5. ChE 5066 Heterogeneous Catalysis
6. ChE 5068 Surfaces, Interfaces, and Colloids
7. ChE 5072 Interfacial Transport Phenomena

Accelerated Masters

Qualified undergraduate students may apply for admission to the Accelerated Masters program in Chemical Engineering. In fulfillment of the requirements for both B.S and M.S. degrees, as outlined in their respective sections, accepted students may apply nine credits of 5000-level courses to both degrees.

Faculty Research Interests

Choudhury — Computational Modeling of Materials for the Energy and Environment; Specific Research Areas include: Surface Engineering, Catalysis, Gas Sensors, Proton Transport Membranes, Sorbent, Materials and O2 Reduction.

Chowdhury — Optically Active Nanomaterials, Solar Energy Conversion, Single Molecule Microscopy, Plasmon Enhanced Catalysis, Plasmonic Biosensors, Polymer recycling and Additive Manufacturing

Leclerc — Catalysis, Reactor Design, Alternative Fuels, Biorefineries, Hydrogen Production, Non- Thermal Plasma Surface Modification, biomass and plastic pyrolysis and gasification

Lee — Functional Polymeric Materials, Conjugated Polymers, Additive Manufacturing, Depolymerization for Recycling.

Tartis — Biomedical Imaging, Targeted Drug Delivery, Lipid Prodrugs, Nanoparticles, Biomaterials, Traumatic Brain Injury

Chemistry Department

CONTACT US		
Office: López Hall 115, 801 Leroy Place		
State & Zip: NM 87801		
Phone: 575-835-5263		
website: **https://www.nmt.edu/academics/chemistry/**		

- **Associate Professors:** Altig, Patidar, Pias, Piyasena (Chair), Rubasinghege
- **Assistant Professors**: Ams, Holubowitch, Khandelwal
- **Instructors:** Madduma Bandarage

Degrees Offered: *B.S. in Chemistry, B.S. in Chemistry with Environmental Science Option, and B.S. in Chemistry with Biochemistry Option, B.A in Chemistry; M.S. in Chemistry and M.S. in Chemistry with Specialization in Biochemistry; Ph.D. in Chemistry*

The fundamental mission of the Department of Chemistry is to provide students with:

1. The skills necessary for critical and analytical thinking
2. An understanding of the basic concepts of chemistry
3. An appreciation of chemistry and its central place among the sciences
4. A feeling for the joys and frustrations of original research
5. The ability to communicate observations and discoveries

The Department of Chemistry offers a balance between pure and applied chemistry and presents science as part of a liberal education. The faculty is qualified in the major divisions of chemistry—inorganic, organic, analytical, physical, and biochemical. The undergraduate program emphasizes development of a strong foundation in the fundamental areas of chemistry in order to prepare students for the diverse career opportunities available to chemists. Laboratory facilities support research in all major areas of chemistry, with a focus on environmental and biomedical topics. Interdisciplinary work is encouraged.

The department maintains a full complement of modern analytical instrumentation. Most undergraduate students participate in departmental research. Career possibilities range from industrial process control through scientific research in academic and government laboratories. More than 60 percent of Tech chemistry graduates continue their education in graduate school.

Many have become teachers, medical doctors, or research scientists. Students have the freedom to select courses to meet individual interests and objectives, such as preparation for graduate school or industry or simply a superior education. B.S. graduates receive a degree accredited by the American Chemical Society, and the chemistry B.S. curriculum is approved by the Committee on Professional Training of the American Chemical Society.

Community Education Department

New Mexico Tech Community Education

www.nmt.edu/ce

The New Mexico Tech Community Education Program provides credit and non-credit enrichment courses in Physical Recreation, Studio Arts, Lifestyle Activities, general Community Education, and Certification programs. Courses are open to New Mexico Tech students, faculty, staff, and the surrounding community. No degrees are offered through the Community Education Program.

Community Education courses may be found on Banweb class schedules with the following prefixes:

- CONC (Community Education Non-Credit)
- CERT (Certification programs non-credit)
- CEFA (Studio Art Enrichment courses)
- LIFE (Lifestyle non-credit)
- MUSV (Music Performance enrichment courses)
- CEPR (Physical Recreation enrichment courses)

Community Education classes, which are signified by a "C" following the course number, are graded on an satisfactory/unsatisfactory (S/U also known as pass/fail) basis and can be used as elective credit in most majors. Community Education credit classes do not count towards Core General Education requirements. The Community Education Program also offers non-credit courses such as Wine Tasting and cooking classes.

Full-time undergraduate students do not pay extra tuition when these courses are part of their 12-18 hour course load. Full-time graduate students may enroll for 1 credit of Community Education coursework beyond their 12 hour credit limit, at no extra charge (see graduate catalog for restrictions).

Students who are not pursuing a degree program, such as community members or staff, are classified as non-degree seeking students. They are limited to a maximum of six credit hours per semester. Non-degree students who have never taken a class at Tech need to complete an Application for Admission Form and can do this application through the office of Community Education. After being admitted, students will be able to register for courses and can do so through the Office of the Registrar or Community Education.

A great deal of information may be found at the department website at www.nmt.edu/ce including downloadable catalogs with course descriptions. To speak with someone about the Community Education program, please visit the offices in Fidel 288 or call 575.835.6581

Cybersecurity (program) Department

CONTACT US
Office: Cramer Hall 132
State & Zip: NM 87801
Phone: 575-835-5558
Website: **https://www.nmt.edu/cybersecurity/**

Degrees Offered: *Master of Science, Professional Masters, and Doctor of Philosophy in Transdisciplinary Cybersecurity*

Mission

Addressing many of the greatest challenges to society requires understanding and integrating the methods, theories, techniques, and perspectives of multiple disciplines to develop new approaches to solve complex, real-world challenges. The mission of the Transdisciplinary Cybersecurity graduate programs is to prepare students with a broad understanding of cybersecurity from the foundational documents that have guided the development of the discipline to the ethical, legal, and psychological challenges that cybersecurity professionals face. Students further engage in hands-on cybersecurity risk analysis, data analysis, and policy development. In addition, technical electives provide technical expertise that students will need to solve real-world challenges in cybersecurity.

Program Design:

These programs are designed to engage students with diverse backgrounds in cutting edge cybersecurity research and prepare them for high demand, high pay cybersecurity careers; and enhance cybersecurity innovation leading to improvement in the cybersecurity stance of the state of New Mexico, the nation, and the world.

Programs

G.C. in Cybersecurity
Cybersecurity (minor)
MS-CYBS - M.S. in Transdisciplinary Cybersecurity
PHD-CYBS - Ph.D. in Transdisciplinary Cybersecurity
PM-CYBS - P.M. in Transdisciplinary Cybersecurity

Courses

CYBS5000 - Directed Research
CYBS5002 - Cybersecurity Ethics and Law
CYBS5003 - Cybersecurity Policy
CYBS5004 - Psychology of Cybersecurity
CYBS5005 - Data Science for Cybersecurity
CYBS5006 - Cyber Physical System Security
CYBS5009 - Cybersecurity Risk Analysis & Management
CYBS5014 - Computer Security & Incident Response
CYBS5015 - Reverse Engineering Malware
CYBS5041 - Advanced Cryptography
CYBS5054 - Computer Network Security

Timmons, S. Timmons, Vrolijk, Zimmerer*

The Department of Earth and Environmental Science administers four closely related disciplines in the Earth sciences: geology, geophysics, geochemistry, and hydrology, as well as the various options leading to a Bachelor of Science degree in Environmental Science. By its very nature, Environmental Science is an interdisciplinary program, incorporating expertise from biology, chemistry, Earth science, physics, and environmental engineering.

Degrees Offered: B.S. in Earth Science; B.A. in Earth Science; Graduate Certificate in Hydrology; P.M. in Hydrology; M.S. in Geochemistry, Geology, Geophysics, and Hydrology; Ph.D. in Earth and Environmental Science with Dissertation in Geobiology, Geochemistry, Geology, Geophysics, or Hydrology

Undergraduate degrees in Earth science require a broad-based background in mathematics, chemistry, and physics, as well as basic training in the Earth sciences. The curriculum emphasizes fundamentals and thus provides the background for entry into a number of Earth science professions or graduate schools.

The graduate program provides specialized training and research opportunities in theoretical or applied aspects of Earth science. Areas or particular expertise in the department include: ore genesis; origins of magmas; volcanology; tectonic history of the continents; geodynamics; basin analysis; geothermal systems; hydrocarbon exploration; recharge, flow, and water quality in groundwater basins and at hazardous waste sites; modern and ancient depositional processes and environments; landscape evolution; atmospheric and land surface controls on regional energy and water budgets; representation of land hydrology and snow in global climate models; hydrogeochemistry; trace element geochemistry; earthquake seismology; seismic imaging; geodesy; faults and fluid flow; marine geophysics; radiometric dating; geobiology; and cave and karst studies.

Staff members of the on-campus New Mexico Bureau of Geology and Mineral Resources participate in the graduate program by offering courses and supervising research work for theses and dissertations.

Earth science is a highly interdisciplinary field with many critical environmental, science, and resource connections to society. Graduates commonly enter professional careers in water resources; in the science, monitoring and management of geologic hazards and water quality; and in the exploration for and stewardship of energy and other natural resources.

Programs

Earth Science (minor)
G.C. in Hydrology
Geobiology (minor)
Geophysics (minor)
Hydrology (minor)

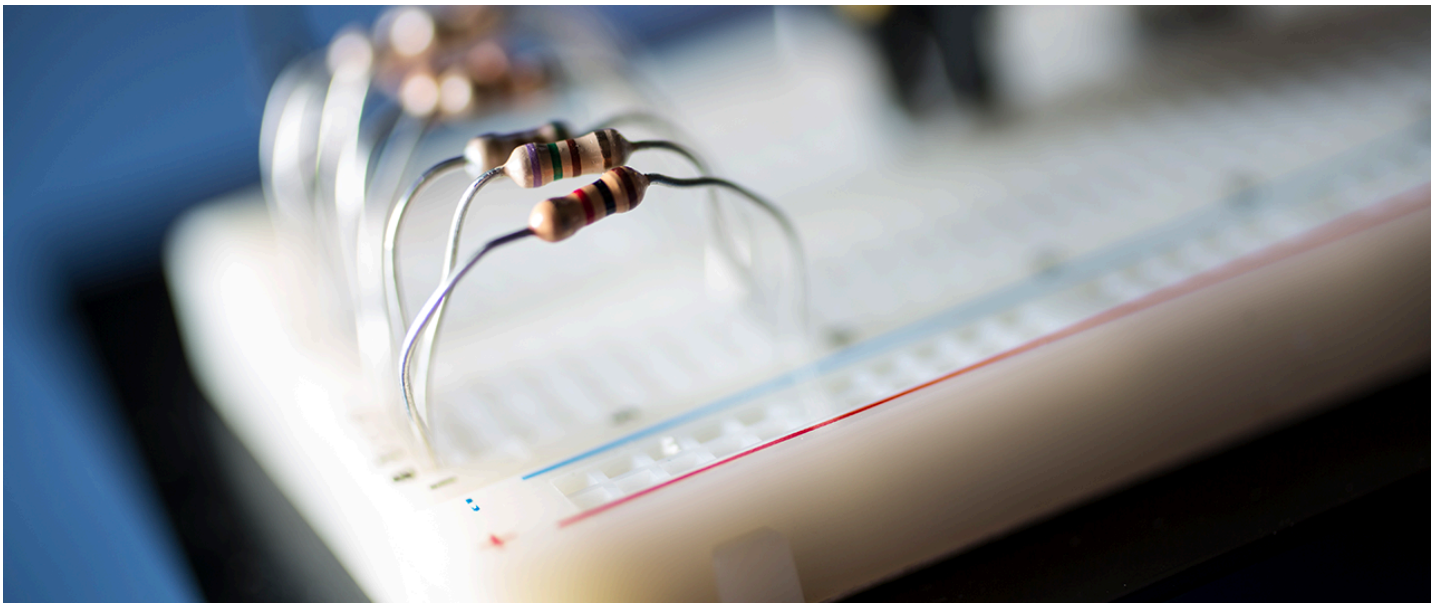
Programs

BS-ENVS - B.S. in Environmental Science

Electrical Engineering Department



Electrical Engineering

- **Professors:** El-Osery (Dean of Graduate Studies), Jorgensen, Teare.
- **Associate Professors:** Arechiga (Chair of Department), Senay.
- **Assistant Professor**: Roy, Cui, Fierro. Emeritus Professor: Bond, Wedeward.
- **Adjunct Faculty**: El-Kady, Shao.

Degrees Offered: *B.S. in Electrical Engineering; M.S. in Electrical Engineering; Ph.D. in Electrical Engineering with Dissertation in Cyber Electronic Systems*

Mission

The mission of the New Mexico Tech Electrical Engineering Department is two-fold:

1. To develop and maintain a program of excellence in teaching which ensures that our graduates have technical knowledge and professional skills they need to become effective engineers in the rapidly-changing technical environment of today's society, so that these graduates will contribute to the growth and development of New Mexico and our nation, and
2. To develop and maintain state-of-the-art research programs which are responsive to the needs of industry and government, which provide excellent educational opportunities for students, and which provide an environment for intellectual growth and excitement.

Faculty Research Interests

Arechiga — Lightning Detection and Mapping, Thunderstorms, Sound Processing.

Cui — Smart Devices and Intelligent Systems.

El-Osery — Wireless Communications, Control Systems, Soft Computing. Cognitive Radio, Inertial Navigations.

Fierro — Fundamental plasma physics, atmospheric and low pressure plasmas.

Jorgensen — Spacecraft and Astronomical Instrumentation, Space Physics, Data Assimilation, Sensor, Networks, Space Elevators. Senay — Communications, Signal Processing, Control Systems.

Teare — Adaptive Optics, Smart Sensors, Ballistics, Energetic Materials.

Bond — Design for Test/Manufacturability, Teaching Effectiveness.

Wedeward — Control Systems, Robotic Systems, Electric Power Systems.

El-Kady — Plasmonics, Optical Metamaterials, Vibration Mechanics.

Shao — Visible light communications.

Programs

Optics (minor)

Engineering Science Department

- ***Professor:*** Leclerc (Dean of Engineering)
- ***Instructors:*** Oxford, Gatto

Accreditation

The Bachelor of Science (BS) programs in Chemical Engineering, Civil Engineering, Electrical Engineering, Environmental Engineering, Materials Engineering, Mechanical Engineering, Mineral Engineering, and Petroleum and Natural Gas Engineering are accredited by the Engineering Accreditation Commission of ABET (EAC).

The Bachelor of Science program in Computer Science is accredited by the Computing Accreditation Commission of ABET (CAC).

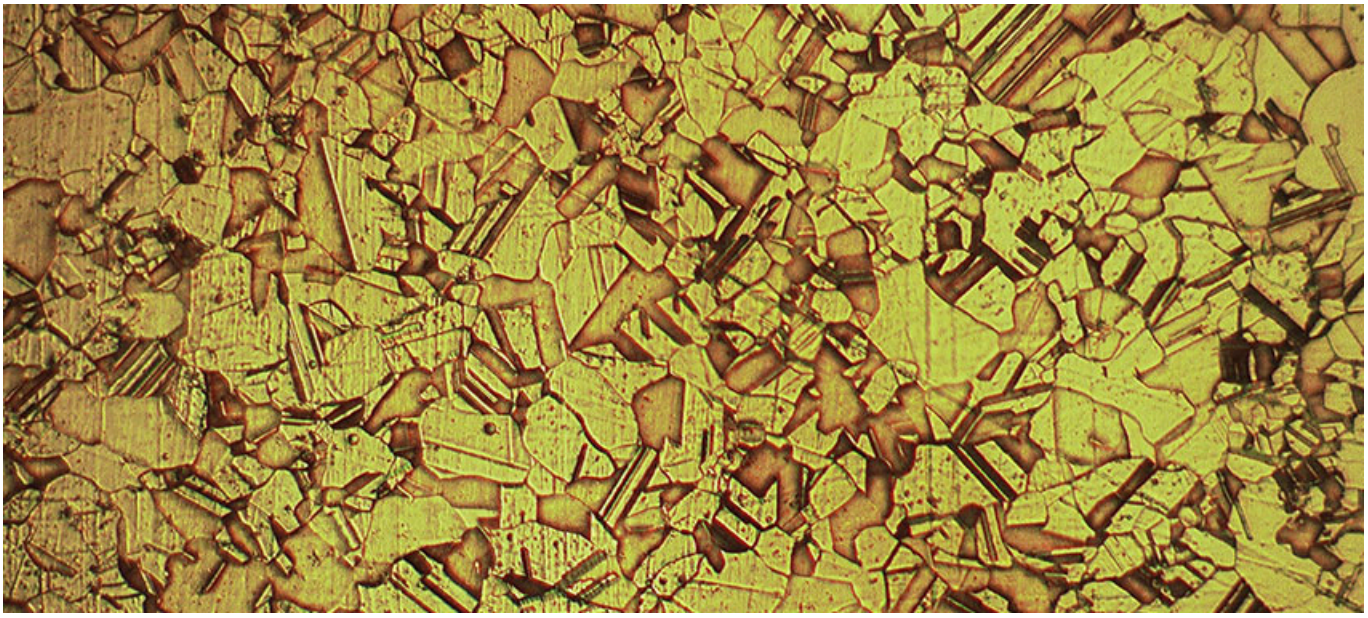
Professional Examinations

Undergraduate engineering majors in Civil Engineering, Environmental Engineering, Mineral Engineering and Mechanical Engineering are required to take the Fundamentals of Engineering (FE) exam as a requirement for graduation. All engineering students are encouraged to take this exam, as it is the entry-level requirement for those individuals who intend to attain status as a professional engineer . The FE exam is a national, computer-based test; therefore, the results are transferable to any state or territory of the United States. See the National Council of Examiners for Engineering and Surveying (NCEES) website for details.

Courses

ES110 - Intro to Engineering Design
ES111 - Computer Programming for Engineers
ES201 - Statics
ES216 - Engineering Fluid Mechanics
ES3002 - Mechanics of Materials
ES3003 - Engineering Dynamics
ES3005 - Engineering Analysis
ES3016 - Engineering Economics
ES3032 - Electrical Engineering
ES3047 - Thermodynamics
ES3050 - Heat & Mass Transfer
ES4005L - Instrumentation, Measurements, & Processess Control Lab
ES4091 - Directed Study

Materials Engineering Department



Materials and Metallurgical Engineering

Degrees Offered: *B.S. in Materials Engineering, Materials Engineering with Metallurgical Engineering Option, Materials Engineering with BioMaterials Engineering Option; and M.S., M.E., and Ph.D. in Materials Engineering*

Web site: *https://www.nmt.edu/academics/mtls/index.php*

Department Mission Statement

To educate our students so that they are prepared to obtain and succeed in the best positions in industry, government laboratories, and graduate schools.

- To advance the frontiers of Materials science and engineering.
- To serve the public of New Mexico through outreach and expanded education.

Program Educational Objective

The Materials Engineering program will prepare graduates who:

- Establish themselves in a range of careers in industry or government or pursue post baccalaureate education in engineering, science, business, law, medicine, or other professional disciplines.
- Advance in their chosen profession.
- Engage in appropriate professional societies and in continuing education activities.

Student Outcomes for Undergraduate Program in Material Engineering

Graduates of the Bachelor of Science in Material Engineering program will have demonstrated.

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Programs

Accelerated M.S. in Materials Engineering (pathway)
M.S. in Materials Engineering
Materials Engineering (minor)
Polymer Science (minor)
BS-MATE - B.S. in Materials Engineering
BS-MATE - B.S. in Materials Engineering with BioMaterials Engineering Option
BS-MATE - B.S. in Materials Engineering with Metallurgical Engineering Option
ME-MATE - M.E. in Materials Engineering
PHD-MATE - Ph.D. in Materials Engineering

Courses

MTLS101L - Materials Science & Engineering Lab
MTLS202 - Materials Engineering I
MTLS202L - Materials Engineering I Lab
MTLS235 - Materials Engineering II
MTLS235L - Materials Engineering II Lab
MTLS3001 - Introduction to Ceramic Engineering
MTLS3010 - Processing & Microstructure Methods & Analysis
MTLS3011 - Thermal & Mechanical Methods & Analysis
MTLS3014 - Transport Processes
MTLS3027 - Introduction to Physical Metallurgy
MTLS3050 - Materials Thermodynamics
MTLS3051 - Introduction to Polymeric Materials
MTLS4002 - Physical Ceramics
MTLS4010 - Microstructure Characterization Methods & Analysis
MTLS4020 - Biomedical Materials
MTLS4035 - Mechanical Behavior of Material
MTLS4041 - X-Ray Diffraction
MTLS4043 - Magnetic Materials
MTLS4045 - Introduction to Composite Materials
MTLS4046 - Computational Methods in Materials Science
MTLS4047 - Optical Materials
MTLS4052 - Solid State Physics for Engineers

Degrees Offered: *B.S. in Mathematics, M.S. in Mathematics with Specialization in Operations Research and Statistics, M.S. in Mathematics with specialization in Analysis, M.S. in Mathematics with Specialization in Industrial Mathematics; Ph.D. in Mathematics with Dissertation in Applied and Industrial Mathematics*

Additional Program Offered: Accelerated MS Program

Students and faculty in the mathematics department at Tech are involved in many areas of mathematics, from pure mathematics to applied mathematics, operations research, and statistics. The department offers bachelors, masters, and Ph.D. degrees in mathematics, and plays an important role in teaching mathematics to students in other disciplines. Faculty and students are also involved in a number of research projects, many of them in conjunction with researchers in other departments at Tech and at other institutions.

There are career opportunities for mathematics students at both the bachelor's and master's levels. Students in mathematics can prepare for actuarial careers; careers in education; and careers in a number of industries, including telecommunications, aerospace, information technology, and financial engineering.

Preparation for a career in industry should include a broad background in mathematics, modeling skills, computer skills, expertise in an area outside mathematics, and communication skills. Degree requirements are designed to help students develop these important abilities.

Mathematics can also be studied in preparation for more advanced work in a variety of fields including pure mathematics, applied mathematics, operations research, statistics, scientific computing, and business administration. Many students choose to combine a major in mathematics with a major in a second field such as management, computer science, engineering, or physics. A strong background in mathematics can be very helpful in graduate studies.

Students in the mathematics department at both the undergraduate and graduate level have many opportunities to interact with faculty and participate in a variety of mathematical activities. The department has weekly seminars in which faculty, graduate students, and visitors present their research. Both undergraduates and graduates are involved in research projects.

Many students are employed by the department as graders, lab facilitators, teaching assistants, and research assistants. Undergraduate students regularly compete in the William Lowell Putnam mathematics competition and in the Consortium for Mathematics and its Applications (COMAP) contest in mathematical modeling.

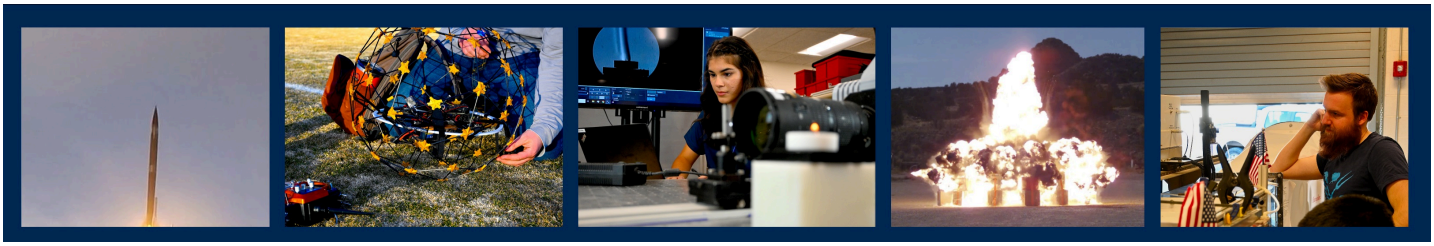
Mechanical Engineering Department



- **Professors**: Bakhtiyarov, Ford, Hargather, Zagrai
- **Associate Professors**: Ghosh, Hassanalian, Kimberley, Lim (Chair of the Department), Ryu, Wei
- **Assistant Professors**: Lee, O'Malley, Ebrahimkhanlou,
- **Adjunct Faculty**: Anderson, Dinwiddie, Grow, Miller, Romero, Ruff, Stofleth, Westpfahl
- **Emeritus Faculty**: Gerity, Ostergren

Degrees Offered: *B.S. in Mechanical Engineering; M.E. in Mechanical Engineering; M.S. in Mechanical Engineering; PhD in Mechanical Engineering with Dissertation in Intelligent Energetic Systems*

The Department of Mechanical Engineering at New Mexico Tech administers the following programs:

Bachelor of Science in Mechanical Engineering

Master of Engineering in Mechanical Engineering

- Specialization in Explosives Engineering
- Specialization in Fluid and Thermal Sciences
- Specialization in Mechatronics and Robotics
- Specialization in Solid Mechanics

Master of Science in Mechanical Engineering

- Specialization in Explosives Engineering
- Specialization in Fluid and Thermal Sciences
- Specialization in Mechatronics Systems and Robotics
- Specialization in Solid Mechanics

Doctor Philosophy in Mechanical Engineering

- Dissertation in Intelligent Energetic Systems

The Department of Mechanical Engineering also offers M.S. and M.E. degrees without specialization.

Program Educational Objectives

The Department of Mechanical Engineering at New Mexico Tech will produce Bachelor of Science graduates who are independent thinkers who take ownership in identifying problems and determining effective solution strategies in a timely manner. Upon graduation, students will be prepared to:

1. Successfully enter government laboratories, graduate schools, industry, and other areas of the profession.
2. Have an understanding of the importance of life-long learning such that they seek personal and professional growth.
3. Have achieved a noteworthy level of workplace responsibility.

Student Outcomes for Undergraduate Program in Mechanical Engineering

Graduates of the Bachelor of Science in Mechanical Engineering program will have demonstrated

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. An ability to communicate effectively with a range of audiences
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Graduate Program

Students will be able to:

1. Learn to reason well and to evaluate and apply information
2. Develop analytical and quantitative skills for competence in science and math
3. Communicate to different audiences in multiple forms
4. Exercise their role as members of diverse societies and cultures
5. Learn responsible values and ethics for their professional lives

6. Gain expertise in their chosen field of study

The Mechanical Engineering Department identifies four primary areas of study, aligned with the teaching and research interests of the faculty. These areas of study each recognize a set of core classes, which are reflected in the Master degree Specializations and the PhD Cores:

- Energetic Systems and Explosive Engineering
- Intelligent Systems and Mechatronics
- Fluid and Thermal Sciences
- Solid Mechanics

State & Zip: NM 87801		
Phone: (575) 835-5836		
Website: https://www.nmt.edu/academics/mining/		

- ***Professors*** *Chávez, Mojtabai*
- ***Associate Professors*** *Razavi (Chair of the Department), Moradian*
- ***Assistant Professors*** *Arya, Khaniani*
- ***Adjunct Faculty Members*** *McLemore, Saiang, Kim, Li, McDaniel, Roghanchi, Haneberg, Mostefanejad*
- ***Emeritus Professors*** *Aimone-Martin, Fakhimi*

Degrees Offered: *B.S. in Mineral Engineering; B.S. in Mineral Engineering with Emphasis in Explosives Engineering; M.S. in Mineral Engineering; Ph.D in Mineral Engineering.*

Department Mission Statement

- Provide the students with an education in the fundamentals of engineering that will allow immediate entry into industry, government, research, or academia and provide a solid theoretical and applied foundation for future professional development and growth.
- Maintain a high level of commitment and excellence in teaching and research, provide the time and effort to understand the individual student's particular learning abilities and needs, give guidance, and provide the environment to achieve those abilities.

- Prepare students for the opportunities and challenges of a diversified professional career in the rapidly changing mineral engineering-related disciplines through exposure to various aspects of applied technology.

Program Educational Objectives

Program graduates will:

1. Develop creativity in thinking and skills in problem-solving to enhance their employer's ability to be competitive within the industry as they advance in their professional career.
2. Develop leadership communication skills within the framework of a team while demonstrating the ability to work independently.
3. Maintain a strong sense of professional and ethical responsibility with a solid corresponding social awareness.
4. Advance in engineering or management status and demonstrate measurable progress in achieving personal and professional goals after graduation.

Student Outcomes for Undergraduate Program

Graduates of the Bachelor of Science in Mineral Engineering program will have demonstrated:

- an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
- an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
- an ability to communicate effectively with a range of audiences
- an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
- an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
- an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
- an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Mineral engineering is concerned with exploring and developing minerals and earth materials most efficiently while protecting the environment. The undergraduate program is oriented toward developing the student's understanding of and skill in engineering design. Proficiency in project management and leadership is encouraged through coursework and projects that emphasize professional-quality written and oral communication skills. The program's objective is to provide the student with an education in the fundamentals of engineering that will allow immediate entry into industry or research work while providing a good opportunity for continued professional growth. Emphasis is placed on developing a responsible professional with a sense of social awareness.

The curriculum includes basic engineering principles that provide the foundation for applied engineering design concepts. The program provides a concentrated study in mechanics, mineral evaluation and economics, ground and environmental control, environmental issues, and project management. Engineering design is introduced in courses covering surface and underground mining, ventilation, mineral processing, equipment selection, drilling and blasting, soil and rock mechanics, hydraulic structures, and geomechanics. Instruction in the environmental aspects of minerals development and production includes mine permitting and reclamation and extends to the legal issues and concerns in natural resources development.

A large-scale design project is undertaken in the senior year. This project integrates engineering principles and design in one of three areas: economic evaluation and exploration for mineral properties; design and planning of a mining project; or the planning and implementation of geotechnical construction projects, such as landfills, tailings impoundments, earth dams, and structures.

The department has modern, well-equipped laboratories for instruction and research in soil and rock mechanics, ventilation, blast vibrations, mineral evaluation, and computer applications. Students are provided the opportunity to work on a wide range of applied research projects within both the department and the Institute. Students are encouraged to obtain summer jobs in mines across the Southwest, providing excellent industrial experience.

Programs

Mineral Engineering (minor)
BS-ME - B.S. in Mineral Engineering
BS-ME - B.S. in Mineral Engineering with Emphasis in Explosives Engineering
MS-ME - M.S. in Mineral Engineering
PHD-ME - Ph.D. in Mineral Engineering

Courses

ME101 - Intro to Mineral Engineering
ME215 - Health & Safety
ME3020 - Economic Analysis
ME3040 - Geostatistics & Mineral Evaluation
ME3060 - Exploration & Field Mapping
ME3080 - Surface Mine Design
ME3081 - Underground Mine Design
ME4010 - Environmental Issues
ME4013 - Foundation Engineering
ME4020 - Soil Mechanics
ME4020L - Soil Mechanics Lab
ME4022 - Rock Mechanics
ME4025 - Occupational Health & Safety and Professional Responses
ME4034 - Drilling & Blasting Engineering
ME4035 - Rock Slope Engineering
ME4037 - Tunneling & Underground Excavations
ME4040 - Mine Ventilation
ME4062 - Mineral Deposits
ME4062L - Mineral Deposits Lab
ME4070 - Senior Design I
ME4071 - Senior Design II
ME4091 - Directed Study
ME5000 - Directed Research
ME5006 - Soil Mechanics
ME5006L - Soil Mechanics Lab
ME5011 - Mineral Economics
ME5012 - Advanced Rock Mechanics
ME5015 - Theory of Elasticity
ME5017 - Advanced Finite Element Method
ME5020 - Fracture Mechanics
ME5021 - Advanced Minerals Exploration
ME5022 - Advanced Exploration and Field Mapping

ME5023 - Ore Petrography
ME5025 - Rock and Soil Plasticity
ME5026 - Applied Numerical Methods
ME5028 - Advanced Mine Ventilation
ME5031 - Advanced Foundation Design & Analysis
ME5034 - Advanced Drilling & Blasting Engineering
ME5035 - Stability of Rock Slopes
ME5037 - Designs & Conditions of Underground Openings
ME5040 - Computer Applications in Geotechnical Engineering
ME5041 - Ground Improvement
ME5045 - Vibration Analysis & Control
ME5046 - Detonation Theory
ME5048 - Rock Fracturing & Fragmentation by Explosives
ME5049 - Wave Propagation
ME5050 - Advanced Explosives Engineering
ME5051 - Industrial Minerals
ME5052 - Applied Explosives Engineering
ME5053 - Computer Modeling-Detonations
ME5061 - Advanced Topics in Engineering Geology
ME5062 - International Mining Field Trip
ME5063 - Field Studies-Hydrothermal Alterations
ME5065 - Mine Waste Characterization
ME5066 - Mine Waste Management & Control
ME5070 - Advanced Topics in Explosives Engineering
ME5071 - Advanced Topics in Mineral Eng
ME5072 - Graduate Seminar
ME5081 - Directed Study
ME5090 - Independent Study
ME5091 - Thesis
ME5095 - Dissertation

Optics Department

Optical Science and Engineering

Degree Offered: *Minor in Optical Science and Engineering*

Students in the minor program in Optical Science and Engineering receive a broad introduction to optics as well as to specialized applications related to optical research activities on campus. The areas of research at New Mexico Tech include adaptive optics, interferometry, wavefront propagation, atmospheric turbulence, polarimetry, and applications to directed energy, astronomy, and communications.

The prime optical research site at New Mexico Tech is the Magdalena Ridge Observatory (MRO), a dedicated astronomical observatory that will support a large optical interferometer and a 2.4m single telescope. This facility provides a world-class facility for scientific research in optics, optical controls, and astronomical science applications. On campus, the Etscorn Observatory provides access to commercial telescopes and imaging cameras.

A Tech student may earn a minor in Optical Science and Engineering as part of a Bachelor of Science degree. While fulfilling the requirements for a Bachelor of Science degree the student must complete a minimum of ten (10) hours of core optics courses, three (3) hours of electromagnetic theory, and at least five (5) additional hours from approved optional courses.

Programs

Optics (minor)

Courses

OPTC3000 - Introduction to Optics
OPTC4000 - Mathematical/Computational Opt
OPTC4010 - Advance Optics

Petroleum Engineering Department

Degrees Offered: *B.S. in Petroleum and Natural Gas Engineering, M.S. and Ph.D. in Petroleum Engineering*

Petroleum and natural gas engineering is a broad-based discipline primarily concerned with the development, exploration, and conservation of oil and gas resources. Petroleum and natural gas engineers plan and supervise drilling and well-completion programs, design and select drilling and production equipment, optimize the production of oil and natural gas, estimate reserves, and manage oil and gas properties.

The oil and gas industry is a progressive and highly technical business, which offers opportunities to young engineers, both in the United States and abroad. A petroleum and natural gas engineering graduate may obtain a responsible position with an oil company, establish a consulting business, or become an independent oil producer.

Program Educational Objectives

The mission of the Petroleum Engineering program is to prepare students for the challenges of such a diversified career by providing students with the necessary skills to achieve success in their future profession. To achieve this mission, the following educational objectives are emphasized:

- Our graduates will use their highly competitive skills in a range of engineering career paths to become leaders in the energy industry.
- Our graduates will seek out continuing education opportunities, striving for technical excellence
- Our graduates will leverage evolving technology through collaborative engagement in both industry workshops and professional societies.

By graduation, a student will be capable of solving a variety of petroleum engineering problems and be able to integrate petroleum engineering concepts to a practical design project.

Student Outcomes for Undergraduate Program in Petroleum Engineering

Graduates of the Bachelor of Science in Petroleum Engineering program will have demonstrated

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. An ability to communicate effectively with a range of audiences
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Programs

Petroleum Engineering (minor)
BS-PETR - B.S. in Petroleum and Natural Gas Engineering
MS-PETR - M.S. in Petroleum Engineering
PHD-PETR - Ph.D. in Petroleum Engineering

Courses

PETR101 - Intro to Petroleum Engineering
PETR111 - Computer Applications in Petroleum Engineering
PETR111L - Computer Apps Petro Eng Lab
PETR245 - Petroleum Fluids
PETR245L - Petroleum Fluid Laboratory
PETR311 - Drilling Engineering
PETR311L - Drilling Mud Lab
PETR345 - Reservoir Engineering I
PETR345L - Reservoir Engineering Lab
PETR424 - Production Engineering
PETR424L - Production Engineering Lab
PETR470 - Applied Reservoir Simulation
PETR471 - Capstone Design I
PETR556 - Advanced Drilling
PETR570 - Graduate Seminar
PETR572 - Advanced Topics
PETR590 - Independent Study
PETR3011 - Drilling Engineering
PETR3011L - Drilling Mud Lab
PETR3045 - Reservoir Engineering I
PETR3045L - Reservoir Engineering Lab
PETR3070 - Formation Evaluation
PETR3070L - Formation Evaluation Lab
PETR4011 - Advanced Drilling
PETR4013 - Well Design
PETR4024 - Production Engineering
PETR4024L - Production Engineering Lab
PETR4025 - Well Completion
PETR4025L - Well Completions Lab
PETR4040 - Directional Drilling & Innovative Methods
PETR4041 - Natural Gas Reservior Engineering
PETR4045 - Reservoir Engineering II
PETR4046 - Improved Petroleum Recovery
PETR4050 - Well Performance
PETR4060 - Numerical Simulation
PETR4070 - Applied Reservoir Simulation
PETR4071 - Capstone Design I
PETR4072 - Capstone Design II
PETR4078 - Petroleum Seminar
PETR4091 - Special Problems in Petroleum & Natural Gas Engineering
PETR5000 - Directed Research
PETR5023 - Numerical Simulation
PETR5024 - Fluid Flow in Porous Media
PETR5032 - Advanced Well Stimulation
PETR5041 - Natural Gas Reservior Engineering
PETR5044 - Advanced Reservior Engineering
PETR5045 - Advanced Production Design
PETR5046 - Advanced Formation Evaluation
PETR5047 - Naturally Fractured Reservoirs
PETR5048 - Reservoir Geomechanics
PETR5056 - Advanced Drilling
PETR5057 - Advanced Artificial Lift Methods
PETR5058 - Reservoir Geomechanics
PETR5060 - Phase Behavior of Petroleum Fluids
PETR5064 - Advanced Well Testing
PETR5070 - Graduate Seminar
PETR5071 - Advanced Topics
PETR5072 - Advanced Topics
PETR5081 - Directed Study
PETR5090 - Independent Study
PETR5091 - Thesis
PETR5095 - Dissertation

- ***Assistant Professors**: Leal, Lopez-Carrillo, Norris*
- ***Instructor**: Mao*
- ***Adjunct Faculty**: Araya, Briggs, Buscher, Butler, Carilli, Dubey, Elvis, Friesen, Gaulme, Haniff, Jurgenson, Kimball, Manney, Myers, Ott, Owen, Si, Spargo, Swain, Tilles*
- ***Emeritus Professors**: Eilek, Hankins, Krebiel, LeFebre, Meason, Raymond, Schery, Westpfahl, Winn*
- ***Research Associate Professor**: Fuchs-Stone*

***Degrees Offered:** B.S. in Physics and in Physics with options in Astrophysics, Atmospheric Physics; M.S. in Physics; M.S. in Physics with Concentration in Instrumentation; Ph.D. in Physics; Ph.D. in Physics with dissertation in Astrophysics, Atmospheric Physics, Instrumentation, or Mathematical Physics*

UNDERGRADUATE PROGRAM

Students in the Department of Physics obtain a broad scientific background while mastering both theory and experimental physics. The fundamental courses are offered in the principal areas of physics—atomic and nuclear physics, classical mechanics, electricity and magnetism, optics, quantum mechanics, statistical physics, and thermodynamics. The department also offers several laboratory classes.

There are opportunities for students to participate in research projects during the semesters and the summertime, over and above the class and lab work. Many undergraduate students become involved in faculty research and often co-author published papers.

There are two options to accompany the basic physics undergraduate degree: astrophysics or atmospheric physics. They are designed around the main research interests of the faculty, so students can take advantage of the expertise of the faculty and the facilities that are offered on or near the campus. In addition, we encourage students to consider a minor in computer science, electrical engineering or mathematics. Several of the faculty have expertise in these areas.

The areas of research in atmospheric physics include thunderstorm electricity, precipitation, cloud dynamics, large-scale atmospheric dynamics, atmospheric chemistry and climate, and the dynamics of planetary atmospheres.

GRADUATE PROGRAM

The graduate program in physics offers several graduate degree options including an MS in Physics and an MS in Physics with Concentration in Instrumentation. We also have five doctoral paths, including PhD with Dissertation in Physics, Astrophysics, Atmospheric Physics, Instrumentation, or Mathematical Physics.

New Mexico Tech faculty primarily have expertise in Astrophysics and Atmospheric Physics, and also in nuclear physics and developing instrumentation. Most graduate students work in one of these areas. We also have research opportunities in cooperation with other departments on campus, in particular Mathematics and Electrical Engineering. Other interdisciplinary programs are also available through research organizations both on (e.g. shock physics at EMRTC) and off campus (Air Force Research Laboratory, Sandia National Laboratory, and Los Alamos National Laboratory).

All graduate students are required to pass a preliminary exam (“prelim”). The prelim covers material in physics and mathematics normally included in the undergraduate physics curriculum. The department offers the exam at the beginning of the Fall and Spring semesters. Although doctoral students take the same prelim as MS students, a higher score is required of them. There is an established time-line for passing the exam which is different for MS and PhD students. Failure to pass the exam with the required score and within the specified time usually results in dis-enrollment from the physics graduate program. See the “Preliminary Exam Procedures” on the department website for further details.

Astrophysics

Astrophysics research at NMT encompasses planets, exoplanets, stars, the interstellar medium, galaxies, and active galactic nuclei. Specific faculty interests include stellar formation, galactic dynamics and evolution, and interstellar chemistry. The Jansky Very Large Array (VLA) and the Very Long Baseline Array (VLBA) radio telescopes, operated by the National Radio Astronomy Observatory (NRAO), are headquartered on campus, and offer unique opportunities for research in radio astronomy. The Magdalena Ridge Observatory (MRO) operates a 2.4-meter optical telescope and is developing an optical/infrared interferometer (MROI) that provides both opportunities in optical instrumentation design as well as scientific research once first light is achieved. Students may pursue dissertation work not only with regular faculty but also with a number of NRAO staff who have adjunct appointments at Tech.

Atmospheric Physics

Atmospheric physicists at Tech study convection and dynamics (on Earth and other solar system planets), lightning, atmospheric electricity, and the middle and upper atmosphere (including ozone and space weather). Langmuir Laboratory for Atmospheric Physics is a facility unique in the world, providing an instrumented mountaintop specializing in lightning research. Langmuir also includes balloon-launch facilities and a capability in compact instrumentation appropriate for remote and airborne deployments. The convection and dynamics group has its own Beowulf cluster, while the upper atmospheric group supports extremely sensitive spectrographs. Students in our graduate program can acquire deep, hands-on experience with custom scientific instrumentation and electronics, computer modeling and automated data analysis, and theoretical and mathematical methods of physics.

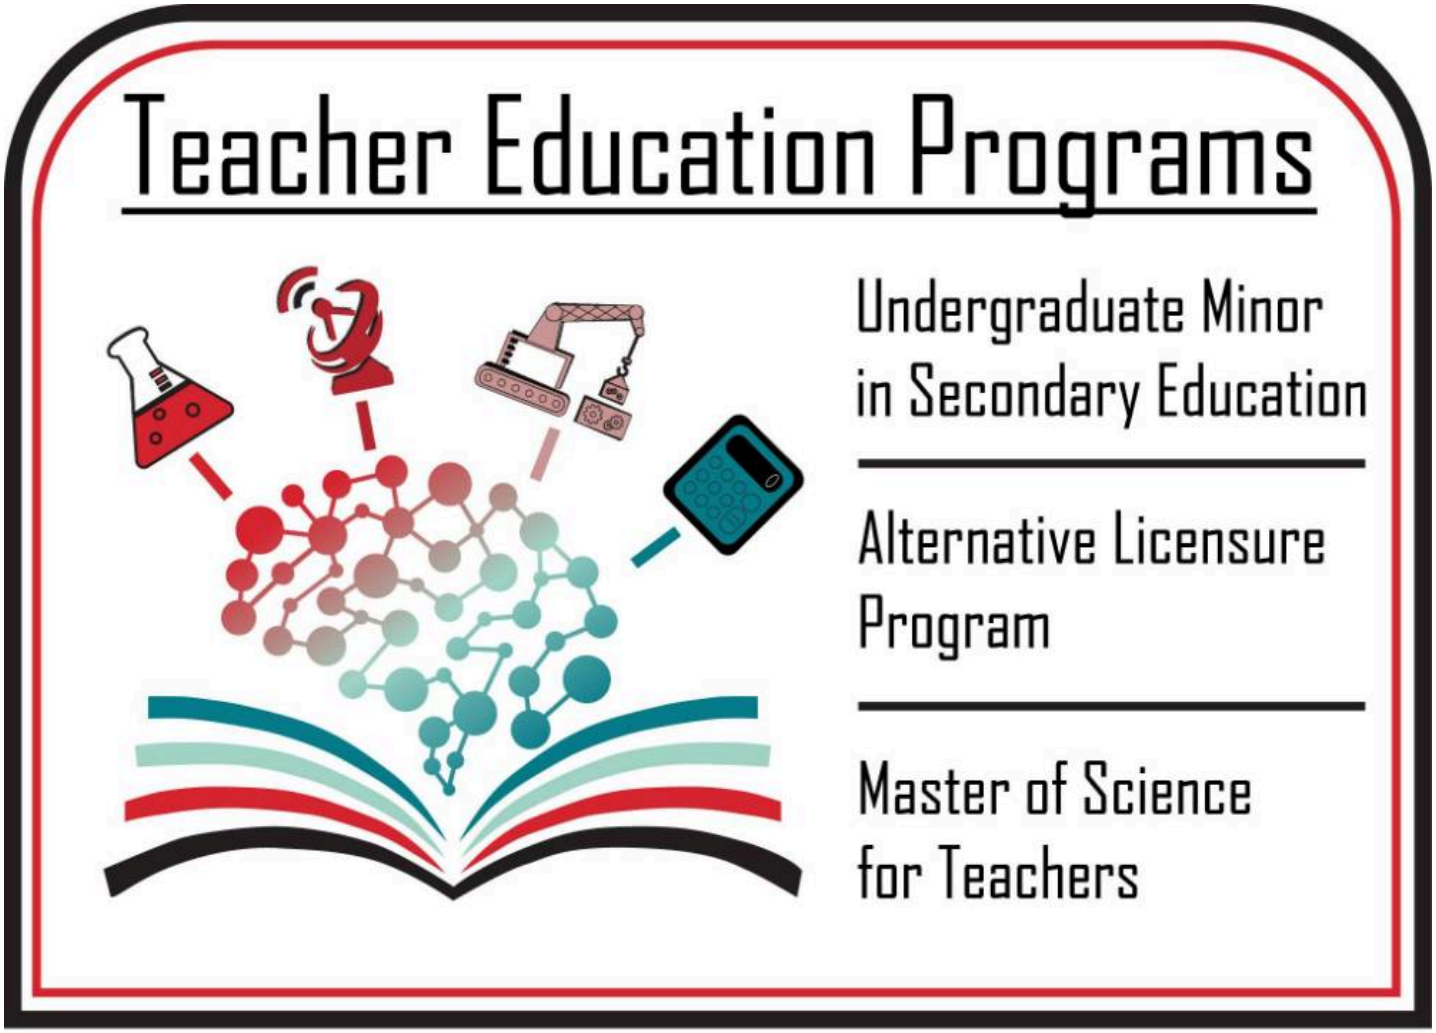
Science Teaching (program) Department



Master of Science Teaching

Interdepartmental Program

Overview: Provides three distinct pathways to becoming a teacher and/or enhancing STEM knowledge with a graduate degree.

Programs Offered: *Master of Science for Teachers (MST), Graduate Certificate: Secondary Alternative Licensure (ALP), Graduate Certificate: Elementary Alternative Licensure (ALP), and Undergraduate Minor in Secondary Education (UMSE).*

Programs

Secondary Education (minor)
GC-ATLE - G.C. in Elementary Alternative Licensure
GC-ATLS - G.C. in Secondary Alternative Licensure
MST - M.S. for Teachers

Courses

STCH5001 - Math for Teachers
STCH5002 - Biology for Educators
STCH5005 - Chemistry for Educators
STCH5006 - Chemistry of Biomolecules
STCH5009 - Current Concepts & Technology in Biology
STCH5010 - Computer Science for Educators
STCH5011 - Cybersecurity Fundamentals
STCH5015 - Engineering for Educators: Looking Underground
STCH5016 - Engineering for Educators: Drones & Biomimicry
STCH5020 - Geology for Educators
STCH5021 - Earth History
STCH5025 - Math for STEM Educators
STCH5026 - Understanding Statistics
STCH5030 - Physics for Educators
STCH5031 - Physics of the Solar System
STCH5035 - Technical Communication for Teachers
STCH5050 - Mathematics for Teachers I
STCH5081 - Directed Study
STCH5090 - Independent Study
STCH5091 - Thesis

Degree Designation
Master of Science

Program Type
Accelerated Pathway

Program Description
Computer Science Accelerated M.S. Option

Students who want to obtain both the B.S. in Computer Science and M.S. in Computer Science degrees may pursue an Accelerated M.S. Degree option. Students must apply by mid-semester of their second semester in their junior year in Computer Science to be admitted for their senior year. Accepted students may apply nine credits of CSE courses numbered above 5000 to both degrees.

Accelerated M.S. in Mathematics (pathway)

[Program Overview]

Program Title
Accelerated Master's Degree Program in Mathematics

Department(s)
Mathematics

Program Short Title
A.M in Mathematics

Degree Designation
Master of Science

Program Description
Accelerated Master's Degree Program in Mathematics (Minimum 150 credit hours) The Accelerated Master Degree program provides the opportunity to obtain a BS and MS degree in Mathematics in five years. Accepted students may apply at most 12 credits from 5000-level courses towards both their undergraduate and graduate degrees. It is recommended to apply to the program after completion of MATH 3052 and before enrolling in any graduate courses. The student will work with a professor in the Mathematics Department who will assist the student in developing the course of study
and advise the student on their master's thesis
or independent study.

Accelerated M.S. in Chemical Engineering (pathway)

[Program Overview]

Program Title
Accelerated Masters in Chemical Engineering

Department(s)
Chemical Engineering

Program Short Title
ACCEL Masters in Chemical Engr

Degree Designation
Master of Science

Program Type
Accelerated Pathway

Program Description
Qualified undergraduate students may apply for admission to the Accelerated Masters program in Chemical Engineering. In fulfillment of the requirements for both B.S and M.S. degrees, as outlined in their respective sections, accepted students may apply nine credits of 5000-level courses to both degrees.

Accelerated M.S. in Biology (pathway)

[Program Overview]

Program Title
Accelerated Master of Science in Biology Program

Department(s)
Biology

Program Short Title
Accelerated M.S. in Biology

Degree Designation
Master of Science

Program Type
Accelerated Pathway

Program Description
Exceptionally qualified and motivated students may earn both BS (in Biology or BMS) and MS (in Biology) degrees in as little as five years.

Program Information & Policies
Accepted students may apply up to 12 credits of 5000-level or above coursework to both degrees.

Students should apply for the accelerated Master's program no later than the semester prior to their final undergraduate year. During their final year of undergraduate study, students must select a graduate advisory committee and formalize their graduate research or independent study topic and program of study.

Thesis students must also enroll in BIOL5081 Directed Study (Directed study) for one credit with their research advisor during their final semester of undergraduate study, and pass with a B or better, to remain in the accelerated program. Both thesis and independent study students must receive a B or better in dual counted classes to remain in the accelerated program. Both thesis and independent study students must take BIOL 5079 and BIOL 5082 during their final undergraduate year.

Accelerated M.S. in Civil & Environmental Engineering (pathway)

[Program Overview]

Program Title
Accelerated Master of Science in Civil & Environmental Engineering

Department(s)
CEE Dept/ Civil Engineering, CEE Dept/ Environmental Engineering

Program Short Title
Accelerated M.S. in CEE

Degree Designation
Master of Science

Program Type
Accelerated Pathway

Program Description
Qualified students may apply for admissions to the Accelerated Masters program in Civil and
Environmental Engineering.

Program Information & Policies
Students are expected to apply for admission to this program after the first semester of their junior year. In fulfillment of the requirements for both B.S. and M.S. degrees in Civil and Environmental Engineering, as outlined in their respective sections, accepted students may apply up to 6 credits of 5000-level courses to both degrees.

[Program Overview]

Program Title
Accelerated Master of Science in Chemistry Program

Department(s)
Chemistry

Program Short Title
Accelerated M.S. in Chemistry

Degree Designation
Master of Science

Program Type
Accelerated Pathway

Program Description
Qualified undergraduate students may apply for admission to the Accelerated Master's Program in Chemistry. In fulfillment of the requirements for both B.S and M.S. degrees, as outlined in their respective sections, accepted students may apply nine (9) credits of 5000-Level courses to both degrees.

Program Information & Policies
The M.S. degree requires completion of a master's thesis. A portion of the master's project may be presented to fulfill the undergraduate senior thesis requirement; however, the master's thesis must go substantially beyond the senior thesis work. The suitability of the proposed master's level research will be evaluated by the student's graduate advisory committee.

Accelerated M.S. in Materials Engineering (pathway)

[Program Overview]

Program Title
Accelerated Master of Science in Materials Engineering

Department(s)
Materials Engineering

Program Short Title
Accelerated M.S. in Mtls Eng.

Degree Designation
Master of Science

Program Type
Major

Program Description
Qualified undergraduate students may apply for admission to the Accelerated Masters program in Materials Engineering. In fulfillment of the requirements for both B.S and M.S. degrees, as outlined in their respective sections, accepted students may apply six credits of 500-level courses to both degrees.

Accelerated M.S. in Physics (pathway)

[Program Overview]

Program Title
Accelerated Masters in Physics

Department(s)
Physics

Program Short Title
Accelerated M.S. in Physics

Degree Designation
Master of Science

Program Type
Accelerated Pathway

Program Description
Qualified students may apply for admission to the Accelerated Masters program in Physics. Students are expected to apply for admission to this program after the first semester of their junior year through the regular graduate admissions process. The student must have a minimum cumulative GPA of 3.0, and also specifically an average minimum GPA of 3.0 in all physics and mathematics courses to be eligible to apply for the program. Meeting the GPA criterion does not automatically guarantee admission to the program.

Upon successful admission, during the student's 7th semester, the candidate should select an advisory committee and research topic for the M.S. Students may apply PHYS 5009 (3 credits) to both the B.S and M.S. degrees, however all other courses must be counted toward either the B.S. or the M.S. exclusively. PHYS 5079 (1 credit) should be taken during semesters 7 through 10 (see sample curriculum on the Department webpages). The curriculum of study must be approved by the candidate's committee, ideally in the 7th or 8th semester. The accelerated M.S. student may take the department's preliminary examination as soon as the 8th semester of study, and must pass the examination by the beginning of the 10th semester to remain in the program.

A student may pursue either a M.S. with Thesis (6 credits) or a M.S. with Independent Study (3 credits), normally taken during the 9th and/or 10th regular semesters of study. The student is strongly encouraged to pursue research or take courses to apply toward the M.S. during the summer between the 8th and 9th semesters.

Simple Requisites

Subplan

Program requirements are the same as MS-PHYSICS.

No Requirement Level

Accelerated M.S. in Electrical Engineering (pathway)

[Program Overview]

Program Title
Accelerated Masters in Electrical Engineering

Department(s)
Electrical Engineering

Program Short Title
Accelerated Masters Elect /Eng

Degree Designation
Master of Science

Program Description
Qualified students may apply for admission to the Accelerated Masters program in Electrical Engineering. In fulfillment of the requirement for both B.S and M.S degrees as outlined in their respective sections, accepted students may apply eight credits of 5000 level or above to both degrees.

Accelerated Masters in Mechanical Engineering

[Program Overview]

Program Title
Accelerated Masters in Mechanical Engineering

Department(s)
Mechanical Engineering

Program Short Title
Accelerated Masters Mechanical

Degree Designation
Master of Science

Program Description
Qualified undergraduate students may apply for admission to the Accelerated Masters program in Mechanical Engineering. In fulfillment of the requirements for both B.S and M.S. degrees, as outlined in their respective sections, accepted students may apply six credits of 5000-level courses to both degrees.

[Learning Outcomes]

Outcome
1. Learn to reason well and to evaluate and apply information

Outcome
2. Develop analytical and quantitative skills for competence in science and math

Outcome
3. Communicate to different audiences in multiple forms

Outcome
4. Exercise their role as members of diverse societies and cultures

Outcome
5. Learn responsible values and ethics for their professional lives

Outcome
6. Gain expertise in their chosen field of study

Biology (minor)

[Program Overview]

Program Title
Minor in Biology

Department(s)
Biology

Program Short Title
Biology

Degree Designation
Minor

Program Type
Undergraduate Minor

Program Description
Minimum of 18 credit hours required to obtain a minor in Biology

Program Information & Policies
Biology classes required for a minor in biology may not be taken on an S/U basis.

Simple Requisites

Subplan

minor in Biology course requirements- 18 credits
Type
Completion Requirement

Required Biology Courses

Complete ALL of the following Courses:

- BIOL2110 - Pinciples of Biology: Cellular & Molecular
  AND BIOL2110L - Pinciples of Biology: Cellular & Molecular Lab
- BIOL2610 - Principles of Biology: Biodiversity, Ecology, and Evolution
  AND BIOL2610L - Principles of Biology: Biodiversity, Ecology, and Evolution Lab
- BIOL3031 - Cell Biology
- BIOL3044 - Introductory Ecology
  AND BIOL3044L - Introductory Ecology Lab

complete 3 additional credits in one course numbered 3000 and above

Earn at least 3 credits from the following:

- Upper-Level Biology Courses

Additional Comments:

See your respective Degree Program for the Requirements of the Program.

No Requirement Level

See the Institute **General Education Core Requirements.**

Minimum credit hours required—18

Restriction: If a student takes more than one minor in the CLASS Department, only six (6) credit hours of one minor may be applied towards another minor.

Undergraduate Minor in Creative Thinking and Practice Requirements
Type
Completion Requirement

Creative Thinking Requirement

Complete ALL of the following Courses:

- HUMN2003 - Creative Thinking and Practice

Electives in Creative Thinking Courses

Earn at least 14 credits from the following:

- Area 6: Creative and Fine Arts (BS, BA, or BGS Degree) (3 credits)
- Area 4: Social and Behavioral Science (BS or BGS Degree) (6 credits)
- Area 5: Humanities (BS or BGS Degree) (6 credits)
- Courses in Area 6: Fine and Creative Arts. Courses in Fine Arts and Music Performance (limit of 2 cr. hr.).
- Courses in Area 4: Social Sciences
- Area 5: Humanities in which the student completes a creative project.

Additional Comments:
All elective courses must be approved by the student's minor advisor.

No Requirement Level

See the NMT Institute Requirements.

G.C. in Cybersecurity

[Program Overview]

Program Title
Graduate Certificate in Cybersecurity

Department(s)
Cybersecurity (program)

Program Short Title
GC-CYS

Degree Designation
Graduate Certificate

Program Type
Major

Program Description
The Cybersecurity Graduate Certificate offers graduate students and post-baccalaureate professionals an opportunity to build and strengthen their capabilities in cybersecurity for academic and professional work. The 12 credit hours of coursework required for the certificate include the foundational overview of cybersecurity and in addition allow the student to focus on cybersecurity course that are of particular interest.

Simple Requisites

Subplan

Graduate Certificate in Cybersecurity
Type
Completion Requirement

Required Course

Complete ALL of the following Courses:

- CSE5061 - Foundations of Information Security

Elective Courses

Earn at least 9 credits from the following:

- CSE5054 - Computer Network Security
- CSE5057 - Hardware-Based Network Security
- CSE5063 - Access Countrol & System Security
- CSE5064 - Secure Systems Administration
- CSE5070 - Privacy in Mobile Environments
- EMGT5009 - Systems Risk & Decision Analysis

G.C. in Hydrology

[Program Overview]

Program Title
Graduate Certificate in Hydrology

Department(s)
E&ES, E&ES Dept/ Earth Science

Program Short Title
GC-Hydrology

Degree Designation
Graduate Certificate

Program Type
Major

Program Description
The Hydrology Certificate program is aimed at working professionals or students who wish to increase their qualifications in Hydrology outside of a degree program.The program covers fundamentals of atmospheric, surface, and subsurface hydrology while leaving flexibility to focus on related areas of particular individual interest.

Program Information & Policies
The Certificate requires a minimum of 15 credit hours of graduate and upper division course work as follows:

· GEOL 4040 (3)

· Twelve credits of additional advisor-approved upper division or graduate-level coursework. Examples of available distance education courses include: HYDR 5007, 5010, 5011, 5013, 5014, 5034, 5047, 5050, 5060.

G.C. in Technology Leadership

[Program Overview]

Program Title
Graduate Certificate in Technology Leadership

Department(s)
CSE Dept/ Engineering Management (Program)

Program Short Title
GC-TL

Degree Designation
Graduate Certificate

Program Description
An additional option for prospective students is the Graduate Certificate in Technology Leadership designed for those professionals who do not wish to pursue a master's degree but require the knowledge and skills to lead teams, projects and organizations through the complex environment of change. The rapid pace of technology innovation requires leaders who possess the knowledge, skills, and vision to guide their organizations through the process with an understanding of strategic and operational issues and solutions.

Simple Requisites

Subplan

The certificate requires a total of 15 credit hours selected from the engineering management curriculum, including EMGT5013 Technology Leadership Seminar - Technology Leadership Seminar.

Courses completed for the certificate may be counted toward a master's degree.

It is recommended that prospective students have completed a calculus-based bachelor's degree and a semester of probability and statistics prior to entering the program.

G.C. in Electrical Engineering

[Program Overview]

Program Title
Graduate Certificate in Electrical Engineering

Department(s)
Electrical Engineering

Program Short Title
Grad Cert Electrical Engineeri

Degree Designation
Master of Science

Program Description
The Electrical Engineering graduate certificate program is aimed at practicing engineers wanting to increase their exposure to electrical engineering at the graduate level while not being tied to a degree program. The program is designed to provide a rigorous upgrade to the student 's skills in electrical engineering while focusing on topics of interest to the student.

Simple Requisites

Subplan
The certificate program requires a minimum of 16 credit hours of graduate course work.

Course Requirements
Type
Completion Requirement

Course Requirements

- EE 5021 Measurement and Instrumentation (4 credits)
- One 4 credit electrical engineering graduate course
- One 3 credit or higher electrical engineering course at either graduate or upper undergraduate level
- One 3 credit or higher graduate course in either mathematics, physics, engineering or computer science
- EE 5090 Independent Study (2 credits) supervised by a member of the electrical engineering department

M.S. in Computer Science

[Program Overview]

Program Title
Master of Science in Computer Science

Department(s)
CSE Computer Science & Engineering

Program Short Title
MS-Computer Science

Degree Designation
Master of Science

Program Type
Major

Program Description
Students may earn a Master of Science degree in Computer Science or a Master of Science degree in Computer Science with Specialization in Information Technology through cooperation with the Information Technology faculty.

Program Information & Policies
Master of Science Degree in Computer Science

The M.S. program in Computer Science is based on course work as well as research (either thesis or independent study option). The student must meet the general requirements of the Graduate Program. In addition, the student must fulfill the following requirements, depending on the research option:

Without Thesis:

- Course work approved by the student's advisory committee fulfilling the general requirements of 30 credit hours for the master's degree must include
- CSE 5090 (Independent Study): 3 credit hours;
- CSE 5085 (Graduate Seminar): 3 credit hours;

- One course on theoretical aspects of computer science: either CSE 5044 or CSE 5046
- One course involving substantial programming on systems aspects: either CSE 4023 (not an option if already taken) or CSE 5025
- 9 credit hours from computer science courses numbered higher than 5000.

With Thesis:

Course work approved by the student's advisory committee fulfilling the general requirements of 30 credit hours for the master's degree must include

- CSE 5091 (Thesis): 6 credit hours;
- CSE 5085 (Graduate Seminar): 3 credit hours;
- One course on theoretical aspects of computer science: either CSE 5044 or CSE 5046
- One course on systems aspects involving substantial programming: either CSE 4023 (not an option if already taken) or CSE 5025
- 9 credit hours from computer science courses numbered higher than 5000.

[Learning Outcomes]

Outcome
1. Advanced knowledge of computer science in the areas of theoretical computer science, programming languages, and systems

Outcome
2. The ability to communicate computing concepts through written reports

Outcome
3. The ability to communicate computing concepts through oral presentations

Outcome
4. The ability to conduct research on a theoretical or applied problem in computer science

M.S. in Materials Engineering

[Program Overview]

Program Title
Master of Science in Materials Engineering

Department(s)
Materials Engineering

Program Short Title
MS-Materials Engineering

Degree Designation
Master of Science

Program Description
The Master of Science Option prepares students for high quality research (and is often preferred for admission into PhD programs around the country). Full time graduate students must formalize an advisory committee that will consist of an academic advisor from the department and at least two additional members. The selection of an advisor must be completed by the end of the first semester while the remaining members of the committee along with thesis topic must be decided by the end of the second semester.

Program Information & Policies
Department faculty must not be in the minority in the committee. Part time or DE students must formalize their advisor by the time they complete 12 credits. The student must meet with his or her committee at least once per year.

Simple Requisites

Subplan
The Course Requirements include:

Master of Science in Materials Engineering Requirements
Type
Completion Requirement

Requirements

At least 24 credit hours of course work that must include:

- A minimum of 12 credit hours of MTLS 5000 level courses
- At least 6 hours of upper level (300+) courses outside the Materials Department, unless the student is from a non-Materials background in which case all courses may be from within the Materials Department
- No more than 3 hours of MTLS 5081 Directed Study
- 6 credit hours of MTLS 5091 (Thesis) that will be defend in a public oral defense
- MTLS 5092 each semester offered (for a maximum of two times)

Students may take MTLS 500(Directed Research) in multiple semesters but the credits may not count toward their degree requirements.

Courses must be approved by the advisory committee, and the research should be directed toward a journal publication. Students must inform faculty advisors in advance regarding courses that they plan to take in the following semester.

Additional Comments:
Students are required to write a thesis proposal and defend it in a public oral defense before the advisory committee at least one full semester (fall or spring) before the final defense. The final thesis must be successfully defended in a public oral defense before the advisory committee. Students may appeal to their advisory committee for possible exceptions.

No Requirement Level

New Mexico Tech General Graduate Program Requirements.
Type
Completion Requirement

General Requirements

See additional information on the **New Mexico Tech General Graduate Program Requirements** webpage.

Additional Comments:

Note: Students pursuing an Master's. degree in a different discipline than their Bachelor's degree may request a waiver for the out of program requirement. Waivers must be approved by the student's advisor, committee, department chair, and the Dean of Graduate Studies.

These general requirements do not apply to students in the Master of Science for Teachers (MST) program

[Learning Outcomes]

Outcome
1. Critically assess the literature

Outcome
2. Effectively engage in written dissemination of technical findings and conclusions

Outcome
3. Effectively engage in oral dissemination of technical findings and conclusions

Outcome
4. Demonstrate a breadth of knowledge in Materials Engineering

Mineral Resources (minor)

[Program Overview]

Program Title
Minor in Mineral Resources

Department(s)
E&ES, E&ES Dept/ Earth Science

Program Short Title
Mineral Resources

Degree Designation
Undergraduate Minor

Program Type
Minor

Program Description
Minimum credit hours required –– 18

Simple Requisites

Subplan

minor in Mineral Resources, course requirements
Type
Completion Requirement

Intro to Earth Science

Complete at least 1 courses in the following course sets:
- GEOL1110 & GEOL1110L: Physical Geology & Lab
  OR GEOL1190 & GEOL1190L: Geology of the National Park and Lab

Intro to GIS

Complete ALL of the following Courses:
- GEOL4012 - Introduction to Geographic Information Systems

Intro to Mineralogy

Complete ALL of the following Course Sets:
- GEOL2160 & GEOL2160L: Introduction to Mineralogy & Lab

Mineral Deposits

Complete ANY of the following Courses:
- GEOL4062 - Mineral Deposits
  OR ME4062 - Mineral Deposits

Mineral Resources Electives

Complete at least 2 of the following courses:
- GEOL4031 - Exploration Geochemistry
- GEOL5051 - Industrial Minerals
- ME220 - Surveying & Map Preparation (Inactive)
- ME3060 - Exploration & Field Mapping

Additional Comments:

No Requirement Level

Environmental Engineering (minor)

[Program Overview]

Program Title
Minor in Environmental Engineering

Department(s)
CEE Dept/ Environmental Engineering

Program Short Title
Minor Environmental Eng.

Degree Designation
Minor

Program Type
Undergraduate Minor

Program Description
Minimum of 18 credit hours required to obtain a minor in Environmental Engineering

Simple Requisites

Subplan

Minor in Environmental Engineering
Type
Completion Requirement

ENVE Courses

Complete ALL of the following Courses:
- ENVE201 - Introduction to Environmental Science & Engineering
- ENVE3001 - Applied Priciples of Environmental Engineering

12 additional hours of approved courses from the following

Earn at least 12 credits from the following:

- Approved ENVE courses
- OR ME4020 Soil Mechanics - Soil Mechanics
- OR GEOL4040 Hydro. Theory & Field Methods - Hydro Theory & Field Method

Additional Comments:
Minimum credit hours required – 18

No Requirement Level

Materials Engineering (minor)

[Program Overview]

Program Title
Minor in Materials Engineering

Department(s)
Materials Engineering

Program Short Title
Minor Materials Engineering

Degree Designation
Minor

Program Type
Minor

Program Description
Minimum of 17 credit hours required to obtain a Minor in Materials Engineering

Simple Requisites

Subplan

Minor in Materials Engineering
Type
Completion Requirement

The following courses are required:

Complete ALL of the following Courses:
- MATE202 - Materials Engineering I (Inactive)
  AND MTLS235 - Materials Engineering II
  AND MTLS3027 - Introduction to Physical Metallurgy

Electives

Approved Technical Electives (to yield total of 17)

Additional Comments:

No Requirement Level

Aerospace Engineering (minor)

[Program Overview]

Program Title
Minor in Aerospace Engineering

Department(s)
Mechanical Engineering

Program Short Title
Minor in Aerospace Engineering

Degree Designation
Minor

Program Type
Undergraduate Minor

Program Description
Minimum of 18 Credits are required

Simple Requisites

Subplan
Minimum credit hours required – 18

Minor in Aerospace Engineering
Type
Completion Requirement

The following courses are required:

Complete ALL of the following Courses:
- AE3011 - Aerodynamics I
- AE4012 - Aerospace Systems

Additional twelve

Additional twelve (12) credit hours of AE courses.

Aerospace-related graduate level (5000) MENG courses may also be used with approval of the Aerospace Engineering Minor Advisor.

Additional Comments:

No Requirement Level

See the Institute **General Education Core Requirements.**

Biomedical Engineering (minor)

[Program Overview]

Program Title
Minor in Biomedical Engineering

Department(s)
Mechanical Engineering

Program Short Title
Minor in Biomedical Eng.

Degree Designation
Minor

Program Type
Undergraduate Minor

Program Description
Minimum of 19 Credits are required

Simple Requisites

Subplan
Minimum credit hours required – 19

Minor in Biomedical Engineering
Type
Completion Requirement

The following courses are required:

Complete ALL of the following Courses:
- BIOL2110 - Pinciples of Biology: Cellular & Molecular
  AND BIOL2110L - Pinciples of Biology: Cellular & Molecular Lab
- BIOL3031 - Cell Biology
- BIOL3051 - Anatomy & Physiology
- BIOL3052 - Anatomy and Physiology II

Two Courses from:

Complete at least 2 of the following courses:

- MTLS3051 - Introduction to Polymeric Materials
- MENG4060 - Intro to Biomedical Engineering
- MENG4065 - Biorheology
- MTLS5016 - Biomimetic Materials
- CH E4073 - Polymer Materials Engineering
- MENG5076 - Biomedical Mechatronics
- MENG4086 - Special Topics Biomedical Eng

Senior Design Project

Students, who are interested in a minor in Biomedical Engineering, will do their Junior/Senior Design Project in the Biomedical Engineering field. This is an opportunity for them to implement their learning in the mechanical engineering and life sciences fields to tackle a particular problem in the biomedical engineering field.

Additional Comments:

No Requirement Level

See the Institute **General Education Core Requirements.**

Chemical Engineering (minor)

[Program Overview]

Program Title
Minor in Chemical Engineering

Department(s)
Chemical Engineering

Program Short Title
Minor in Chemical Engineering

Minor

Program Description
Minimum credit hours required—22

Simple Requisites

Subplan
The following courses are required:

Minor in Chemical Engineering Requirements
Type
Completion Requirement

Complete one of the following options

Complete at least 1 of the following courses:

- CH E3051 - Chemical Process Kinetics
- CH E3052 - Separation Process
- CH E4077 - Bioprocess Engineering

Complete one of the following options

Complete at least 1 of the following courses:

- CHEM3011 - Quantitative Analysis **AND** CHEM3011L - Quantitative Analysis Lab
- CHEM3031 - Physical Chemistry I **AND** CHEM3031L - Physical Chemistry I Lab
- CHEM3033 - Organic Chemistry I **AND** CHEM3033L - Organic Chemistry I Lab

Complete all of the following courses

Complete ALL of the following Courses:

- CH E3026 - Principles of Chemical Engineering I
- ES216 - Engineering Fluid Mechanics
- ES3047 - Thermodynamics
- ES3050 - Heat & Mass Transfer
- CH E3049 - Chemical Engineering Thermodynamics

Civil Engineering (minor)

[Program Overview]

Department(s)
CEE Dept/ Civil Engineering

Program Short Title
Minor in Civil Engineering

Degree Designation
Minor

Program Type
Minor

Program Description
18 total credit hours of CE courses, ME 4020, or ME 4022

Simple Requisites

Subplan

Minor in Civil Engineering
Type
Completion Requirement

Minor in Civil Engineering

Minimum credit hours required – 18

Earn at least 18 credits from the following:

- CE101 - Civil Engineering Seminar
- CE3002 - Introduction to Structural Engineering
- CE4001 - Finite Element Analysis for Civil Engineers
- CE4002 - Introduction to Transportation Engineering
- CE4003 - Infrastructure
- CE4006 - Design of Steel Structures
- CE4007 - Design of Concrete Structures
- CE4008 - Cooperative Education
- CE4009 - NDT and SHM (Inactive)
- CE4010 - Reinforced Masonry and Wood Design
- CE4011 - Minimum Design Loads Buildings
- CE4012 - Adv. Design Of Steel Struct.
- CE4013 - Foundation Design & Analysis
- CE4014 - Adv Design of Concrete Struct
- CE4015 - Green Building
- CE4018 - Structural Dynamics
- CE4020 - Pavement Materials & Design (Inactive)
- CE4022 - Geotechnical Waste Containment
- CE4023 - Open Channel Hydraulics
- CE4081 - Senior Engineering Design I
- CE4082 - Senior Engineering Design II
- CE4091 - Special Topics
- ME4020 - Soil Mechanics
  OR ME4022 - Rock Mechanics

Additional Comments:

No Requirement Level

Computer Engineering (minor)

[Program Overview]

Program Title
Minor in Computer Engineering

Department(s)
CSE Computer Science & Engineering

Program Short Title
Minor in Computer Engineering

Degree Designation
Undergraduate Minor

Program Type
Undergraduate Minor

Simple Requisites

Subplan

Minimum credit hours required: 25
Type
Completion Requirement

The following courses are required:

Complete ALL of the following Courses:

- CSE113 - Introduction to Programming
- CSE122 - Algorithms & Data Structures
- CS221 - Computer System Organization (Inactive)
- CS222 - Systems Programming (Inactive)
- EE211 - Circuits & Signals I
- EE252 - Digital Electronics
- EE3051 - Microcontrollers

Any one out of the following

Complete at least 1 of the following courses:

- CSE3025 - Principles of Operating Systems
- CSE3026 - Software Engineering
- CSE3031 - Computer Architecture
- CSE3053 - Introduction to Computer Networks

along with their respective pre-requisites

Additional Comments:

No Requirement Level

See the **Institute General Education Requirements.**

Electrical Engineering (minor)

[Program Overview]

Program Title
Minor in Electrical Engineering

Department(s)
Electrical Engineering

Program Short Title
Minor in E.E

Degree Designation
Undergraduate Minor

Program Type
Minor

Simple Requisites

Subplan

Minimum credit hours required—18
Type
Completion Requirement

Any one out of the following

Complete ALL of the following Courses:

- EE161 - Basic Electronics Laboratory I
- EE162 - Basic Electronics Lab II
- EE211 - Circuits & Signals I
- EE212 - Circuits & Signals II
- EE252 - Digital Electronics
- EE271 - Mathematical Engineering

*Upper-level (3000 level or above)

Four (4) additional credit hours of upper-level (3000-level or above) Electrical Engineering courses.

Additional Comments:

No Requirement Level

See the Institute General Education Core Requirements.

Explosives Engineering (minor)

[Program Overview]

Program Title
Minor in Explosives Engineering

Department(s)
Mechanical Engineering

Program Short Title
Minor in Explosives Eng.

Degree Designation
Minor

Program Type
Undergraduate Minor

Program Description
Minimum of 18 Credits are required

Simple Requisites

Subplan

Minor in Explosives Engineering
Type
Completion Requirement

The following courses are required:

Complete ALL of the following Courses:

- EXPL4045 - Introduction to Explosives Eng
  OR MENG5045 - Introduction to Explosives Engineering
- EXPL4049 - Wave Propagation
  OR MENG5049 - Wave Propagation

One course from (ES fundamentals):

Complete at least 1 of the following courses:

- MENG216 - Engineering Fluid Mechanics
  OR ES216 - Engineering Fluid Mechanics
- ES3002 - Mechanics of Materials
- ES3047 - Thermodynamics

Additional credits

Additional 9 credits hours from EXPL courses
Explosives-related graduate level (500) MENG courses may be used with the approval of the Explosive Engineering Minor Advisor.

Additional Comments:

No Requirement Level

See the Institute **General Education Core Requirements.**

Management (minor)

[Program Overview]

Program Title
Minor in Management

Department(s)
CSE Dept/ Business and Technology Management (program)

Program Short Title
Minor in Management

Degree Designation
Minor

Program Type
Undergraduate Minor

Program Description
The Minor in Management degree option (18 credit hours) provides NMT students with an opportunity to develop their knowledge and skills in business and management through courses of their interest within the management curriculum, and explore a management career path in their respective field of study. Minimum credit hours required—18

Simple Requisites

Subplan

Course Requirements
Type
Completion Requirement

Principle Courses

Nine (9) credit hours from the following courses:

Complete ALL of the following Courses:

- ACCT2110 - Principles of Accounting I
- ECON2120 - Microeconomic Principles
- ES3016 - Engineering Economics

and any ENTR courses (no more than 6 credit hours from ENTR)

Management Required Course: MGMT3030 Management Behavior & Org.

Management Elective Courses: At least Six (6) credit hours of electives from 3000-level and above MGMT courses.

Additional Comments:

No Requirement Level

Mathematics (minor)

[Program Overview]

Minor in Mineral Engineering
Type
Completion Requirement

18 Credits chosen from the following courses

Earn at least 18 credits from the following:

- ME3020 - Economic Analysis
- ME3040 - Geostatistics & Mineral Evaluation
- ME3060 - Exploration & Field Mapping
- ME3080 - Surface Mine Design
- MENG3081 - Junior Engineering Design Clinic I
- ME4010 - Environmental Issues
- ME4013 - Foundation Engineering
- ME4020 - Soil Mechanics
- ME4022 - Rock Mechanics
- ME4024 - Materials Handling & Equip (Inactive)
- ME4025 - Occupational Health & Safety and Professional Responses
- ME4035 - Rock Slope Engineering
- ME4037 - Tunneling & Underground Excavations
- ME4040 - Mine Ventilation
- ME4062 - Mineral Deposits

Other courses can be used with the department's approval.

Additional Comments:

No Requirement Level

See the Institute **General Education Core Requirements.**

Petroleum Engineering (minor)

[Program Overview]

Program Title
Minor in Petroleum Engineering

Department(s)
Petroleum Engineering

Program Short Title
Minor in Petroleum Engineering

Degree Designation
Minor

Program Type
Minor

Program Description
Minimum of 18 credit hours required to obtain a minor in Petroleum Engineerinng

Simple Requisites

Subplan

Minimum credit hours required—18

Minor Requirements
Type

Completion Requirement

The following courses are required

Complete ALL of the following Courses:

- PETR245 - Petroleum Fluids
- PETR3011 - Drilling Engineering
  AND PETR3011L - Drilling Mud Lab
- PETR3045 - Reservoir Engineering I
  AND PETR3045L - Reservoir Engineering Lab
- PETR4024 - Production Engineering
  AND PETR4024L - Production Engineering Lab

Complete at least one of these

Complete at least 1 of the following courses:

- PETR4013 - Well Design
- PETR4045 - Reservoir Engineering II

Additional Comments:

No Requirement Level

See the NMT Institute Requirements .

Minor in Materials Engineering
Type
Completion Requirement

Chemistry Required Courses

Complete ALL of the following Courses:

- CHEM3034 - Organic Chemistry II
- CHEM4046 - Polymer Chemistry

Materials Engineering Required Courses

Complete at least 1 of the following courses:

- MTLS202 - Materials Engineering I
  AND MTLS202L - Materials Engineering I Lab
- MTLS235 - Materials Engineering II
  AND MTLS235L - Materials Engineering II Lab
- MTLS3051 - Introduction to Polymeric Materials

Earn at least 6 credits from the following list

Earn at least 6 credits from the following:

- Technical Electives

Additional Comments:

No Requirement Level

See the **Institute General Education Core Requirements**.

Mechanical Engineering (minor)

[Program Overview]

Program Title
Minor in Mechanical Engineering

Department(s)
Mechanical Engineering

Program Short Title
Minor-MENG

Degree Designation
Minor

Program Type
Minor

Program Description
Minimum of 18 credit hours required

Simple Requisites

Subplan

Minor in Mechanical Engineering
Type
Completion Requirement

The following courses are required:

At least eighteen (18) credit hours of ES or MENG courses and/or labs beyond those required for major. These courses and labs are subject to the approval of the Mechanical Engineering Minor Advisor.

Additional Comments:

No Requirement Level

See the Institute **General Education Core Requirements.**

Music (minor)

[Program Overview]

Program Title
Minor in Music

Department(s)
CLASS

Program Short Title
Music

Degree Designation
Minor

Program Type
Undergraduate Minor

Program Description
Minimum of 18 credit hours required to obtain a minor in Music

Simple Requisites

Subplan

Minimum credit hours required—18

Restriction: If a student takes more than one minor in the CLASS Department, only six (6) credit hours of one minor may be applied towards another minor.

Minor in Music
Type
Completion Requirement

Theory Courses

Complete ALL of the following Courses:

- MUSC1210 - g:Fundamentals of Music
- MUSC3000 - g:Music Theory
  AND MUSC3000L - Music Theory Lab
- MUSC3001 - g:Composition

Fundamentals of Music or Successful audition,

Music Theory or Successful audition.

Elective Courses

Complete ANY of the following Courses:

- MUSC1110 - g:Music Appreciation: Jazz
- MUSC2420 - g:Comprehensive Musicianship
- MUSC3009 - g:Song and Society
  OR HUMN3009 - g:Song and Society
- MUSC3011 - g:Opera
- HUMN3011 - g:Shakespeare & Music
- PSYC3042 - g:Music and the Brain
- GRMNELECT - German Elective
- FRENELECT - French Elective

Can also take a course from MUSC, HUMN, or THEA courses.

Performance credits

4 credits in Music Performance classes
At least 4 credits should be taken from any of the music performance courses (including special topics music performance courses).

Additional Comments:
Successful Auditions

If a student auditions out of MUS 1210 or MUS 3000 (MUSC Theory), they should replace them with credits from the “Elective” or “Performance” categories. Up to 4 of these additional credits can be satisfied by performance classes.

Music minors are required to complete a Senior Recital before graduating.

No Requirement Level

See the **NMT Institute General Education Core Requirements.**

Ph.D. in Physics with Dissertation in Atmospheric Physics

[Program Overview]

Program Title
Doctor of Philosophy in Physics with Dissertation in Atmospheric Physics

Program Short Title
PHD-PHYS Diss/Atmospheric PHYS

Degree Designation
Doctor of Philosophy

Completion Requirement

Ethics in Science and Engineering

Complete ANY of the following Courses:

- SOSC1110 - Introduction to Science and Technology Studies
- SOSC1220 - g:Full Steam Ahead Part 2

Advanced Science, Medicine, or Technology Course

Earn at least 3 credits from the following:

- 3000-Level & above: Science, Medicine, & Technology courses
- OR science, medicine, or technology related PHIL, SOSC, HIST, PSYC, or POLS coursework at the 3000- level or higher.

Science, Medicine, or Technology Electives

Earn at least 12 credits from the following:

- Science, Medicine, Technology Electives
- OR additional credits of science, medicine, or technology related humanities studies and social science courses approved by the student's minor advisor.

Additional Comments:

No Requirement Level

See the **NMT Institute General Education Core Requirements.**

Secondary Education (minor)

[Program Overview]

Program Title
Minor in Secondary Education

Department(s)
Science Teaching (program)

Program Short Title
Secondary Education

Degree Designation
Minor

Program Type
Undergraduate Minor

Program Description
The Undergraduate Minor in Secondary Education (UMSE) will allow current undergraduate students to become certified teachers for grades 7-12 in New Mexico schools. The program is accredited by New Mexico Public Education Department (NMPED) and includes 5 classes along with supervised field experiences in local secondary schools.

Program Information & Policies

- Minimum of 18 credit hours required to obtain a minor in Secondary Education.
- Note : A grade of C– or higher is required to get ALP or UMSE credit for education courses.

Simple Requisites

Subplan

Minimum credit hours required—27

Restriction: If a student takes more than one minor in the CLASS Department, only six (6) credit hours of one minor may be applied towards another minor.

Minor in Secondary Education
Type
Completion Requirement

Education Course Requirements

Complete ALL of the following Courses:

- EDUC3040 - Concepts in Education
- EDUC3041 - Matching Teacher Strategy to Student Learning
- EDUC4001 - Effective Reading for Diverse Learners
- EDUC4003 - Methods & Practices
- EDUC4005 - Assessments & Measurements
- EDUC4013 - Student Teaching (Secondary)
- EDUC4014 - Student Teaching Seminar

Note : A grade of C– or higher is required to get ALP or UMSE credit for education courses.

Additional Comments:

No Requirement Level

Undergraduate Certificate in Business

[Program Overview]

Program Title
Undergraduate Certificate in Business

Department(s)
CSE Dept/ Business and Technology Management (program)

Program Short Title
UC-BUS

Degree Designation
Undergraduate Certificate

Program Type
Undergraduate Certificate

Program Description
The Certificate in Business (18 credit hours) provide students with an introduction to business fundamentals that can meet their diverse educational needs and prepare them for future career opportunities. Students select courses of interest from the management program. This option is an opportunity for community residents, business owners, government and public school employees, and NM Tech employees to increase their business knowledge and skills. The certificate program serves as a catalyst to develop local entrepreneurs who can start their own business or work for existing and new businesses.

AGS - Associate of General Studies

[Program Overview]

Program Title
Associate in General Studies

Department(s)
CLASS

Program Short Title
Associate in General Studies

Degree Designation
Associate of General Studies

Program Type
Major

Program Description
A two-year degree, Associate of General Studies, may be awarded after completion of 60 credit hours of course work approved by the CLASS department chair and the student's AGS academic advisor with a grade-point average of 2.0 or above

Program Information & Policies
Minimum credit hours required—60

Fulfillment of the Institution's residence requirement (30 credit hours) must also be met.

To be admitted into the program for this degree, the candidate must meet with the CLASS department chair and the AGS academic advisor, who will be assigned by the CLASS department chair, to create a AGS Academic Career Plan that will be on file with the Registrar.

Any changes to the AGS Academic Career Plan must be approved by the CLASS department chair and the student's AGS academic advisor. These changes will be on file with the Registrar. The certificate will be awarded only after completion of the above requirements and completion of the AGS academic Career Plan and after petition to the Vice President for Academic Affairs. The plan can be found at https://www.nmt.edu/academics/class/generalstudies.php

Simple Requisites

Subplan

In addition to the General Education Requirements listed below under "Institute General Education Requirement".

- Elective credits in excess of the General Education Core requirements to meet 60 degree credits.

No Requirement Level

Associate of General Studies General Education Requirements
Type
Completion Requirement

Area 1: Communication Requirements for the Associate of General Studies

Earn at least 9 credits from the following:

- Area 1: Communications (AGS or BGS Degree) (9 crs)

ENGL 1110 is waived for students who scored 27 or higher on the ACT English Test or 610 or higher on the SAT Critical Reading Test. These students must take ENGL 1120, COMM 1130, and ENGL 3041 to fulfill the 9 credit hours in this area.

Area 2: Mathematics Requirements for the Associate of General Studies

Earn at least 3 credits from the following:

- Area 2: Mathematics (AGS or BGS Degree) (3 crs)

Area 3: Science Requirements for the Associate of General Studies

Earn at least 8 credits from the following:

- Area 3: Science (AGS or BGS Degree) (8 crs)

Generally, any two courses in Science or Engineering (with associated labs) that are a minimum of 3 credits each.

Area 4: Social Science Requirements for the Associate of General Studies

Earn at least 6 credits from the following:

- Area 5: Humanities (BS or BGS Degree) (6 credits)

Area 5: Humanities Requirements for the Associate of General Studies

Earn at least 6 credits from the following:

- Area 5: Humanities (BS or BGS Degree) (6 credits)

Area 6: Fine and Creative Art Requirement for the Associate of General Studies

Earn at least 3 credits from the following:

- Area 6: Creative and Fine Arts (BS, BA, or BGS Degree) (3 credits)

Area 7: Additional Humanities/Social Science Requirement for the Associate of General Studies

Earn at least 3 credits from the following:

- Area 7: Additional Courses from Areas 4, 5, 6 (BS, BA, or BGS Degree) (3 credits)

BA- BIOLOGY - Bachelor of Arts in Biology

[Program Overview]

Program Title
Bachelor of Arts in Biology

Department(s)
Biology

Program Short Title
BS-BIOLOGY

Degree Designation
Bachelor of Arts

Program Type
Major

Program Description
Minimum Degree Requirements 120 credits

The Bachelor of Arts in Biology provides a rigorous and broad education in Biology and supporting sciences, and captures the social and ethical implications pertinent to today's world view. Graduates of this program are well positioned to pursue careers at the interface of Biology and other disciplines, including in such varied areas as patent law, science communication, and secondary education, as well as postgraduate studies.

Program Learning Outcomes: Graduates will be able to
●Understand, critically evaluate, and communicate information related to Biology
●Use the scientific method to collect and analyze quantitative data
● Articulate the ethical implications of biological research and its impact on society

No more than 4 PHED, ARTS or MUS ensemble credits may be applied toward the degree.

Simple Requisites

BA-BUS - B.A. in Business Management

[Program Overview]

Program Title
Bachelor of Arts in Business Management

Department(s)
CSE Dept/ Business and Technology Management (program)

Program Short Title
BA in BUS

Degree Designation
Bachelor of Arts

Program Description
The B.A. in Business Management provides students with a broad exposure to the field and the practical knowledge and skills required to manage a functional area, project team, or department in public or private sector organizations. The program offers an additional career path for those students interested in developing their own business or becoming future entrepreneurs. Students can choose courses of interest outside the program as electives to gain a wider view and understanding of the world of business and entrepreneurship

Simple Requisites

Subplan

Minimum credit hours required – 120
In addition to the General Education and Institute Core Curriculum for a B.A degree, the following courses are required:

Degree Requirements
Type
Completion Requirement

Required accounting courses

Complete ALL of the following Courses:

- ACCT2110 - Principles of Accounting I
- ACCT2120 - Principles of Accounting II

Complete at least 1 of the following:

Complete at least 1 of the following courses:

- ACCT3050 - Managerial Accounting
- ACCT3053 - Cost Accounting
- ACCT3071 - Financial Accounting

Required economic courses

Complete ALL of the following Courses:

- ECON2110 - Macroeconomic Principles
- ECON2120 - Microeconomic Principles

3 credit hours may be used to fulfill Area 4 of the General Education Requirement.

Additional required courses

Complete ALL of the following Courses:

- ENTR1110 - Creativity, Innovation, & Entrepreneurship
- BFIN3002 - Introduction to Financial Economics

Earn at least 15 credits from the following:

Earn at least 15 credits from the following:

- MGMT3030 - Management Behavior & Organization
- MGMT3031 - Human Resource Management (Inactive)
- MGMT3035 - Marketing New Products & Innovations
- MGMT4062 - Systems, Risk, & Decision Analysis
- MGMT4072 - Production & Operations Management
- MGMT4076 - Project Management

Additional requirements

9 additional credit hours chosen from upper-division MGT and ECON courses, ES 3016, and MATH 3082.

Required computer science engineering courses

Complete at least 1 of the following courses:

- CSE107 - Intro to Programming Python (Inactive)
- CSE113 - Introduction to Programming

Required math courses

additional to courses used to fulfill the General Education Requirement Area 2

Earn at least 6 credits from the following:

- MATH1430 - Application to Calculus 1
- MATH2350 - Statistical Methods
- MATH2420 - Applied Linear Algebra
- MATH3082 - Probability and Statistics

Note pre-requisites of MATH classes must be satisfied.

Complete at least 1 of the following courses

Complete at least 1 of the following courses:

- COMM1130 - g:Public Speaking
- COMM3060 - g:Advanced Public Speaking

The chosen course cannot be used to fulfill the General Education Requirement Area 5.

Additional Comments:

- 13-17 credit hours of electives to complete 120 credit hours. Students are recommended to take these electives as part of a minor in a program such as Computer Science, Mathematics, or Technical Communication.
- Two semesters of a foreign language are suggested.
- Required classes cannot be taken on an S/U basis. B.A. degree must achieve a minimum GPA of 2.0.

No Requirement Level

BA-CHEMISTRY - B.A. in Chemistry

[Program Overview]

Program Title	Department(s)
Bachelor of Arts in Chemistry	Chemistry
Program Short Title	**Degree Designation**
BA- Chemistry	Bachelor of Arts

Program Description
This degree program is designed to give students a solid foundation in chemistry and biochemistry, while also exploring the “liberal arts” (natural sciences, social sciences, arts, and humanities). Students are able to pursue individualized programs of study that accommodate their interests and enable them to prepare for a variety of future endeavors. This program may be a good option for students planning careers that apply scientific knowledge within a broader professional context, such as medicine, education, law, or government.

Program Information & Policies
Minimum credit hours required—120

In addition to the Institute Requirements for the Bachelor of Arts Degree, the following courses are required.

Simple Requisites

Subplan

Chemistry Requirements
Type
Completion Requirement

Chemistry Requirements

Complete ALL of the following Courses:

- CHEM1215 - General Chemistry I
- CHEM1215L - General Chemistry I Lab
- CHEM1225 - General Chemistry II
- CHEM1225L - General Chemistry II Lab
- CHEM0130 - Issues in Chem and Biochem
- CHEM3001 - The Chemistry Toolbox
- CHEM3011 - Quantitative Analysis
  AND CHEM3011L - Quantitative Analysis Lab
- CHEM3031 - Physical Chemistry I
  AND CHEM3031L - Physical Chemistry I Lab
- CHEM3033 - Organic Chemistry I
  AND CHEM3033L - Organic Chemistry I Lab
- CHEM3034 - Organic Chemistry II
  AND CHEM3034L - Organic Chemistry II Lab
- CHEM3043 - Descriptive Inorganic Chemistry
  AND CHEM3043L - Descriptive Inorganic Chemistry Lab
- CHEM4030 - Chemistry and Biochemistry Seminar
- CHEM4041 - Biochemistry I
  AND CHEM4041L - Biochemistry I Lab
- CHEM4093 - Senior Research & Thesis I
- CHEM4094 - Senior Research & Thesis II

Mathematics Requirements

Complete ALL of the following Courses:

- MATH1510 - g: Calculus I
  AND MATH1510L - g: Calculus I Lab
- MATH1520 - g: Calculus II

Programing

Complete ALL of the following Courses:

- CSE107 - Intro to Programming Python (Inactive)
  AND CSE107L - Intro Programming Python Lab

Physics

Complete ALL of the following Courses:

- PHYS1310 - g:Calculus-based Physics I
  AND PHYS1310L - Calculus-based Physics I Lab
- PHYS1320 - Calculus-based Physics II
  AND PHYS1320L - Calculus-based Physics Lab II

Psychology

and one additional three-credit course in Psychology

Complete ALL of the following Courses:

- PSYC1110 - Introduction to Psychology

Management Requirement

Complete ALL of the following Courses:

- MGMT3030 - Management Behavior & Organization

Additional Comments:

Recommended Electives

Type
Completion Requirement

Additional Biology

Additional Biology, Especially BIOL 3031

Chemistry

Complete ALL of the following Courses:

- CHEM4011 - Advanced Instrumental Methods
  AND CHEM4011L - Advanced Instrumental Lab

Valuable for students seeking employment in industry

Ethics

Complete ANY of the following Courses:

- PHIL130 - Ethics in Science & Engineerin (Inactive)
  OR PHIL3021 - g:Professional Ethics
  OR PHIL3042 - g:Philosophy of Bioethics

Statistics

Complete ANY of the following Courses:

- MATH2350 - Statistical Methods
  OR MATH3082 - Probability and Statistics
  OR MATH3083 - Introduction to Biostatistics

Economics

Complete ANY of the following Courses:

- ECON2110 - Macroeconomic Principles
  OR ECON2120 - Microeconomic Principles

Additional Comments:
The probable sequence of electives should be discussed with the student's advisor during the first year. Students interested in admission to medical school (or other professional schools) should see Pre-professional Programs in the catalog for advice on choosing electives.

No Requirement Level

Bachelor of Arts General Education Requirements
Type
Completion Requirement

Area 1: Communications

Complete ALL of the following Course Sets:

- Area 1: Communications (BA Degree) (9 credits)

Area 2: Mathematics

Complete ALL of the following Course Sets:

- Area 2: Mathematics (BA Degree) (6 credits)

Area 3: Science

Complete ALL of the following Course Sets:

- Area 3: Science (BA Degree) (12 credits)

Area 4a: Social and Behavioral Science, Policy and Technology

Earn at least 3 credits from the following:

- Area 4a: Social Sciences: Policy and Technology (BA Degree) (3 credits)

Area 4b: Other Social Sciences

Earn at least 6 credits from the following:

- Area 4b: Other Social Sciences (BA Degree) (6 credits)

Area 5a: Ethics and Technology

Earn at least 3 credits from the following:

- Area 5a: Humanities: Ethics and Technology (BA Degree) (3 credits)

Area 5b: Other Humanities

Earn at least 6 credits from the following:

- Area 5b: Other Humanities (BA Degree) (6 credits)

Area 6: Creative and Fine Arts

Earn at least 3 credits from the following:

- Area 6: Creative and Fine Arts (BS, BA, or BGS Degree) (3 credits)

Area 7: Additional Humanities/Social Science Requirement for Bachelor of Arts

Earn at least 3 credits from the following:

- Area 7: Additional Courses from Areas 4, 5, 6 (BS, BA, or BGS Degree) (3 credits)

Additional Comments:

[Learning Outcomes]

Outcome
Demonstrate the Skills Necessary for Critical and Analytical Thinking

Outcome
Demonstrate Professional Level Knowledge of Chemistry

Outcome
Demonstrate the Ability to Conduct Original Research

Outcome
Demonstrate the Ability to Communicate Observations and Discoveries

Degree Map Effective Catalog Year
2025 -
Degree Map Description
The curriculum below assumes a reasonably strong high school background. Where possible, CHEM 311, 333, and 334 should be completed by the end of the sophomore year. This is only an example. Students should consult their advisor to design programs that fit their individual backgrounds, math placement, and interests.

BA-ERSC - B.A. in Earth Science

[Program Overview]

Program Title
Bachelor of Arts in Earth Science

Department(s)
E&ES, E&ES Dept/ Earth Science

Program Short Title
BA- Earth Science

Degree Designation
Bachelor of Arts

Program Type
Degree

Program Description
Earth science is a highly interdisciplinary field with many critical environmental, science, and resource connections to society. Graduates commonly enter professional careers in water resources, in the science, monitoring and management of geologic hazards and water quality, and in the exploration for and stewardship of energy and other natural resources.

Program Information & Policies
Minimum credit hours required–120

Courses used for degree, including general degree requirements, must be taken for a letter grade. GEOL 1000 and 2000 level courses must be passed with a C or higher.

Simple Requisites

Subplan
In addition to the General Education and Institute Core Curriculum Requirements, the following courses are required:

Courses marked with an asterisk (*) may also be used to satisfy Institute Requirements.

B.A. in Earth Science Program Requirements
Type
Completion Requirement

Introduction to Earth Science Requirements

Fulfill ALL of the following requirements:

Earth Science as a Profession

Complete ALL of the following Courses:
- GEOL1101 - Earth Science as a Profession

AND

Physical Geology

Enroll in the following Course Sets:
- GEOL1110 & GEOL1110L: Physical Geology & Lab
- GEOL1190 & GEOL1190L: Geology of the National Park and Lab

(*) GEOL1110 & L may also be used to satisfy Institute Requirements.

Required Earth Science Core Courses

Complete ALL of the following Courses:
- GEOL2160 - Introduction to Mineralogy
  AND GEOL2160L - Introduction to Mineralogy Lab
- GEOL2320 - Earth Surface Processes & Landforms
  AND GEOL2320L - Earth Surface Processes & Landforms Labs
- GEOL2340 - Introduction to Earth's Structure & Composition
  AND GEOL2340L - Introduction to Earth's Structure & Composition Lab
- GEOL206 - Earth History
  AND GEOL206L - Earth History Lab
- GEOL2510 - Introduction to Computational Methods for Earth and Environmental Sciences
- GEOL3001 - Sedimentology and Stratigraphy
  AND GEOL3001L - Sedimentology & Stratigraphy Lab
- GEOL3040 - Global Climate Change Origins & Impacts
- GEOL3053 - Structural Geology
  AND GEOL3053L - Structural Geology Lab
- GEOL3080 - Igneous & Metamorphic Petrology
  AND GEOL3080L - Igneous & Metamorphic Petrology Lab

Earth Science Electives
- Minimum 8 credit hours from GEOL, GEOB, GEOP, GEOC, or HYDR (a maximum of 4 credits from GEOL 1000-level courses)

Earn at least 8 credits from the following:
- Earth Science Dept Electives

Math Requirement

Complete ALL of the following Courses:
- MATH1510 - g: Calculus I
  AND MATH1510L - g: Calculus I Lab
- MATH1520 - g: Calculus II

(*) may also be used to satisfy Institute Requirements.

Physics Requirements

Complete ALL of the following Course Sets:
- PHYS1310 & PHYS1310L: g:Calculus-Physics I and Lab
- PHYS1320 & PHYS1320L: g:Calculus-Based Physics II and Lab

(*) PHYS1310 g:Calculus-based Physics I & PHYS1310L Calculus-based Physics I Lab may also be used to satisfy Institute Requirements.

Chemistry Requirements

Complete ALL of the following Course Sets:

- CHEM1215 & CHEM1215L: g:General Chemistry I and Lab
- CHEM1225 & CHEM1225L: g: General Chemistry II and Lab

(*)CHEM1215 General Chemistry I & CHEM1215L General Chemistry I Lab may also be used to satisfy Institute Requirements.

STEM Electives

- Minimum 9 credit hours from PHYS, MATH, CHEM, BIOL, PETR, ME, GEOL, GEOP, GEOC, or HYD 200-level and CSE 100 level and above.

Earn at least 9 credits from the following:

- Earth STEM Electives

Additional electives (6 cr):

Fulfill ANY of the following requirements:

Earth Disciplines

Earn at least 6 credits from the following:

- Earth Science Dept Electives 2000 or above

OR

OR

Earn at least 6 credits
From the following Subjects:

- English (ENGL) except 103, 1110, 1120, 3041; Communication (COMM); Education (EDUC); History (HIST); Philosophy (PHIL); Humanities (HUMA); Technical Communication (TCOM) except 3021, 4020, 4022; Foreign Languages; Economics (ECON); Political Science (POLS); Psychology (PSYC); Anthropology (ANTH); Women's and Gender Studies (WGS); Social Science (SOSC)
- **Recommended electives from this second list include:** ENGL 3023, ENGL 3024, EDUC 3040, PHIL 3000, PHIL/ TCOM 3015, PHIL 3021, PHIL 3042, POLS 4070, POLS 4071, TCOM 4005

Additional Comments:

No Requirement Level

General Education Requirements for Bachelor of Arts in Earth and Environmental Science
Type
Completion Requirement

Area 1: Communications Requirement for Bachelor of Science

Complete ALL of the following Course Sets:

- Area 1: Communications (BA Degree) (9 credits)

Area 2: Mathematics and Quantitative Reasoning Requirements for Bachelor of Arts

Complete ALL of the following Course Sets:

- Area 2: Mathematics (BA Degree) (6 credits)

Area 3: Science Requirements for a Bachelor of Arts

Earn at least 12 credits from the following:

- Area 3: Science (BA Degree) (12 credits)

Area 4: Social and Behavioral Science

Fulfill ALL of the following requirements:

Area 4a: Policy and Technology requirement for Bachelor of Arts

Earn at least 3 credits from the following:

- Area 4a: Social Sciences: Policy and Technology (BA Degree) (3 credits)

AND

Area 4b: Other Social Sciences for Bachelor of Arts

Earn at least 6 credits from the following:

- Area 4b: Other Social Sciences (BA Degree) (6 credits)

Area 5a: Ethics and Technology for Bachelor of Arts

Earn at least 3 credits from the following:

- Area 5a: Humanities: Ethics and Technology (BA Degree) (3 credits)

Area 5b: Other Humanities

Earn at least 6 credits from the following:

- Area 5b: Other Humanities (BA Degree) (6 credits)

Area 6: Creative and Fine Arts

Earn at least 3 credits from the following:

- Area 6: Creative and Fine Arts (BS, BA, or BGS Degree) (3 credits)

Area 7: Additional Humanities/Social Science Requirement for Bachelor of Arts

Earn at least 3 credits from the following:

- Area 7: Additional Courses from Areas 4, 5, 6 (BS, BA, or BGS Degree) (3 credits)

Additional Comments:

[Learning Outcomes]

Outcome
1. Students will develop a fundamental knowledge of Earth Sciences. This includes a conceptual understanding of: (a) Earth Science Concepts (e.g., Rock composition, geologic processes, surface processes, and magmatism); (b) Laboratory Methods (e.g., optical microscopy, thin section preparation, sedimentary separates, using online repositories, etc.); and (c) Field Methods (taking orientations of rocks in field areas, sampling methods for rocks, measuring stream flow, water chemistry, etc.)

Outcome
2. Students will develop skills needed for professional and research careers. These include (a) Hypothesis Development and Testing; (b) Writing and Communication of Data and Scientific Outcomes; (c) Data Analysis (including the use of online repositories); and (d) Integration of concepts

Outcome
3. Students will be able to apply the acquired skills and concepts of geology to societal problems, such as natural hazards, energy and mineral resources, water resources, or climate change.

BA-ISCI - B.A. in Interdisciplinary Sciences

[Program Overview]

Program Title
Bachelor of Arts in Interdisciplinary Sciences

Department(s)
CLASS , CLASS Dept/ Interdisciplinary Sciences (program)

Program Short Title
BA-Interdisciplinary Sciences

Degree Designation
Bachelor of Arts

Program Description
The degree in Interdisciplinary Sciences is intended for the student who desires a science-focused Bachelor's degree but wishes more latitude in the selection of courses than is available otherwise. The BS is more suited to those who want a quantitative focus and the BA more suited to those who want to focus on social and life sciences or wish to have more exposure to non-STEM subjects (e.g., the humanities and arts). Both degrees pair well with the Undergraduate Minor in Secondary Education (UMSE), and students with this minor would discuss with their advisor which degree (BA or BS) is best suited for disciplines they wish to teach.

Program Information & Policies

To qualify for the Bachelor of Arts degree in Interdisciplinary Sciences, a student must satisfy the general education core curriculum requirements for the Bachelor of Arts.

For students who do choose to pursue teaching as an additional area, proper selection of courses and enrollment in the Undergraduate Minor in Secondary Education (UMSE) is necessary for eventual state teaching licensure. Students in the optional UMSE should check State requirements with their Education Minor Advisor to ensure they meet criteria for certification and endorsement, because State requirements can change. Typically USME students must complete 5 Education classes along with three field experiences and one semester of student teaching in local secondary schools. These 27 credits necessary to teach on the secondary level are accredited by the New Mexico Public Education Department (NMPED). In addition, UMSE Students seeking a particular endorsement from the NMPED (e.g., Science, Math, Psychology, Computer Science) should work with their advisor on a suitable course sequence. For instance, the math requirement is a minimum of 24 credits in mathematics courses with 12 of those credits at the 3000-level or above.

Simple Requisites

Subplan

Bachelor of Arts in Interdisciplinary Sciences (120 credits)
Type
Completion Requirement

Science, Engineering, or Mathematics

At least 65 must be in science, engineering, or mathematics.

- These can include biology, chemistry, computer science, earth and environmental science, mathematics, engineering, physics, and psychology.
- These credits can also be used to satisfy general education requirements for the degree.

Science, Engineering, or Mathematics: Course level 2000 or above

At least 30 credit hours in course numbered 2000 or above.

- These can include biology, chemistry, computer science, earth and environmental science, mathematics, engineering, physics, and psychology.
- These credits can also be used to satisfy general education requirements for the degree.
- Of the 30 credits hours at least nine credit hours in each of two fields. Closely related disciplines may count together with appropriate course substitution approvals.

Elective Courses 3000 or above.

- Enough credits to meet the 120 credit hour degree minimum requirement.
- At least 42 credits must be in courses numbered 3000 or above, of the total degree credit hours required.

Additional Comments:

Additionally, the Secondary Education compliments this degree. Other minors and their information may be found in their respective departments.

No Requirement Level

Here you can find the NMT Institute Requirements.

Bachelor of Arts General Education Requirements
Type
Completion Requirement

Area 1: Communication Requirements for Bachelor of Arts

Earn at least 9 credits from the following:

- Area 1: Communications (BA Degree) (9 credits)

Area 2: Math Requirements for Bachelor of Arts

Earn at least 6 credits from the following:

- Area 2: Mathematics (BA Degree) (6 credits)

Note: At least 3 credits must be in Math.

Area 3: Science Requirements for a Bachelor of Arts

Earn at least 12 credits from the following:

- Area 3: Science (BA Degree) (12 credits)

A course and associated lab (of at least 3 total credit hours) from each discipline listed below:

- Biology
- Chemistry
- Earth Sciences
- Physics

Area 4: Social Science Requirements for a Bachelor of Arts

Earn at least 9 credits from the following:

- Area 4a: Social Sciences: Policy and Technology (BA Degree) (3 credits)
- Area 4b: Other Social Sciences (BA Degree) (6 credits)

Note: at least one course must be a “policy and technology” class (POLS; SOSC)

Area 5: Humanities Course Requirements for a Bachelor of Arts

Earn at least 9 credits from the following:

- Area 5a: Humanities: Ethics and Technology (BA Degree) (3 credits)
- Area 5b: Other Humanities (BA Degree) (6 credits)
- At least one of “ethics and technology” classes (PHIL, or other specified classes)

Area 6: Fine & Creative Art Course Requirement for a Bachelor of Arts

Earn at least 3 credits from the following:

- Area 6: Creative and Fine Arts (BS, BA, or BGS Degree) (3 credits)

Area 7: Additional Humanities/Social Science Requirement for a Bachelor of Arts

Earn at least 3 credits from the following:

- Area 7: Additional Courses from Areas 4, 5, 6 (BS, BA, or BGS Degree) (3 credits)

Additional Comments:

[Learning Outcomes]

Name	Outcome
Program Outcomes	Students will learn the fundamentals of scientific inquiry in a breadth of disciplines.

Outcome
Students will develop critical thinking and quantitative skills for competence in scientific reasoning.

Outcome
Students will communicate with different audiences using multiple formats.

Outcome
Students will apply professional values and ethics to their role as a member of a culturally diverse society.

Outcome
Students will explore connections between non-STEM disciplines (e.g., the humanities and arts) and the sciences, including commonalities of inquiry.

Outcome
Students will understand at least one discipline in enough depth to teach others.

BA-PSY - B.A. in Psychology

[Program Overview]

Program Title	**Department(s)**
Bachelor of Arts in Psychology	CLASS , CLASS Dept/ Psychology (program)
Program Short Title	**Degree Designation**
BA- Psychology	Bachelor of Arts

Program Description

The program in psychology is designed to provide students with a scientific foundation in the methods and basic data in psychology and neuroscience and to prepare students for further work in all specializations within the field. The B.A. degree program allows more flexibility and breadth whereas the B.S. degree program emphasizes depth in quantitative skills. Psychology students acquire the fundamentals of learning and memory, perception, attention, reason and problem solving, emotion, thought, language and communication, the development of all these processes and their pathology. In addition, we apply psychology to other fields and teach techniques for measuring and studying psychological variables. Students conduct laboratory experiments on the psychological and physiological bases of behavior. The department has an invertebrate vivarium for laboratory classes and research. There are student opportunities for independent research.

Simple Requisites

Subplan

Minimum credit hours required—120

In addition to the General Education and Institute Core Curriculum the following courses are required:

Required Courses
Type
Completion Requirement

Required Psychology

Complete ALL of the following Courses:
- PSYC1110 - Introduction to Psychology
- PSYC2285 - g:Experimental Psychology
  AND PSYC2285L - g:Experimental Psychology Lab
- PSYC4072 - g:Senior Seminar

Two courses (with associated labs) chosen from among

Complete at least 2 of the following courses:
- PSYC3001L - g:Sensation & Perception Lab
  AND PSYC3001 - g:Sensation & Perception
- PSYC3005 - g:Cognitive Psychology
  AND PSYC3005L - g:Cognitive Psychology Lab
- PSYC3009 - g:Behavioral Neuroscience
  AND PSYC3009L - g:Behavioral Neuroscience Lab
- PSYC3062 - g:Animal Behavior
  AND PSYC3062L - g:Animal Behavior Lab

15 additional credit hours in Psychology

Earn at least 15 credits from the following:
- PSYC1180 - g:Science & Pseudoscience
- PSYC1190 - g:Human Factors in Science & Engineering
- PSYC2110 - Social Psychology
- PSYC2310 - g:Drugs & Behavior
- PSYC2331 - g:Psychobiology of Sex
- PSYC3020 - g:Psychology of Language
- PSYC3042 - g:Music and the Brain
- PSYC3091 - Directed Study
- PSYC4009 - Cell and Molecular Neuroscience
- PSYC4010 - Neurology

Required Biology

Complete ALL of the following Courses:
- BIOL2110 - Pinciples of Biology: Cellular & Molecular
  AND BIOL2110L - Pinciples of Biology: Cellular & Molecular Lab
- BIOL2610 - Principles of Biology: Biodiversity, Ecology, and

Evolution
AND BIOL2610L - Principles of Biology: Biodiversity, Ecology, and Evolution Lab

Upper Division Biology Requirements exclusive of BIOL 4071 or 4081

Earn at least 6 credits from the following:

- BIOL3001 - Genetic Engineering: At the Bench
  OR BIOL3011 - Genetics
  OR BIOL3031 - Cell Biology
  OR BIOL3041 - Intro Microbiology
  OR BIOL3043 - Environmental Microbiology
  OR BIOL3044 - Introductory Ecology
  OR BIOL3045 - Evolutionary Biology
  OR BIOL3050 - Psychobiology of Sex
  OR BIOL3051 - Anatomy & Physiology
  OR BIOL3052 - Anatomy and Physiology II
  OR BIOL3062 - Animal Behavior
  OR BIOL4002 - Ecosystem Biology
  OR BIOL4009 - Cell and Molecular Neuroscience
  OR BIOL4010 - Neurology
  OR BIOL4011 - Advanced Genetics
  OR BIOL4019 - Ecotoxicology
  OR BIOL4031 - Virology
  OR BIOL4035 - Bioinformatics
  OR BIOL4037 - Infection and Immunity
  OR BIOL4043 - Molecular Biology
  OR BIOL4045 - Evolutionary Biomechanics (Inactive)
  OR BIOL4049 - Astrobiology
  OR BIOL4055 - Molecular Ecology
  OR BIOL4070 - Biology CURE
  OR BIOL4089 - Special Topics in Biology

Additional credits

At least three (3) additional credit hours beyond the General Education Core Curriculum and the Psychology requirements above at the 3000 level or above

Electives

Electives to complete 120 credit hours. Earning a minor in another field is strongly encouraged

Additional Comments:

No Requirement Level

BGS - Bachelor of General Studies

[Program Overview]

Program Title
Bachelor of General Studies

Department(s)
CLASS , CLASS Dept/ General Studies (program)

Program Short Title
Bachelor of General Studies

Degree Designation
Bachelor of General Studies

Program Description
This degree allows a student to plan a program of courses according to individual educational goals and career plans.

Program Information & Policies
The Bachelor of General Studies degree will be awarded after completion of 120 credit hours with a grade-point average of 2.0 or more. Other requirements for this degree include the following:

- Completion of the General Education Core & Degree Curriculum listed below.
- Completion of 42 credit hours in courses numbered 3000 or above.
- Completion of the BGS Academic Career Plan with a stated Emphasis area or areas.
- Fulfillment of the Institution's residence credit requirement (30 credit hours).

To be admitted into the program for this degree, the candidate must meet with the CLASS department chair and the BGS academic advisor, who will be assigned by the CLASS department chair, to create a BGS Academic Career Plan that will be on file with the Registrar. Any changes to the BGS Academic Career Plan must be approved by the CLASS department chair and the student's BGS academic advisor. These changes will be on file with the Registrar and must be met, along with the above-stated requirements, before the degree will be awarded. The plan can be downloaded from https://www.nmt.edu/academics/class/generalstudies.php

Note: Minors cannot be earned under a Bachelor of General Studies Degree. Students who plan to pursue a career or graduate studies that require a Bachelor of Science degree are advised to pursue another degree program at New Mexico Tech.

Simple Requisites

Subplan
The Bachelor of General Studies Degree requires completion of the Institute General Education Core Requirements; See the Requirements listed below under "Institute General Education Requirements."

Bachelor of General Studies Requirements in addition to the General Education Requirements
Type
Completion Requirement

Courses 3000 or above

Earn at least 42 credits from the following:
- Courses 3000 or above (BGS Degree)

Academic Career Plan

Completion of the BGS Academic Career Plan with a stated Emphasis area or areas.
The Academic Career Plan can be downloaded from https://www.nmt.edu/academics/class/generalstudies.php

Additional Comments:

General Electives to meet 120 degree credit hours.

No Requirement Level

Bachelor of General Studies General Education Requirements
Type
Completion Requirement

Area 1: Communication Requirements for Bachelor of General Studies

Earn at least 9 credits from the following:
- Area 1: Communications (AGS or BGS Degree) (9 crs)

ENGL 1110 is waived for students who scored 27 or higher on the ACT English Test or 610 or higher on the SAT Critical Reading Test. These students must take ENGL 1120, COMM 1130, and ENGL 3041 to fulfill the 9 credit hours in this area.

Area 2: Mathematics Requirements for Bachelor of General Studies

Earn at least 3 credits from the following:
- Area 2: Mathematics (AGS or BGS Degree) (3 crs)

Area 3: Science or Engineering Requirements for Bachelor of General Studies

Earn at least 8 credits from the following:
- Area 3: Science (AGS or BGS Degree) (8 crs)

any two courses at a minimum of 3 credits each in Science or Engineering (with associated labs)

Area 4: Social Science Requirements for a Bachelor of General Studies

Earn at least 6 credits from the following:
- Area 4: Social and Behavioral Science (BS or BGS Degree) (6 credits)

Area 5: Social Sciences Requirements for a Bachelor of General Studies

Earn at least 6 credits from the following:
- Area 5: Humanities (BS or BGS Degree) (6 credits)

Area 6: Fine & Creative Art Course Requirement for a Bachelor of General

Studies

Earn at least 3 credits from the following:

- Area 6: Creative and Fine Arts (BS, BA, or BGS Degree) (3 credits)

Area 7: Additional Humanities/Social Science Requirement for a Bachelor of General Studies

Earn at least 3 credits from the following:

- Area 7: Additional Courses from Areas 4, 5, 6 (BS, BA, or BGS Degree) (3 credits)

Additional Comments:

BS-BIOLOGY - B.S. in Biology

[Program Overview]

Program Title
Bachelor of Science in Biology

Department(s)
Biology

Program Short Title
BS-BIOLOGY

Degree Designation
Bachelor of Science

Program Type
Major

Program Description
The Biology program prepares undergraduate students for graduate education in the medically allied professions and in the specialized fields of the biological sciences. Students who are interested in pre-medical, pre-dental, and pre-veterinary science programs should discuss appropriate course electives with their advisor.

Program Information & Policies
Bachelor of Science in Biology Minimum credit hours required—120;

Biology laboratory classes are required for biology lecture courses that offer an associated laboratory if credit for the lecture course is used to meet the required number of biology credits for a B.S. degree in Biology. Students pursuing a B.S. in Biology must take Biology and Chemistry courses for a letter grade, except for those only offered S/U. Prerequisites for a particular course may be waived only with the written permission of the course instructor and chair of the department.

Simple Requisites

Subplan

BS in BIOLOGY
Type
Completion Requirement

Biology Core Courses

Complete ALL of the following Courses:

- BIOL1131 - Intro to Biology & BMS
- BIOL2110 - Pinciples of Biology: Cellular & Molecular
- BIOL2110L - Pinciples of Biology: Cellular & Molecular Lab
  OR BIOL2141 - Seaphage: Phage Discovery
- BIOL2610 - Principles of Biology: Biodiversity, Ecology, and Evolution
- BIOL2610L - Principles of Biology: Biodiversity, Ecology, and Evolution Lab
  OR BIOL2142 - SEAPHAGE: Phage Genome Annotation
- BIOL3011 - Genetics
- BIOL3011L - Genetics Lab
- BIOL3031 - Cell Biology
- BIOL3041 - Intro Microbiology
- BIOL3041L - Introductory Microbiology Lab
- BIOL3044 - Introductory Ecology
  AND BIOL3044L - Introductory Ecology Lab
- BIOL3045 - Evolutionary Biology
- BIOL4043 - Molecular Biology
  AND BIOL4043L - Molecular Biology Lab
- BIOL4071 - Life Sciences Seminar

Additional Biology Courses

Biology courses numbered 2000 & above.

Minimum of 13 credits in additional Biology courses
Choose courses from Biology listed on the following page:

- https://catalog.nmt.edu/departments/BIOL/courses

Additionally, the following courses may be applied to biology electives if not fulfilling the chemistry elective requirement:

- CHEM4041 Biochemistry I
- CHEM4042 Biochemistry II

Chemistry Requirement

Complete ALL of the following Courses:

- CHEM3033 - Organic Chemistry I

Additional Chemistry Course Electives

Earn at least 6 credits from the following:

- CHEM3011 - Quantitative Analysis
- CHEM3011L - Quantitative Analysis Lab
- CHEM3031 - Physical Chemistry I
- CHEM3033L - Organic Chemistry I Lab
- CHEM3034 - Organic Chemistry II
- CHEM3034L - Organic Chemistry II Lab
- CHEM4041 - Biochemistry I
- CHEM4041L - Biochemistry I Lab

Computer Science or Math Elective

Complete at least 1 of the following courses:

- CSE107 - Intro to Programming Python (Inactive)
  OR MATH2350 - Statistical Methods

Additional Comments:

Electives to Complete 120 credit hours
Type
Completion Requirement

General Electives

Generally students in the B.S. in Biology program will have 10 free elective credits to complete to meet the minimum degree hour requirements. These electives can be fulfilled with any extra credit courses.

Complete electives to meet 120 degree credit hours

Additional Comments:

No Requirement Level

Bachelor of Science General Education Degree Requirements
Type
Completion Requirement

Area 1: English Requirements for Bachelor of Science

Complete ALL of the following Course Sets:

- Area 1: Communications (BS Degree) (9 credits)

Area 2: Math Requirements for Bachelor of Science

Complete ALL of the following Course Sets:

- Area 2: Mathematics (BS Degree) (8 credits)

Area 3: Science Requirements for a Bachelor of Science

Complete ALL of the following Course Sets:

- Area 3: Science (BS Degree) (18 credits)

Area 4: Social Science Requirements for a Bachelor of Science

Earn at least 6 credits from the following:

- Area 4: Social and Behavioral Science (BS or BGS Degree) (6 credits)

Area 5: Humanities Course Requirements for a Bachelor of Science

Earn at least 6 credits from the following:

- Area 5: Humanities (BS or BGS Degree) (6 credits)

Area 6: Fine & Creative Art Course Requirement for a Bachelor of Science

Earn at least 3 credits from the following:

- Area 6: Creative and Fine Arts (BS, BA, or BGS Degree) (3 credits)

Area 7: Additional Humanities/Social Science Requirement for a Bachelor of Science

Earn at least 3 credits from the following:

- Area 7: Additional Courses from Areas 4, 5, 6 (BS, BA, or BGS Degree) (3 credits)

Additional Comments:

[Learning Outcomes]

Outcome
● Demonstrate broad knowledge of biological concepts

Outcome
● Be able to interpret biologically-relevant data

Outcome
● Demonstrate proficiency in lab techniques

Outcome
● Effectively communicate scientific information

BS-BMS - B.S. in Biomedical Sciences

[Program Overview]

Program Title
Bachelor of Science in Biomedical Sciences

Department(s)
Biology, Biology Dept/ Biomedical Sciences (program)

Program Short Title
BS-Biomedical Sciences

Degree Designation
Bachelor of Science

Program Type
Major

Required Specialization/Concentration(s)
Biology Option, Chemistry Option, Psychology & Neuroscience Option

Program Description
The Bachelor of Science in Biomedical Sciences is a broadly interdisciplinary degree, drawing on knowledge from both science and engineering. Students take a common set of core courses from several disciplines. For more in-depth study, they select an option in Biology, Chemistry, or Psychology & Neuroscience along with a concentration in one of four engineering fields: Biochemical Engineering, Bioinformatics, Biomaterials Engineering or Biomechanical Engineering.

Program Information & Policies
A **Science Option** and **Engineering Concentration** must be chosen and be declared with the office of the Registrar.

Simple Requisites

Subplan

Minimum credit hours required—120

- One of the **Science Options** described and found in the *"Program Science Options"* tab AND
- One of the **Engineering Concentrations** described and found in the *"Concentration Requirements"* tab.

The **Science option** and **Engineering concentration** must be declared with the office of the Registrar.

In addition to the General Education and Institute Core Curriculum Requirements, the following core program is required of all BMS students. Note that courses marked with an asterisk (*) may also be used to satisfy General Education requirements:

Core Requirements for a Bachelor of Science in BMS (all options)
Type
Completion Requirement

Biology/BMS Core Courses

Complete ALL of the following Courses:
- BIOL1131 - Intro to Biology & BMS
- BMST3001 - Genetic Engineering: At the Bench
- BMST4095 - Biomedical Research & Design: Science
- BMST4096 - Biomedical Research & Design: Engineering

Biology Courses

Complete ALL of the following Courses:
- BIOL2110 - Pinciples of Biology: Cellular & Molecular
- BIOL2110L - Pinciples of Biology: Cellular & Molecular Lab
  OR BIOL2141 - Seaphage: Phage Discovery
- BIOL2610 - Principles of Biology: Biodiversity, Ecology, and Evolution
- BIOL2610L - Principles of Biology: Biodiversity, Ecology, and Evolution Lab
  OR BIOL2142 - SEAPHAGE: Phage Genome Annotation
- BIOL3031 - Cell Biology
- BIOL3041 - Intro Microbiology
- BIOL3041L - Introductory Microbiology Lab

Chemistry Courses

Complete ALL of the following Courses:
- CHEM3033 - Organic Chemistry I
  AND CHEM3033L - Organic Chemistry I Lab
- CHEM3034 - Organic Chemistry II
  AND CHEM3034L - Organic Chemistry II Lab
- CHEM4041 - Biochemistry I
  AND CHEM4041L - Biochemistry I Lab

Programming Course

Fulfill ANY of the following requirements:

Python

Complete ALL of the following Courses:
- CSE107 - Intro to Programming Python (Inactive)
  AND CSE107L - Intro Programming Python Lab

OR

or Intro to Programming

Complete ALL of the following Courses:
- CSE113 - Introduction to Programming
  AND CSE113L - Intro to Programming Lab

OR

or Engineer Programming

Complete ALL of the following Courses:
- ES111 - Computer Programming for Engineers
  AND ES111L - Computer Programming for Engineers Lab

Mathematics

Complete ALL of the following Courses:
- MATH2532 - Calculus III
- MATH3035 - Ordinary Differential Equation
- MATH3083 - Introduction to Biostatistics

Philosophy

Complete ALL of the following Courses:
- PHIL3042 - g:Philosophy of Bioethics

Psychology

Complete ALL of the following Courses:
- PSYC1110 - Introduction to Psychology
- PSYC2285 - g:Experimental Psychology
  AND PSYC2285L - g:Experimental Psychology Lab

Additional Comments:

No Requirement Level

Bachelor of Science General Education Requirements
Type
Completion Requirement

Area 1: English Requirements for Bachelor of Science

Complete ALL of the following Course Sets:
- Area 1: Communications (BS Degree) (9 credits)

Area 2: Math Requirements for Bachelor of Science

Complete ALL of the following Course Sets:
- Area 2: Mathematics (BS Degree) (8 credits)

Area 3: Science Requirements for a Bachelor of Science

Complete ALL of the following Course Sets:
- Area 3: Science (BS Degree) (18 credits)

Area 4: Social Science Requirements for a Bachelor of Science

Earn at least 6 credits from the following:
- Area 4: Social and Behavioral Science (BS or BGS Degree) (6 credits)

Area 5: Humanities Course Requirements for a Bachelor of Science

Earn at least 6 credits from the following:
- Area 5: Humanities (BS or BGS Degree) (6 credits)

Area 6: Fine & Creative Art Course Requirement for a Bachelor of Science

Earn at least 3 credits from the following:

- Area 6: Creative and Fine Arts (BS, BA, or BGS Degree) (3 credits)

Area 7: Additional Humanities/Social Science Requirement for a Bachelor of Science

Earn at least 3 credits from the following:

- Area 7: Additional Courses from Areas 4, 5, 6 (BS, BA, or BGS Degree) (3 credits)

Additional Comments:

[Science Options]

Program Science Option (must be declared with the Registrar Office)

Science Option 1: Title
Biology Option

Requirements
Fulfill ANY of the following Course Set requirements:

Anatomy & Physiology

Complete ALL of the following Courses:

- BIOL3051 - Anatomy & Physiology
  AND BIOL3051L - Anatomy and Physiology Lab I
- BIOL3052 - Anatomy and Physiology II
  AND BIOL3052L - Anatomy & Physiology II Lab

OR

Genetics & Molecular

Complete ALL of the following Courses:

- BIOL3011 - Genetics
  AND BIOL3011L - Genetics Lab
- BIOL4043 - Molecular Biology
  AND BIOL4043L - Molecular biology Lab

The Genetics & Molecular course set is Required for Bioinformatics Concentration

AND

- at least 1 additional 4000-level Biology course of 3 or more credits (Bioinformatics Concentration must take BIOL4035 Bioinformatics).

Program Science Option (must be declared with the Registrar Office)

Science Option 2: Title
Chemistry Option

Requirements
In addition to the General Education and Institute Core Curriculum Requirements, and the core BMS Requirements, the following courses are required:

Complete ALL of the following Course Sets:

- CHEM 3011 & CHEM 3011L: Quantitative Analysis & Lab
- CHEM 3031 & CHEM 3031 Lab: Physical Chemistry I & Physical Chemistry I Lab
- CHEM 4042 & CHEM 4042 L: Biochemistry II & Biochemistry II Lab

Program Science Option (must be declared with the Registrar Office)

Science Option 3: Title
Psychology & Neuroscience Option

Requirements
In addition to the General Education and Institute Core Curriculum Requirements), and the core Biomedical Sciences Requirement, the following courses are required: (may be used to satisfy General Education requirements):

Fulfill ALL of the following requirements:

- At least one 2000-level Psychology course of 3 or more credits.
- AND at least one 3000-level Psychology course with laboratory of 4 credits.
- AND at least two additional 3000- or 4000-level Psychology courses of 3 or more credits each.

[Engineering Concentrations]

Concentration Option (must be declared with the Registrar Office)

Concentration Option 1: Title
Biochemical Engineering Concentration

Requirements
The following courses are required:

- CH E3026 Principles of Chemical Engr I (3)
- AND two of: CH E3027 Principles Chem Eng II (3), CH E4068 Surfaces,Interfaces, &Colloids (3), CH E4076 Drug Delivery Techniques (3), CH E4077 Bioprocess Engineering (3), and CH E4049 Nanostructures & Nanotech (3)

Concentration Option (must be declared with the Registrar Office)

Concentration Option 2: Title
Bioinformatics Engineering Concentration

Requirements
With this Concentration choice, Students must take the Biology Science Option (BIOL 3011 & BIOL 3011L AND BIOL 4043 & BIOL 4043L, & BIOL 4035 as the additional 4000 level), and CSE 107 & CSE 107L.

The following courses are also required:

- CSE117 Data Structures in Python (3)
- AND CSE241 Foundtns of Computer Science (3)
- AND CSE3073 Intro to Database Systems (3)

Concentration Option (must be declared with the Registrar Office)

Concentration Option 3: Title
Biomaterials Engineering Concentration

Requirements
The following courses are required (7 credit hours):

- MTLS202 Materials Engineering I & MTLS202L Materials Engineering I Lab *(4),*
- *PLUS* MTLS235 Materials Engineering II *AND* MTLS3010 Proc.& Microstruct. Meth.& Ana *(3)*
- *OR* MTLS4020 Biomedical Materials *(3)*

Concentration Option (must be declared with the Registrar Office)

Concentration Option 4: Title
Biomechanical Engineering Concentration

Requirements
The following courses are required:

- MENG110 Intro. to Mechanical Eng. (3)
- AND ES201 Statics (3)
- AND a 4000-level MENG course of at least 3 credits.

[Learning Outcomes]

Outcome
1. Acquire a breadth of knowledge spanning biological and related sciences,

Outcome
2. Design and conduct scientific research,

Outcome
3. Explain and communicate the role of technology in biology and related fields.

[Sample 4-Year Curriculum Plan(s)]

Degree Map Name
Sample Curriculum for the Bachelor of Science in Biomedical Sciences: Biology option with Bioinformatics Concentration
Total Degree Map Credits
122
Degree Map Effective Catalog Year
2025 -

Degree Map Description
Given that there are 3 science Concentrations, and 4 Engineering Options for this degree, there are 12 possible pathways that a student can take for this degree. The sample curriculum is for the Biology Science option with a Bioinformatics concentration. Students should consult with their advisor to design programs that fit their needs.

BS-CE - B.S. in Civil Engineering

[Program Overview]

Program Title
Bachelor of Science in Civil Engineering

Department(s)
CEE Dept/ Civil Engineering

Program Short Title
BS-Civil Engineering

Degree Designation
Bachelor of Science

Program Type
Major

Program Description
The undergraduate program offers a balanced approach to civil engineering education. Students take a common core of civil engineering courses, and they can specialize in the areas of geotechnical, water resources, or structural engineering. The program is also designed to give students a solid foundation in engineering and science. Students take courses in chemistry, physics, and math, in addition to a core set of engineering courses common to most engineering disciplines.

The civil engineering courses teach students the fundamentals of engineering design, as well as potential applications. Students are taught how to use computer software to expedite the design process, and they are also taught how to balance engineering designs with economic constraints. During their senior year, undergraduate students work with a professor on a design project.

Program Information & Policies
Students pursuing a B.S. in Civil Engineering must take all courses counting towards their degree (including technical electives) for a letter grade, except for courses in Areas 4, 5, 6, and 7 of the institute requirements, which may be taken on an S/U basis.

Civil engineering majors must maintain a minimum GPA of 2.0 in required courses (including technical electives) in order to graduate. Civil engineering majors are required to take the Fundamentals in Engineering (FE) exam as a requirement for graduation.

Simple Requisites

Subplan

Students pursuing a B.S. in Civil Engineering must take all engineering courses for a letter grade.

Civil engineering majors must maintain a minimum GPA of 2.0 in required courses in order to graduate. Civil engineering majors are required to take the Fundamentals in Engineering (FE) exam as a requirement for graduation.

Bachelor of Science in Engineering Required Courses
Type
Completion Requirement

In addition to the General Education and Institute Core Curriculum, the following courses are required:

Complete ALL of the following Courses:

- CE101 - Civil Engineering Seminar
  AND CE201 - Construction Matl/ Prop/Test
  AND CE3001 - Introduction to Construction Engineering
  AND CE3002 - Introduction to Structural Engineering
  AND CE4001 - Finite Element Analysis for Civil Engineers
  AND CE4002 - Introduction to Transportation Engineering
  AND CE4006 - Design of Steel Structures
  AND CE4007 - Design of Concrete Structures
  AND CE4013 - Foundation Design & Analysis
  AND CE4023 - Open Channel Hydraulics
  AND CE4081 - Senior Engineering Design I
  AND CE4082 - Senior Engineering Design II
- ES110 - Intro to Engineering Design
  AND ES111 - Computer Programming for Engineers
  AND ES201 - Statics
  AND ES216 - Engineering Fluid Mechanics
  AND ES3002 - Mechanics of Materials
  AND ES3016 - Engineering Economics
- MATH2532 - Calculus III
  AND MATH2350 - Statistical Methods
  AND MATH3035 - Ordinary Differential Equation
- ME4020 - Soil Mechanics

Additional Comments:

Basic Science Elective
Type
Completion Requirement

Basic Science Elective

Earn at least 3 credits from the following:

- BIOL2110 - Pinciples of Biology: Cellular & Molecular
  OR GEOL1110 - Physical Geology
  OR GEOL2120 - Introduction to Oceanography
  OR GEOL1170 - Spaceship Earth (Inactive)
  OR GEOL1185 - Water in the Rise & Fall of Civilizations
  OR GEOL1140 - Geological Disasters

Students are not required to take the accompanying lab unless it is required by the Biology/Earth Science department.

Additional Comments:

Technical Electives (15) minimum credits: from the following Approved Civil Engineering Elective lists:
Type
Completion Requirement

Water Resources Engineering

Complete ANY of the following Courses:

- ENVE201 - Introduction to Environmental Science & Engineering
- ENVE3001 - Applied Priciples of Environmental Engineering
- ENVE3003 - Water Treatment Process Design
- ENVE3004 - Wastewater Treatment Process Design
- ENVE4006 - Environmental Engineering Unit Operations
- GEOL4040 - Hydrology Theory & Field Methods
- ES3047 - Thermodynamics
- ES3050 - Heat & Mass Transfer

Geotechnical Engineering

Complete ANY of the following Courses:

- CE4022 - Geotechnical Waste Containment
- ME3060 - Exploration & Field Mapping
- ME4022 - Rock Mechanics
- ME4034 - Drilling & Blasting Engineering

3 credits in Some explosives (EXPL) courses – check with Department Chair

Structural Engineering

Complete ANY of the following Courses:

- CE4003 - Infrastructure
- CE4009 - NDT and SHM (Inactive)
- CE4010 - Reinforced Masonry and Wood Design
- CE4011 - Minimum Design Loads Buildings
- CE4012 - Adv. Design Of Steel Struct.
- CE4014 - Adv Design of Concrete Struct
- CE4015 - Green Building
- CE4018 - Structural Dynamics
- MENG3004 - Advanced Strength of Materials
- MENG4041 - Dynamics & Vibrations in Structural Design
- ME4034 - Drilling & Blasting Engineering
- CE4016 - Non-Destructive Testing & Structural Health Monitoring

3 credits in Some explosives (EXPL) courses – check with Department Chair

Additional Electives

Complete ANY of the following Courses:

- ENVE4021 - Green Engineering
- ENVE4014 - Energy & Environment
- ENVE4091 - Special Topics
- CE4091 - Special Topics
- GEOL4012 - Introduction to Geographic Information Systems

Additional Comments:
Additional technical electives must be approved by the Department Chair

CE students must take a minimum of 15 credit hours from the list of approved civil engineering electives. Students may take approved elective courses from more than one specialty area to satisfy the B.S. degree without prior approval from their advisor or the Department Chair. Courses are grouped by specialty to assist students who may want to specialize in a particular area.

No Requirement Level

Bachelor of Science General Education Requirements
Type
Completion Requirement

Bachelor of Science General Education Requirements

Area 1: Communications

Complete ALL of the following Course Sets:

- Area 1: Communications (BS Degree) (9 credits)

Area 2: Mathematics and Quantitative Reasoning

Complete ALL of the following Course Sets:

- Area 2: Mathematics (BS Degree) (8 credits)

Area 3: Science

Complete ALL of the following Course Sets:

- Area 3: Science (BS Degree) (18 credits)

Area 4: Social Science

Earn at least 6 credits from the following:

- Area 4: Social and Behavioral Science (BS or BGS Degree) (6 credits)

Area 5: Humanities

Earn at least 6 credits from the following:

- Area 5: Humanities (BS or BGS Degree) (6 credits)

Area 6: Creative and Fine Arts

Earn at least 3 credits from the following:

- Area 6: Creative and Fine Arts (BS, BA, or BGS Degree) (3 credits)

Area 7: Additional Courses

Earn at least 3 credits from the following:

- Area 7: Additional Courses from Areas 4, 5, 6 (BS, BA, or BGS Degree) (3 credits)

Additional Comments:

[Learning Outcomes]

Outcome
an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics

Outcome
an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors

Outcome
an ability to communicate effectively with a range of audiences

Outcome
an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts

Outcome
an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives

Outcome
an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions

Outcome
an ability to acquire and apply new knowledge as needed, using appropriate learning strategies

BS-CH E - B.S. in Chemical Engineering

[Program Overview]

Program Title	**Department(s)**
BS-CH E	Chemical Engineering
Program Short Title	**Degree Designation**
BS-Chemical Engineering	Bachelor of Science

Program Description

Chemical engineering is one of the most fundamental engineering disciplines that impacts nearly every facet of life. The efficient production of food, pharmaceuticals, fuels, semiconductors, polymers, and various chemicals, as well as research in sustainable environment and energy, biomedical technology and nanotechnology are driven by the ingenuity of chemical engineers.

Graduates from the Chemical Engineering department will find employment in a variety of industry and research facilities, as well as government, medicine, patent law, technical marketing and other such fields. Students have worked in food production, pharmaceuticals, energetic materials, semiconductor processing, biofuels, and have also pursued research at the national laboratories.

Throughout the Chemical Engineering curriculum, students will be able to foster innovation and champion ideas through effective communication. They learn how to design solutions to answer questions such as “how can this process be made safer?”, “how can this process be made more efficient?” and so on. This is accomplished through a combination of insightful teaching, challenging laboratory experiences, unique research opportunities and internships. Furthermore, the program is reviewed by an external advisory board of industry and research professionals to ensure that students are well-prepared for successful careers in the modern scientific world

To learn more, the Student Handbook of the Chemical Engineering website (www.nmt.edu/academics/chemeng) is an excellent resource with quick links and great insights to taking advantage of the outstanding educational opportunities at New Mexico Tech.

Minimum credit hours required—136

In addition to the General Education and Institute Core Curriculum, the following courses are required:

Course Requirements
Type
Completion Requirement

Chemical Engineering Required Courses

Complete ALL of the following Courses:
- CH E1010 - Intro to Chemical Engineering
- CH E3026 - Principles of Chemical Engineering I
- CH E3027 - Principles of Chemical Engineering II
- CH E3045L - Chemical Engineering Design Lab
- CH E3049 - Chemical Engineering Thermodynamics
- CH E3051 - Chemical Process Kinetics
- CH E3052 - Separation Process
- CH E3071 - Solution Methods for Chemical Engineering
- CH E4043 - Process Dynamics & Control
  AND CH E4043L - Process Dynamics & Control Lab
- CH E4045L - Unit Operations Lab
- CH E4061 - Plant Design, Economics, and Management I
- CH E4062 - Plant Design, Economics, & Management II
- CH E4085 - Process Safety Seminar

Chemistry Required Courses

Complete ALL of the following Courses:
- CHEM3011 - Quantitative Analysis
  AND CHEM3011L - Quantitative Analysis Lab
- CHEM3031 - Physical Chemistry I
  AND CHEM3031L - Physical Chemistry I Lab
- CHEM3033 - Organic Chemistry I
  AND CHEM3033L - Organic Chemistry I Lab

Engineering Science Required Courses

Complete ALL of the following Courses:
- ES201 - Statics
- ES216 - Engineering Fluid Mechanics
- ES3002 - Mechanics of Materials
- ES3047 - Thermodynamics
- ES3050 - Heat & Mass Transfer
- ES4005L - Instrumentation, Measurements, & Processess Control Lab

Electrical Engineering Required Courses

Complete ALL of the following Courses:

- EE211 - Circuits & Signals I
- EE3032 - Electricity and Magnetism

Math Required Courses

Complete ALL of the following Courses:

- MATH2532 - Calculus III
- MATH3035 - Ordinary Differential Equation

Materials Engineering Required Courses

Complete ALL of the following Courses:

- MTLS202 - Materials Engineering I
  AND MTLS202L - Materials Engineering I Lab
- MTLS235 - Materials Engineering II
  AND MTLS235L - Materials Engineering II Lab

Additional Comments:
Engineering/Technical Electives (9) Upper-division engineering or other approved courses. These electives should be Chemical Engineering, other engineering, chemistry, biology, mathematics, physics or computer science courses at the 3000-, 400-, or 5000-level.

Chemical engineering majors must maintain a minimum GPA of 2.0 in required courses in order to graduate. Courses used for degree, including general degree requirements, may not be taken on an S/U basis.

No Requirement Level

General Education Requirements for Bachelor of Science in Chemical Engineering
Type
Completion Requirement

Area 1: Communications Requirement for Bachelor of Science

Complete ALL of the following Course Sets:

- Area 1: Communications (BS Degree) (9 credits)

Area 2: Mathematics and Quantitative Reasoning Requirements for Bachelor of Science

Complete ALL of the following Course Sets:

- Area 2: Mathematics (BS Degree) (8 credits)

Area 3: Science Requirements for a Bachelor of Science

Complete ALL of the following Course Sets:

- Area 3: Science (BS Degree) (18 credits)

Area 4: Social and Behavioral Science Requirements for a Bachelor of Science

Earn at least 6 credits from the following:

- Area 4: Social and Behavioral Science (BS or BGS Degree) (6 credits)

Area 5: Humanities Course Requirements for a Bachelor of Science

Earn at least 6 credits from the following:

- Area 5: Humanities (BS or BGS Degree) (6 credits)

Area 6: Creative & Fine Art Requirement for a Bachelor of Science

Earn at least 3 credits from the following:

- Area 6: Creative and Fine Arts (BS, BA, or BGS Degree) (3 credits)

Area 7: Additional Humanities/Social Science Requirement for a Bachelor of Science

Earn at least 3 credits from the following:

- Area 7: Additional Courses from Areas 4, 5, 6 (BS, BA, or BGS Degree) (3 credits)

Additional Comments:

[Learning Outcomes]

Outcome
1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics

Outcome
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors

Outcome
3. An ability to communicate effectively with a range of audiences

Outcome
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts

Outcome
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives

Outcome
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions

Outcome
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

BS-CHEMISTRY - B.S. in Chemistry

[Program Overview]

Program Title
Bachelor of Science in Chemistry

Department(s)
Chemistry

Program Short Title
BS-Chemistry

Degree Designation
Bachelor of Science

Program Type
Degree

Optional Specialization/Concentration(s)
Biochemistry Option, Environmental Science Option

Program Description
The fundamental mission of the Department of Chemistry is to provide students with: (1) the skills necessary for critical and analytical thinking; (2) an understanding of the basic concepts of chemistry; (3) an appreciation of chemistry and its central place among the sciences; (4) a feeling for the joys and frustrations of original research; and (5) the ability to communicate observations and discoveries.

Program Information & Policies
Minimum credit hours required—120

In addition to the General Education and Institute Core Curriculum Requirements, the following courses are required:

Simple Requisites

Subplan

Required Courses
Type
Completion Requirement

Mathematics & Programming Requirement

Fulfill ALL of the following requirements:

Mathematics Requirement

Complete ALL of the following Courses:

- MATH2532 - Calculus III

AND

Programming Requirement

Complete ANY of the following Courses:

- CSE107 - Intro to Programming Python (Inactive)
  OR CSE113 - Introduction to Programming
  OR ES111 - Computer Programming for Engineers

Required Chemistry Core Courses

Complete ALL of the following Courses:

- CHEM3001 - The Chemistry Toolbox
- CHEM3011 - Quantitative Analysis
  AND CHEM3011L - Quantitative Analysis Lab
- CHEM3031 - Physical Chemistry I
  AND CHEM3031L - Physical Chemistry I Lab
- CHEM3032 - Physical Chemistry II
  AND CHEM3032L - Physical Chemistry II Lab
- CHEM3033 - Organic Chemistry I
  AND CHEM3033L - Organic Chemistry I Lab
- CHEM3034 - Organic Chemistry II
  AND CHEM3034L - Organic Chemistry II Lab
- CHEM3043 - Descriptive Inorganic Chemistry
  AND CHEM3043L - Descriptive Inorganic Chemistry Lab
- CHEM4011 - Advanced Instrumental Methods
  AND CHEM4011L - Advanced Instrumental Lab
- CHEM4041 - Biochemistry I
  AND CHEM4041L - Biochemistry I Lab
- CHEM4046 - Polymer Chemistry
- CHEM4093 - Senior Research & Thesis I
- CHEM4094 - Senior Research & Thesis II

Advanced Chemistry courses

Six (6) credit hours from 4000 or 5000 level Chemistry courses not required above (excluding CHEM 3000, 4000, 4081, 4089).

Earn at least 6 credits from the following:

- 4000 & 5000-Level Chemistry Courses

Additional Comments:

The above curriculum leaves a minimum of 14 credit hours of general electives. In addition to the above requirements, the Chemistry Department strongly recommends the following courses for be taken by students seeking a majoring in Chemistry.

Recommended Electives

•CHEM4042 Biochemistry II (3),

•CHEM4042L Biochemistry II Lab (1)

•One or more of MATH2420 Applied Linear Algebra (3), MATH2350 Statistical Methods (3) or MATH3082 Probability and Statistics (3), MATH3035 Ordinary Differential Equation (3)

•One or more of MGMT3030 Management Behavior & Org. (3),MGMT462 Systems, Risk & Analy (3), MGMT476 Project Management (3)

•BIOL2110 Prin of Bio: Cell & Molecular (3), BIOL2110L Prin of Bio: Cell & Molec Lab (1)

The probable sequence of electives should be discussed with the student's advisor during the freshman year. Students interested in admission to medical school (or other professional schools) should see Pre-professional Programs for advice on choosing electives.

No Requirement Level

Bachelor of Science General Education Requirements
Type
Completion Requirement

Area 1: Communications Requirement for Bachelor of Science

Complete ALL of the following Course Sets:

- Area 1: Communications (BS Degree) (9 credits)

Area 2: Mathematics and Quantitative Reasoning Requirements for Bachelor of Science

Complete ALL of the following Course Sets:

- Area 2: Mathematics (BS Degree) (8 credits)

Area 3: Science Requirements for a Bachelor of Science

Complete ALL of the following Course Sets:

- Area 3: Science (BS Degree) (18 credits)

Area 4: Social and Behavioral Science Requirements for a Bachelor of Science

Earn at least 6 credits from the following:

- Area 4: Social and Behavioral Science (BS or BGS Degree) (6 credits)

Area 5: Humanities Course Requirements for a Bachelor of Science

Earn at least 6 credits from the following:

- Area 5: Humanities (BS or BGS Degree) (6 credits)

Area 6: Creative & Fine Art Requirement for a Bachelor of Science

Earn at least 3 credits from the following:

- Area 6: Creative and Fine Arts (BS, BA, or BGS Degree) (3 credits)

Area 7: Additional Humanities/Social Science Requirement for a Bachelor of Science

Earn at least 3 credits from the following:

- Area 7: Additional Courses from Areas 4, 5, 6 (BS, BA, or BGS Degree) (3 credits)

Additional Comments:

[Science Options]

Program Science Option (must be declared with the Registrar Office)

Science Option 1: Title
Bachelor of Science in Chemistry with Environmental Science Option

Requirements
Minimum credit hours required—124

In addition to the General Education and Institute Core Curriculum Requirements, requirements include the courses listed for the Bachelor of Science in Chemistry (only 6 credit hours of electives required) and the following courses:

- CHEM 4022 and CHEM 4022L plus
- Eight (8) credit hours from the following: CHEM 4031, 4032, or 4033; BIOL 3043, 3044, 4046, and 4055; GEOL 1170, 130L, 140, 140L, 200, 201, 202, 3040, 3090, and 4005
- In addition to the above requirements, strongly recommended courses include: CHEM 3043; one or more of MATH 2420, 283, 3035; and one or more of MGT 3030, 4062, 4076

Program Science Option (must be declared with the Registrar Office)

Science Option 2: Title
Bachelor of Science in Chemistry with Biochemistry Option

Requirements
Minimum credit hours required—122

In addition to the General Education and Institute Core Curriculum Requirements, requirements include the courses listed for the Bachelor of Science in Chemistry (only 6 credit hours of electives required) and the following courses:

- CHEM 4042 (3), 4042L (1)
- Six (6) credit hours from the following: CHEM 4047; BIOL 3011, 3031, 3033, 3041, 3043, 3051, 3052, 4011, 4031, 4035, 4037, 4071, 4086, 4087, and 4088; ChE 4076; and any associated laboratory courses
- In addition to the above requirements, strongly recommended courses include: CHEM 3043; one or more of MATH 2420, 3083, 3035; and one or more of MGT 3030, 4062, 4076

[Learning Outcomes]

Outcome
Demonstrate the Skills Necessary for Critical and Analytical Thinking

Outcome
Demonstrate Professional Level Knowledge of Chemistry

Outcome
Demonstrate the Ability to Conduct Original Research

Outcome
Demonstrate the Ability to Communicate Observations and Discoveries

BS-CS - B.S. in Computer Science

[Program Overview]

Program Title	**Department(s)**
Bachelor of Science in Computer Science	CSE Computer Science & Engineering
Program Short Title	**Degree Designation**
BS-Computer Science	Bachelor of Science

Program Description

The Bachelor of Science in Computer Science program is accredited by the Computing Accreditation Commission of ABET, https://www.abet.org. The program emphasizes fundamental principles while striking a careful balance between the applications of computer technology and the theory of computing. In addition to the required fundamental computer science courses, students must also take technical electives to broaden their knowledge in major computer science application areas. Graduates of this program will be well prepared for both industry employment and graduate study.

Simple Requisites

Subplan

Minimum credit hours required—123

In addition to the General Education and Institute Core Curriculum, the following courses are required:

Program Major Requirements

Type

Completion Requirement

Course Requirements

Complete ALL of the following Courses:
- CSE101 - Introduction to Computer Science & Information Technology
- CSE113 - Introduction to Programming
- CSE122 - Algorithms & Data Structures
- CSE213 - Introduction to Object Oriented Programming
- CSE221 - Computer System Organization
- CSE222 - Systems Programming
- CSE241 - Foundations of Computer Science
- CSE3024 - Principles of Programming Languages
- CSE3025 - Principles of Operating Systems
- CSE3026 - Software Engineering
- CSE3031 - Computer Architecture
- CSE3042 - Formal Languages & Automata
- CSE3044 - Design & Analysis of Algorithms
- CSE3053 - Introduction to Computer Networks
- CSE3063 - Computer Security
- CSE3082 - Ethical and Social Issues in Computing and Information Technologies
- CSE4023 - Compiler Writing
- MATH3052 - Basic Concepts of Mathematics
- MATH3082 - Probability and Statistics
- MATH3082L - Probability and Statistics Lab

Additional Comments:

Technical Electives

Type

Completion Requirement

Technical Electives

A sequence of 12 hours of CSE courses numbered 300 or higher, pre-approved by the student's advisor and the CSE Department, with no more than one course numbered CSE 485. Students are encouraged to select a coherent set of courses as technical electives that will prepare them for a specific focus in their career;

Earn at least 12 credits from the following:
- CSE3020 - Video Game Design
- CSE3021 - Internet and Web Programming
- CSE3028 - Secure Software Construction
- CSE3040 - Intro to Quantum Theory
- CSE3051 - Modeling & Simulation Techniques for Information

Systems
- CSE3073 - Intro to Database Systems
- CSE3080 - Practicum in Problem Solving
- CSE3089 - Pilot Course
- CSE3091 - 300-Level Directed Study
- CSE4011 - Data Science
- CSE4041 - Cryptography and Applications
- CSE4051 - Intro to Parallel Processing
- CSE4052 - Introduction Sensor Networks
- CSE4053 - Advances in Computer Networks & Internet
- CSE4054 - Computer Graphics
- CSE4063 - Information Assurance
- CSE4064 - Intro to Soft Computing
- CSE4065 - Neural Networks
- CSE4066 - Machine Learning
- CSE4076 - Visualization
- CSE4085 - Undergrad Seminar on Special Topics
- CSE4089 - Special Topics in CSE
- CSE4093 - Undergraduate Thesis
- CSE4094 - Undergraduate Thesis

General Electives to complete 123 credit hours.

All the courses listed above must be taken for a letter grade;

Additional Comments:

General Education Core Requirements
Type
Completion Requirement

General Education Requirements

Area 1: Communication

Complete ALL of the following Course Sets:
- Area 1: Communications (BS Degree) (9 credits)

Area 2: Mathematics

Complete ALL of the following Course Sets:
- Area 2: Mathematics (BS Degree) (8 credits)

Area 3 Science

Complete ALL of the following Course Sets:
- Area 3: Science (BS Degree) (18 credits)

Area 4: Social and Behavioral Science

Earn at least 6 credits from the following:
- Area 4: Social and Behavioral Science (BS or BGS Degree) (6 credits)

Area 5 Humanities

Earn at least 6 credits from the following:
- Area 5: Humanities (BS or BGS Degree) (6 credits)

Area 6: Creative and Find Arts

Earn at least 3 credits from the following:
- Area 6: Creative and Fine Arts (BS, BA, or BGS Degree) (3 credits)

Area 7: Additional Courses from Areas 4, 5, 6

Earn at least 3 credits from the following:
- Area 7: Additional Courses from Areas 4, 5, 6 (BS, BA, or BGS Degree) (3 credits)

Additional Comments:

[Learning Outcomes]

Outcome
Analyze a complex computing problem and to apply principles of computing and other relevant disciplines to identify solutions

Outcome
Design, implement, and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline

Outcome
Communicate effectively in a variety of professional contexts

Outcome
Recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles

Outcome
Function effectively as a member or leader of a team engaged in activities appropriate to the program's discipline

Outcome
Apply computer science theory and software development fundamentals to produce computing-based solutions

BS-EE - B.S. in Electrical Engineering

[Program Overview]

Program Title	**Department(s)**
BS-EE	Electrical Engineering
Program Short Title	**Degree Designation**
BS-Electrical Engineering	Bachelor of Science

Program Description

The Department of Electrical Engineering concentrates on a high-quality undergraduate program in electronics and design, combined with a firm intellectual foundation in the fundamentals of circuits, signals, and systems. As with other degree programs at New Mexico Tech, students are also provided with a breadth of knowledge in the basic sciences, mathematics, humanities, and social sciences.

Laboratories constitute an important part of the electrical engineering program. Computer-based instruments and software packages provide students with up-to-date engineering and design techniques.

Engineering design is the iterative process of converting a set of needs into a process, system or component. Students learn to combine the tools of basic sciences, mathematics and engineering sciences to meet requirements using a process of establishing objectives and criteria, analysis, construction, test and evaluation. Several courses are strongly focused on the fundamentals of engineering design in which students apply understanding from previous courses to solve real-world problems. Projects for the final design courses change every year, and past contributors of projects include research laboratories at New Mexico Tech such as Langmuir Laboratory for Atmospheric Research, Energetic Materials Research and Testing Center, Etscorn Observatory, and those of individual professors; national organizations such as the VLA and VLBA facilities of the National Radio Astronomy Observatory, Sandia National Laboratories, Los Alamos National Laboratory, Air Force Research Laboratory, and Naval Research Laboratory; and companies such as Microsoft and National Instruments.

Graduates of the electrical engineering program will be well equipped with the practical skills necessary for immediate employment, as well as with the intellectual base for graduate studies and lifelong learning.

Program Information & Policies

Students that transfer into the NMT EE program with ES3032 Electrical Engineering, will have EE equivalency determined on a case by case basis.

Program Educational Objectives for Undergraduate Program in Electrical Engineering

The faculty of the Department of Electrical Engineering strives to continuously improve the undergraduate program in electrical engineering. The educational objectives reflect the needs of, and have been reviewed by, among others, the Advisory Board and faculty. Several years after graduation it is expected that the program's graduates will be:

- Recognized leaders in electrical engineering-related fields or other career paths, in the public and private sectors;
- Valued leaders and participants in diverse teams who boldly discover and apply new knowledge and engineering practices;
- Adaptive learners who continue to grow professionally in their organizations, or by earning post-graduate degrees.

Simple Requisites

Subplan

Minimum credit hours required—120 In addition to the General Education and Institute Core Curriculum, the following courses are required

Type

Completion Requirement

Electrical Engineering Requirement

Complete ALL of the following Courses:
- EE161 - Basic Electronics Laboratory I
- EE162 - Basic Electronics Lab II
- EE211 - Circuits & Signals I
- EE212 - Circuits & Signals II
- EE252 - Digital Electronics
- EE271 - Mathematical Engineering
- EE3011 - Signals and Linear Systems
- EE3032 - Electricity and Magnetism
- EE3051 - Microcontrollers
- EE3053 - Analog Electronics
- EE3061 - Mixed Electronics Lab I
- EE3062 - Mixed Electronics Lab II
- EE3072 - Modeling and Simulation
- EE4011 - Stochastic Processes and Communication
- EE4031 - Electrodynamics
- EE4072 - Digital Signal Processing
- EE4081 - Capstone Design I
- EE4081L - Capstone Design I
- EE4082 - Capstone Design II
- EE4082L - Capstone Design II

Math Requirements

Complete ALL of the following Courses:
- MATH2532 - Calculus III
- MATH3035 - Ordinary Differential Equation

Additional Comments:
upper-level (3000-level and above) mathematics elective (3)

Engineering electives: a minimum of nine engineering credit hours (200-level or above) courses, including Optical Science and Engineering (OPT), and excluding the Electrical Engineering core classes listed above, Engineering Management, and Computer Science courses, as well as ES 3016 and ES 3032. Students that transfer into the NMT EE program with ES 3032, will have EE equivalency determined on a case by case basis.

To enroll in an Electrical Engineering class, a student must have passed the prerequisites of the course. In addition, a student must be in good academic standing and have declared electrical engineering as a major to enroll in EE 4081.

Students pursuing a B.S. degree in Electrical Engineering must take all Electrical Engineering courses for a letter grade.

No Requirement Level

General Education Requirements for Bachelor of Science in Electrical Engineering
Type
Completion Requirement

Area 1: Communications Requirement for Bachelor of Science

Complete ALL of the following Course Sets:
- Area 1: Communications (BS Degree) (9 credits)

Area 2: Mathematics and Quantitative Reasoning Requirements for Bachelor of Science

Complete ALL of the following Course Sets:
- Area 2: Mathematics (BS Degree) (8 credits)

Area 3: Science Requirements for a Bachelor of Science

Complete ALL of the following Course Sets:
- Area 3: Science (BS Degree) (18 credits)

Area 4: Social and Behavioral Science Requirements for a Bachelor of Science

Earn at least 6 credits from the following:
- Area 4: Social and Behavioral Science (BS or BGS Degree) (6 credits)

Area 5: Humanities Course Requirements for a Bachelor of Science

Earn at least 6 credits from the following:
- Area 5: Humanities (BS or BGS Degree) (6 credits)

Area 6: Creative & Fine Art Requirement for a Bachelor of Science

Earn at least 3 credits from the following:
- Area 6: Creative and Fine Arts (BS, BA, or BGS Degree) (3 credits)

Area 7: Additional Humanities/Social Science Requirement for a Bachelor of Science

Earn at least 3 credits from the following:
- Area 7: Additional Courses from Areas 4, 5, 6 (BS, BA, or BGS Degree) (3 credits)

Additional Comments:

[Learning Outcomes]

Outcome
1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics

Outcome
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors

Outcome
3. An ability to communicate effectively with a range of audiences

Outcome
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts

Outcome
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives

Outcome
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions

Outcome
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

BS-ENVE - B.S. in Environmental Engineering

[Program Overview]

Program Title
B.S. in Environmental Engineering

Department(s)
CEE Dept/ Environmental Engineering

Program Short Title
Environmental Engineering

Degree Designation
Bachelor of Science

Program Type
Major

Program Description
The primary objective of this program is to produce well-balanced environmental engineers capable of entering the environmental engineering profession or continuing their studies at the graduate level. Graduates will be well-prepared to solve current environmental engineering problems, and they will have the ability to adapt to problems of the future.

By providing relevant experiences and building requisite technical skills and judgment cumulatively through rigorous problem solving, the program will instill the confidence needed for students to emerge as leaders in the field of environmental engineering.

Program Information & Policies
Students pursuing a B.S. in Environmental Engineering must take all courses counting towards their degree (including technical electives) for a letter grade, except for courses in Areas 4, 5, 6, and 7 of the institute requirements, which may be taken on an S/U basis. Environmental engineering majors must maintain a minimum GPA of 2.0 in required courses (including technical electives) in order to graduate.

Simple Requisites

Subplan
Minimum Hours Required—132

In addition to the General Education and Institute Core Curriculum , the following courses are required:

Program Requirements
Type
Completion Requirement

Mathematics Requirements

Complete ALL of the following Courses:
- MATH2532 - Calculus III
- MATH2350 - Statistical Methods
  AND MATH2350L - Statistical Methods Lab
- MATH3035 - Ordinary Differential Equation
  AND MATH3035L - Ordinary Differential Equations Computer Lab

Biology Requirements

Complete ALL of the following Courses:
- BIOL2110 - Pinciples of Biology: Cellular & Molecular
  AND BIOL2110L - Pinciples of Biology: Cellular & Molecular Lab
  AND BIOL3043 - Environmental Microbiology

Geology Requirements

Complete ALL of the following Course Sets:
- GEOL 4040 & GEOL 4040L

Engineering Science Requirements

Complete ALL of the following Courses:
- ES110 - Intro to Engineering Design
  AND ES110L - Intro to Engineering Lab
- ES111 - Computer Programming for Engineers
  AND ES111L - Computer Programming for Engineers Lab
- ES201 - Statics
- ES216 - Engineering Fluid Mechanics
- ES3002 - Mechanics of Materials
- ES3016 - Engineering Economics
- ES3047 - Thermodynamics
- ES3050 - Heat & Mass Transfer

Environmental Engineering Requirement

Complete ALL of the following Courses:
- ENVE101 - Environmental Engineering Seminar
- ENVE201 - Introduction to Environmental Science & Engineering
- ENVE3001 - Applied Priciples of Environmental Engineering
- ENVE3002 - Environmental Law & Regulations
- ENVE3003 - Water Treatment Process Design
- ENVE3004 - Wastewater Treatment Process Design
- ENVE4011 - Solid & Hazardous Waste Engineering
- ENVE4013 - Air Resources Engineering
- ENVE4080 - Environmental Engineering Senior Design
  OR ENVE4090 - Senior Design Thesis I
- ENVE4092 - Senior Design Thesis II
- ME4020 - Soil Mechanics
- ENVS4012 - Geographic Information Systems

Mineral Engineering Requirement

Complete ALL of the following Course Sets:

- ME 4020 & ME 4020L: Soil Mechanics & Lab

Environmental Science Requirement

Complete ALL of the following Courses:

- ENVS4012 - Geographic Information Systems

Additional Comments:

Approved Technical Electives include the following (3)
Type
Completion Requirement

Technical Electives Minimum of 3 Cr. required

Earn at least 3 credits from the following:

- ENVE4014 - Energy & Environment
- ENVE4021 - Green Engineering
- ENVE4091 - Special Topics
- CE201 - Construction Matl/ Prop/Test
- CE3001 - Introduction to Construction Engineering
- CE3002 - Introduction to Structural Engineering
- CE4001 - Finite Element Analysis for Civil Engineers
- CE4013 - Foundation Design & Analysis
- CE4015 - Green Building
- CE4020 - Pavement Materials & Design (Inactive)
- CE4022 - Geotechnical Waste Containment
- CE4023 - Open Channel Hydraulics
- CH E3051 - Chemical Process Kinetics
- CH E3052 - Separation Process
- CH E4043 - Process Dynamics & Control
- CHEM3033 - Organic Chemistry I
- CHEM4022 - Environmental Chemistry
- EE211 - Circuits & Signals I
- ES3032 - Electrical Engineering
- ME4010 - Environmental Issues
- ME4022 - Rock Mechanics
- ME4027 - Site Investigation (Inactive)
- MENG3004 - Advanced Strength of Materials
- MENG3005 - Numerical Methods & Analysis
- MENG4021 - Finite Element Analysis & Design

Or other electives approved by the department chair.

BS-ENVS - B.S. in Environmental Science

[Program Overview]

Program Title
Bachelor of Science in Environmental Science

Department(s)
E&ES, E&ES Dept/ Environmental Science (program), E&ES Dept/ Earth Science

Program Short Title
BS-Environmental Science

Degree Designation
Bachelor of Science

Program Type
Major

Required Specialization/Concentration(s)
Biology Option, Chemistry Option, Geology Option, Hydrology Option

Program Description
The Bachelor of Science degree in Environmental Science draws upon courses from biology, chemistry, Earth science, physics, and environmental engineering. Students must be aware of the complexity of environmental problems, yet have a rigorous background to address specific aspects of those problems. To ensure that graduates are competitive in the marketplace for diverse environmentally oriented careers, Environmental Science students take classes in all of the disciplines listed above. They must select a specialization in biology, chemistry, geology, or hydrology. Each option is sufficiently in-depth to allow students to continue their education in a traditional graduate program within that discipline. An advisory committee, composed of faculty from the specific disciplines, is convened to help students plan their programs.

Program Information & Policies

- In addition to the General Education and Institute Core Curriculum Requirements all Environmental Science students must complete the programs core courses along with a science option:
- All students in the Environmental Science program are required to attend the Environmental Science Senior Seminar (ENVS 4072) for four years or, if transfer students, for the duration of their enrollment in the Environmental Science program. In the first three years, students need only audit the seminar, but in their senior year, they are required to present at the seminar and take the class for a grade.
- Three credit hours of courses numbered 4091 and 4092 taken in the appropriate department in the subject area of environmental science. These credit hours shall comprise a supervised research project, supervised scholarship project, or a supervised internship, and must result in a written paper or senior thesis. Prior to beginning the research project or internship, the student must prepare a short proposal of the activity. This proposal must be approved by the student's advisor and two faculty from the Environmental Science Advisory Committee. Following completion of the project, all three faculty must sign off on the resulting research paper.

Simple Requisites

Subplan
In addition to the General Education and Institute Core Curriculum Requirements the following core program is required of all Environmental Science students:

Core Requirements for the Bachelor of Science Degree in Environmental Science
Type
Completion Requirement

Required Biology

Complete ALL of the following Course Sets:

- BIOL2110 & BIOL2110L: Principles of Biology I & Lab
- BIOL2610 & 2610L: Principles of Biology II & Lab
  OR GEOL206 & GEOL206L: Earth History and Lab
- BIOL3043 & BIOL3043L: Environmental Microbiology & Lab
- BIOL3044 & BIOL3044L: Introductory Ecology & Lab

A 1000-Level Geology course and Associated Lab

Earn at least 4 credits from the following:

- 1000-Level Geology & Lab courses

Required Geology Courses

Complete ALL of the following Courses:

- GEOL2320 - Earth Surface Processes & Landforms
- GEOL4040 - Hydrology Theory & Field Methods
- GEOL4040L - Hydrology Theory & Field Methods Lab

Required Courses

Complete ALL of the following Courses:

- MATH2350 - Statistical Methods
- ENVS4012 - Geographic Information Systems
- ENVS4072 - Senior Seminar
- BIOL4091 - Special Problems
  OR GEOL4091 - Special Topics
  OR GEOL4092 - Senior Thesis
  OR CHEM4091 - Directed Study
- ENVE3002 - Environmental Law & Regulations

Additional Comments:

- All students in the Environmental Science program are required to attend the Environmental Science Senior Seminar (ENVS 4072) for four years or, if transfer students, for the duration of their enrollment in the Environmental Science program. In the first three years, students need only audit the seminar, but in their senior year, they are required to present at the seminar and take the class for a grade.
- Three credit hours of courses numbered 4091 and 4092 taken in the appropriate department in the subject area of environmental science. These credit hours shall comprise a supervised research project, supervised scholarship project, or a supervised internship, and must result in a written paper or senior thesis. Prior to beginning the research project or internship, the student must prepare a short proposal of the activity. This proposal must be approved by the student's advisor and two faculty from the Environmental Science Advisory Committee. Following completion of the project, all three faculty must sign off on the resulting research paper.

Bachelor of Science in Environmental Science with Biology Option
Type
Completion Requirement

Biology Option

Minimum credit hours required—121

In addition to the General Degree Requirements and the core Environmental Science Requirements (above), the following courses are required:

Complete ALL of the following Courses:

- BIOL3011 - Genetics
  AND BIOL3011L - Genetics Lab
- BIOL3031 - Cell Biology
- Technical Electives (9)—Technical electives 3000 level and above from the Biology Dept. catalog to be approved by the Advisory Committee

Additional Comments:

Bachelor of Science in Environmental Science with Chemistry Option
Type
Completion Requirement

Chemistry Option

Minimum credit hours required—121

In addition to the General Degree Requirements, and the core Environmental Science Requirements (above), the following courses are required:

Complete ALL of the following Courses:

- CHEM3031 - Physical Chemistry I
  AND CHEM3031L - Physical Chemistry I Lab
- CHEM4011 - Advanced Instrumental Methods
  AND CHEM4011L - Advanced Instrumental Lab
- Technical Electives (8)—3000 level and above from the Chemistry Dept. catalog to be approved by the ENVS advisory committee.

Additional Comments:

Bachelor of Science in Environmental Science with Geology Option
Type
Completion Requirement

Geology Option

Minimum credit hours required—121

In addition to the General Degree Requirements, and the core Environmental Science Requirements above), the following courses are required:

Complete ALL of the following Courses:

- GEOL1101 - Earth Science as a Profession
- GEOL2160 - Introduction to Mineralogy
  AND GEOL2160L - Introduction to Mineralogy Lab
- GEOL3053 - Structural Geology
- GEOL4003 - Introduction to Soils
- Technical Electives (4)—Technical electives 3000 level and above from the E&ES Dept. catalog to be approved by the Advisory Committee.

Additional Comments:

Bachelor of Science in Environmental Science with Hydrology Option
Type
Completion Requirement

Hydrology Option

Minimum credit hours required—121

In addition to the General Degree Requirements, and the core Environmental Science Requirements (above), the following courses are required:

Complete ALL of the following Courses:

- GEOL1101 - Earth Science as a Profession
- GEOL3040 - Global Climate Change Origins & Impacts
- GEOL4011 - Groundwater Hydrology
  OR GEOL4013 - Watershed Dynamics & Ecohydrology
  OR GEOL4014 - Vadose Zone Hydrology
- MATH3035 - Ordinary Differential Equation
  OR MATH3082 - Probability and Statistics
- Technical Electives (6)—Technical electives 3000 level and above from the E&ES Dept. catalog to be approved by the Advisory Committee.

Additional Comments:

No Requirement Level

General Education Requirements for Bachelor of Science in Environmental Science
Type
Completion Requirement

Area 1: Communications Requirement for Bachelor of Science

Complete ALL of the following Course Sets:

- Area 1: Communications (BS Degree) (9 credits)

Area 2: Mathematics and Quantitative Reasoning Requirements for Bachelor of Science

Complete ALL of the following Course Sets:

- Area 2: Mathematics (BS Degree) (8 credits)

Area 3: Science Requirements for a Bachelor of Science

Complete ALL of the following Course Sets:

- Area 3: Science (BS Degree) (18 credits)

Area 4: Social and Behavioral Science Requirements for a Bachelor of Science

Earn at least 6 credits from the following:

- Area 4: Social and Behavioral Science (BS or BGS Degree) (6 credits)

Area 5: Humanities Course Requirements for a Bachelor of Science

Earn at least 6 credits from the following:

- Area 5: Humanities (BS or BGS Degree) (6 credits)

Area 6: Creative & Fine Art Requirement for a Bachelor of Science

Earn at least 3 credits from the following:

- Area 6: Creative and Fine Arts (BS, BA, or BGS Degree) (3 credits)

Area 7: Additional Humanities/Social Science Requirement for a Bachelor of Science

Earn at least 3 credits from the following:

- Area 7: Additional Courses from Areas 4, 5, 6 (BS, BA, or BGS Degree) (3 credits)

Additional Comments:

BS-ERSC - B.S. in Earth Science

[Program Overview]

Program Title
Bachelor of Science in Earth Science

Department(s)
E&ES, E&ES Dept/ Earth Science

Program Short Title
BS-Earth Science

Degree Designation
Bachelor of Science

Program Type
Major

Program Description
Undergraduate degrees in Earth science require a broad-based background in mathematics, chemistry, and physics, as well as basic training in the Earth sciences.

Program Information & Policies
Minimum credit hours required—120

Courses used for degree, including general degree requirements, must be taken for a letter grade. GEOL 1110, GEOL 1110L, GEOL 1190, GEOL 1190L, and GEOL 2000 level courses must be passed with a grade of C or higher.

Simple Requisites

Subplan
In addition to the General Education and Institute Core Curriculum Requirements the following courses are required:

B.S. in Earth Science Program Requirements
Type
Completion Requirement

Introduction to Earth Science

Complete ALL of the following Courses:

- GEOL1101 - Earth Science as a Profession

Introductory Earth Science Lab Elective

Complete ANY of the following Courses:

- GEOL1110 - Physical Geology
  AND GEOL1110L - Physical Geology Lab
- GEOL1190 - Geology of the National Parks
  AND GEOL1190L - Geology of the National Parks Lab

Earth Science Core Courses

Complete ALL of the following Courses:

- GEOL2160 - Introduction to Mineralogy
  AND GEOL2160L - Introduction to Mineralogy Lab
- GEOL2320 - Earth Surface Processes & Landforms
  AND GEOL2320L - Earth Surface Processes & Landforms Labs
- GEOL2340 - Introduction to Earth's Structure & Composition
  AND GEOL2340L - Introduction to Earth's Structure & Composition Lab
- GEOL206 - Earth History
  AND GEOL206L - Earth History Lab
- GEOL2510 - Introduction to Computational Methods for Earth and Environmental Sciences
- GEOL3001 - Sedimentology and Stratigraphy
  AND GEOL3001L - Sedimentology & Stratigraphy Lab
- GEOL3040 - Global Climate Change Origins & Impacts
- GEOL3053 - Structural Geology
  AND GEOL3053L - Structural Geology Lab
- GEOL3080 - Igneous & Metamorphic Petrology
  AND GEOL3080L - Igneous & Metamorphic Petrology Lab

Earth Science Field Camp

Complete ANY of the following Courses:

- GEOL4080 - Field Methods in Earth Science
- GEOL4083 - Field Methods in Earth Science I
  AND GEOL4084 - Field Methods in Earth Science II
  AND GEOL4085 - Field Methods in Earth Science III

Earth Science Electives

- minimum 12 credit hours from GEOL, GEOL, GEOP, GEOC, or HYD (a maximum of 4 credits from GEOL 1000-level courses)

Earn at least 12 credits from the following:

- Earth Science Dept Electives

Math Elective Requirement

Complete ANY of the following Courses:

- MATH2350 - Statistical Methods
  OR MATH2420 - Applied Linear Algebra
  OR MATH3035 - Ordinary Differential Equation
  OR MATH3082 - Probability and Statistics

Technical Electives

- Electives, minimum 9 credit hours from PHYS, MATH, CHEM, BIOL, PETR, ME, GEOL, ENVS,GEOL, GEOP, GEOC, or HYDR and CSE 100 level and above.

Earn at least 9 credits

Additional Comments:

No Requirement Level

General Education Requirements for Bachelor of Science in Earth Science
Type
Completion Requirement

Area 1: Communications Requirement for Bachelor of Science

Complete ALL of the following Course Sets:

- Area 1: Communications (BS Degree) (9 credits)

Area 2: Mathematics and Quantitative Reasoning Requirements for Bachelor of Science

Complete ALL of the following Course Sets:

- Area 2: Mathematics (BS Degree) (8 credits)

Area 3: Science Requirements for a Bachelor of Science

Complete ALL of the following Course Sets:

- Area 3: Science (BS Degree) (18 credits)

Area 4: Social and Behavioral Science Requirements for a Bachelor of Science

Earn at least 6 credits from the following:

- Area 4: Social and Behavioral Science (BS or BGS Degree) (6 credits)

Area 5: Humanities Course Requirements for a Bachelor of Science

Earn at least 6 credits from the following:

- Area 5: Humanities (BS or BGS Degree) (6 credits)

Area 6: Creative & Fine Art Requirement for a Bachelor of Science

Earn at least 3 credits from the following:

- Area 6: Creative and Fine Arts (BS, BA, or BGS Degree) (3 credits)

Area 7: Additional Humanities/Social Science Requirement for a Bachelor of Science

Earn at least 3 credits from the following:

- Area 7: Additional Courses from Areas 4, 5, 6 (BS, BA, or BGS Degree) (3 credits)

Additional Comments:

[Learning Outcomes]

Outcome
Students will develop a fundamental knowledge of Earth Sciences. This includes a conceptual understanding of: (a) Earth Science Concepts (e.g., Rock composition, geologic processes, surface processes, and magmatism); (b) Laboratory Methods (e.g., optical microscopy, thin section preparation, sedimentary separates, using online repositories, etc.); and (c) Field Methods (taking orientations of rocks in field areas, sampling methods for rocks, measuring stream flow, water chemistry, etc.)

Outcome
Students will develop skills needed for professional and research careers. These include (a) Hypothesis Development and Testing; (b) Writing and Communication of Data and Scientific Outcomes; (c) Data Analysis (including the use of online repositories); and (d) Integration of concepts

Outcome
Students will be able to apply the acquired skills and concepts of geology to societal problems, such as natural hazards, energy and mineral resources, water resources, or climate change

Program Type
Major

Program Description
The degree in Interdisciplinary Sciences is intended for the student who desires a science-focused Bachelor's degree but wishes more latitude in the selection of courses than is available otherwise. The BS is more suited to those who want a quantitative focus and the BA more suited to those who want to focus on social and life sciences or wish to have more exposure to non-STEM subjects (e.g., the humanities and arts). Both degrees pair well with the Undergraduate Minor in Secondary Education (UMSE), and students with this minor would discuss with their advisor which degree (BA or BS) is best suited for disciplines they wish to teach.

Program Information & Policies
Students pursuing the Bachelor of Science degree will have a primary and secondary advisor (or minor advisor if pursuing a minor) in different disciplines to ensure interdisciplinary input. Students will discuss an Academic Career Plan with both advisors. Such an academic career plan proposes a sequence of courses that will emphasize chosen areas of depth by selecting related upper-level courses, in a way that is relevant to professional discernment or future pursuit of employment.

For students who choose to pursue teaching as an additional area, proper selection of courses and enrollment in the Undergraduate Minor in Secondary Education (UMSE) is necessary for eventual state teaching licensure. In this case the Education minor advisor is needed as primary or secondary advisor to ensure that the student's course selection meets the requirements for both the BS degree and the minor. In addition, students in the optional UMSE should check state requirements with their Education minor advisor to ensure they meet criteria for certification and endorsement, because State requirements can change. Typically USME students must complete five education classes along with three field experiences and one semester of student teaching in local secondary schools. These 27 credits necessary to teach on the secondary level are accredited by the New Mexico Public Education Department (NMPED). In addition, UMSE students seeking a particular endorsement from the NMPED (e.g., Science, Math, Psychology, Computer Science) should work with their advisor on a suitable course sequence. For instance, the math requirement is a minimum of 24 credits in mathematics courses with 12 of those credits at the 3000-level or above.

Simple Requisites

Subplan
To qualify for the Bachelor of Science degree in Interdisciplinary-Sciences, a student must satisfy the general education core curriculum requirements for the Bachelor of Science.

Bachelor of Science in Interdisciplinary Sciences
Type
Completion Requirement

General Requirements

- Of the minimum 120 credit hours required for this degree, at least 65 must be in science, engineering, or mathematics. These can include biology, chemistry, computer science, earth and environmental science, mathematics, engineering, physics, and psychology. These credits can also be used to satisfy general education requirements for the degree.
- At least 30 credit hours in science, engineering, or mathematics must be in courses numbered 2000 or above.
- In order that a reasonable depth of study is attained in at least two disciplines, the 30 credit hours at 2000 or above must include at least nine credit hours in each of two fields. Closely related disciplines may count together with appropriate course substitution approvals.
- Of the total credit hours required, at least 42 must be in courses numbered 3000 or above.

Additional Comments:

No Requirement Level

Bachelor of Science General Education Requirements (53 credits)
Type
Completion Requirement

Area 1: English Requirements for Bachelor of Science

Earn at least 9 credits from the following:

- Area 1: Communications (BS Degree) (9 credits)

Area 2: Math Requirements for Bachelor of Science

Earn at least 8 credits from the following:

- Area 2: Mathematics (BS Degree) (8 credits)

Area 3: Science Requirements for a Bachelor of Science

Earn at least 18 credits from the following:

- Area 3: Science (BS Degree) (18 credits)

Area 4: Social Science Requirements for a Bachelor of Science

Earn at least 6 credits from the following:

- Area 4: Social and Behavioral Science (BS or BGS Degree) (6 credits)

Area 5: Humanities Course Requirements for a Bachelor of Science

Earn at least 6 credits from the following:

- Area 5: Humanities (BS or BGS Degree) (6 credits)

Area 6: Fine & Creative Art Course Requirement for a Bachelor of Science

Earn at least 3 credits from the following:

- Area 6: Creative and Fine Arts (BS, BA, or BGS Degree) (3 credits)

Area 7: Additional Humanities/Social Science Requirement for a Bachelor of Science

Earn at least 3 credits from the following:

- Area 7: Additional Courses from Areas 4, 5, 6 (BS, BA, or BGS Degree) (3 credits)

Additional Comments:

[Learning Outcomes]

Name Program Outcomes	**Outcome** 1. Students will learn the fundamentals of scientific inquiry in a breadth of disciplines.

Outcome
2. Students will develop analytical and quantitative skills for competence in science and mathematics.

Outcome
3. Students will communicate with different audiences using multiple formats.

Outcome
4. Students will apply professional values and ethics to their role as a member of a culturally diverse society.

Outcome
5. Students will explore common areas of inquiry among the disciplines.

Outcome
6. Students will understand at least one discipline in enough depth to teach others.

BS-IT - B.S. in Information Technology

[Program Overview]

Program Title	**Department(s)**
Bachelor of Science in Information Technology	CSE Computer Science & Engineering, CSE Dept/ Information Technology (program)
Program Short Title	**Degree Designation**
BS-IT	Bachelor of Science

Program Description
The Bachelor of Science in Information Technology program at New Mexico Tech is administered jointly by the Computer Science and Business Management faculty in the Computer Science and Engineering department. The curriculum includes relevant computer science, management, and engineering courses and emphasizes secure information systems and information assurance that are among the areas of research at Tech's Institute for Complex Additive Systems Analysis (ICASA) where IT students may find employment or internship opportunities. Students must also take a sequence of 6 hours of technical electives to broaden or deepen their knowledge in an IT area of their interest.

Simple Requisites

Subplan
Minimum credit hours required—120

In addition to the General Education and Institute Core Curriculum, the following courses are required:

Course Requirements
Type

Completion Requirement

Information Technology Course Requirements

Complete ALL of the following Courses:
- IT101 - Intro to Computer Science & Information Technology
- IT113 - Introduction to Programming
- IT122 - Data Structure and Algorithms
- IT213 - Introduction to Object Oriented Programming
- CSE221 - Computer System Organization
- IT3021 - Internet & Web Programming
- IT3026 - Software Engineering
- IT3030 - Management & Organizational Behavior
- IT3053 - Introduct to Computer Networks
- IT3063 - Computer Security
- IT3073 - Intro to Database Systems
- IT3082 - Ethics of Computing and IT
- IT4062 - Systems, Risk, & Decision Analysis
- IT4066 - Project Management
- IT4081 - Senior IT Design Project
- IT4082 - Senior IT Design Project

Computer Science Engineering Course Requirements

Complete ALL of the following Courses:
- CSE222 - Systems Programming
- CSE241 - Foundations of Computer Science

Managements Course Requirements

Complete ALL of the following Courses:
- MGMT4072 - Production & Operations Management

Math Requirements

Complete ALL of the following Courses:
- MATH2350 - Statistical Methods

Psychology Requirements

Complete ALL of the following Courses:
- PSYC1110 - Introduction to Psychology

(can be applied as a social science course in the general education core curriculum)

Additional Comments:
Technical Electives: a sequence of 6 hours of computer science, information technology, or management courses numbered 3000 or higher, *pre-approved* by the student's advisor and an IT Program Coordinator, with no more than one course numbered IT4085. Students are encouraged to select a coherent set of courses as technical electives that will prepare them for a specific focus in their career, for instance, IT4041 & IT4063 for cybersecurity focus and MGMT3035 & MGMT4007 for management focus.

No Requirement Level

Bachelor of Science General Education Requirements (53 credits)
Type
Completion Requirement

Area 1: English Requirements for Bachelor of Science

Complete ALL of the following Course Sets:
- Area 1: Communications (BS Degree) (9 credits)

Area 2: Math Requirements for Bachelor of Science

Complete ALL of the following Course Sets:

- Area 2: Mathematics (BS Degree) (8 credits)

Area 3: Science Requirements for a Bachelor of Science

Complete ALL of the following Course Sets:

- Area 3: Science (BS Degree) (18 credits)

Area 4: Social Science Requirements for a Bachelor of Science (6 credits)

Earn at least 6 credits from the following:

- Area 4: Social and Behavioral Science (BS or BGS Degree) (6 credits)

Area 5: Humanities Course Requirements for a Bachelor of Science (6 credits)

Earn at least 6 credits from the following:

- Area 4: Social and Behavioral Science (BS or BGS Degree) (6 credits)

Area 6: Fine & Creative Art Course Requirement for a Bachelor of Science (3 credits)

Complete ALL of the following Course Sets:

- Area 6: Creative and Fine Arts (BS, BA, or BGS Degree) (3 credits)

Area 7: Additional Humanities/Social Science Requirement for a Bachelor of Science (3 credits)

Earn at least 3 credits from the following:

- Area 7: Additional Courses from Areas 4, 5, 6 (BS, BA, or BGS Degree) (3 credits)

Additional Comments:

[Learning Outcomes]

Outcome
1. The ability to design, implement, test, and configure software programs

Outcome
2. The ability to analyze information technology requirements, assess risk, optimize resources, monitor and evaluate progress, and manage project budgets

Outcome
3. Knowledge of the fundamental principles of information processing and decision, networking, security, and database

Outcome
4. Exposure to one or more information technology areas

Outcome
5. Technical communication skills in written and oral forms

Outcome
6. The capacity to work as part of a team

Outcome
7. Awareness of the ethical and societal impact of developments in the field of information technology

Outcome
8. The ability to develop a business case for an organizational decision to pursue an IT project

BS-MATE - B.S. in Materials Engineering

[Program Overview]

Program Title	**Department(s)**
BS in Materials Engineering	Materials Engineering
Program Short Title	**Degree Designation**
BS-Materials Engineering	Bachelor of Science

Program Description

Advanced technologies in for example the electronic or aerospace industries, are often initiated with innovations in new Materials. These innovations rest on a fundamental understanding of how the structure of a Material at different length scales, ranging from sub-atomic to nano-, to micro- and macro-scale influences material properties. The state of the Material at these length scales are probed by various characterizing methods, which provide understanding of mechanisms responsible for observed phenomenon. Thereby Material problems can be resolved and innovations made that are both efficient and based on solid scientific principles. The undergraduate Materials program provides this foundations in an academic atmosphere that fosters growth and collaboration. With a small class size, students have the opportunity to interact closely with professors and conduct research in laboratories.

Students are exposed to Materials science principles starting from their freshman year and continuing through their senior year. A number of options are available in the department so that students have the flexibility to select courses that suit a specialization. In addition to theoretical courses, students obtain an excellent experience in processing and characterization techniques during their junior and senior years, these constituting the core of most experimental research and innovations. Material probing methods include spectroscopic (e.g. X-ray, FTIR, Raman), electron microscopic, thermal, and mechanical characterization.

The processing-structure-property relations are developed and expanded upon throughout the undergraduate curriculum. Four classes in the junior year target the theories used to understand characteristics of metals, ceramics, polymers, and composites. Senior-level elective Materials courses target specialized topics such as electronic, structural, nano Materials, biomaterials, and computational Materials science. The senior design sequence emphasizes the synthesis of skills and ideas as well as providing experience in teamwork and practical design.

Research experience for the students is available and encouraged through part-time employment in the broad range of Materials research projects that are on-going in the department and also in other in-house research entities, such as the Energetic Materials Research and Testing Center and the Petroleum Recovery Research Center. Departmental collaborations with scientists at Los Alamos and Sandia National Laboratories provide another avenue for student involvement in research projects. Many of our students pursue graduate degrees either at New Mexico Tech or elsewhere while others seek employment directly. The department operates and maintains a broad range of instrumentation. A full list of these resources is available on the department's web site. Of particular note is the broad range of microscopy capabilities for research and instruction, including scanning electron microscopes, Auger probe and a scanning probe (atomic force) microscope.

Simple Requisites

Subplan

Minimum credit hours required—131

In addition to the General Education and Institute Core Curriculum, the following courses are required:

These additional courses may not be taken on a S/U basis

Requirements for Bachelor of Science in Materials Engineering

Type

Completion Requirement

Math Requirement

Credit for trigonometry or college algebra is not allowed for engineering students.

Complete ALL of the following Courses:

- MATH2532 - Calculus III
- MATH3035 - Ordinary Differential Equation

Engineering Science Requirements

Complete ALL of the following Courses:

- ES110 - Intro to Engineering Design
- ES111 - Computer Programming for Engineers
- ES201 - Statics
- ES3002 - Mechanics of Materials
- ES3032 - Electrical Engineering
  OR EE211 - Circuits & Signals I

Materials Engineering courses

Complete ALL of the following Courses:

- MTLS101L - Materials Science & Engineering Lab
- MTLS202 - Materials Engineering I
  AND MTLS202L - Materials Engineering I Lab
- MTLS235 - Materials Engineering II
  AND MTLS235L - Materials Engineering II Lab
- MTLS3001 - Introduction to Ceramic Engineering
- MTLS3010 - Processing & Microstructure Methods & Analysis
- MTLS3011 - Thermal & Mechanical Methods & Analysis
- MTLS3014 - Transport Processes
- MTLS3027 - Introduction to Physical Metallurgy
- MTLS3050 - Materials Thermodynamics
- MTLS3051 - Introduction to Polymeric Materials
- ME4010 - Environmental Issues
- MTLS4045 - Introduction to Composite Materials
- MTLS4081 - Engineering Design I
- MTLS4082 - Engineering Design II

Advanced Basic Sciences (3) Upper-level chemistry and physics and other natural sciences including life, earth, and space sciences.

CHEM 3011, CHEM 3031, CHEM 3033 or MTLS 4052 are recommended; advisor approval is required.

Technical electives (12)

Technical electives (12): Approved upper level MTLS courses. Up to 3 credit hours can be completed outside the department with the consent of the department.

Electives

Electives to complete 131 credit hours

Additional Comments:
Credit for trigonometry or college algebra is not allowed for engineering students.

[Learning Outcomes]

Outcome
1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics

Outcome
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors

Outcome
3. An ability to communicate effectively with a range of audiences

Outcome
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts

Outcome
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives

Outcome
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use

Outcome
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies

BS-MATE - B.S. in Materials Engineering with BioMaterials Engineering Option

[Program Overview]

Program Title	**Department(s)**
BS in Materials Engineering with BioMaterials Engineering Option	Materials Engineering
Program Short Title	**Degree Designation**
BioMaterials Engineering Opt.	Bachelor of Science

Program Description

Advanced technologies in for example the electronic or aerospace industries, are often initiated with innovations in new Materials. These innovations rest on a fundamental understanding of how the structure of a Material at different length scales, ranging from sub-atomic to nano-, to micro- and macro-scale influences material properties. The state of the Material at these length scales are probed by various characterizing methods, which provide understanding of mechanisms responsible for observed phenomenon. Thereby Material problems can be resolved and innovations made that are both efficient and based on solid scientific principles. The undergraduate Materials program provides this foundations in an academic atmosphere that fosters growth and collaboration. With a small class size, students have the opportunity to interact closely with professors and conduct research in laboratories.

Students are exposed to Materials science principles starting from their freshman year and continuing through their senior year. A number of options are available in the department so that students have the flexibility to select courses that suit a specialization. In addition to theoretical courses, students obtain an excellent experience in processing and characterization techniques during their junior and senior years, these constituting the core of most experimental research and innovations. Material probing methods include spectroscopic (e.g. X-ray, FTIR, Raman), electron microscopic, thermal, and mechanical characterization.

The processing-structure-property relations are developed and expanded upon throughout the undergraduate curriculum. Four classes in the junior year target the theories used to understand characteristics of metals, ceramics, polymers, and composites. Senior-level elective Materials courses target specialized topics such as electronic, structural, nano Materials, biomaterials, and computational Materials science. The senior design sequence emphasizes the synthesis of skills and ideas as well as providing experience in teamwork and practical design.

Research experience for the students is available and encouraged through part-time employment in the broad range of Materials research projects that are on-going in the department and also in other in-house research entities, such as the Energetic Materials Research and Testing Center and the Petroleum Recovery Research Center. Departmental collaborations with scientists at Los Alamos and Sandia National Laboratories provide another avenue for student involvement in research projects. Many of our students pursue graduate degrees either at New Mexico Tech or elsewhere while others seek employment directly.

The department operates and maintains a broad range of instrumentation. A full list of these resources is available on the department's web site. Of particular note is the broad range of microscopy capabilities for research and instruction, including scanning electron microscopes, Auger probe and a scanning probe (atomic force) microscope.

Simple Requisites

Subplan

Minimum credit hours required—131

In addition to the General Education and Institute Core Curriculum, the following courses are required:

These additional courses may not be taken on a S/U basis

Requirements for Bachelor of Science in Materials Engineering

Type

Completion Requirement

Math Requirement

Credit for trigonometry or college algebra is not allowed for engineering students.

Complete ALL of the following Courses:
- MATH2532 - Calculus III
- MATH3035 - Ordinary Differential Equation

Engineering Science Requirements

Complete ALL of the following Courses:
- ES110 - Intro to Engineering Design
- ES111 - Computer Programming for Engineers
- ES201 - Statics
- ES3002 - Mechanics of Materials
- ES3032 - Electrical Engineering
  OR EE211 - Circuits & Signals I

Materials Engineering courses

Complete ALL of the following Courses:
- MTLS101L - Materials Science & Engineering Lab
- MTLS202 - Materials Engineering I
  AND MTLS202L - Materials Engineering I Lab
- MTLS235 - Materials Engineering II
  AND MTLS235L - Materials Engineering II Lab
- MTLS3001 - Introduction to Ceramic Engineering
- MTLS3014 - Transport Processes
- MTLS3027 - Introduction to Physical Metallurgy
- MTLS3050 - Materials Thermodynamics

- MTLS3051 - Introduction to Polymeric Materials
- MTLS4020 - Biomedical Materials
- MTLS4081 - Engineering Design I
- MTLS4082 - Engineering Design II

Two of the following

Complete at least 2 of the following courses:

- MTLS3010 - Processing & Microstructure Methods & Analysis
- MTLS3011 - Thermal & Mechanical Methods & Analysis
- MTLS4010 - Microstructure Characterization Methods & Analysis
- BIOL2110 - Pinciples of Biology: Cellular & Molecular **AND** BIOL2110L - Pinciples of Biology: Cellular & Molecular Lab
- BIOL3031 - Cell Biology

Technical electives (6): Suggested electives include

Earn at least 6 credits from the following:

- BIOL3041 - Intro Microbiology
- BIOL3051 - Anatomy & Physiology
- CH E4073 - Polymer Materials Engineering
- CHEM3033 - Organic Chemistry I **AND** CHEM3033L - Organic Chemistry I Lab
- CHEM3034 - Organic Chemistry II **AND** CHEM3034L - Organic Chemistry II Lab
- MTLS4045 - Introduction to Composite Materials
- MATH2350 - Statistical Methods
- MATH3082 - Probability and Statistics
- MENG4060 - Intro to Biomedical Engineering
- MENG4065 - Biorheology
- MENG4089 - Pilot Course
- MENG5076 - Biomedical Mechatronics

Alternative or additional technical electives must be approved by the Student, the Advisor, and the Department Chair

Additional Comments:
3 credits from program specific electives

No Requirement Level

General Education Requirements for Bachelor of Science
Type
Completion Requirement

Area 1: Communications Requirement for Bachelor of Science

Complete ALL of the following Course Sets:

- Area 1: Communications (BS Degree) (9 credits)

Area 2: Mathematics and Quantitative Reasoning Requirements for Bachelor of Science

Complete ALL of the following Course Sets:

- Area 2: Mathematics (BS Degree) (8 credits)

Area 3: Science Requirements for a Bachelor of Science

Complete ALL of the following Course Sets:

- Area 3: Science (BS Degree) (18 credits)

Area 4: Social and Behavioral Science Requirements for a Bachelor of Science

Complete ALL of the following Course Sets:

- Area 4: Social and Behavioral Science (BS or BGS Degree) (6 credits)

Area 5: Humanities Course Requirements for a Bachelor of Science

Complete ALL of the following Course Sets:

- Area 5: Humanities (BS or BGS Degree) (6 credits)

Area 6: Creative & Fine Art Requirement for a Bachelor of Science

Complete ALL of the following Course Sets:

- Area 6: Creative and Fine Arts (BS, BA, or BGS Degree) (3 credits)

Area 7: Additional Humanities/Social Science Requirement for a Bachelor of Science

Complete ALL of the following Course Sets:

- Area 7: Additional Courses from Areas 4, 5, 6 (BS, BA, or BGS Degree) (3 credits)

Additional Comments:
Credit for trigonometry or college algebra is not allowed for engineering students.

[Learning Outcomes]

Outcome
1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics

Outcome
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors

Outcome
3. An ability to communicate effectively with a range of audiences

Outcome
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts

Outcome
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives

Outcome
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use

Outcome
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies

Program Description
Advanced technologies in for example the electronic or aerospace industries, are often initiated with innovations in new Materials. These innovations rest on a fundamental understanding of how the structure of a Material at different length scales, ranging from sub-atomic to nano-, to micro- and macro-scale influences material properties. The state of the Material at these length scales are probed by various characterizing methods, which provide understanding of mechanisms responsible for observed phenomenon. Thereby Material problems can be resolved and innovations made that are both efficient and based on solid scientific principles. The undergraduate Materials program provides this foundations in an academic atmosphere that fosters growth and collaboration. With a small class size, students have the opportunity to interact closely with professors and conduct research in laboratories.
Students are exposed to Materials science principles starting from their freshman year and continuing through their senior year. A number of options are available in the department so that students have the flexibility to select courses that suit a specialization. In addition to theoretical courses, students obtain an excellent experience in processing and characterization techniques during their junior and senior years, these constituting the core of most experimental research and innovations. Material probing methods include spectroscopic (e.g. X-ray, FTIR, Raman), electron microscopic, thermal, and mechanical characterization.
The processing-structure-property relations are developed and expanded upon throughout the undergraduate curriculum. Four classes in the junior year target the theories used to understand characteristics of metals, ceramics, polymers, and composites. Senior-level elective Materials courses target specialized topics such as electronic, structural, nano Materials, biomaterials, and computational Materials science. The senior design sequence emphasizes the synthesis of skills and ideas as well as providing experience in teamwork and practical design.
Research experience for the students is available and encouraged through part-time employment in the broad range of Materials research projects that are on-going in the department and also in other in-house research entities, such as the Energetic Materials Research and Testing Center and the Petroleum Recovery Research Center. Departmental collaborations with scientists at Los Alamos and Sandia National Laboratories provide another avenue for student involvement in research projects. Many of our students pursue graduate degrees either at New Mexico Tech or elsewhere while others seek employment directly. The department operates and maintains a broad range of instrumentation. A full list of these resources is available on the department's web site. Of particular note is the broad range of microscopy capabilities for research and instruction, including scanning electron microscopes, Auger probe and a scanning probe (atomic force) microscope.

Simple Requisites

Subplan
Minimum credit hours required—131

The required curriculum for the Metallurgy Engineering Option is SAME as Materials Engineering. However, students with Metallurgy Engineering Option MUST take 12 credits in Technical Electives, with a minimum of 9 credits required in advisor approved METALS- FOCUSED courses
In addition to the General Education and Institute Core Curriculum, the following courses are required:
These additional courses may not be taken on a S/U basis

Requirements for Bachelor of Science in Materials Engineering
Type
Completion Requirement

Math Requirement

Credit for trigonometry or college algebra is not allowed for engineering students.

Complete ALL of the following Courses:
- MATH2532 - Calculus III
- MATH3035 - Ordinary Differential Equation

Engineering Science Requirements

Complete ALL of the following Courses:
- ES110 - Intro to Engineering Design
- ES111 - Computer Programming for Engineers
- ES201 - Statics
- ES3002 - Mechanics of Materials
- ES3032 - Electrical Engineering
  OR EE211 - Circuits & Signals I

Materials Engineering courses

Complete ALL of the following Courses:
- MTLS101L - Materials Science & Engineering Lab
- MTLS202 - Materials Engineering I
  AND MTLS202L - Materials Engineering I Lab

- MTLS235 - Materials Engineering II
  AND MTLS235L - Materials Engineering II Lab
- MTLS3001 - Introduction to Ceramic Engineering
- MTLS3010 - Processing & Microstructure Methods & Analysis
- MTLS3011 - Thermal & Mechanical Methods & Analysis
- MTLS3014 - Transport Processes
- MTLS3027 - Introduction to Physical Metallurgy
- MTLS3050 - Materials Thermodynamics
- MTLS3051 - Introduction to Polymeric Materials
- ME4010 - Environmental Issues
- MTLS4045 - Introduction to Composite Materials
- MTLS4081 - Engineering Design I
- MTLS4082 - Engineering Design II

Advanced Basic Sciences (3) Upper-level chemistry and physics and other natural sciences including life, earth, and space sciences.

CHEM 311, CHEM 331, CHEM 333 or MTLS 4052 are recommended; advisor approval is required.

Technical electives (12)

Technical electives (12): Approved upper level MTLS courses. Up to 3 credit hours can be completed outside the department with the consent of the department.

Electives

Electives to complete 131 credit hours

Complete ALL of the following Course Sets:

- Area 7: Additional Courses from Areas 4, 5, 6 (BS, BA, or BGS Degree) (3 credits)

Additional Comments:
Credit for trigonometry or college algebra is not allowed for engineering students.

[Learning Outcomes]

Outcome
1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics

Outcome
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors

Outcome
3. An ability to communicate effectively with a range of audiences

Outcome
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts

Outcome
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives

Outcome
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use

Outcome
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies

BS-MATH - B.S. in Mathematics

[Program Overview]

Program Title
Bachelor of Science in Mathematics

Department(s)
Mathematics

Program Short Title
BS-Mathematics

Degree Designation
Bachelor of Science

Program Description
none set

Simple Requisites

Subplan
Minimum credit hours required—120

In addition to the General Education and Institute Core Curriculum, the following courses are required:

Course Requirements
Type
Completion Requirement

Introduction to Computer Science:

Complete at least 1 of the following courses:
- CSE113 - Introduction to Programming
  OR CSE107 - Intro to Programming Python (Inactive)
  OR EE271 - Mathematical Engineering
  OR ES111 - Computer Programming for Engineers

Basic Mathematics

Complete ALL of the following Courses:
- MATH2532 - Calculus III
- MATH2420 - Applied Linear Algebra
- MATH3035 - Ordinary Differential Equation
- MATH3036 - Introduction to Partial Differential Equations
- MATH3052 - Basic Concepts of Mathematics
- MATH3072 - Basic Concepts of Analysis
- MATH3082 - Probability and Statistics
  AND MATH3082L - Probability and Statistics Lab
- MATH4054 - Linear Algebra

Mathematical Modeling

Complete ALL of the following Courses:
- MATH4030 - Mathematical Modeling

Mathematics Electives

Four courses from at least two of the following areas

Complete at least 4 courses in the following course sets:

- Applied Mathematics
- Pure Mathematics
- Operations Research and Statistics

Additional Comments:
Science, Engineering, or Mathematics Electives: Eight (8) credit hours from the science and engineering disciplines beyond the general degree requirements, or additional 3000-level or above mathematics electives.

Electives outside mathematics: A minor in another department or at least 18 related credit hours outside mathematics approved by the advisor. These 18 hours may include courses fulfilling the general education core requirements or other course requirements within this degree program.

No Requirement Level

General Education Requirements for Bachelor of Science in Mathematics
Type
Completion Requirement

Area 1: Communications Requirement for Bachelor of Science

Complete ALL of the following Course Sets:

- Area 1: Communications (BS Degree) (9 credits)

Area 2: Mathematics and Quantitative Reasoning Requirements for Bachelor of Science

Complete ALL of the following Course Sets:

- Area 2: Mathematics (BS Degree) (8 credits)

Area 3: Science Requirements for a Bachelor of Science

Complete ALL of the following Course Sets:

- Area 3: Science (BS Degree) (18 credits)

Area 4: Social and Behavioral Science Requirements for a Bachelor of Science

Earn at least 6 credits from the following:

- Area 4: Social and Behavioral Science (BS or BGS Degree) (6 credits)

Area 5: Humanities Course Requirements for a Bachelor of Science

Earn at least 6 credits from the following:

- Area 5: Humanities (BS or BGS Degree) (6 credits)

Area 6: Creative & Fine Art Requirement for a Bachelor of Science

Earn at least 3 credits from the following:

- Area 6: Creative and Fine Arts (BS, BA, or BGS Degree) (3 credits)

Area 7: Additional Humanities/Social Science Requirement for a Bachelor of Science

Earn at least 3 credits from the following:

- Area 7: Additional Courses from Areas 4, 5, 6 (BS, BA, or BGS Degree) (3 credits)

Additional Comments:

[Learning Outcomes]

Outcome
1. Understand and write mathematical proofs

Outcome
2. Analyze and solve mathematical or statistical problems using analytical and computational techniques

Outcome
3. Communicate mathematical or statistical concepts and solutions orally and in writing in a clear and well organized manner using correct mathematical notation, formal mathematical definitions, and professional technology

[Sample 4-Year Curriculum Plan(s)]

Degree Map Name
Sample Curriculum for the Bachelor of Science in Mathematics
Total Degree Map Credits
123 - 124
Degree Map Effective Catalog Year
2025 -
Degree Map Description
General education requirements should be fulfilled as early as possible. The sequence MATH 3052 and MATH 3072 is a key prerequisite to many advanced courses and should be taken as early as possible, in no case later than the junior year.

Choice of electives must include courses for approved 18-hour sequence. It is strongly recommended that elective choices include advanced science and/or a foreign language.

BS-ME - B.S. in Mineral Engineering

[Program Overview]

Program Title
B.S.-ME

Department(s)
Mineral Engineering

Program Short Title
BS-Mineral Engineering

Degree Designation
Bachelor of Science

Program Description
Mineral engineering is concerned with the exploration for and development of minerals and earth Materials in the most efficient manner while protecting the environment. The undergraduate program is oriented toward developing the student's understanding of, and skill in, engineering design. Proficiency in project management and leadership are encouraged through coursework and projects that emphasize professional-quality written and oral communication skills. The objective of the program is to provide the student with an education in the fundamentals of engineering that will allow immediate entry into industry or research work while providing a good opportunity for continued professional growth. Emphasis is placed on developing a responsible professional with a sense of social awareness.

The curriculum includes basic engineering principles that provide the foundation for applied engineering design concepts. The program provides a concentrated study in mechanics, mineral evaluation and economics, ground and environmental control, environmental issues, and project management. Engineering design is introduced in courses covering surface and underground mining, ventilation, mineral processing, equipment selection, drilling and blasting, soil and rock mechanics, hydraulic structures, and geomechanics. Instruction in the environmental aspects of minerals development and production include mine permitting and reclamation, extending to the legal issues and concerns in natural resources development.

A large-scale design project is undertaken in the senior year. This project integrates engineering principles and design in one of three areas: economic evaluation and exploration for mineral properties; design and planning of a mining project; or the planning and implementation of geotechnical construction projects, such as landfills, tailings impoundments, earth dams, and structures.

The department has modern well-equipped laboratories for instruction and research in soil and rock mechanics, ventilation, blast vibrations, mineral evaluation, and computer applications. Students are provided the opportunity to work on a wide range of applied research projects within both the department and the Institute. Students are encouraged to obtain summer jobs available in mines across the Southwest, providing excellent industrial experience.

Simple Requisites

Subplan

Minimum Credit Hours Required—127 In addition to the General Education and Institute Core Curriculum, the following courses are required
Type
Completion Requirement

Math Requirement

Complete ALL of the following Courses:
- MATH2532 - Calculus III

- MATH335 - Ordinary Differential Equation (Inactive)

Engineering Science Requirement

Complete ALL of the following Courses:

- ES201 - Statics
- ES216 - Engineering Fluid Mechanics
- ES3002 - Mechanics of Materials
- ES3003 - Engineering Dynamics
  OR ES3047 - Thermodynamics

Geology Requirement

Complete ALL of the following Course Sets:

- GEOL1110 & GEOL1110L: Physical Geology & Lab
- GEOL200 & GEOL200L: Introduction to Minerology & Lab

Mineral Engineering Courses

Complete ALL of the following Courses:

- ME101 - Intro to Mineral Engineering
- ME3020 - Economic Analysis
- ME3040 - Geostatistics & Mineral Evaluation
- ME3060 - Exploration & Field Mapping
- ME3080 - Surface Mine Design
- ME3081 - Underground Mine Design
- ME4010 - Environmental Issues
- ME4013 - Foundation Engineering
- ME4020 - Soil Mechanics
- ME4022 - Rock Mechanics
- ME4025 - Occupational Health & Safety and Professional Responses
- ME4035 - Rock Slope Engineering
- ME4037 - Tunneling & Underground Excavations
- ME4040 - Mine Ventilation
- ME4062 - Mineral Deposits
- ME4070 - Senior Design I
- ME4071 - Senior Design II

Other Requirements

Fulfill ALL of the following requirements:
Technical Elective (3), Three approved courses from any of the explosive engineering courses offered on campus.

All ME majors must take the Fundamentals in Engineering (FE) exam as a requirement for graduation.

Additional Comments:

No Requirement Level

Generl Education Requirements for Bachelor of Science
Type
Completion Requirement

Area 1: Communications Requirement for Bachelor of Science

Complete ALL of the following Course Sets:

- Area 1: Communications (BS Degree) (9 credits)

Area 2: Mathematics and Quantitative Reasoning Requirements for Bachelor of Science

Complete ALL of the following Course Sets:

- Area 2: Mathematics (BS Degree) (8 credits)

Area 3: Science Requirements for a Bachelor of Science

Complete ALL of the following Course Sets:

- Area 3: Science (BS Degree) (18 credits)

Area 4: Social and Behavioral Science Requirements for a Bachelor of Science

Complete ALL of the following Course Sets:

- Area 4: Social and Behavioral Science (BS or BGS Degree) (6 credits)

Area 5: Humanities Course Requirements for a Bachelor of Science

Complete ALL of the following Course Sets:

- Area 5: Humanities (BS or BGS Degree) (6 credits)

Area 6: Creative & Fine Art Requirement for a Bachelor of Science

Complete ALL of the following Course Sets:

- Area 6: Creative and Fine Arts (BS, BA, or BGS Degree) (3 credits)

Area 7: Additional Humanities/Social Science Requirement for a Bachelor of Science

Complete ALL of the following Course Sets:

- Area 7: Additional Courses from Areas 4, 5, 6 (BS, BA, or BGS Degree) (3 credits)

Additional Comments:

[Learning Outcomes]

Outcome
an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics

Outcome
an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors

Outcome
an ability to communicate effectively with a range of audiences

Outcome
an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts

Outcome
an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives

Outcome
an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions

Outcome
an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

BS-ME - B.S. in Mineral Engineering with Emphasis in Explosives Engineering

[Program Overview]

Program Title	Department(s)
B.S. in Mineral Engineering with Emphasis in Explosives Engineering	Mineral Engineering
Program Short Title	**Degree Designation**
Mineral Eng w/Emph Expl Eng	Bachelor of Science

Simple Requisites

Subplan

Minimum Credit Hours Required—136 In addition to the General Education and Institute Core Curriculum, the following courses are required
Type
Completion Requirement

Math Requirement

Complete ALL of the following Courses:
- MATH2532 - Calculus III
- MATH3035 - Ordinary Differential Equation

Engineering Science Requirement

Complete ALL of the following Courses:
- ES201 - Statics
- ES216 - Engineering Fluid Mechanics
- ES3002 - Mechanics of Materials
- ES3032 - Electrical Engineering
- ES3003 - Engineering Dynamics
  OR ES3047 - Thermodynamics

Geology Requirement

Complete ALL of the following Course Sets:
- GEOL1110 & GEOL1110L: Physical Geology & Lab

- GEOL2160 & GEOL2160L: Introduction to Mineralogy & Lab

Mineral Engineering Courses

Complete ALL of the following Courses:

- ME101 - Intro to Mineral Engineering
- ME3020 - Economic Analysis
- ME3040 - Geostatistics & Mineral Evaluation
- ME3060 - Exploration & Field Mapping
- ME3080 - Surface Mine Design
- ME3081 - Underground Mine Design
- ME4010 - Environmental Issues
- ME4020 - Soil Mechanics
- ME4022 - Rock Mechanics
- ME4024 - Materials Handling & Equip (Inactive)
- ME4025 - Occupational Health & Safety and Professional Responses
- ME4035 - Rock Slope Engineering
- ME4037 - Tunneling & Underground Excavations
- ME4040 - Mine Ventilation
- ME4062 - Mineral Deposits
- ME4070 - Senior Design I
- ME4071 - Senior Design II

Technical Electives

Three approved courses from any of the explosive engineering courses offered on campus

Technical Electives (3)

Additional Comments:
All ME majors must take the Fundamentals in Engineering (FE) exam as a requirement for graduation.

No Requirement Level

Generl Education Requirements for Bachelor of Science
Type
Completion Requirement

Area 1: Communications Requirement for Bachelor of Science

Complete ALL of the following Course Sets:

- Area 1: Communications (BS Degree) (9 credits)

Area 2: Mathematics and Quantitative Reasoning Requirements for Bachelor of Science

Complete ALL of the following Course Sets:

- Area 2: Mathematics (BS Degree) (8 credits)

Area 3: Science Requirements for a Bachelor of Science

Complete ALL of the following Course Sets:

- Area 3: Science (BS Degree) (18 credits)

Area 4: Social and Behavioral Science Requirements for a Bachelor of Science

Complete ALL of the following Course Sets:

- Area 4: Social and Behavioral Science (BS or BGS Degree) (6 credits)

Area 5: Humanities Course Requirements for a Bachelor of Science

Complete ALL of the following Course Sets:

- Area 5: Humanities (BS or BGS Degree) (6 credits)

Area 6: Creative & Fine Art Requirement for a Bachelor of Science

Complete ALL of the following Course Sets:

- Area 6: Creative and Fine Arts (BS, BA, or BGS Degree) (3 credits)

Area 7: Additional Humanities/Social Science Requirement for a Bachelor of Science

Complete ALL of the following Course Sets:

- Area 7: Additional Courses from Areas 4, 5, 6 (BS, BA, or BGS Degree) (3 credits)

BS-MENG - B.S. in Mechanical Engineering

[Program Overview]

Program Title	**Department(s)**
BS-MENG	Mechanical Engineering
Program Short Title	**Degree Designation**
BS-Mechanical Engineering	Bachelor of Science

Program Description

Mechanical engineering is considered to be one of the cornerstone engineering disciplines and is perhaps the broadest of all engineering disciplines. Mechanical engineers are found in every sector of our technology-based economy. Mechanical engineers find careers in (to name just a few): electric power generation and distribution; petroleum exploration, production and refining; automotive, truck and bus manufacturing; light and heavy rail transportation and manufacturing; agricultural equipment manufacturing; commercial and industrial construction industries; aeronautical design and manufacturing; national defense & energy industries; semiconductor manufacturing; biomedical technology; petrochemical process industries; basic Materials extraction and refining industries.

The undergraduate mechanical engineering program is very broad in its scope, yet it contains sufficient depth to ensure competency in the discipline. Mechanical engineering students must take a heavy load of science and mathematics as prerequisites for their engineering science courses. Mechanical engineers in industry must be able to interact with many engineering disciplines, so they are required to take courses in other engineering disciplines. Also, because mechanical engineers design and manufacture components and systems, they are required to take courses that emphasize the engineering design/definition process. The mechanical engineering graduate engineer should be well equipped to undertake professional engineering careers in any technology that involves fluid and thermal sciences, mechanics of Materials, vibrations, mechatronics, dynamic systems and controls, instrumentation, and measurement. Junior and senior mechanical engineering students work on design projects for two years that range from building an off-road vehicle for the Baja SAE® competition to aerospace aircraft design to designing and launching a rocket in the Spaceport American Cup Challenge. Included in the range of design projects are those sponsored by national laboratories and industry.

Simple Requisites

Subplan
Minimum credit hours required—135

In addition to the General Education and Institute Core Curriculum (with MENG 3041 substituted for ENGL 3041), the following courses are required:

Required courses
Type
Completion Requirement

Engineering Science Courses

Complete ALL of the following Courses:
- ES201 - Statics
- ES216 - Engineering Fluid Mechanics
- ES3002 - Mechanics of Materials
- ES3003 - Engineering Dynamics
- ES3016 - Engineering Economics
- ES3032 - Electrical Engineering
- ES3047 - Thermodynamics
- ES3050 - Heat & Mass Transfer

Mechanical Engineering Courses

Complete ALL of the following Courses:
- MENG110 - Introduction to Mechanical Engineering **AND** MENG110L - Introduction to Mechanical Engineering Lab
- MENG210 - Sophomore Design & Measurements **AND** MENG210L - Sophomore Design & Measurements Lab
- MENG3002L - Mechanics of Materials Lab
- MENG3004 - Advanced Strength of Materials
- MENG3005 - Numerical Methods & Analysis
- MENG3041 - Mechanical Engineering Technical Writing
- MENG3081 - Junior Engineering Design Clinic I
- MENG3082 - Junior Engineering Design Clinic II
- MENG4005 - Dynamic Systems & Controls **AND** MENG4005L - Dynamic Systems & Controls Lab
- MENG4021 - Finite Element Analysis & Design **AND** MENG4021L - Finite Element Analysis & Design Lab
- MENG4031 - Fluid & Thermal Systems **AND** MENG4031L - Fluid & Thermal Systems Lab
- MENG4041 - Dynamics & Vibrations in Structural Design
- MENG4051 - Design of Machine Elements
- MENG4081 - Senior Engineering Design Clinic I
- MENG4082 - Senior Engineering Design Clinic II
- MENG4083 - Mechatronics **AND** MENG4083L - Mechatronics Lab

Students changing degree programs may substitute ES 111 for MENG 210 (lecture only).

Materials Engineering Requirement

Complete ALL of the following Courses:

- MTLS202 - Materials Engineering I
  AND MTLS202L - Materials Engineering I Lab

Math Requirement

Complete ALL of the following Courses:

- MATH2532 - Calculus III
- MATH3035 - Ordinary Differential Equation

Technical Electives

Technical Electives: Six hours from upper-division (300, 400, or 500 level) technical courses chosen by the student with the faculty advisor's approval. Recommendations include classes from AE, EXPL, MENG, or other engineering or science disciplines.

Earn at least 6 credits

Additional Comments:
Credit for MATH 1240, pre-calculus, and MATH 1230, trigonometry, is not allowed for mechanical engineering students.

Courses used for the degree, including the General Education Core Curriculum, may not be taken on an S/U basis except for two courses in Humanities and/or Social Science.

Mechanical engineering majors must take the Fundamentals in Engineering (FE) exam as a requirement for graduation. Passing this exam is a major step in the process of attaining professional registration. It is **strongly** recommended that the exam be taken in semester 7, before the graduation semester (semester 8).

No Requirement Level

General Education Requirements for Bachelor of Science in Mechanical Engineering
Type
Completion Requirement

Area 1: Communications Requirement for Bachelor of Science

Complete ALL of the following Course Sets:

- Area 1: Communications (BS Degree) (9 credits)

Area 2: Mathematics and Quantitative Reasoning Requirements for Bachelor of Science

Complete ALL of the following Course Sets:

- Area 2: Mathematics (BS Degree) (8 credits)

Area 3: Science Requirements for a Bachelor of Science

Complete ALL of the following Course Sets:

- Area 3: Science (BS Degree) (18 credits)

Area 4: Social and Behavioral Science Requirements for a Bachelor of Science

Complete ALL of the following Course Sets:

- Area 4: Social and Behavioral Science (BS or BGS Degree) (6 credits)

Area 5: Humanities Course Requirements for a Bachelor of Science

Complete ALL of the following Course Sets:

- Area 5: Humanities (BS or BGS Degree) (6 credits)

Area 6: Creative & Fine Art Requirement for a Bachelor of Science

Complete ALL of the following Course Sets:

- Area 6: Creative and Fine Arts (BS, BA, or BGS Degree) (3 credits)

Area 7: Additional Humanities/Social Science Requirement for a Bachelor of Science

Complete ALL of the following Course Sets:

- Area 7: Additional Courses from Areas 4, 5, 6 (BS, BA, or BGS Degree) (3 credits)

Additional Comments:

[Learning Outcomes]

Outcome
1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics

Outcome
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors

Outcome
3. An ability to communicate effectively with a range of audiences

Outcome
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts

Outcome
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives

Outcome
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions

Outcome
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

BS-MGMT - B.S. in Management

[Program Overview]

Program Title	Department(s)
Bachelors of Science in Management	CSE Dept/ Business and Technology Management (program)
Program Short Title	**Degree Designation**
BS-Management	Bachelor of Science

Program Description

The B.S. Management degree provides students with the knowledge and skills required to manage complex projects and functional areas of an enterprise, i.e. accounting, finance, logistics, marketing, or human resources. In addition, the B.S. in Management prepares potential technology entrepreneurs to start their own companies.

Simple Requisites

Subplan

In addition to the General Education and Institute Core Curriculum (page 78), the following core of business, management, accounting, finance, and economics courses required of all Management students.

Core Requirements for the Bachelor of Science in Management
Type
Completion Requirement

Completion Requirements for a Bachelors of Science in Management

Complete ALL of the following Courses:

- ACCT2110 - Principles of Accounting I
- ACCT3071 - Financial Accounting
- MATH2350 - Statistical Methods
- CSE107 - Intro to Programming Python (Inactive)
  OR ES111 - Computer Programming for Engineers
- MGMT3030 - Management Behavior & Organization
- MGMT3035 - Marketing New Products & Innovations
- MGMT4062 - Systems, Risk, & Decision Analysis
- MGMT4072 - Production & Operations Management
- MGMT4076 - Project Management
- MGMT4081 - Senior Seminar Technical Management
- MGMT4086 - Business Policy & Corporate Strategy
- BFIN3002 - Introduction to Financial Economics
- ECON2110 - Macroeconomic Principles
- ECON2120 - Microeconomic Principles

Additional Comments:
• At least two semesters of a single approved foreign language are strongly suggested but not required.

• Electives to complete 120 credit hours to be selected in consultation with a faculty advisor.

Any required class or technical elective used toward a B.S. in Management or a B.S. in Management of Technology may not be taken on an S/U basis. Management majors must achieve a minimum GPA of 2.0 in order to graduate.

• Management Elective Sequence: At least nine (9) credit hours selected in consultation with and approved by the student's faculty advisor.

No Requirement Level

General Education Requirements for Bachelor of Science in Management
Type
Completion Requirement

Area 1: Communications Requirement for Bachelor of Science

Complete ALL of the following Course Sets:

- Area 1: Communications (BS Degree) (9 credits)

Area 2: Mathematics and Quantitative Reasoning Requirements for Bachelor of Science

Complete ALL of the following Course Sets:

- Area 2: Mathematics (BS Degree) (8 credits)

Area 3: Science Requirements for a Bachelor of Science

Complete ALL of the following Course Sets:

- Area 3: Science (BS Degree) (18 credits)

Area 4: Social and Behavioral Science Requirements for a Bachelor of Science

Earn at least 6 credits from the following:

- Area 4: Social and Behavioral Science (BS or BGS Degree) (6 credits)

Area 5: Humanities Course Requirements for a Bachelor of Science

Earn at least 6 credits from the following:

- Area 5: Humanities (BS or BGS Degree) (6 credits)

Area 6: Creative & Fine Art Requirement for a Bachelor of Science

Earn at least 3 credits from the following:

- Area 6: Creative and Fine Arts (BS, BA, or BGS Degree) (3 credits)

Area 7: Additional Humanities/Social Science Requirement for a Bachelor of Science

Earn at least 3 credits from the following:

- Area 7: Additional Courses from Areas 4, 5, 6 (BS, BA, or BGS Degree) (3 credits)

Additional Comments:

[Learning Outcomes]

Outcome
1. Identify, analyze, and evaluate global, economic, policy, and social problems related to engineering and technology.

Outcome
2. Identify, analyze, and evaluate risk and uncertainty in engineering and technology organizations.

Outcome
3. Identify, formulate, and solve complex problems in accounting, finance, operations, marketing, and organizational behavior related to engineering and technology.

Outcome
4. Apply business and management analytical techniques to improve system and process efficiency.

Outcome
5. Plan, organize, and lead interdisciplinary project teams.

BS-MGTT - B.S. in Management of Technology

[Program Overview]

Program Title
Bachelor of Science in Management of Technology

Department(s)
CSE Dept/ Business and Technology Management (program)

Program Short Title
BS in MGTT

Degree Designation
Bachelor of Science

Program Description
The B.S. degree in Management of Technology (130 credit hours) integrates the business and management curriculum with more extensive coursework in an engineering or science field of the student's choice, providing specific technical knowledge and skills required to lead project teams and technical organizations with an in depth understanding of both the technology and business components of the organization.

Simple Requisites

Subplan
Minimum credit hours required—130

In addition to the General Education and Institute Core Curriculum and the core business, management, finance, and economics requirements, students are required to complete six (6) credit hours of fundamentals courses in engineering or science and (9) credit hours of engineering or science courses numbered 3000 or above, depending on their preferred track.

Program Requirements
Type
Completion Requirement

Additional Comments:

- Engineering Traces 201 (3), 216 (3), and nine (9) approved credit hours of engineering courses numbered 3000 or above, ES 3016 does not count toward the Management of Technology degree
- Science Track: fundamentals courses and 3000 level courses will be approved in consultation with the student's faculty advisor
- MATH 2532 (4)
- At least two semesters of a single approved foreign language are strongly suggested but not required.
- Electives to complete 130 hours

No Requirement Level

BS-PETR - B.S. in Petroleum and Natural Gas Engineering

[Program Overview]

Program Title	**Department(s)**
Bachelor of Science in Petroleum and Natural Gas Engineering	Petroleum Engineering
Program Short Title	**Degree Designation**
BS-Petroleum & NatGas Engr	Bachelor of Science

Program Description

Petroleum and natural gas engineering is a broad-based discipline primarily concerned with the development, exploration, and conservation of oil and gas resources. Petroleum and natural gas engineers plan and supervise drilling and well-completion programs, design and select drilling and production equipment, optimize the production of oil and natural gas, estimate reserves, and manage oil and gas properties.

The oil and gas industry is a progressive and highly technical business, which offers opportunities to young engineers, both in the United States and abroad. A petroleum and natural gas engineering graduate may obtain a responsible position with an oil company, establish a consulting business, or become an independent oil producer.

Simple Requisites

Subplan

Minimum credit hours required—134

In addition to the General Education and Institute Core Curriculum, the following courses are required:

Required Courses

Type

Completion Requirement

Petroleum courses

Complete ALL of the following Courses:
- PETR101 - Intro to Petroleum Engineering
- PETR111 - Computer Applications in Petroleum Engineering
- PETR245 - Petroleum Fluids
  AND PETR245L - Petroleum Fluid Laboratory
- PETR3011 - Drilling Engineering
  AND PETR3011L - Drilling Mud Lab
- PETR3045 - Reservoir Engineering I
  AND PETR3045L - Reservoir Engineering Lab
- PETR3070 - Formation Evaluation
- PETR4013 - Well Design
- PETR4024 - Production Engineering
  AND PETR4024L - Production Engineering Lab
- PETR4025 - Well Completion
  AND PETR4025L - Well Completions Lab
- PETR4045 - Reservoir Engineering II
- PETR4050 - Well Performance
- PETR4070 - Applied Reservoir Simulation
- PETR4071 - Capstone Design I
- PETR4072 - Capstone Design II

Engineering Science courses

Complete ALL of the following Courses:
- ES201 - Statics
- ES216 - Engineering Fluid Mechanics
- ES3002 - Mechanics of Materials
- ES3003 - Engineering Dynamics
- ES3016 - Engineering Economics

- ES3047 - Thermodynamics

Math Requirement

Complete ALL of the following Courses:

- MATH2532 - Calculus III
- MATH3035 - Ordinary Differential Equation

Geology Requirement

Complete ALL of the following Courses:

- GEOL1110 - Physical Geology
  AND GEOL1110L - Physical Geology Lab
- GEOL2330 - Earth's Crust: Mantle, Processes, & Dynamics
- GEOL4060 - Subsurface & Petroleum Geology

Petroleum Electives

Petroleum Electives: Three credit hours of upper-division technical and petroleum and natural gas engineering electives are selected by the student with the faculty advisor's approval to fulfill the requirement of 134 credit hours needed for graduation.

Minimum Grade

Petroleum and natural gas engineering majors must obtain a C or better in all petroleum engineering courses to graduate.

Only courses in Areas 4, 5, and 6 of the general education core curriculum requirements may be taken on an S/U basis.

Additional Comments:

[Learning Outcomes]

Outcome
1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics

Outcome
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors

Outcome
3. An ability to communicate effectively with a range of audiences

Outcome
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts

Outcome
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives

Outcome
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions

Outcome
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

BS-PHYSICS - B.S. in Physics

[Program Overview]

Program Title	Department(s)
Bachelor of Science in Physics	Physics
Program Short Title	**Degree Designation**
BS-PHYSICS	Bachelor of Science

Optional Specialization/Concentration(s)
Astrophysics Option, Atmospheric Physics Option

Program Description
Students in the Department of Physics are encouraged to pursue a broad scientific background and to master theory as well as experiment. The fundamental courses are offered in the principal areas of physics—atomic and nuclear physics, classical mechanics, electricity and magnetism, optics, quantum mechanics, statistical physics, and thermodynamics. The department also offers several laboratory classes. There is the opportunity for students to participate in research projects during the semesters and the summertime, over and above the class and lab work. Many undergraduate students become involved in faculty research and often co-author published papers.

Program Information & Policies
Minimum credit hours required—120

Simple Requisites

Subplan
In addition to General Education and Institutional Core Curriculum Requirements, the following courses are required:

The following courses are required:
Type
Completion Requirement

Program Requirements for B.S. in Physics

Complete ALL of the following Courses:
- PHYS2250 - Comprehensive Physics I
  AND PHYS2250L - Comprehensive Phys I Lab
- PHYS2251 - Comprehensive Physics II
  AND PHYS2251L - Comprehensive Physics II Lab
- PHYS2420 - Computational Physics I

- PHYS3040 - Intro to Quantum Theory
- PHYS3080 - Practicum in Problem Solving

- PHYS4011 - Thermodynamics & Statistical Mechanics
- PHYS4043 - Atomic & Nuclear Physics
- PHYS4051 - Senior Laboratory

Math requirements for B.S. in Physics

Complete ALL of the following Courses:

- MATH2532 - Calculus III
- MATH2420 - Applied Linear Algebra
- MATH3032 - Vector Analysis
- MATH3035 - Ordinary Differential Equation
- MATH3036 - Introduction to Partial Differential Equations
- Three hours of upper-division math courses

Other course requirements for B.S. in Physics

- Eight credit hours of science or engineering courses that are not required as part of requirements for Bachelor of Science in Physics. At least 2 of the credits must be lab credits. These courses are not limited to Physics classes. Any Physics elective, including requirements for Astrophysics or Atmospheric Physics options as well as PHYS1113/1113L, may be used to satisfy this requirement. Courses that form a lecture/lab pair must both be taken.
- Language–three hours
- Electives–to complete 120 credit hours; in some instances, additional elective credits may be desired.

B.S. in Physics with Astrophysics Option

Requirements
Requirements include the courses listed for the Bachelor of Science Degree in Physics, the General Education Core Curriculum, and the following courses:

PHYS 3025 (3), 3026 (3), 3027L (1), 3028L (1), 4025 (3), 4026 (3)

Program Science Option (must be declared with the Registrar Office)

Science Option 2: Title
B.S. in Physics with Atmospheric Physics Option

Requirements
Requirements include the courses listed for the Bachelor of Science Degree in Physics, the General Education Core Curriculum, and the following courses: PHYS 4027 (3), 4028 (3), 4032 (3), 4033 (3)

Note: PHYS 4027, 4028, and 4032 are offered in alternate years. Students may take one of the following sequences:

1. Junior year: PHYS 4027 (fall); PHYS 4028 (spring)

   Senior year: PHYS 4032 (fall); PHYS 4033 (spring)

2. Junior year: PHYS 4032 (fall), PHYS 4033 (spring)

   Senior year: PHYS 4027 (fall), PHYS 4028 (spring)

3. Junior year: PHYS 4032 (fall)

   Senior year: PHYS 4027 (fall), PHYS 4028, PHYS 4033 (spring)

[Learning Outcomes]

Outcome
1. Students will begin to master the knowledge of physics, including equations of motion, minimization principles, conservation laws, and application of mathematics to physical problems.

Outcome
2. Students will solve physics and physics-related problems using laboratory and computational techniques.

Outcome
3. Students will demonstrate an ability to communicate conceptual and quantitative information effectively.

BS-PSY - B.S. in Psychology

[Program Overview]

Program Title
Bachelor of Science in Psychology

Department(s)
CLASS , CLASS Dept/ Psychology (program)

Program Short Title
BS-PSY

Degree Designation
Bachelor of Science

Program Type
Major

Program Description
The program in psychology is designed to provide students with a scientific foundation in the methods and basic data in psychology and neuroscience and to prepare students for further work in all specializations within the field. The B.A. degree program allows more flexibility and breadth whereas the B.S. degree program emphasizes depth in quantitative skills. Psychology students acquire the fundamentals of learning and memory, perception, attention, reason and problem solving, emotion, thought, language and communication, the development of all these processes and their pathology. In addition, we apply psychology to other fields and teach techniques for measuring and studying psychological variables. Students conduct laboratory experiments on the psychological and physiological bases of behavior. The department has an invertebrate vivarium for laboratory classes and research. There are student opportunities for independent research.

Program Information & Policies
- *Minimum credit hours required—120*

Students intending to major in psychology should complete PSYC1110 g:Introduction to Psychology and PSYC2285 g:Experimental Psychology by the end of their sophomore year. They are advised to complete the biology and mathematics requirements as early as possible since material from these courses will be used in upper-division courses.

Simple Requisites

Subplan

BS in Psychology
Type
Completion Requirement

Psychology Courses

Complete ALL of the following Courses:

- PSYC1110 - Introduction to Psychology
- PSYC2285 - g:Experimental Psychology
  AND PSYC2285L - g:Experimental Psychology Lab
- PSYC4072 - g:Senior Seminar

Two Psychology Courses & Labs

Complete at least 2 courses in the following course sets:

- PSYC3001 & PSYC3001L: Sensation and Perception & Lab
- PSYC3005 & PSYC3005L: Cognitive Psychology & Lab
- PSYC3009 & PSYC3009L: Behavioral Neuroscience & Lab
- PSYC3062 & PSYC3062L: Animal Behavior & Lab

Additional Psychology Credits (minimum of 15)

Earn at least 15 credits from the following:

- Psychology Electives

Biology Courses

Complete ALL of the following Course Sets:

- BIOL2110 & BIOL2110L: Principles of Biology I & Lab
- BIOL2610 & 2610L: Principles of Biology II & Lab

Biology Electives

Earn at least 6 credits from the following:

- 3000 & 4000 Level Biology Courses

at least six (6) upper-division credits in Biology, exclusive of BIOL4071 Life Sciences Seminar or BIOL 4081

Math Courses

Complete ALL of the following Courses:

- MATH2350 - Statistical Methods
  OR MATH4083 - Mathematical Statistics

Science Requirement

Earn at least 4 credits
At least four (4) additional credit hours beyond the General Education Core Curriculum and above the Psychology requirements selected from among Biology, Computer Science, Chemistry, Mathematics and Physics

Additional Comments:

General Electives
Type
Completion Requirement

Elective Courses to meet 120 Degree hours

General Electives courses to complete 120 credit hours.

Additional Comments:

Students intending to major in psychology should complete PSYC 1110 and 2285 by the end of their sophomore year. They are advised to complete the biology and mathematics requirements as early as possible since material from these courses will be used in upper-division courses.

No Requirement Level

General Education Requirements for Bachelor of Science in Psychology
Type
Completion Requirement

Area 1: Communications Requirement for Bachelor of Science

Complete ALL of the following Course Sets:

- Area 1: Communications (BS Degree) (9 credits)

Area 2: Mathematics and Quantitative Reasoning Requirements for Bachelor of Science

Complete ALL of the following Course Sets:

- Area 2: Mathematics (BS Degree) (8 credits)

Area 3: Science Requirements for a Bachelor of Science

Complete ALL of the following Course Sets:

- Area 3: Science (BS Degree) (18 credits)

Area 4: Social and Behavioral Science Requirements for a Bachelor of Science

Earn at least 6 credits from the following:

- Area 4: Social and Behavioral Science (BS or BGS Degree) (6 credits)

Area 5: Humanities Course Requirements for a Bachelor of Science

Earn at least 6 credits from the following:

- Area 5: Humanities (BS or BGS Degree) (6 credits)

Area 6: Creative & Fine Art Requirement for a Bachelor of Science

Earn at least 3 credits from the following:

- Area 6: Creative and Fine Arts (BS, BA, or BGS Degree) (3 credits)

Area 7: Additional Humanities/Social Science Requirement for a Bachelor of Science

Earn at least 3 credits from the following:

- Area 7: Additional Courses from Areas 4, 5, 6 (BS, BA, or BGS Degree) (3 credits)

Additional Comments:

[Learning Outcomes]

Outcome
1. Knowledge base in Psychology

Outcome
2. Scientific inquiry and critical thinking

Outcome
3. Ethical and social responsibility in a diverse world

Outcome
4. Communication

Outcome
5. Professional development

BS-TC - B.S. in Technical Communication

[Program Overview]

Program Title
Bachelor of Science in Technical Communication

Department(s)
CLASS , CLASS Dept/ Technical Communication (program)

Program Short Title
BS-Technical Communication

Degree Designation
Bachelor of Science

Program Type
Major

Program Description
The Technical Communication curriculum combines courses from three fields of study to prepare students for technical communication positions upon graduation:

Program Information & Policies

- The TCOM courses introduce students to document design, graphics, and computer documentation, created online and for multimedia. The TCOM courses also develop students' writing, speaking, and editing abilities.
- The humanities and social science courses improve students' understanding and appreciation of history, literature, philosophy, psychology, and the arts.
- The science and technology courses provide students a background in one specific science or engineering discipline.

Simple Requisites

Subplan
Minimum credit hours required—120

In addition to the General Education and Institute Core Curriculum , the following courses are required:

Course Requirements
Type
Completion Requirement

Technical Communication Course Requirements

Earn at least 35 credits from the following:

- TCOM1110 - g:Community Service
- TCOM1120 - g:Orientation to Technical Communication
- TCOM1130 - g:Visual Communication & Graphic Design
- TCOM2110 - g:Technical Editing
- TCOM2120 - g:Branding and Social Media
- TCOM3021 - g:Internship
- TCOM4011 - g:Persuasive Communication & Grant Writing
- TCOM4020 - Senior Seminar
- TCOM4021 - g:Documents & Client Project Management
- TCOM4022 - Senior Thesis

and nine credit hours of technical communication electives. MGT 330 is an approved TCOM elective. All technical communication courses must be completed with grade C or better. Students may use these TCOM courses to fulfill Area 5 of the General Education Core Curriculum Requirements with the exception of TCOM 3021, TCOM 4021, and TCOM 4022.

Humanities Course Requirements

12 credit hours in excess of the General Education Core Curriculum Requirements and excluding TCOM courses.

Foreign Language Requirements

Six credit hours of one language

Science or Engineering Requirements

12 credit hours in a single discipline in excess of general degree requirements

Additional Comments:
Electives to complete 120 hours

No Requirement Level

Bachelor of Science General Education Degree Requirements
Type
Completion Requirement

Area 1: English Requirements for Bachelor of Science

Complete ALL of the following Courses:

- ENGL1110 - g: Composition I
- ENGL1120 - g: Composition II
- ENGL3041 - g:Technical Writing

9 credits in Communications

Area 2: Math Requirements for Bachelor of Science

Complete ALL of the following Courses:

- MATH1510 - g: Calculus I
  AND MATH1510L - g: Calculus I Lab
- MATH1520 - g: Calculus II

8 Credits in Mathematics

Area 3: Science Requirements for a Bachelor of Science

Complete ALL of the following Courses:

- CHEM1215 - General Chemistry I
  AND CHEM1215L - General Chemistry I Lab
- CHEM1225 - General Chemistry II
  AND CHEM1225L - General Chemistry II Lab
- PHYS1310 - g:Calculus-based Physics I
  AND PHYS1310L - Calculus-based Physics I Lab
- PHYS1320 - Calculus-based Physics II
  AND PHYS1320L - Calculus-based Physics Lab II

18 Credits in Sciences

Area 4: Social Science for a Bachelor of Science

Earn at least 6 credits from the following:

- Area 4: Social and Behavioral Science (BS or BGS Degree) (6 credits)

Area 5: Humanities Course Requirements for a Bachelor of Science

Earn at least 6 credits from the following:

- Area 5: Humanities (BS or BGS Degree) (6 credits)

Area 6: Fine & Creative Art Course Requirement for a Bachelor of Science

Earn at least 3 credits from the following:

- Area 6: Creative and Fine Arts (BS, BA, or BGS Degree) (3 credits)

Area 7: Additional Humanites/Social Science Requirement for a Bachelor of Science

Earn at least 3 credits from the following:

- Area 7: Additional Courses from Areas 4, 5, 6 (BS, BA, or BGS Degree) (3 credits)

Additional Comments:

[Learning Outcomes]

Outcome
1. Professionalism within the field of Technical Communication in Written Communication and Editing

Outcome
2. Professionalism within the field of Technical Communication in Visual and Design Communication

Outcome
3. Professionalism within the field of Technical Communication in Oral Presentation

Outcome
4. Ability to conduct original research in Technical Communication (measured through senior thesis, SRS, internship, and other class projects)

Outcome
5. Ability to work collaboratively and understand the way Technical Communication projects are products of negotiated interaction

Outcome
6. Ability to produce multimedia content for different purposes, audiences, and places

CS - Computer Science (minor)

[Program Overview]

Program Title
Minor in Computer Science

Department(s)
CSE Computer Science & Engineering

Program Short Title
Minor in Computer Science

Degree Designation
Undergraduate Minor

Program Type
Minor

Simple Requisites

Subplan
Minimum credit hours required: 28

The following courses are required
Type
Completion Requirement

Required courses

Complete ALL of the following Courses:

- CSE113 - Introduction to Programming
- CSE122 - Algorithms & Data Structures

along with their respective pre-requisites

Four courses required

Complete at least 4 of the following courses:

- CSE3024 - Principles of Programming Languages
- CSE3025 - Principles of Operating Systems
- CSE3026 - Software Engineering
- CSE3042 - Formal Languages & Automata
- CSE3044 - Design & Analysis of Algorithms
- CSE3053 - Introduction to Computer Networks

Additional Comments:
along with their respective pre-requisites.

No Requirement Level

See the **Institute General Education Core Requirements**.

GC-ATLE - G.C. in Elementary Alternative Licensure

[Program Overview]

Program Title
Graduate Certificate in Elementary Alternative Licensure

Department(s)
Science Teaching (program)

Program Short Title
GC Elem Alternative Licensure

Degree Designation
Graduate Certificate

Program Type
Major

Program Description
The Elementary Alternative Licensure Graduate Certificate will allow students with at least a Bachelor's degree to become certified teachers for grades K-8 in New Mexico schools. Teacher candidates can start teaching on the alternative licensure as soon as they are admitted into the program. The program includes 6 credit hours of upper-level coursework and 12 credit hours of graduate classes.

Note: A grade of C– or higher is requires to get ALP or UMSE credit for education courses.

Simple Requisites

Subplan
Note: A grade of C– or higher is requires to get ALP or UMSE credit for education courses.

GC-SPC - G.C. in Scientific & Professional Communication

[Program Overview]

Program Title
Graduate Certificate in Scientific and Professional Communication

Department(s)
CLASS

Program Short Title
Scientific & Professional Comm

Degree Designation
Graduate Certificate

Program Type
Graduate Certificate

Program Description
Minimum credit hours required—14

The Scientific and Professional Communication Graduate Certificate offers graduate students and post- baccalaureate and industry and public sector professionals an opportunity to build and strengthen their professional communication abilities for professional and academic work. The certificate can be completed live or through distance education

Program Information & Policies
The 14 hours of coursework required for the Certificate provides general foundation of communication to the public and to academic audiences (COMM5075 Communication in the Sciences or TCOM5005 Science Writing and TCOM5011 Persuasive Comm & Grant Wrtng), while elective courses are available to students with specific interests; for example professionals who work in Spanish-speaking settings might benefit from SPAN5020 Adv Spanish Reading & Comp; students in industry or in one of New Mexico's national labs might choose courses such as TCOM5016 International Prof Communicati International Professional Communication or TCOM5005 Science Writing Science Writing; and students interested in public policy and public engagement might consider POLS5071 Science & Technology Policy Science and Technology Policy or POLS5070 Policy Science Policy Sciences. The certificate concludes with a capstone project that allows students to work on a project related to their work or partner with a community organization.

We also provide the option for a concentration in Policy Sciences and Communication. Students may select from the electives above and opt to substitute a third policy-related course in place of TCOM5001 Experiential Learning Project.

Simple Requisites

Subplan

Scientific & Professional Communication Requirements
Type
Completion Requirement

Required Communication Courses

Complete ALL of the following Courses:

- TCOM5011 - Persuasive Comm & Grant Wrtng
- TCOM5005 - Science Writing
  OR COMM5075 - Communication in the Sciences

Elective Communication Courses

Earn at least 6 credits from the following:

- COMM5075 - Communication in the Sciences
  OR TCOM5005 - Science Writing
- TCOM5021 - Document & Client Project Management
- TCOM5016 - International Professional Communication
- POLS5070 - Policy Science
- POLS5071 - Science & Technology Policy
- SPAN5020 - Advanced Spanish Reading & Composition
- and 5000-level special topics courses in TCOM or POLS.

COMM5075 Communication in the Sciences or TCOM5005 Science Writing can only be used as an elective if not complete for the Communication Requirements above.

Additional Comments:
We also provide the option for a concentration in Policy Sciences and Communication. Students may select from the electives above and opt to substitute a third policy-related course in place of TCOM5001 Experiential Learning Project.

Students must be concurrently enrolled in a graduate degree program at NMT or meet the admissions criteria to enroll in a graduate degree program (including as non-degree-seeking graduate students).

No Requirement Level

General Requirements

It is required that a student preparing to complete the M.S. degree:

1. have a minimum of six credit hours of approved out of program upper-division or graduate course work,
2. declare a major with at least 12 credit hours of coursework above the 5000-level, exclusive of research credits,
3. complete a research project culminating in a thesis or independent study paper, and
4. theses must be checked with iThenticate by the academic advisor before they will be accepted.

Note: Students pursuing an Master's. degree in a different discipline than their Bachelor's degree may request a waiver for the out of program requirement. Waivers must be approved by the student's advisor, committee, department chair, and the Dean of Graduate Studies.

These general requirements do not apply to students in the Master of Science for Teachers (MST) program.

Approvals

1. The appropriate department grants admission to its graduate program.
2. The appropriate department and the Dean of Graduate Studies must approve the composition of each graduate student's advisory committee.
3. The graduate student's advisory committee must approve the student's thesis or independent study research project. The MS degree will not be awarded until the thesis or independent study paper has been approved by the advisory committee.
4. Coursework to be applied toward the degree must meet the associated degree requirements and be approved by the graduate student's advisory committee and the Dean of Graduate Studies.

Research Options

There are two research options, M.S. with Independent Study and M.S. with Thesis. Each option requires a minimum of 30 credit hours. Some departments do not recognize the Independent Study option.

M.S. with Independent Study Requirements:

1. Completion of at least 27 credit hours of approved course work, with at least 15 credit hours of 5000-level courses, exclusive of research credits;
2. Completion of at least three credit hours of independent study;
3. Submission of a formal paper describing the results of the research to the candidate's advisor and advisory committee; and
4. Submission of a digital abstract of the independent study to the Center for Graduate Studies.

M.S. with Thesis Requirements:

1. Completion of at least 24 credit hours of approved course work, with at least 12 credit hours of 5000-level courses, exclusive of research credits;
2. Completion of at least six credit hours of thesis work;
3. Satisfactory oral defense of the thesis research; and
4. Submission of the digital thesis to the Center for Graduate Studies via ProQuest.

Most Master Degrees at NMT require some out of department course electives, see the Graduate Office or an Academic Advisor for clarification or for additional information.

ME-CH E - M.E. in Chemical Engineering

[Program Overview]

Program Title
Masters of Engineering in Chemical Engineering

Department(s)
Chemical Engineering

Program Short Title
ME in CH E

Degree Designation
Master of Engineering

Required Specialization/Concentration(s)
Specialization in Surface Engineering

Program Description
Students in the graduate program in Chemical Engineering will be required to take a significant course load in surface engineering fundamentals where they will advance knowledge from science and basic engineering to surface engineering. Students will also have the opportunity to explore applications in surface engineering through coursework and research.

Simple Requisites

Subplan
In addition to meeting the general graduate degree requirements, the program has the following requirements:

1. The Master of Engineering degree requires 30 credit hours beyond the B.S. with the following requirements:
    - a minimum of 12 hours of 5000-level in chemical engineering, which must include at least 9 hours of core courses
    - a minimum of 6 hours outside of chemical engineering
    - maximum of 3 hours of directed study
    - all courses need to be 3000-level or above
2. Students must take CHE5085: Graduate Seminar each semester offered up to two times. CHE5085 cannot be used towards the credit coursework requirement for the degree.

Core Courses
Type
Completion Requirement

Any three of the following course are required:

Complete at least 3 of the following courses:
- CH E5051 - Advanced Mathematical Modeling
- CH E5068 - Surfaces, Interfaces, and Colloids
- CH E5072 - Interfacial Transport Phenomenon

Additional Comments:

No Requirement Level

[Learning Outcomes]

Outcome
1. The ability to apply experimental and/or calculation based techniques in order to solve a research question in the field of surface engineering

Outcome
2. Science and basic engineering to the field of surface engineering in order to solve upper level problems

Outcome
3. Effectively present their research through oral presentations, posters, and publications

ME-MATE - M.E. in Materials Engineering

[Program Overview]

Program Title
Master of Engineering in Materials Engineering

Department(s)
Materials Engineering

Program Short Title
ME-Materials Engineering

Degree Designation
Master of Engineering

Program Description
The Master of Engineering (ME) degree is a coursework only option for students seeking a non-research-based advanced degree. The ME in Materials Engineering is professionally-oriented, focused on satisfying the needs of practicing engineers in a materials-related discipline. Degree requirements are set by the departmental Master of Engineering Graduate Committee.

Simple Requisites

Subplan

The Course Requirements include:

1. At least 30 credit hours of upper level coursework that must include:
   (i) a minimum of 12 credit hours of MTLS 500 level courses and
   (ii) the 6 credit hours of outside department coursework must be selected from EMGT 501, EMGT 502, EMGT 503, EMGT 504, EMGT 505,EMGT 506, EMGT 507, EMGT 508, EMGT 509, or EMGT 510.
   (iii) ME students with a BS in Materials Engineering may take an additional 6 credits of elective outside of the Materials Engineering department, for a minimum of 18 hours of MTLS coursework. ME students with a BS outside of Materials Engineering must complete 21 credit hours of MTLS coursework.
2. Students may not use MTLS 581, Directed Study, to satisfy the coursework requirements for a Master of Engineering degree. All coursework used towards the ME degree requirements must carry a letter grade.
3. The student must work with his/her faculty advisor to form a course plan. Coursework to be applied towards the degree must be approved by the graduate student's advisor, chair, and the Dean of Graduate Studies
4. Students enrolled in the Master of Engineering program are required to take two semesters of MTLS 592. MTLS 592 cannot be used towards the ME 30 credit coursework requirements. If a student has completed their BS in Materials Engineering or affiliated field at New Mexico Tech and has at least a 3.0 GPA, the student can be accepted to the ME program without taking the GRE.

No Requirement Level

[Learning Outcomes]

Outcome
Critically assess the literature

Outcome
Effectively engage in written dissemination of technical findings and conclusions

Outcome
Effectively engage in oral dissemination of technical findings and conclusions

Outcome
Demonstrate a breadth of knowledge in Materials Engineering

ME-MENG - M.E. in Mechanical Engineering

[Program Overview]

Program Title
M.E.-MENG

Department(s)
Mechanical Engineering

Program Short Title
ME-Mechanical Engineering

Degree Designation
Master of Engineering

Program Type
Major

Optional Specialization/Concentration(s)
Specialization in Explosives Engineering, Specialization in Mechatronics Systems & Robotics, Specialization in Fluid & Thermal Sciences, Specialization in Solid Mechanics

Program Description
The Mechanical Engineering Department offers each of the Master degrees either as a general Mechanical Engineering degree or with one of four specializations. The four areas of specialization for the masters degrees are listed below with the core classes for each specialization.

Program Information & Policies

Department Requirements for the Master of Science and Master of Engineering degrees in Mechanical Engineering

The Mechanical Engineering Department offers each of the Master degrees either as a general Mechanical Engineering degree or with one of four specializations. The four areas of specialization for the masters degrees are listed below with the core classes for each specialization.

General Mechanical Engineering Degree

12 core class credits are to be taken as any graduate level MENG courses which are approved by the advisory committee.

Specialization in Explosives Engineering

Core Classes: Classes listed under Energetic Systems and Explosive Engineering above.

(Note: Students who have completed the minor in explosives engineering program cannot re-use the classes (including co-listed classes) used for the minor program toward a master's degree in explosives engineering.)

Specialization in Fluid and Thermal Sciences

Core Classes: Classes listed under Fluid and Thermal Sciences above.

Specialization in Mechatronics Systems and Robotics

Core Classes: Classes listed under Intelligent Systems and Mechatronics above.

Specialization in Solid Mechanics

Core Classes: Classes listed under Solid Mechanics above.

Students enrolled in the Master of Engineering program are not required to take MENG 5085. Only one credit of MENG 5085 may be used to fulfill degree requirements. MENG 5085 must be taken for a letter grade if used to fulfill degree requirements.

A minimum of 30 credit hours is required for the Master of Engineering in Mechanical Engineering.

Simple Requisites

Subplan

Requirements

A minimum of 30 credit hours is required for the Master of Science or Master of Engineering in Mechanical Engineering.

Core Specialization Courses
Type
Completion Requirement

Additional Comments:
at least 12 credit hours from the selected specialization listed under graduate department requirements. For no specialization, any 12 credit hours from graduate level MENG courses constitute the core requirements.

MENG Elective Courses
Type
Completion Requirement

Additional Comments:
at least 12 credit hours of graduate-level MENG courses. Students may not use MENG 5081, Directed Study, to satisfy Master of Engineering degree requirements. The advisory committee may allow for a maximum of 3 credits of out-of-department graduate level coursework hours to apply to the elective course requirement.

Out-of-Department courses
Type
Completion Requirement

Additional Comments:
6 credit hours of approved upper-division or graduate course work from another department. The advisory committee may determine that a student's previous academic experience has provided breadth and may recommend modification of this

No Requirement Level

Specialization/Dissertation Title
Specialization in Fluid and Thermal Sciences

Specialization/Dissertation Requirements
• MENG 5056 Compressible Fluid Flow

• MENG 5075 Advanced Engineering Mathematics

• MENG 5077 Advanced Fluid Mechanics

• MENG 5078 Advanced Thermodynamics

• MENG 5079 Advanced Heat Transfer

• MENG 5080 Computational Fluid Dynamics and Reactive Flow

Specialization/Dissertation Options

Specialization/Dissertation Title
Specialization in Solid Mechanics

Specialization/Dissertation Requirements
• MENG 5004 Advanced Mechanics of Materials

• MENG 5005 Design and Analysis of Experiments

• MENG 5015 Theory of Elasticity

• MENG 5016 Plates and Shells

• MENG 5017 Advanced Finite Element Method

• MENG 5020 Fracture Mechanics

• MENG 5024 Continuum Mechanics

• MENG 5041 Vibration in an Elastic Continuum

• MENG 5049 Wave Propagation

• MENG 5083 Engineering Mechanics of Composite Structures

• MENG 5084 Smart Materials and Structures

[Learning Outcomes]

Outcome
1. Learn to reason well and to evaluate and apply information

Outcome
2. Develop analytical and quantitative skills for competence in science and math

Outcome
3. Communicate to different audiences in multiple forms

Outcome
4. Exercise their role as members of diverse societies and cultures

Outcome
5. Learn responsible values and ethics for their professional lives

Outcome
6. Gain expertise in their chosen field of study

MEM - Master of Engineering Management

[Program Overview]

Program Title
Master of Engineering Management

Department(s)
CSE Dept/ Engineering Management (Program)

Program Short Title
MEM

Degree Designation
Master of Engr Management

Program Description
The Graduate Degree Program in Engineering Management at New Mexico Tech is specifically designed for engineers, scientists, and technologists holding a bachelor's degree in their respective fields who seek the knowledge and practical skills required to lead project teams and organizations through today's competitive and fast changing business environment. Our focus is to provide students with a challenging experience that prepares them to develop and articulate a business case for their next engineering or technology design and development project and lead their team and organization to a successful outcome.

Simple Requisites

Program Requirements for MEM (30 Total Credits Required)
Type
Completion Requirement

The following Courses Are Required (18 Credits)

Complete ALL of the following Courses:

- EMGT5001 - Management Science for Engineering Management
- EMGT5002 - Financial Management
- EMGT5003 - Information Systems in Technology Organizations
- EMGT5004 - Engineering Statistics
- EMGT5005 - Technology Marketing
- EMGT5006 - Managing HR in Technolgy Organizations

12 additional credits of electives (at least 9 credits should be 5000-level EMGT courses).

Additional Comments:

No Requirement Level

[Learning Outcomes]

Outcome
1. Apply management and organization design principles to improve operational efficiency in organizations;

Outcome
2. Apply analytical and simulation models to solve engineering and technology management problems;

Outcome
3. Identify, analyze, and evaluate complex engineering problems under multiple levels of risk and uncertainty;

Outcome
4. Identify, analyze, and evaluate new technologies, products, and innovations for commercialization;

Outcome
5. Be able to plan projects and manage project finance and operations.

MS-BIOLOGY - M.S. in Biology

[Program Overview]

Program Title
Master of Science in Biology

Department(s)
Biology

Program Short Title
MS-Biology

Degree Designation
Master of Science

Optional Specialization/Concentration(s)
Specialization in Biochemistry

Program Information & Policies
The master's candidate must demonstrate competence in mathematics, chemistry, and physics comparable to New Mexico Tech's Bachelor of Science in Biology. In addition to the general degree requirements for the Master of Science degree at New Mexico Tech, all Biology MS students must take BIOL 5079 and BIOL 5082 during the first year of graduate study. For courses listed at both the 4000 and 5000 level, graduate students should enroll in the 5000 level course.

Master of Science Degree

General requirements common to all Masters of Science degree curricula in the sciences and engineering fields are listed below. Additional requirements for specific curricula are listed under the appropriate department.

Master of Science General Requirements
Type
Completion Requirement

Additional Comments:

See the Master of Science information found in the Graduate section of the catalog at Master of Science Degree.

Most Master Degrees at NMT require some out of department course electives, see the Graduate Office or an Academic Advisor for clarification or for additional information.

[Specializations/Dissertation Concentration Options]

Specialization/Dissertation Options

Specialization/Dissertation Title
Optional: Specialization in Biochemistry

Specialization/Dissertation Title Description
The master's candidate must demonstrate competence in mathematics, chemistry, and physics comparable to New Mexico Tech's Bachelor of Science in Biology.

Specialization/Dissertation Requirements
The master's candidate must demonstrate competence in mathematics, chemistry, and physics comparable to New Mexico Tech's Bachelor of Science in Biology. In addition to the MS in Biology requirements above, the following are required:

- Completion of at least six credit hours of CHEM 5061 (Advanced Topics in Biochemistry, 3cr) and CHEM 5047 (Medicinal Chemistry, 3cr), or committee-approved substitute 5000-level chemistry course(s).
- Completion of one credit hour of BIOL 5001 (Graduate Seminar) *and* two credit hours of CHEM 5029 (Chemistry Graduate Seminar).

Thesis overlaps the fields of Biology and Chemistry and is supervised by faculty from both Biology and Chemistry Departments.

[Learning Outcomes]

Outcome
1. Use basic principles and advanced knowledge of science to analyze, explain, and apply biological information and concepts.

Outcome
2. Design and implement a biological research project

Outcome
3. Effectively communicate scientific findings orally and in writing

MS-CEE - M.S. in Civil & Environmental Engineering

[Program Overview]

Program Title
Master of Science in Civil and Environmental Engineering

Department(s)
CEE Dept/ Civil Engineering, CEE Dept/ Environmental Engineering

Program Short Title
MS-Civil & Environmental Engr

Degree Designation
Master of Science

Program Type
Major

Required Specialization/Concentration(s)
w spec. in Civil Engineering, w spec. in Environmental Eng

Program Description
The Civil and Environmental Engineering graduate program at New Mexico Tech provides a unique educational and research experience in the engineering and science of the natural and the built environment and environmental protection. The plan of study and research is suited to each individual, drawing upon the strengths of the student, taking advantage of program capabilities, and complementing research activities within and outside New Mexico. A thesis or independent study project is required to complete the degree. General requirements common to all Master of Science degree curricula also apply.

Program Information & Policies
Admission to the Master of Science in Civil and Environmental Engineering program requires competence in mathematics, chemistry, physics, and engineering science comparable to the Bachelor of Science in Civil or Environmental Engineering. The department chair, or an advisory committee, will evaluate the scholastic record of every entering student to determine whether any deficiencies exist in their educational background. For example, students entering the program without an engineering degree may be required to take additional course work in such areas as fluid mechanics, heat and mass transfer, and differential equations before being granted a M.S. in Civil and Environmental Engineering. It is up to the student and his or her graduate committee to determine the specific plan of study for the student after the first semester of graduate work. Transfer credit for courses taken at another institution will be evaluated on an individual basis.

Simple Requisites

Subplan

Thesis Option
Type
Completion Requirement

Additional Comments:
A total of 30 credit hours are required for a M.S. in Civil and Environmental Engineering, which must include a minimum of 18 credit hours of Civil and Environmental Engineering coursework, and 6 credit hours of CEE 5091 (thesis). All students must take a minimum of 12 credit hours of 5000-level Civil and Environmental Engineering courses.

Independent Study Option
Type
Completion Requirement

Additional Comments:
A student may petition the department with the approval of the Department Chair to pursue a Master of Science degree with an independent study option. Candidates for the non-thesis Master of Science option must complete a minimum of 30 credit hours, of which 3 credit hours must be independent study (CEE 5090). All students must take a minimum of 12 credit hours of 5000-level Civil and Environmental Engineering courses, and an additional 6 credits of 4000- or 5000-level Civil and Environmental Engineering courses (18 credits total). The student's course of study must be approved by the student's advisory committee, and it must fulfill the other requirements of the M.S. in Civil and Environmental Engineering degree program with the exception of 6 credit hours of thesis (CEE 5091).

No Requirement Level

[Specializations/Dissertation Concentration Options]

Specialization/Dissertation Options

Specialization/Dissertation Title
Specialization in Environmental Engineering

Specialization/Dissertation Requirements
The Area of Specialization in Environmental Engineering requires a minimum of 4 courses be taken from the following list of CEE courses:

CEE 5001, Physicochemical and Biological Processes

CEE 5003, Environmental Risk Assessment

CEE 5010, Advanced Water Chemistry

CEE 5011, Water Quality Management and Control

CEE 5012, Industrial Water and Wastewater Treatment

CEE 5013, Air Resources Engineering

CEE 5014, Energy & Environment

CEE 5020, Hazardous Waste Site Remediation

CEE 5021, Green Engineering

CEE 5022, Geotechnical Waste Containment

CEE 5023, Open Channel Hydraulics

CEE 5071, Special Topics

Specialization/Dissertation Options

Specialization/Dissertation Title
Specialization in Civil Engineering

Specialization/Dissertation Requirements
The Area of Specialization in Civil Engineering requires a minimum of 4 courses be taken from the following list of CEE courses:

CEE 5001, Finite Element Analysis for Civil Engineers

CEE 5002, Introduction to Transportation Engineering

CEE 5006, Design of Steel Structures

CEE 5007, Design of Concrete Structures

CEE 5004, Reinforced Masonry and Timber Design

CEE 5005, Infrastructure

CEE 5018 Structural Dynamics

CEE 5041, Minimum Design Loads for Buildings

CEE 5043, Foundation Design and Analysis

CEE 5008, Advanced Design of Steel Structures

CEE 5009, Advanced Design of Concrete Structures

CEE 5023, Open Channel Hydraulics

CEE 5071, Special Topics

[Learning Outcomes]

Outcome
1. Graduates of the Civil and Environmental Engineering MS Program will be able to: Assess various infrastructure issues associated with planning and development of the urban and natural environment and their accompanying social impacts

Outcome
2. Synthesize technical knowledge of engineering analysis and design to identify, formulate, and solve traditional or emerging problems of professional interest and importance by selecting and applying appropriate tools and techniques

Outcome
3. Specify or design an experiment to meet a need, conduct the experiment, and analyze and explain the resulting data

Outcome
4. Demonstrate the technical and communication skills needed to be successful in their professional practice, both in writing and through oral presentations

MS-CH E - M.S. in Chemical Engineering with specialization in surface engineering

[Program Overview]

Program Title
Master of Science in Chemical Engineering with specialization in surface engineering

Department(s)
Chemical Engineering

Program Short Title
MS in CH E

Degree Designation
Master of Science

Required Specialization/Concentration(s)
Specialization in Surface Engineering

Program Description
Students in the graduate program in chemical engineering with specialization in surface engineering will be required to take a significant course load in surface engineering fundamentals where they will advance knowledge from science and basic engineering to surface engineering. Students will also have the opportunity to explore applications in surface engineering through coursework and research.

Simple Requisites

Subplan
In addition to meeting the general graduate degree requirements, the M.S. Program has the following requirements:

1. The student must select a thesis committee of at least three faculty with the majority of the faculty members being from inside the department. The committee must include the student's research advisor and academic advisor, which may be the same faculty member.
2. The MS degree requires 3 credit hours beyond the B.S. with the following requirements:
    - A minimum of 6 hours of thesis
    - A maximum of 3 hours of directed study
    - A minimum of 12 hours of 5000-level or above in Chemical Engineering, which must include at least 9 hours of core courses
    - A minimum of 6 hours of upper-division or graduate-level courses outside of chemical engineering
    - All courses need to be 3000-level or above
3. The student's graduate thesis committee, the department chair, and the graduate dean must approve the course work used for the degree.
4. The student must successfully pass a proposal defense, preferably at least one semester before the thesis defense.
5. The student must write and successfully defend a thesis of their research in an oral public defense before their graduate thesis committee.
6. Students must take ChE 5085: Graduate Seminar each semester offered, up to two times. ChE 5085 cannot be used towards the credit coursework requirement for the degree.

Core Courses
Type
Completion Requirement

Any 3 courses required

Complete at least 3 of the following courses:
- CH E5051 - Advanced Mathematical Modeling
- CH E5068 - Surfaces, Interfaces, and Colloids
- CH E5072 - Interfacial Transport Phenomenon

Additional Comments:

No Requirement Level

[Learning Outcomes]

Outcome
1. The ability to apply experimental and/or calculation based techniques in order to solve a research question in the field of surface engineering

Outcome
2. Science and basic engineering to the field of surface engineering in order to solve upper level problems

Outcome
3. Effectively present their research through oral presentations, posters, and publications

MS-CHEMISTRY - M.S. in Chemistry

[Program Overview]

Program Title
Master of Science in Chemistry

Department(s)
Chemistry

Program Short Title
MS-Chemistry

Degree Designation
Master of Science

Optional Specialization/Concentration(s)
Specialization in Biochemistry

Program Description
Students entering any chemistry graduate program must take placement examinations within a week after their first registration. If deficiencies are determined, appropriate remedial undergraduate coursework will be required. Students are encouraged to consult the chemistry graduate handbook for details. Remedial coursework does not count toward degree requirements. The individualized course of study must be approved by the student's graduate advisory committee and must fulfill the general degree requirements for their respective advanced degree.

Program Information & Policies
Master of Science in Chemistry

M.S. students must meet the general degree requirements for the Master of Science degree at New Mexico Tech. In addition, a minimum of 12 credit hours of 5000-Level chemistry courses is required. CHEM 5029 and 5030 do not count toward this requirement. Additionally students must take six (6) credit hours at the 3000, 4000, or 5000-Level and above from other departments. Student should consult with their graduate advisory committee and advisor when developing a course plan.

All M.S students must register for Graduate seminar (CHEM 5029/530) every fall and spring semester that they are enrolled full-time in the graduate program.

[Specializations/Dissertation Concentration Options]

Specialization/Dissertation Options

Specialization/Dissertation Title
Master of Science in Chemistry with Specialization in Biochemistry

Specialization/Dissertation Requirements
Students earning a Master of Science degree in chemistry can receive a specialization in Biochemistry. The requirements for the specialization in biochemistry are the same as those for a Master of Science in Chemistry, except that:

· Six (6) credit hours of the 12 credit hours minimum of 5000-Level chemistry classes must be from CHEM 5061 and 5047.

· A maximum of three (3) credit hours of CHEM 5081 or BIOL 5081 (directed study) may be used toward the degree.

· A minimum of six (6) credit hours of courses in biology, selected from the following, must be completed: BIOL 3031, 3033, 3051, 3052, 3056, 4088, 5001, 5052, 5088.

[Learning Outcomes]

Outcome
1. Become independent researchers

Outcome
2. Become effective teachers

Outcome
3. Demonstrate deep understanding in their area of specialization and general knowledge in the 5 major areas of chemistry

Outcome
4. Demonstrate professional-level communication

MS-CYBS - M.S. in Transdisciplinary Cybersecurity

[Program Overview]

Program Title
Master of Science in Transdisciplinary Cybersecurity

Department(s)
Cybersecurity (program)

Program Short Title
MS-Trans Cybersecurity

Degree Designation
Master of Science

Program Description

Simple Requisites

Subplan
The MSTC program requires a minimum of 30 graduate credits in cybersecurity including a research project.

Students in the MSTC program must take all of the required core courses listed, a minimum three credits of technical electives from the approved list, and at least three additional credits in the following cybersecurity areas: cybersecurity policy, psychology of cybersecurity, cybersecurity data science, or cybersecurity technical electives; other cybersecurity courses may be substituted for the approved list only with prior written approval from the advisor and the program chair, which must be filed with the Center for Graduate Studies prior to taking the course.

Research projects may be either a thesis (6 credits) or an independent study (3 credits). A thesis is to be of a high quality to make a contribution to the discipline and should be submitted for publication. Students who complete an independent study must also complete an additional cybersecurity area course.

Course Requirements for Master of Science in Transdisciplinary Cybersecurity
Type
Completion Requirement

Core Courses

Complete ALL of the following Courses:

- CYBS5002 - Cybersecurity Ethics and Law
- CYBS5003 - Cybersecurity Policy
- CYBS5004 - Psychology of Cybersecurity
- CYBS5005 - Data Science for Cybersecurity
- CYBS5009 - Cybersecurity Risk Analysis & Management
- CYBS5061 - Foundations of Cybersecurity

Technical Electives

Earn at least 3 credits from the following:

- CYBS5041 - Advanced Cryptography
- CYBS5054 - Computer Network Security
- CYBS5057 - Hardware-Based Network Security
- CYBS5063 - Access Control and System Security
- CYBS5064 - Secure Systems Administration
- CYBS5014 - Computer Security & Incident Response
- CYBS5015 - Reverse Engineering Malware
- EE5060 - Electronic Warfare
- EE5065 - Position, Navigation,Timing

Additional Comments:

- 3 credits of cybersecurity area course
- AND 6 credits of thesis or 3 credits of independent study and 3 credits of cybersecurity area courses

No Requirement Level

[Learning Outcomes]

Outcome
1. Communicate effectively both orally and in writing to a variety of audiences.

Outcome
2. Analyze and evaluate the cybersecurity needs of an organization to conduct a cybersecurity risk assessment.

Outcome
3. Design operational and strategic cybersecurity approaches and policies.

Outcome
4. Understand and appreciate the legal, ethical, technical, and psychological environment impacting individuals and business organizations to determine the implications and risks associated with cybersecurity decisions.

Outcome
5. Carry out research that demonstrates critical thinking by analyzing situations, integrating acquired knowledge, and developing solutions to real world cybersecurity challenges.

MS-EE - M.S. in Electrical Engineering

[Program Overview]

Program Title
MS-EE

Department(s)
Electrical Engineering

Program Short Title
MS-Electrical Engineering

Degree Designation
Master of Science

Program Type
Degree

Program Description
The Electrical Engineering graduate program provides students with unique research opportunities, thanks to its close association with many research facilities. These facilities include Energetic Materials Research and Testing Center, Langmuir Laboratory, Magdalena Ridge Observatory, National Radio Astronomy Observatory, Incorporated Research Institutions for Seismology, and Institute for Complex Additive Systems Analysis; all easily accessible from campus. These facilities can provide opportunities for students to participate in research related to leading scientific and engineering projects and allow them to achieve highly desirable educational and research experiences.

Program Information & Policies
The faculty of the Department of Electrical Engineering strives to continuously improve the graduate program in electrical engineering. The educational objectives reflect the needs of, and have been reviewed by, among others, the Advisory Board and faculty. Several years after graduation it is expected that our graduates will be:

- Technology leaders who fearlessly discover, apply, and teach new knowledge and engineering practices;
- Entrepreneurially minded innovators driving positive economic and social impact in their communities and the nation;
- Adaptive learners who continue to grow educationally and professionally through advancing their education.

Simple Requisites

Subplan

The student's course of study must be approved by the student's advisory committee, must fulfill the general requirements for the master's degree (page 51), and must include the course EE 5021, Measurement and Instrumentation.

At least 12 semester hours must be approved Electrical Engineering courses. No more than six (6) semester hours of advanced undergraduate course work may be used to satisfy the degree requirements. Students are required to take at least six (6) credit hours from outside the Electrical Engineering department. Students may choose between an M.S. with thesis (24 credit hours of courses plus six (6) thesis hours) or an M.S. with independent study (27 credit hours of courses plus three (3) independent study hours). Students may be required to take an appropriate software course if they don't have an appropriate programming background.

No Requirement Level

[Learning Outcomes]

Outcome
1. An ability to apply methods of advanced analysis appropriate for professionals to use when solving problems;

Outcome
2. An ability to apply an in-depth knowledge in a particular field of study that supports the use of innovative techniques to solve problems;

Outcome
3. An ability to demonstrate skills pertinent to the research process, including the ability to formulate problems, synthesize and integrate information, work collaboratively, communicate effectively, and publish results.

MS-EMGT - M.S. in Engineering Management

[Program Overview]

Program Title
Master of Science in Engineering Management

Department(s)
CSE Dept/ Engineering Management (Program)

Program Short Title
MS -EMGT

Degree Designation
Master of Science

Program Description
The curriculum is innovative and rigorous, and delivered live via interactive webcasts both on campus and globally through internet streaming; students are encouraged to participate during the live course lectures, with accommodations available when work or personal schedules do not permit in class participation. The graduate program is designed to build on a student's bachelor's degree and technical background, exposing them to the latest methods, tools, and research to expand their career options. Students have the ability to select their degree option depending on their personal interest and career objective, from either a course-based option or course and research option; see Program Requirements for further details.

Program Information & Policies
In addition to the general requirements for the Master of Science degree, Master of Science in Engineering Management (MSEM) students need to form a three-member committee that is composed of at least two New Mexico Tech management faculty members and one other qualified individual with knowledge of the student's research project. Examples of qualified individuals include faculty members at New Mexico Tech, faculty members at other higher-education institutions, workplace supervisors, and/or professional peers with a master's or doctoral degree. The student should identify a committee chair, who usually also serves as the student's research advisor. The primary role of the committee is to assist the student in course selection and advise and approve the final independent study project or thesis.

Simple Requisites

Subplan
Program Requirements for MSEM: in meeting the general requirements for the Master of Science degree, the requirements for one of the following options must be met:

MSEM Degree With an Independent Study Project
Type
Completion Requirement

The Following Courses Are Required (30 Credits)

Complete ALL of the following Courses:

- EMGT5001 - Management Science for Engineering Management
- EMGT5002 - Financial Management
- EMGT5003 - Information Systems in Technology Organizations
- EMGT5004 - Engineering Statistics

- EMGT5005 - Technology Marketing
- EMGT5006 - Managing HR in Technolgy Organizations
- 3 credits of 5000-level EMGT courses
- 6 credits of upper-division or graduate out of program course work
- 3 credits of EMGT 590 (Independent Study)

Independent Study Option

An independent study project should be supervised by the graduate advisory committee. The chosen project should be implemented with a clearly identified project objective (or research question), sound methodology, and rigorous analysis. Each project will be accompanied by a written project report and an oral presentation to a diverse audience in a professional setting.

Additional Comments:

MSEM Degree With a Thesis
Type
Completion Requirement

The Following Courses Are Required (30 credits)

Complete ALL of the following Courses:

- EMGT5001 - Management Science for Engineering Management
- EMGT5002 - Financial Management
- EMGT5003 - Information Systems in Technology Organizations
- EMGT5004 - Engineering Statistics
- EMGT5005 - Technology Marketing
- EMGT5006 - Managing HR in Technolgy Organizations
- 6 credits of upper-division or graduate out of program course work
- 6 credits of EMGT 591 (Thesis)

Thesis Option

The student must clearly demonstrate the ability to plan, organize, and pursue research. Thesis research is expected to be carried out in at least two semesters and shall be supervised by the graduate advisory committee. A written research report and a public oral presentation are required.

Additional Comments:

No Requirement Level

[Learning Outcomes]

Outcome
1. Apply management and organization design principles to improve operational efficiency in organizations.

Outcome
2. Apply analytical and simulation models to solve engineering and technology management problems.

Outcome
3. Identify, analyze, and evaluate complex engineering problems under multiple levels of risk and uncertainty.

Outcome
4. Identify, analyze, and evaluate new technologies, products, and innovations for commercialization.

Outcome
5. Be able to plan projects and manage project finance and operations.

Outcome
6. Conduct independent research on complex engineering and technology management problems and develop analytical reports.

MS-GEOC - M.S. in Geochemistry

[Program Overview]

Program Title
Master of Science in Geochemistry

Department(s)
E&ES, E&ES Dept/ Earth Science

Program Short Title
MS-Geochemistry

Degree Designation
Master of Science

Program Description
The Master of Science degree in Geochemistry may be earned either with thesis or without thesis, as outlined below in accordance with the general requirements of the Graduate Program.

Program Information & Policies
With Thesis:

The student's course of study must be approved by the advisory committee and must fulfill the general requirements for the master's degree with thesis and must include:

1. At least six credit hours of GEOC 5091 (Thesis, master's program);
2. Two credit hours of GEOC 5092 (Graduate Seminar);
3. At least four credit hours of GEOC 5093 (Seminar), unless the degree is completed in a shorter time;
4. At least 15 credit hours in graduate geochemistry or chemistry courses, 9 of which must have a GEOC designation (up to 3 credit hours of this requirement may be replaced with non- geochemistry graduate courses with the committee's approval).

As part of the degree requirements students must have completed GEOL 2160 (mineralogy) and CHEM 3031 (physical chemistry), unless taken in undergraduate work. These requirements may be replaced by upper division mineralogy or thermodynamics courses with approval from the student's committee.

Without Thesis:

Courses approved by the student's advisory committee must fulfill the general requirements for the master's degree without thesis and must include:

1. At least three credit hours of GEOC 5090 (Independent Study);
2. Two credit hours of GEOC 5092 (Graduate Seminar);
3. At least four credit hours of GEOC 5093 (Seminar), unless the degree is completed in a shorter time;
4. At least 15 credit hours in graduate geochemistry or chemistry courses, 9 of which must have a GEOC designation (up to 3 credit hours of this requirement may be replaced with non-geochemistry graduate courses with the committee's approval).

As part of the degree requirements students must have completed GEOL 2160 (mineralogy) and CHEM 3031 (physical chemistry), unless taken in undergraduate work. These requirements may be replaced by upper division mineralogy or thermodynamics courses with approval from the student's committee.

[Learning Outcomes]

Outcome
1. Use the scientific method to organize and conduct research.

Outcome
2. Collect original and interpret data using field/lab techniques and archival material.

Outcome
3. Demonstrate knowledge of, understand, and interpret published literature, as well as understand geology across sub disciplines.

Outcome
4. Effectively disseminate technical findings and conclusions by means of written reports and oral presentations

MS-GEOL - M.S. in Geology

[Program Overview]

Program Title
Master of Science in Geology

Department(s)
E&ES, E&ES Dept/ Earth Science

Program Short Title
MS-Geology

Degree Designation
Master of Science

Program Description
The Master of Science degree in Geology may be earned either with thesis or without thesis, as outlined below in accordance with the general requirements of the Graduate Program

Program Information & Policies
With Thesis:

The student's course of study must be approved by the advisory committee and must fulfill the general requirements for the master's degree with thesis and must include:

- GEOL 4080 or the equivalent, if not previously satisfied
- Two credits of GEOL 5092
- At least six credit hours of GEOL 5091
- At least four credit hours of GEOL 5093, unless the degree is completed in a shorter time

Credits earned in GEOL 5092 and 5093 may not be applied towards the 30 credits required for the M.S. degree.

Without Thesis:

The student's course of study must be approved by the advisory committee and must fulfill the general requirements for the master's degree without thesis and must include:

- GEOL 4080 or the equivalent, if not previously satisfied
- Two credits of GEOL 5092
- At least three credit hours of GEOL 5090
- And at least four credit hours of GEOL 5093, unless the degree is completed in a shorter time.

Credits earned in GEOL 5092 and 5093 may not be applied towards the 30 credits required for the M.S. degree.

[Learning Outcomes]

Outcome
1. Use the scientific method to organize and conduct research.

Outcome
2. Collect original and interpret data using field/lab techniques and archival material.

Outcome
3. Demonstrate knowledge of, understand, and interpret published literature, as well as understand geology across sub disciplines.

Outcome
4. Effectively disseminate technical findings and conclusions by means of written reports and oral presentations

MS-GEOP - M.S. in Geophysics

[Program Overview]

Program Title
Master of Science in Geophysics

Department(s)
E&ES, E&ES Dept/ Earth Science

Program Short Title
M.S. in Geophysics

Degree Designation
Master of Science

Program Description
The Master of Science degree in Geophysics may be earned under either of the plans outlined below:

Program Information & Policies
With Thesis:

The student's course of study must be approved by the advisory committee and must fulfill the general requirements for the master's degree with thesis and must include (unless taken in undergraduate work):

- GEOL 3025 and 4048, or their equivalents;
- Upper-division geology, six credit hours;
- Competence in mathematics corresponding to nine credit hours beyond calculus;
- At least six credit hours of GEOP 5091,
- Two credit hours of GEOP 5092,
- At least four credit hours of GEOP 5093, unless the degree is completed in a shorter time,
- Twelve additional credit hours in graduate geophysics (up to six credit hours of this requirement may be replaced with non-geophysics graduate courses with the advisor's approval).

Without Thesis:

Courses approved by the student's advisory committee must fulfill the general requirements for the master's degree without thesis and must include (unless taken in undergraduate work):

- GEOL 3025 and 4048, or their equivalents;
- Upper-division geology, six credit hours;
- Competence in mathematics corresponding to nine credit hours beyond calculus;
- At least three credit hours of GEOP 5090,
- Two credit hours of GEOP 5092,
- At least four credit hours of GEOP 5093, unless the degree is completed in a shorter time,
- Twelve additional credit hours of graduate courses in geophysics (up to six credit hours of this requirement may be replaced with non-geophysics graduate courses with the advisor's approval).

[Learning Outcomes]

Outcome
1. Use the scientific method to organize and conduct research.

Outcome
2. Collect original and interpret data using field/lab techniques and archival material.

Outcome
3. Demonstrate knowledge of, understand, and interpret published literature, as well as understand geology across sub disciplines.

Outcome
4. Effectively disseminate technical findings and conclusions by means of written reports and oral presentations

MS-HYD - M.S. in Hydrology

[Program Overview]

Program Title
Master of Science in Hydrology

Department(s)
E&ES, E&ES Dept/ Earth Science

Program Short Title
M.S. in Hydrology

Degree Designation
Master of Science

Program Description
The Master of Science degree in Hydrology requires completion of a thesis according to the general requirements of the Graduate Program.

Program Information & Policies
The student's course of study must be approved by the advisory committee and must fulfill the general requirement for the master's degree and must include:

- GEOL 4040 and GEOL 4040L, HYDR 5007, HYDR 5008, HYDR 5011, HYDR 5018
- Three additional credits from graduate-level hydrology courses listed in the course catalog
- HYDR 5091 (at least six credit hours)
- HYDR 5092 (two credit hours) and HYDR 5093 (four credit hours); credits do not apply to the 30 hours required for the M.S. degree
- Compentency in the surficial processes at the GEOL 2320 level or above, including courses taken at previous institutions. Suggested courses include GEOL 5062 or HYDR 5062.
- Compentency in statistics at the MATH 2350 level or above, including courses taken at previous institutions. Suggested courses include MATH 3082 or MATH 50 84.
- At least three additional graduate-level course credits approved by the advisory committee

[Learning Outcomes]

Outcome
1. Demonstrate adequate expertise and skills to embark on a career as a professional hydrologist.

Outcome
2. Use the scientific method to organize and conduct research.

Outcome
3. Demonstrate knowledge of the information resources available in the Earth Sciences such as scientific journals and geologic databases.

Outcome
4. Collect original data using field and laboratory techniques; interpret data using computer models, statistics, and other methods; and assess the significance of their findings within the context of the discipline.

Outcome
5. Effectively disseminate technical findings and conclusions by means of written reports and oral presentations.

Outcome
6. Use maps, graphs, three dimensional diagrams, earth imagery and other graphics to summarize findings and display them to a range of different audiences.

Outcome
7. Demonstrate a ready knowledge of the basic, important facts and laws that describe the behavior of water, solutes and contaminants in the environment.

MS-MATE - M.S. in Materials Engineering

[Program Overview]

Program Short Title
M.S. in Materials Engineering

Degree Designation
Master of Science

MS-MATH - M.S. in Mathematics

[Program Overview]

Program Title
Master of Science in Mathematics

Department(s)
Mathematics

Program Short Title
MS-Mathematics

Degree Designation
Master of Science

Required Specialization/Concentration(s)
Specialization in Analysis, Specialization in Industrial Math, Specialization in Statistics & Data Science

Program Description
A program fulfilling the general requirements must be completed. Two basic plans are offered: for the program without thesis, MATH 5090 (three credit hours) must be completed; for the program with thesis, MATH 5091 (six credit hours) must be completed. The student must fulfill the requirements for the undergraduate program in mathematics. In addition, the student must fulfill the requirements of one of the following three specializations: Analysis, Industrial Math, or Statistics & Data Science. Students interested in continuing for the PhD in Applied and Industrial Mathematics should take care to choose their courses so that they will fit that program as well.

Simple Requisites

Subplan
Master of Science in Mathematics

Interested students must fulfill the requirements for the undergraduate program in mathematics. In addition, the student must fulfill the requirements of one of the following three specializations.

No Requirement Level

[Specializations/Dissertation Concentration Options]

Specialization/Dissertation Options

Specialization/Dissertation Title
Master of Science in Mathematics with Specialization in Analysis

Specialization/Dissertation Requirements
[Total: 30 cr hrs. of which six credit hours must be approved upper-division or graduate course work from another department.]

An interdisciplinary program in analysis is available at the graduate level within the various departments at New Mexico Tech. To specialize in this area the student must fulfill the requirements of the undergraduate program in mathematics and complete MATH 4035 and MATH 4071 or the equivalent.

Graduate work consists of:

1) A minimum of 12 credits from:

Earn at least 12 credits from the following:

- **MATH5031 - Topics in ODEs**
- **MATH5033 - Partial Differential Equations**
- **MATH5034 - Topics in PDEs**
- **MATH5035 - Methods of Mathematical Physic**
- **MATH5036 - Methods/Mathematical Physics**
- **MATH5037 - Bifurcation Theory**
- **MATH5042 - Topics Differential Geometry**
- **MATH5075 - Functions of a Real Variable**
- **MATH5077 - Functional Analysis**

2) Additional courses subject to the approval of the student's advisor to complete the requirements of the Graduate School.

Specialization/Dissertation Options

Specialization/Dissertation Title
Master of Science in Mathematics with Specialization in Statistics and Data Science

Specialization/Dissertation Requirements
An interdisciplinary program in statistics and data science is available at the graduate level. To specialize in this area, the student must fulfill the requirements for the undergraduate program in mathematics or a related field, including MATH 4083, and either MATH 4041 or MATH 5041, or the equivalent.

Graduate work would consist of:

1. **A minimum of 15 credits from:**

   Earn at least 15 credits from the following:

   - **MATH5018 - Convex Optimiz Nonlinear Prgmg**
   - **MATH5019 - Inverse Problems**
   - **MATH5020 - Applied Multivariate Analysis**
   - **MATH5082 - Linear Stat Models w/ Apps**
   - **MATH5083 - Topics in Probability & Stats**
   - **MATH5086 - Spatial Variability & Geostats**
   - **MATH5087 - Analy. of Time Series & Spat.**
   - **MATH5088 - Advanced Data Analysis**
2. **Two of the following CSE courses: (Complete at least 2 of the following courses):**
   - **CSE3007 - Python for Data Science**
   - **CSE4011 - Data Science**
   - **CSE4064 - Intro to Soft Computing**
   - **CSE5067 - Soft Computing**
   - **CSE4065 - Neural Networks**
   - **CSE5065 - Neural Networks**
   - **CSE4066 - Machine Learning**
   - **CSE4076 - Visualization**
   - **CSE5076 - Advanced Visualization**
   - **CSE5072 - Advanced Data Management**
3. **For the Independent Study option, three cr hrs of MATH 5090, for the Thesis option, six cr hrs of MATH 5091.**
4. **Additional courses subject to the approval of the student's advisor to satisfy the general requirements of the Master of Science degree, for the total of 30 cr hrs.**

Specialization/Dissertation Options

Specialization/Dissertation Title
Master of Science in Mathematics with Specialization in Industrial Mathematics

Specialization/Dissertation Requirements
[Total : 30 cr hrs. of which six credit hours must be approved upper-division or graduate course work from another department]

Industry and business provide many areas for the application of advanced mathematics, and many possibilities for mathematicians to make significant contributions. New Mexico Tech offers a program to prepare students for these opportunities. Students need a basic background in numerical analysis, differential equations, and statistics at the undergraduate level. The graduate requirements are:

1) Modeling Courses

Earn at least 3 credits from the following:

- MATH4030 - Mathematical Modeling
  OR MATH5030 - Mathematical Modeling

2) Core Industrial Mathematics Courses

Two of the following (Earn at least 6 credits from the following):

- **MATH5011 - Numerical Methods for PDEs**
- **MATH5018 - Convex Optimiz Nonlinear Prgmg**
- **MATH5032 - Perturbation Methods**
- **MATH5035 - Methods of Mathematical Physic**
- **MATH5041 - Statistical Machine Learning**
- **MATH5087 - Analy. of Time Series & Spat.**

3) A concentration of four related courses (12 credits), at least two at the 5000-level (beyond the two in requirement 2) and at least two in one other department, and additional courses to satisfy the general requirements of the Master of Science degree. The courses to satisfy this requirement must be approved by the student's advisory committee.

4) Each student spends one term, usually summer, in an internship in an industrial position. This internship is arranged by the student, with the approval of the student's advisory committee and should involve mathematical modeling, computation and analysis.

[Learning Outcomes]

Outcome
1. Solve a significant mathematical or statistical problem

Outcome
2. Communicate a mathematical or statistical solution in writing using professional format and correct mathematical notation

MS-ME - M.S. in Mineral Engineering

[Program Overview]

Program Title
M.S.-ME

Department(s)
Mineral Engineering

Program Short Title
MS-Mineral Engineering

Degree Designation
Master of Science

Program Description
Admission to the Master of Science in Mineral Engineering program requires competence in mathematics, chemistry, physics, and engineering science comparable to the bachelor of science degree in mineral engineering. Applicants without an engineering degree may apply for the graduate program in Mineral Engineering. However, the student will be required to take all deficiencies as required by the advisory committee.

Program Information & Policies
The student may select one area of specialization, **Specialization in Mineral Exploration, Specialization in Geotechnical Engineering and Geomechanical Engineering, or Specialization in Explosive Engineering.**

Simple Requisites

Subplan
The student's course of study must be approved by the student's advisory committee and fulfill the general requirements for the master's degree.

Of the 30 hours required for the M.S. degree, a minimum of 12 credit hours must be in approved Mineral Engineering courses. All graduate students must complete at least one credit of ME 5072 (graduate seminar). Under special consideration, a student may petition the advisory committee with approval of the Department Chair to pursue a Master of Science degree with Independent Study (three hours of ME 5090). A formal paper will be submitted with an oral presentation to the advisory committee.

The student may select one area of specialization as outlined below; within each specialization, recommended courses are provided.

Specialization in Mineral Exploration
Type
Completion Requirement

Credit Requirements

Earn at least 12 credits from the following:
- ME5011 - Mineral Economics
- ME5021 - Advanced Minerals Exploration
- ME5022 - Advanced Exploration and Field Mapping
- ME5023 - Ore Petrography
- ME5051 - Industrial Minerals
- ME5062 - International Mining Field Trip
- ME5063 - Field Studies-Hydrothermal Alterations

Other courses can be substituted with the approval of the research advisor and committee.

Additional Comments:

Specialization in Geotechnical Engineering and Geomechanical Engineering
Type
Completion Requirement

Credit Requirements

Earn at least 12 credits from the following:
- ME5006 - Soil Mechanics
- ME5008 - Rock Mechanics
- ME5015 - Theory of Elasticity
- ME5017 - Advanced Finite Element Method
- ME5020 - Fracture Mechanics
- ME5025 - Rock and Soil Plasticity
- ME5031 - Advanced Foundation Design & Analysis
- ME5034 - Advanced Drilling & Blasting Engineering
- ME5035 - Stability of Rock Slopes
- ME5037 - Designs & Conditions of Underground Openings
- ME5040 - Computer Applications in Geotechnical Engineering
- ME5041 - Ground Improvement
- ME5061 - Advanced Topics in Engineering Geology

Other courses can be substituted with the approval of the research advisor and committee.

Additional Comments:

Specialization in Explosive Engineering
Type
Completion Requirement

Credit Requirements

Earn at least 12 credits from the following:
- ME5015 - Theory of Elasticity
- ME5017 - Advanced Finite Element Method
- ME5020 - Fracture Mechanics
- ME5034 - Advanced Drilling & Blasting Engineering
- ME5045 - Vibration Analysis & Control
- ME5046 - Detonation Theory
- ME5048 - Rock Fracturing & Fragmentation by Explosives
- ME5049 - Wave Propagation
- ME5050 - Advanced Explosives Engineering
  OR MENG5050 - Advanced Explosives Engineering
- ME5052 - Applied Explosives Engineering
- ME5053 - Computer Modeling-Detonations
  OR MENG5070 - Advanced Mechatronics

Other courses can be substituted with the approval of the research committee and the department.

Additional Comments:

No Requirement Level

[Learning Outcomes]

Outcome
1. Be able to effectively and proficiently communicate in written text, with well-organized and professional-style reports and publications, as well as oral communication. Capable of compiling, organizing, and presenting research and related information in oral form to peers, professionals.

Outcome
2. Be able to contribute to the development of scientific knowledge by producing and publishing high level scientific articles in journals and reputable conferences.

Outcome
3. Be able to identify industrial and scientific problems and conduct research and development to address these problems or provide high level science founded solutions.

Outcome
4. Understand professional codes-of-ethics and know what is expected of them as they enter the professional environment.

MS-MENG - M.S. in Mechanical Engineering

[Program Overview]

Program Title
Master of Science in Mechanical Engineering

Department(s)
Mechanical Engineering

Program Short Title
MS-Mechanical Engineering

Degree Designation
Master of Science

Program Type
Major

Optional Specialization/Concentration(s)
Specialization in Explosives Engineering, Specialization in Mechatronics Systems & Robotics, Specialization in Fluid & Thermal Sciences, Specialization in Solid Mechanics

Program Description
The Mechanical Engineering Department offers each of the Masters of Science degree either as a general Mechanical Engineering degree or with one of four specializations: Specialization in Explosives Engineering, Specialization in Fluid and thermal Sciences, Specialization in Mechatronics Systems and Robotics, and Specialization in Solid Mechanics.

Program Information & Policies
Department Requirements for the Master of Science and Master of Engineering degrees in Mechanical Engineering

The four areas of specialization for the masters degrees are listed below with the core classes for each specialization.

General Mechanical Engineering Degree

12 core class credits are to be taken as any graduate level MENG courses which are approved by the advisory committee.

Specialization in Explosives Engineering

Core Classes: Classes listed under Energetic Systems and Explosive Engineering above.

(Note: Students who have completed the minor in explosives engineering program cannot re-use the classes (including co-listed classes) used for the minor program toward a master's degree in explosives engineering.)

Specialization in Fluid and Thermal Sciences

Core Classes: Classes listed under Fluid and Thermal Sciences above.

Specialization in Mechatronics Systems and Robotics

Core Classes: Classes listed under Intelligent Systems and Mechatronics above.

Specialization in Solid Mechanics

Core Classes: Classes listed under Solid Mechanics above.

Master of Science students must take MENG 5085 each semester offered if the student is in residence. Distance-education students and part-time on-campus students enrolled in the Master of Science program are required to take two semesters of MENG 5085. Students enrolled in the Master of Engineering program are not required to take MENG 5085. Only one credit of MENG 5085 may be used to fulfill degree requirements. MENG 5085 must be taken for a letter grade if used to fulfill degree requirements.

Simple Requisites

Subplan
Requirements

A minimum of 30 credit hours is required for the Master of Science or Master of Engineering in Mechanical Engineering.

Core Specialization Courses
Type
Completion Requirement

Additional Comments:
at least 12 credit hours from the selected specialization listed under graduate program requirements. For no specialization, any 12 credit hours from graduate level MENG courses constitute the core requirement.

Elective Courses
Type
Completion Requirement

Additional Comments:
6 credit hours of graduate level MENG courses. The advisory committee may allow for a maximum of 3 credits of out-of-department graduate level coursework hours to apply to the elective course requirement. Students may use no more than 3 credit hours of MENG 5081, Directed Study, toward the MS. MENG 5081 must be taken for a letter grade if used to satisfy degree requirements.

Out-of-Department courses
Type
Completion Requirement

Additional Comments:
6 credit hours of approved upper-division or graduate course work from another department. The advisory committee may determine that a student's previous academic experience has provided breadth and may recommend modification of this requirement.

Thesis
Type
Completion Requirement

Additional Comments:

MENG 5091, (6 credit hours) — A student must prepare and submit a thesis to his/her advisory committee for approval in accordance with the general requirements of the graduate school.

No Requirement Level

[Specializations/Dissertation Concentration Options]

Specialization/Dissertation Options

Specialization/Dissertation Title
Specialization in Solid Mechanics

Specialization/Dissertation Requirements
- MENG 5004 Advanced Mechanics of Materials
- MENG 5005 Design and Analysis of Experiments
- MENG 5015 Theory of Elasticity
- MENG 5016 Plates and Shells
- MENG 5017 Advanced Finite Element Method
- MENG 5020 Fracture Mechanics
- MENG 5024 Continuum Mechanics
- MENG 5041 Vibration in an Elastic Continuum
- MENG 5049 Wave Propagation
- MENG 5083 Engineering Mechanics of Composite Structures
- MENG 5084 Smart Materials and Structures

Specialization/Dissertation Options

Specialization/Dissertation Title
Specialization in Fluid and Thermal Sciences

Specialization/Dissertation Requirements
- MENG 5056 Compressible Fluid Flow
- MENG 5075 Advanced Engineering Mathematics
- MENG 5077 Advanced Fluid Mechanics
- MENG 5078 Advanced Thermodynamics
- MENG 5079 Advanced Heat Transfer
- MENG 5080 Computational Fluid Dynamics and Reactive Flow

Specialization/Dissertation Options

Specialization/Dissertation Title
Specialization in Intelligent Systems and Mechatronics

Specialization/Dissertation Requirements
- MENG 5041 Vibrations in Elastic Continuum
- MENG 5035 Drones
- MENG 5043 Control System Design
- MENG 5044 Modern Control Theory
- MENG 5048 Manipulator Based Robotics
- MENG 5051 Optimal Control
- MENG 5061 Digital Image Processing
- MENG 5063 Bioinspiration and Biomimetics
- MENG 5067 Smart Engineering systems
- MENG 5069 AI Concepts and Applications
- MENG 5070 Advanced Mechatronics
- MENG 5072 Sensor Technology
- MENG 5074 Electrical Measurements of Non-Electrical Quantities
- MENG 5084 Smart Materials and Structures

Specialization/Dissertation Options

Specialization/Dissertation Title
Specialization in Energetic Systems and Explosive Engineering

Specialization/Dissertation Requirements
- MENG 5013 Impact Dynamics
- MENG 5045 Introduction to Explosives Engineering
- MENG 5046 Detonation Theory
- MENG 5047 Pyrotechnics Theory and Application
- MENG 5049 Wave Propagation
- MENG 5050 Advanced Explosives Engineering
- MENG 5052 Explosives Technology and Applications
- MENG 5056 Compressible Fluid Flow

[Learning Outcomes]

Outcome
1. Learn to reason well and to evaluate and apply information

Outcome
2. Develop analytical and quantitative skills for competence in science and math

Outcome
3. Communicate to different audiences in multiple forms

Outcome
4. Exercise their role as members of diverse societies and cultures

Outcome
5. Learn responsible values and ethics for their professional lives

Outcome
6. Gain expertise in their chosen field of study

MS-PCOM - M.S. in Public Engagement in Science, Design, & Communication

[Program Overview]

Program Title
Master of Public Engagement in Science, Design and Communication

Department(s)
CLASS , CLASS Dept/ Public Engagement (program)

Program Short Title
MS-PCOM

Degree Designation
Master of Science

Program Type
Major

Program Description
This 30-credit hour graduate program trains students through real-world projects to research, critically analyze and communicate information and technology to diverse communities. Students in this proposed program may follow four pathways through the program, or may construct a path that meets their own career objectives: 1) Communication, branding, and project management for nonprofits and small businesses, 2) Science Communication, policy, and public outreach, 3) User experience (UX/UI) research and design, and 4) STEM Career promotion and advancement. These pathways are built upon the core courses for the master's program in conjunction with electives from both within and outside the CLASS Department.

Simple Requisites

Subplan
There are two options for completing the MS in Public Engagement: Thesis or Independent Study. Both require public defense of a written report/portfolio and the same set of core courses. The independent study option is composed of 27 credit hours of coursework and 3 credit hours of independent study, while the thesis option is composed of 24 credit hours of coursework and 6 credit hours of thesis research under the direct supervision of a faculty member. The independent study option is intended for working professionals, whose independent study project may be related to their job, while the thesis option is best suited to students considering continuing on to a doctoral program. Partnerships with local Socorro and New Mexico state organizations provide STEM-based education with an industry and nonprofit twist that will help students enter the workforce upon graduation.

12 (for thesis option)-15 (for independent study option) credits of elective coursework within or outside the CLASS Department that reflect the interdisciplinary and multidisciplinary potential of Public Engagement as an area of research and production.

Master of Science on Public Engagement Type

Completion Requirement

Course Requirements

Complete ALL of the following Courses:

- PCOM5003 - Applied Research Methods
- PCOM5004 - g: Media, Communication, & Public Engagement
- PCOM5005 - Ethical and Social Issues in Public Engagement
- PCOM5006 - Communication, Product, and Experience Design

Thesis Option

6 credit hours of faculty guided research

Earn at least 6 credits from the following:

- PCOM5091 - Thesis

Independent Study Option

This may be part of workplace based study or on campus research, both with an NMT faculty advisor.

Earn at least 3 credits from the following:

- PCOM5090 - Independent Study

Additional Comments:

No Requirement Level

Most Master Degrees at NMT require some out of department course electives, see the Graduate Office or an Academic Advisor for clarification or for additional information.

[Learning Outcomes]

Outcome
1. Engage responsibly and effectively with diverse public stakeholders to promote inclusive and respectful collaborations.

Outcome
2. Develop and manage research projects with stakeholders of varying backgrounds and multidimensional identities.

Outcome
3. Design and employ strategies of internal/external communication across various media, platforms, and channels in an effective, responsible manner.

Outcome
4. Critically analyze and interpret new advancements, technologies, and policies, identifying potential impacts and risks for different audiences, stakeholders, and policymakers.

Outcome
5. Employ interdisciplinary approaches to analysis and design, including quantitative and qualitative research methods from the humanities, social sciences, and STEM fields, to thoughtfully consider the implications of STEM research, design, and technology.

MS-PETR - M.S. in Petroleum Engineering

[Program Overview]

Program Title
Master of Science in Petroleum Engineering

Department(s)
Petroleum Engineering

Program Short Title
MS-Petroleum Engineering

Degree Designation
Master of Science

Program Type
Major

Program Description
The Petroleum Engineering program offers two options for a Master of Science Degree—with thesis or independent study—and a Doctor of Philosophy degree. All graduate students are required to register for and attend the Graduate Seminar (PETR 570) each semester it is offered. Exceptions may be made only with approval of the student's advisor and the department chair.
The Ph.D. and master's programs are open to students with degrees in fields other than petroleum and natural gas engineering. A special course program will be tailored for those students who have not completed a B.S. in petroleum and natural gas engineering to provide an appropriate background. Prospective students are encouraged to visit www.nmt.edu/~petro for more details

[Learning Outcomes]

Outcome
1. Demonstrate competence in undergraduate fundamentals in petroleum engineering

Outcome
2. Learn advanced concepts in two of the three areas of Drilling and completions, production, and reservoir engineering/evaluation

Outcome
3. Learn to formulate and complete a research project and document results in a thesis (for thesis option only)

Outcome
4. Learn additional knowledge in one specific area and document work in an independent study report (for independent study option only)

Outcome
5. Effectively communicate

MS-PHYSICS - M.S. in Physics

[Program Overview]

Program Title
Master in Science in Physics

Department(s)
Physics

Program Short Title
MS-PHYSICS

Degree Designation
Master of Science

Optional Specialization/Concentration(s)
Concentration in Instrumentation

Program Description
The Master of Science degree in Physics may be earned with thesis or independent study:

With Thesis:
The student's course of study and thesis topic must be approved by the student's advisory committee. A thesis consists of directed research, usually of a nature which would be suitable for publication in a refereed journal, and a write-up of the research. An oral defense of the thesis is required. The thesis is an archival document published electronically and kept in the NMT Library.

Independent Study:
The student's course of study must be approved by the student's advisory committee. A student who elects not to write a thesis will instead write an independent study paper on a topic selected with guidance from their advisory committee. Unlike a thesis, this paper is not archived electronically by the NMT Library.

PhD students who wish to earn an MS
If a PhD student would like to earn an MS while completing PhD requirements, they may initiate the process by petitioning the department. They may choose either the thesis or independent study option. All coursework may count toward both the MS and PhD degree. The independent study paper may be a dissertation proposal, a journal article, or another appropriate written product. For further details, see the Physics Department webpage.

Simple Requisites

Subplan

MS in Physics Requirements

Choose from the following Courses according to requirements above:

- PHYS5001 - Intro Resrch & Scientific Comm (must be completed in first two semesters)
- PHYS5002 - Intro Resrch & Scientific Comm (must be completed in first two semesters)
- PHYS5009 - Methods of Theoretical Physics
- PHYS5005 - Advanced Dynamics

  OR

- PHYS4025 - Astrophysics III

  OR

- PHYS5026 – Fluid Dynamics

  OR

- PHYS5027 – Geophysical Fluid Dynamics
- PHYS5079 - Graduate-Faculty Seminar (must be taken during first four semesters)
- PHYS5008 - Statistical Mechanics
- PHYS5010 - Electromagnetism
- PHYS5018 - Quantum Mechanics

While the listed courses are the simplest route to achieving this credit, a student may petition their committee and the department chair either with proposed substitute course work or other prior experience that demonstrates competence in any of these areas.

Procedure for MS students to petition to PhD program

Graduate students wishing to petition to change from M.S. to Ph.D. status can do so no earlier than the end of their second semester and no later than Aug 1 of that year. The petition should include: a) a letter stating the reason for the petition, b) a copy of the first full-year of transcripts, c) a letter of support from the potential research advisor, d) any updates in scores (e.g. GREs, TOEFL/ELTS, Department Prelim) that should be considered as evidence of ability to pursue a Ph.D.

The petition should be copied in email to the Department Chair, Graduate Admissions Committee chair and Dean of the Graduate School. The Graduate Admissions committee will render a decision regarding the petition in writing to the petitioner, Chair and Dean no later than Sept 15 that year. This decision will include both an adjudication of the petitioner's request to pursue a Ph.D. as well as any potential funding commitments from the department.

If the student's petition fails, the student may apply for readmission for the Ph.D. through the regular graduate admissions process after the M.S. degree is completed

Specialization/Dissertation Options

Specialization/Dissertation Title
M.S in Physics with Concentration in Instrumentation

Specialization/Dissertation Requirements
Complete ALL of the following Courses:

- PHYS5001 Intro Resrch & Scientific Comm - Intro Resrch & Scientific Comm
- PHYS5002 Intro Resrch & Scintfic Com II - Intro Resrch & Scientific Comm
- PHYS5009 Methods of Theoretical Physics - Methods of Theoretical Physics
- MATH5087 Analy. of Time Series & Spat. - Analy. of Time Series & Spat.
- PHYS5008 Statistical Mechanics - Statistical Mechanics

AND/OR

- PHYS5010 Electromagnetism – Electromagnetism

AND/OR

- PHYS5018 Quantum Mechanics - Quantum Mechanics

[Learning Outcomes]

Outcome
1. Students will master the fundamental knowledge of physics, including (a) Mechanics, Thermodynamics, and Statistical Physics; (b) Electricity, magnetism, and optics; and (c) Quantum mechanics, atomic, and nuclear physics.

Outcome
2. Students will apply physical, mathematical, statistical, and computing skills to a problem in their area of specialization.

Outcome
3. Students will communicate scientific results in written, oral, and graphical form to experts and the public.

Outcome
4. Students will become independent learners and researchers.

MST - M.S. for Teachers

[Program Overview]

Program Title
Master of Science for Teachers

Department(s)
Science Teaching (program)

Program Short Title
Master of Science for Teachers

Degree Designation
Master of Science Teaching

Program Description
The MST program provides graduate-level classroom and laboratory instruction for teachers or going into science, mathematics, engineering, and/or technology. The emphasis of the courses is on content, rather than pedagogy. MST students are encouraged to adapt activities, demonstrations, laboratory exercises and methods of teaching and apply these as projects in their own classrooms during the academic year. Courses for the participants are offered in a variety of disciplines and are led by New Mexico Tech faculty. Classes build on fundamental principles and offer new concepts and novel teaching methods. Courses are offered throughout the year via distance education with in-person course options in summer on the New Mexico Tech campus and around the state.

Degree Pathways
1. M.S. for Teachers Coursework-only
2. M.S. for Teachers with Independent Study
3. M.S. for Teachers with Thesis

Simple Requisites

Subplan
1.Program prerequisite: All incoming MST students must demonstrate competence in mathematics by either completing ST5001 (Credits are awarded for this course but DO NOT count towards the 30 credits needed for a MST Degree), passing the equivalent Math Competence exam, or receiving a waiver based upon previous course work. No credits are awarded for passing a Math Competence exam.

This course or the appropriate Math Competence exam/waivers is a prerequisites for admission into the MST program as a regular graduate student

2. Master of Science for Teacher students must take comprehensive and specialty courses across the disciplines of Biology, Chemistry, Physics, Geology, Mathematics, Engineering, and Computer Science for a total of 30 credit hours. All incoming students must choose (A) **STEM Breadth** or (B) **STEM Depth** option for their degree. By the end of the second semester in the program, students must choose between independent study, thesis, or coursework-only option for program completion.

3. Degree completion requirements; students will submit a portfolio to the MST office prior to their final semester. Contents of portfolio will depend on degree pathway and should be discussed with the MST program director. Examples of artifacts that may be included in a portfolio are (a) Lesson plans with STEM K-12 classroom activities (topics chosen from at least two MST courses), (b) Feedback from the respective course instructors on the accuracy of the STEM content, and (c) Feedback from at least three fellow MST students, as well as (d) Writing a self-reflection on how to further improve their STEM content teaching from their experience in the MST program.

Note: A grade of C or higher is required to get credit toward an MST degree. (this is an institutional requirement for graduate students)

Program Requirements
Type
Completion Requirement

All students must take

Complete ALL of the following Courses:
- STCH5035 - Technical Communication for Teachers

STEM Breadth option will choose at least 5 STCH courses (15 credits) from among the list below

Earn at least 15 credits from the following:
- STCH5002 - Biology for Educators
- STCH5005 - Chemistry for Educators
- STCH5010 - Computer Science for Educators
- STCH5015 - Engineering for Educators: Looking Underground
- STCH5020 - Geology for Educators
- STCH5025 - Math for STEM Educators
- STCH5030 - Physics for Educators

STEM Depth option will choose at least 2 courses (6 credits) from among the list below:

Earn at least 6 credits from the following:
- STCH5002 - Biology for Educators
- STCH5005 - Chemistry for Educators
- STCH5010 - Computer Science for Educators
- STCH5015 - Engineering for Educators: Looking Underground
- STCH5020 - Geology for Educators
- STCH5025 - Math for STEM Educators
- STCH5030 - Physics for Educators

STEM Breadth option will choose 4 courses (12 credits)

Earn at least 12 credits from the following:
- STCH5026 - Understanding Statistics
- STCH5031 - Physics of the Solar System
- STCH5006 - Chemistry of Biomolecules
- STCH5021 - Earth History
- STCH5009 - Current Concepts & Technology in Biology
- STCH5016 - Engineering for Educators: Drones & Biomimicry
- STCH5011 - Cybersecurity Fundamentals
- STCH5081 - Directed Study

STCH 5081 Directed Study (if approved by the student's advisor)

STEM Depth option will take 5 courses (15 credits) in one discipline and 2 additional courses (6 credits) from two other disciplines from among the list below

Earn at least 15 credits from the following:
- STCH5026 - Understanding Statistics
- STCH5031 - Physics of the Solar System
- STCH5006 - Chemistry of Biomolecules
- STCH5021 - Earth History
- STCH5009 - Current Concepts & Technology in Biology
- STCH5016 - Engineering for Educators: Drones & Biomimicry
- STCH5011 - Cybersecurity Fundamentals
- STCH5081 - Directed Study

STCH 5081 Directed Study (if approved by the student's advisor)

Independent Study Option

Complete ALL of the following Courses:
- STCH5090 - Independent Study

Thesis Option

Complete ALL of the following Courses:
- STCH5091 - Thesis

Additional Comments:
Depending on the scope of independent study or thesis projects, students may also need to enroll in Research and Documentation as a Directed Study course. Please contact your academic advisor/MST Director for details.

Additional courses to complete 30 credit hours may be chosen from other Tech courses numbered 3000 or above. These courses can be substituted for specialty credit requirements upon approval of the advisor.

*STEM Depth eligibility and approvals: Students with a prior bachelor's degree in one of the disciplines (or closely related fields) offered by the MST program may, with the consent of the student's advisor, and the department chair associated with the discipline, use up to 15 credit hours of non-MST courses from the selected discipline to satisfy the "specialty courses" requirement. The consent of the advisor and the associated department chair or instructor is required in order to apply non-MST courses offered by other NMT departments.

No Requirement Level

[Learning Outcomes]

Outcome
MST students will demonstrate understanding of STEM content.

Outcome
MST students will develop effective technical communication skills.

Outcome
MST students will demonstrate transfer of STEM content to the K-12 classroom setting

PHD-BIOT - Ph.D. in Biotechnology

[Program Overview]

Program Title
Doctor of Philosophy in Biotechnology

Department(s)
Biotechnology (program)

Program Short Title
PhD-Biotechnology

Degree Designation
Doctor of Philosophy

Program Type
Major

Program Description
Students of exceptional ability, as demonstrated in previous courses or in a master's degree program, may pursue a program leading to the doctoral degree.

The Prospective doctoral candidate in Biotechnology should develop a good background in biology, chemistry, and mathematics plus at least one of the following: Computer Science, Mechanical Engineering, Chemical Engineering, or Materials Engineering. Additionally, students should achieve a high level of competence in the field of specialization defined by their dissertation research. Additional information is found in the Graduate Program section of the catalog.

Research fields appropriate for the biotechnology candidate include bioengineering, molecular biology, microbiology, tissue engineering, pathogen detection, drug discovery, drug delivery, medical instrument development, neuroscience, and biochemistry. Interdisciplinary projects are strongly encouraged.

Simple Requisites

Subplan

Degree Requirements

• Up to 30 credit hours from an appropriate master's degree, excluding thesis and S/U courses, may be included.

• Students are normally expected to take BIOL 5001 each semester that they are in residence on the New Mexico Tech campus.

• 48 hours of coursework approved by the student's advisory committee, to include:

1. Core Biotechnology courses:

BIOT 5002 Molecular Biotechnology

BIOT 5003 Biochemical Technology

BIOT 5004 Biophysical Technology

BIOT 5005 Biomechanical Technology

2. 12 hours of upper-division or graduate-level coursework outside the Biology Department.

• Dissertation (24 credit hours): BIOT 5095

Qualifying Examination

Core competency in two or more academic disciplines relevant to biotechnology must be demonstrated. The qualifying exam will also assess a student's ability to rationally approach novel problems and apply engineering and analytical tools. The student will take written exams in two topic areas as selected by the student with approval of the academic advisor. Exam Topic Areas:

• Molecular Biology

• Bioinformatics

• Microbiology

• Biochemistry

• Biophysics

• Biomechanical engineering

• BioMaterials

• Biomathematical modeling

• A topic from one other academic area related to the interdisciplinary Biotechnology Program can be selected with approval from the Biotechnology Advisory Panel.

The exam questions will be written and graded by faculty members with expertise in each of these disciplines. Results

of these exams will be used to evaluate the student's knowledge of core topics at the undergraduate level and their

ability to a) apply advanced knowledge of mathematics, science, and engineering, b) identify, formulate, and solve

problems.

The exam will be just before the start of each semester. The exam must be first taken before the beginning of the 3rd

semester and is subject to the following:

• Students must take exams from two selected topics at the first exam attempt.

• A student who does not pass a topic exam may retake that topic exam (or another topic exam with advisor approval) at the next offering, i.e., before the beginning of the next semester; they do not need to retake exams that they have passed.

• A student who has not passed exams in two topics by the completion of their second exam attempt (beginning of the 4th semester) does not advance, and will leave the program. The student may be able to purse a M.S. in an appropriate NMT program subject to those degree requirements.

Degree Requirements
Type
Completion Requirement

Core Biotechnology Courses

Complete ALL of the following Courses:

- BIOT5002 - Molecular Biotechnology
- BIOT5003 - Biochemical Technology
- BIOT5004 - Biophysical Technology
- BIOT5005 - Biomechanical Technology

Dissertation (24 Credit Hrs.)

Complete ALL of the following Courses:

- BIOT5095 - Dissertation

PHD-CH E - Ph.D. in Chemical Engineering

[Program Overview]

Program Title
Doctor of Philosophy in Chemical Engineering

Department(s)
Chemical Engineering

Program Short Title
Ph.D.-CH E

Degree Designation
Doctor of Philosophy

Program Description
Students in the graduate program in Chemical Engineering will be required to take a significant course load in surface engineering fundamentals where they will advance knowledge from science and basic engineering to surface engineering. Students will also have the opportunity to explore applications in surface engineering through coursework and research.

Simple Requisites

Subplan

Core Courses
Type
Completion Requirement

Complete ALL of the following Courses:

- CH E5051 - Advanced Mathematical Modeling
- CH E5068 - Surfaces, Interfaces, and Colloids
- CH E5072 - Interfacial Transport Phenomenon

Additional Comments:

No Requirement Level

[Specializations/Dissertation Concentration Options]

Specialization/Dissertation Options

Specialization/Dissertation Title
Doctor of Philosophy in Chemical Engineering with Dissertation in Surface Engineering.

Specialization/Dissertation Requirements
In addition to meeting the general graduate degree requirements (please see graduate program policies in the catalog), the Ph.D. requirements include the following:

1. **Select a graduate committee that shall consist of a minimum of four members:**
    1. an academic advisor from the Chemical Engineering department, and
    2. at least three other members, one of which must be from outside the department assigned. The research advisor may be the academic advisor or another member of the committee, and
    3. Chemical Engineering members of the committee cannot be in the minority.
2. **The PhD degree requires 72 credit hours beyond the B.S. degree with the following requirements:**
    1. a minimum of 24 hours of dissertation
    2. a maximum of 9 hours of directed study
    3. a minimum of 6 hours outside of chemical engineering
    4. a minimum of 24 hours of 5000-level courses in ChE, which must include 18 hours of core courses
    5. all courses need to be 3000-level or above
3. **The PhD degree requires 48 credit hours beyond the M.S. degree with the following requirements:**
    1. a minimum of 24 hours of dissertation
    2. a maximum of 6 hours of directed study
    3. a minimum of 12 hours of 5000-level courses in ChE, which must include 9 hours of core courses
    4. a minimum of 6 hours outside of chemical engineering
    5. all courses need to be 3000-level or above
4. **All course work must be approved by the student's graduate committee, the Chemical Engineering Department Chair, and the Dean of Graduate Studies.**
5. **Qualifying Exam:**- In order to take the qualifying exam, a student must satisfy a GPA requirement of 3.25 or above based on five out of the six required core courses. If a student enters

the PhD program with a MS degree, the GPA of all three required core courses must be 3.25 or above. The qualifying exam consists of a written and orally presented literature review on their research topic. The student's graduate advisory committee will make the decision for passing. If the student fails the qualifying exam, the student may retake the exam within one year. If the student fails the retake, the student may pursue an MS or MEng. All qualifying exam activities must be completed within 2 years of entering the program.

6. **Candidacy Exam:** After passing the qualifying exam, the student must take a candidacy exam. The candidacy exam consists of a written proposal and oral presentation of their research to their Graduate Advisory Committee in a public forum. As part of the oral presentation the student is expected to answer, to the satisfaction of the committee, questions regarding their research. If a student fails, they have one additional attempt to pass the exam, taken the semester after the first attempt. The candidacy exam must be completed within 3 years of entering the program.
7. **The admission to candidacy to the Ph.D. degree requires that the qualifying and candidacy examinations be passed and approved by the graduate committee**; after which the student may enroll in ChE 5095: Dissertation.
8. **The student must write a final dissertation and defend it in an oral public defense before the student's graduate committee.**
9. **Students must take ChE 5085: Graduate Seminar each semester offered.** ChE 5085 cannot be used towards the credit coursework requirement for the degree.

[Learning Outcomes]

Outcome
1. Gain the ability to apply experimental and/or calculation based techniques in order to solve a research question in field of surface engineering

Outcome
2. Apply science and basic engineering to the field of surface engineering in order to solve upper level problems

Outcome
3. Effectively present their research through oral presentations, posters, and publications

PHD-CHEM - Ph.D. in Chemistry

[Program Overview]

Program Title
Doctor of Philosophy in Chemistry

Department(s)
Chemistry

Program Short Title
Ph.D.-Chemistry

Degree Designation
Doctor of Philosophy

Program Description
Students of exceptional ability may pursue a program leading to the doctoral degree. The prospective doctoral candidate will develop a broad background in chemistry and related fields and prove his or her ability to do independent research. An early assessment of the student's ability is achieved in the candidacy examination to be completed by the end of the third year. Research within the Chemistry department generally emphasizes environmental and human health related topics. Interdisciplinary research with other departments, such as Physics, Biology, Chemical Engineering, or Earth and Environmental Science can be pursued. Ph.D. students must meet the general degree requirements for the Doctor of Philosophy degree at New Mexico Tech as well as the requirements listed below.

All Ph.d student must register for Graduate Seminar(CHEM 5029/5030) every fall and spring semester that they are enrolled full-time in the graduate program

Simple Requisites

Subplan

Requirements for Doctor of Philosophy in Chemistry
Type
Completion Requirement

No Prior Master's Degree in Chemistry. A minimum of 52 credit hours is required. These hours are distributed as follows:

- 5000-Level chemistry courses 21 cr hrs minimum
- CHEM 5029, 530 (Seminar) 2 cr hrs
- COMM 5075 and CHEM 5055 (Proposal Writing) 5 cr hrs
- CHEM 5095 (Dissertation) 24 cr hrs

Substitutions
Students may substitute up to six 6 credit hours of courses at the 3000-level and above from other departments. Additional 5000-Level courses from other departments may be used in place of 500- level chemistry courses, upon approval of student's advisory committee

Prior Master's Degree in Chemistry. A minimum of 40 credit hours is required. These hours are distributed as follows:

- 5000-Level chemistry courses 9 cr hrs minimum
- CHEM 5029, 530 (Seminar) 2 cr hrs
- COMM 5075 and CHEM 5055 (Proposal Writing) 5 cr hrs
- CHEM 5095 (Dissertation) 24 cr hrs

Substitutions
Students may substitute up to three 3 credit hours of courses at the 3000-level and above from other departments. Additional 5000-Level courses from other departments maybe used in place of 5000-Level chemistry courses, upon approval of student's advisory committee.

Additional Comments:

No Requirement Level

[Learning Outcomes]

Outcome
Become independent researchers

Outcome
Become effective teachers

Outcome
Demonstrate deep understanding in their area of specialization and general knowledge in the 5 major areas of chemistry

Outcome
Demonstrate professional-level communication

PHD-COMP. SC - Ph.D. in Computer Science

[Program Overview]

Program Title
Doctor of Philosophy in Computer Science

Department(s)
CSE Computer Science & Engineering

Program Short Title
Ph.D.-Computer Science

Degree Designation
Doctor of Philosophy

Program Type
Major

Program Description
Students of exceptional ability as demonstrated in previous coursework are encouraged to pursue a doctor of philosophy degree; individuals with substantial experience in industrial research and development may also apply to the doctoral program. The current research programs of the department include artificial intelligence, machine learning, big data and cloud computing, computer security, privacy, computer networking, sensor networks, parallel computation, distributed computing, mobile computing, software engineering, databases, knowledge-based systems, visualization, computational theory, and computer science education. The department also encourages interdisciplinary work with other departments and divisions at Tech and in cooperation with researchers at Los Alamos and Sandia national laboratories.

Program Information & Policies
As computer science and engineering is a diverse and rapidly changing discipline, the program of study of a PhD student will depend on the area of specialization and on prior experience and education. All PhD students will be required to demonstrate master's-level knowledge of the core areas of computer science, as well as a thorough understanding of the intended area of specialization. The core areas include programming languages, algorithms, systems, and computational theory. In addition, all PhD students are required to take three credit hours of CSE 5085 (Graduate Seminar). The specific course requirements are determined with the consultation and approval of the student's advisory committee and the chair of the department.

Simple Requisites

Subplan
To earn a PhD degree, students must complete at least 60 post-baccalaureate credit hours. This includes at least 24 credit hours of dissertation research and at least 9 credit hours of coursework including CSE 5085.

Before the degree is approved and granted, at least one paper on the subject matter from the dissertation must be accepted for publication to a reputable journal or conference proceedings acceptable to the doctoral committee of the student.

Coursework Requirements Before Candidacy Exam
Type
Completion Requirement

Coursework Required Before Candidacy Exam

In order for CS PhD students to proceed to their candidacy exam, they must complete the following:

- CSE 5085 (Graduate Seminar, 3 credit hours): Students must take this and pass it with a grade of "B" or higher, unless taken before at NMT. It is recommended that they should take this in their first semester as a Ph.D. student.
- Complete at least three courses from the CS core areas (9 credit hours):

Earn at least 9 credits from the following:

- CSE5044 - Advanced Algorithms
- CSE5025 - Advanced Operating Systems
  OR CSE5053 - Advanced Computer Networks
- CSE5046 - Theory of Computation
  OR CSE5028 - Formal Methods of Software Development

For each of these three courses, either :

- Take the class and pass it with a grade of "B" or higher

or

- Pass the corresponding Competency Exam. Competency Exams are to be offered yearly, typically one week before the start of the semester when the corresponding course is offered.

For Students with MS in CS or closely related area

Complete the required minimum credit hours as follows:

- 6 credit hours of CSE graduate courses.

For student without MS in CS or closely related area

Complete the required minimum credit hours as follows:

- 21 credit hours, detailed as follows:
  - 15 credit hours of CSE graduate courses
  - 6 credit hours of 300-level or higher courses (CSE or related/needed areas)

All students who are financially supported by the department must finish the above requirements within their first four semesters (from the time of joining the PhD program); otherwise, their financial support is subject to termination without further notice.

Additional Comments:

Candidacy Exam
Type
Completion Requirement

Candidacy Exam Requirements

In order to advance to PhD candidacy, the student must pass a candidacy examination (PhD proposal defense) in his/her specific area of specialization. The student's advisory committee will conduct the proposal defense.

Additional Comments:

Dissertation
Type
Completion Requirement

Dissertation Requirements

The doctoral dissertation demonstrates the candidate's capacity for independent research. The student may register for dissertation hours only after successfully completing the candidacy exam. A minimum of 24 credit hours must be devoted to the dissertation. The student is encouraged to explore the various current research projects in his or her field of interest before choosing a dissertation subject. The dissertation must be defended before the Tech faculty under the supervision of the student's advisory committee. Manuscript requirements are in the catalog. An external examiner will be included on the defense committee. The candidate must be registered during the semester in which the completed dissertation is submitted to the Graduate Office. Doctoral candidates are required to present at least one departmental or general seminar on the dissertation during their tenure as a graduate student.

Additional Comments:

No Requirement Level

[Learning Outcomes]

Outcome
Advanced knowledge of computer science in the areas of theoretical computer science, programming languages, and systems

Outcome
Ability to communicate computing concepts through written reports

Outcome
Ability to communicate computing concepts through oral presentations

Outcome
Expertise in conducting research on a theoretical or applied problem in computer science, demonstrated by the writing of a successful research proposal, a dissertation that contributes original and scholarly work to the field, and publications that have been accepted by the wider computer science community via peer review

PHD-CYBS - Ph.D. in Transdisciplinary Cybersecurity

[Program Overview]

Program Title
Doctor of Philosophy in Transdisciplinary Cybersecurity

Department(s)
Cybersecurity (program)

Program Short Title
PHD- Trans Cybersecurity

Degree Designation
Doctor of Philosophy

Program Description
Students of exceptional ability, as demonstrated in previous courses, in a master's degree program, or in professional research experience, may pursue a program leading to the doctoral degree.
The prospective doctoral candidate in Transdisciplinary Cybersecurity should develop a strong background in the core of cybersecurity. Additionally, students must achieve a high level of competence in the field of specialization defined by their dissertation research. Additional information is found in the Graduate Program section of the catalog.
Research fields appropriate for the transdisciplinary cybersecurity candidate include attack and defense, communications security, computer security, cyberprivacy, cybersecurity data science, cybersecurity policy, cyberspace security, electronic warfare, enterprise-wide cybersecurity, forensics, incident response, information assurance, hardware security, network security, psychology of cybersecurity, reverse engineering, threat analysis, and vulnerability analysis. Transdisciplinary projects integrating theory, metrics, and methods from multiple disciplines are strongly encouraged.

Simple Requisites

Subplan
PhD Degree Minimum Requirements Summary

A minimum of 68 credits total, and up to 30 graded credit hours from an appropriate master's degree, may be included.

44 hours of graded coursework approved by the student's advisory committee must include:

- All core courses listed below (18 cr), including
    - 9 credits of technical electives
    - 12 credits of cybersecurity area courses
- Up to 12 graded research credits (CYBS 5081) may be used toward the required graded coursework credits.
- Dissertation (24 credit hours): CYBS 5095

PHD Requirements
Type
Completion Requirement

Qualifying Examination

The paper critique is the program's qualifying examination. The critique is the first examination that a PhD student must pass within 24 months of enrolling in the program. The paper for critique must be agreed on by the doctoral committee. Student must conduct a successful written and public oral critique of a paper published in a high-quality professional journal on a cybersecurity topic. During the paper critique presentation, the student may be asked questions relating to background knowledge gained from taking regular coursework in cybersecurity subjects. The paper critique must be completed within 24 months of enrolling in the PhD program. The committee may determine that the student has a pass, a conditional pass, or a fail on the critique. Students with an unconditional pass proceed to the dissertation proposal. Students with a

conditional pass, will be required to overcome deficiencies, which may require additional courses, individual reading/research, and/or a subsequent critique before advancing to the dissertation proposal. Students who fail to pass the critique will be dismissed from the program. The committee will document the outcome of the critique and the reasons for its decision with a copy sent to the student, the program chair, and the Center for Graduate Studies.

Dissertation Proposal (Candidacy Exam)

The dissertation proposal is the program's candidacy examination, which cannot be done before the qualifying exam has been passed without condition or the conditions have been met. The student must write a research proposal and defend that proposal in a public oral defense at a minimum of two full semesters before the final dissertation defense. The proposal must include the rationale for the research, the preliminary research that has been done, and the plan for completion. The committee may determine that the student has a pass, a conditional pass, or a fail on the dissertation proposal. Students with an unconditional pass will be recommended for candidacy beginning in the subsequent semester, when they may register for dissertation credits. Students with a conditional pass, will be required to overcome deficiencies, which may require additional courses, individual reading/research, and/or a subsequent dissertation proposal before advancing to candidacy. Students who fail to pass the dissertation proposal will be dismissed from the program. The committee will document the outcome of the dissertation proposal and the reasons for its decision with a copy sent to the student, the program chair, and the Center for Graduate Studies.

Dissertation

Students may proceed with dissertation research after advancing to candidacy. Students must enroll in a minimum of 24 credits of dissertation (CYBS 5095). Students should be aware that research typically takes significantly longer than two semesters and should plan accordingly. During dissertation registration, the student completes the research project approved by the committee via the dissertation proposal approval process. The dissertation is the documentation of research that advances the state of the science for transdisciplinary cybersecurity.

The student must write a dissertation and defend it in a public oral defense. The committee may determine that the student has a pass, a conditional pass, or a fail on the dissertation defense. Students with an unconditional pass will graduate with the doctoral degree. Students with a conditional pass, will be required to overcome deficiencies, which may require research and/or a subsequent public dissertation defense before graduation. Students who fail to pass the dissertation defense will be dismissed from the program. The committee will document the outcome of the dissertation defense and the reasons for its decision with a copy sent to the student, the program chair, and the Center for Graduate Studies.

Publication Requirement

Students are required to publish a minimum of three high-quality papers in reputable, refereed journals or conference proceedings. The journals and conferences selected must be approved in writing by the committee, which will be documented with a copy sent to the student, the program chair, and the Center for Graduate Studies. At least one paper must be published after the dissertation proposal defense; others may be published on work completed earlier in the program, but that work must be an integral part of the final dissertation.

Admission Requirement

Completion of a bachelor's degree in a relevant field (e.g., information technology, computer science, cybersecurity, electrical engineering, mathematics, etc.) or the expectation of completing such a degree before the beginning of the first semester of graduate study. Students are expected to have competencies in mathematics equivalent to those required for completion of a B.S. degree at New Mexico Tech. Students who are deficient in mathematics will be required by their advisory committee to complete undergraduate coursework in the area of deficiency. Students should have an academic record that indicates a good potential for success in a graduate program. An undergraduate GPA of 3.0 or higher is used as a general guideline in New Mexico Tech's Graduate School.

Additional Comments:

No Requirement Level

[Learning Outcomes]

Outcome
1. Communicate effectively both orally and in writing to a variety of audiences.

Outcome
2. Analyze and evaluate the cybersecurity needs of an organization to conduct a cybersecurity risk assessment.

Outcome
3. Design operational and strategic cybersecurity approaches and policies.

Outcome
4. Understand and appreciate the legal, ethical, technical, and psychological environment impacting individuals and business organizations to determine the implications and risks associated with cybersecurity decisions.

Outcome
5. Carry out research that demonstrates critical thinking by analyzing situations, integrating acquired knowledge, and developing solutions to real world cybersecurity challenges.

PHD-E&ES - Ph.D. in Earth & Environmental Science

[Program Overview]

Program Title
Doctor of Philosophy in Earth & Environmental Science

Department(s)
E&ES, E&ES Dept/ Earth Science

Program Short Title
PHD-Earth&Environmental Sci

Degree Designation
Doctor of Philosophy

Program Type
Major

Required Specialization/Concentration(s)
Dissertation in Geology, Dissertation in Geobiology, Dissertation in Geochemistry, Dissertation in Geophysics, Dissertation in Hydrology

Program Description
Students of exceptional ability, as demonstrated in previous courses or in a master's degree program, may pursue a program leading to the doctoral degree.

[Engineering Concentrations]

Concentration Option (must be declared with the Registrar Office)

Concentration Option 1: Title
Dissertation in Geology

Requirements
Prior Master's Degree

A minimum of 42 credit hours is required. These hours are distributed as follows:

- 9 or more cr hrs of 5000-level coursework with a GEOL, GEOB, GEOC, GEOP, or HYDR designation (which includes 5810, Directed Study). 5000-level courses from other programs may be used upon approval of the student's advisory committee.
- 3 or more cr hrs of GEOL 5092 (Graduate Seminar).
- 6 or more cr hrs of GEOL 5093 (Seminar).
- 24 or more cr hrs of GEOL 5095 (Dissertation).

No Prior Master's Degree

A minimum of 60 credit hours is required. These hours are distributed as follows:

- 24 or more cr hrs of upper division coursework with a GEOL, GEOB, GEOC, GEOP, or HYDR designation, at least 18 of which must be at the 5000-level (which includes 5810, Directed Study). Courses from other programs may be used upon approval of student's advisory committee.
- 4 or more cr hrs of GEOL 5092 (Graduate Seminar).
- 8 or more cr hrs of GEOL 5093 (Seminar).
- 24 or more cr hrs of GEOL 5095 (Dissertation).

Concentration Option (must be declared with the Registrar Office)

Concentration Option 2: Title
Dissertation in Geobiology

Requirements
Prior Master's Degree

A minimum of 42 credit hours is required. These hours are distributed as follows:

- 9 or more cr hrs of 5000-level coursework with a GEOB, GEOL, GEOC, HYDR, BIOL, or CHEM designation (which includes 5810, Directed Study). 5000-level courses from other programs may be used upon approval of student's advisory committee.
- 3 or more cr hrs of GEOB 5092 (Graduate Seminar).
- 6 or more cr hrs of GEOB 5093 (Seminar).
- 24 or more cr hrs of GEOB 5095 (Dissertation).

No Prior Master's Degree

A minimum of 60 credit hours is required. These hours are distributed as follows:

- 24 or more cr hrs of upper division coursework with a GEOB, GEOL, GEOC, HYDR, BIOL, or CHEM designation, at least 18 of which must be at the 5000-level (which includes 5081, Directed Study). Courses from other programs may be used upon approval of the student's advisory committee.
- 4 or more cr hrs of GEOB 5092 (Graduate Seminar).
- 8 or more cr hrs of GEOB 5093 (Seminar).
- 24 or more cr hrs of GEOB 5095 (Dissertation).

Concentration Option (must be declared with the Registrar Office)

Concentration Option 3: Title
Dissertation in Geochemistry

Requirements
Prior Master's Degree

A minimum of 42 credit hours is required. These hours are distributed as follows:

- 9 or more cr hrs of 5000-level coursework with a GEOC designation (which includes 5810, Directed Study). 5000-level courses from other programs may be used upon approval of student's advisory committee.
- 3 or more cr hrs of GEOC 5092 (Graduate Seminar).
- 6 or more cr hrs of GEOC 5093 (Seminar).
- 24 or more cr hrs of GEOC 5095 (Dissertation).

No Prior Master's Degree

A minimum of 60 credit hours is required. These hours are distributed as follows:

- 24 or more cr hrs of upper division coursework with a GEOC, GEOL, or HYDR designation, at least 18 of which must be at the 5000-level (which includes 5081, Directed Study). Courses from other programs may be used upon approval of the student's advisory committee.
- 4 or more cr hrs of GEOC 5092 (Graduate Seminar).
- 8 or more cr hrs of GEOC 5093 (Seminar).
- 24 or more cr hrs of GEOC 5095 (Dissertation).

Concentration Option (must be declared with the Registrar Office)

Concentration Option 4: Title
Dissertation in Geophysics

Requirements
Prior Master's Degree

A minimum of 42 credit hours is required. These hours are distributed as follows:

- 9 or more cr hrs of 5000-level coursework with a GEOP designation (which includes 5810, Directed Study). 5000-level courses from other programs may be used upon approval of student's advisory committee.
- 3 or more cr hrs of GEOP 5092 (Graduate Seminar).
- 6 or more cr hrs of GEOP 5093 (Seminar).
- 24 or more cr hrs of GEOP 5095 (Dissertation).

No Prior Master's Degree

A minimum of 60 credit hours is required. These hours are distributed as follows:

- 24 or more cr hrs of upper division coursework with a GEOP or GEOL designation, at least 18 of which must be at the 5000-level (which includes 5081, Directed Study). Courses from other programs may be used upon approval of the student's advisory committee.
- 4 or more cr hrs of GEOP 5092 (Graduate Seminar).
- 8 or more cr hrs of GEOP 5093 (Seminar).
- 24 or more cr hrs of GEOP 5095 (Dissertation).

Concentration Option (must be declared with the Registrar Office)

Concentration Option 5: Title
Dissertation in Hydrology

Requirements
Prior Master's Degree

A minimum of 42 credit hours is required. These hours are distributed as follows:

- 9 or more cr hrs of 5000-level coursework with a HYDR designation (which includes 5810, Directed Study). 5000-level courses from other programs may be used upon approval of student's advisory committee.
- 3 or more cr hrs of HYDR 5092 (Graduate Seminar).
- 6 or more cr hrs of HYDR 5093 (Seminar).
- 24 or more cr hrs of HYDR 5095 (Dissertation).

No Prior Master's Degree

A minimum of 60 credit hours is required. These hours are distributed as follows:

- 24 or more cr hrs of upper division coursework with a HYDR designation, at least 18 of which must be at the 5000-level (which includes 5810, Directed Study). Courses from other programs may be used upon approval of the student's advisory committee.
- 4 or more cr hrs of HYDR 5092 (Graduate Seminar).
- 8 or more cr hrs of HYDR 5093 (Seminar).
- 24 or more cr hrs of HYDR 5095 (Dissertation).

[Learning Outcomes]

Outcome
1. Use the scientific method to organize and conduct research.

Outcome
2. Collect original and interpret data using field/lab techniques and archival material.

Outcome
3. Demonstrate knowledge of, understand and interpret published literature, as well as understand geology across sub disciplines.

Outcome
4. Effectively disseminate technical findings and conclusions by means of written reports and oral presentations.

PHD-EE - Ph.D. in Electrical Engineering

[Program Overview]

Program Title
Doctor of Philosophy in Electrical Engineering

Department(s)
Electrical Engineering

Program Short Title
PHD-Electrical Engineering

Degree Designation
Doctor of Philosophy

Program Description
The prospective doctoral candidate will develop a high level of competence in the specialized area of cyber electronic systems. Candidates will also develop the ability to integrate aspects of this area and apply them in cutting-edge research. The program is arranged by the prospective student and the student's graduate committee.

Simple Requisites

Subplan
The Ph.D. requirements include the following:

Select a graduate committee that shall consist of a minimum of four members:

1. An academic advisor from the Electrical Engineering department, and

2. AND at least three other members, one of which must be from outside the department assigned or approved by the Dean of Graduate Studies. The research advisor may be the academic advisor or another member of the committee.

Student with a Bachelor Degree Requirements
Type
Completion Requirement

Students with only a Bachelor of Science degree in related area must complete a minimum of 72 credit hours:

- A minimum of 24 credit hours of electrical engineering courses 5000-level or above including required core courses (8 credits)
- EE5060 Electronic Warfare, Electronic Warfare
- EE5065 Position, Navigation,Timing, Position, Navigation and Timing
- A minimum of 6 credit hours outside electrical engineering;
- 24 credit hours of dissertation;
- And no more than 6 credit hours of 3000- or 4000- level courses.

Additional Comments:

Students with a Master of Science Degree Requirements
Type
Completion Requirement

Students with a Master of Science degree in related area must complete a minimum of 48 credit hours:

- A minimum of 12 credit hours of electrical engineering courses of 5000-level or above including required core courses (8 credits)
- EE5060 Electronic Warfare, Electronic Warfare
- EE5065 Position, Navigation,Timing, Position, Navigation and Timing
- A minimum of 6 credit hours outside of the Electrical Engineering department unless satisfied by the Master of Science degree;
- 24 credit hours of dissertation;
- And no more than 3 credit hours of 3000- or 4000- level courses

Additional Comments:

Requirements For All Students In Program
Type
Completion Requirement

Requirements all students pursuing a PHD in Electrical Engineering will need to complete

All course work must be approved by the student's graduate committee, the Electrical Engineering Department Chair, and the Dean of Graduate Studies.

The graduate committee, in consultation with the student, will select a technical paper. The student must perform an in-depth study of the paper through analysis, modeling, and/or simulation. The student will present the analysis and critique of the paper in a written report and an oral presentation. The written report and the oral presentation constitute the qualifying examination. The exam is designed to test the student's ability to be successful in the Ph.D. program by demonstrating his/her ability to analyze, critique, solve technical problems, grasp fundamental concepts, solve open problems, and communicate effectively. The graduate student may only take the qualifying exam once. In case the student did not pass, he/she may appeal the decision to the Electrical Engineering Department Chair.

Successfully pass the candidacy examination. The student must present a detailed review of his/her research area and hypothesis under investigation to the members of his/her graduate committee. The presentation will be open to the public. This examination may only be taken after a student has passed the qualifying examination.

The admission to candidacy to the Ph.D. degree requires that the qualifying and candidacy examinations be passed and approved by the graduate committee; after which the student may enroll in EE5095 Dissertation: Dissertation.

The student must write a final dissertation and defend it in an oral public defense before the student's graduate committee.

Additional Comments:
Additional requirements include the **New Mexico Institute of Mining and Technology Graduate Program requirements**.

No Requirement Level

[Learning Outcomes]

Outcome
1. An ability to apply methods of advanced analysis appropriate for professionals to use when solving problems

Outcome
2. An ability to apply an in-depth knowledge in a particular field of study that supports the use of innovative techniques to solve problems

Outcome
3. An ability to demonstrate skills pertinent to the research process, including the ability to formulate problems, synthesize and integrate information, work collaboratively, communicate effectively, and publish results.

PHD-MATE - Ph.D. in Materials Engineering

[Program Overview]

Program Title
Doctor of Philosophy in Materials Engineering

Department(s)
Materials Engineering

Program Short Title
PhD-Materials Engineering

Degree Designation
Doctor of Philosophy

Program Description
The prospective doctoral candidate should develop a good background in Materials sciences, chemistry, physics, and mathematics, in addition to achieving a high level of competence in a specialized area of Materials. Programs are arranged by the prospective student and the student's advisory committee.

Simple Requisites

Subplan
The PhD requirements include the following:

Doctor of Philosophy in Materials Engineering Requirements
Type
Completion Requirement

Select an advisory committee that shall consist of a minimum of four members:

1. an academic advisor from the Materials department,
2. at least three other members out of which one must be from outside the department (not necessarily from a different field). The research advisor may be the academic advisor or other member of the committee. Materials faculty shall not be in the minority on the advisory committee. The student must select an academic advisor, who may serve as a temporary research advisor, before the second semester of study. The selection of the entire committee and dissertation topic must be completed by the end of the second semester of study for full-time in-house students, and immediately after completing 12 credit hours for DE students. The student must meet with his or her committee at least once per year, and must get courses approved by them.

Complete at least 24 credit hours of courses approved by the doctoral committee, including:

- At least 12 hours of 5000 level courses. No more than 3 hours of MTLS 5081 Directed Study may be used for fulfilling the course requirements. Students may take MTLS 5000 (Directed Research) in multiple semesters but the credits may not count towards their degree requirements.

For students who have already received an MS degree from the Materials department, the total credit requirements for course work may be reduced below 24 credits with the approval of their committee, department chair, and the graduate dean

Conduct a successful written and public oral critique of a paper published in a high quality professional journal

The paper choice shall be agreed on by the doctoral committee. The paper critique is the Materials Department's **Preliminary** (alternately called qualifying) examination. This is the first examination that a student has to pass. During the paper critique presentation, the student may be asked questions relating to background knowledge gained from taking regular coursework in Materials and related subjects. The paper critique must be completed within 18 months of enrolling into the PhD program.

Write a research proposal and defend it in a public oral defense at least two full semesters before the final dissertation defense

This proposal defense is the Materials Department **Candidacy** exam, and should address the rationale for the research plan and preliminary work in progress. This examination can only be taken after a student has passed the preliminary examination.

The admission to candidacy to the PhD degree requires that the preliminary and candidacy examinations be passed and approved by the advisory committee.

Following this, the student must enroll in at least 24 credit hours of MTLS 5095 Dissertation during which the student completes the research project approved by the advisory committee. The student cannot start taking MTLS 5095 credits until both the preliminary exam (paper critique) and the candidacy exam (proposal defense) have been passed.

Full Time

A full-time graduate student must be enrolled in a minimum of 9 credit hours per regular semester and 6 credit hours during the summer.

The student must submit at least one paper based on the dissertation to a recognized journal acceptable to the doctoral committee.

A preprint must be submitted to the doctoral committee prior to defense of the PhD dissertation. It is preferable that this paper be accepted by the journal and a written copy of the acceptance or conditional acceptance with reviewer comments should be provided to the committee.

The student must write the final dissertation and defend it in an oral public defense before the doctoral committee.

Additional Comments:
Additional requirements include the New Mexico Tech General Graduate Program Requirements.

No Requirement Level

New Mexico Tech General Graduate Program Requirements.
Type
Completion Requirement

New Mexico Tech General Graduate Program Requirements.

Further information can be found on the **New Mexico Tech General Graduate Program Requirements** webpage.

Additional Comments:

[Learning Outcomes]

Outcome
1. Critically assess the literature

Outcome
2. Effectively engage in written dissemination of technical findings and conclusions

Outcome
3. Effectively engage in oral dissemination of technical findings and conclusions

Outcome
4. Demonstrate a breadth of knowledge in Materials Engineering

PHD-MATH - Ph.D. in Mathematics

[Program Overview]

Program Title
Doctor of Philosophy in Mathematics With Dissertation in Applied and Industrial Mathematics

Department(s)
Mathematics

Program Short Title
PHD-Mathematics

Degree Designation
Doctor of Philosophy

Program Description
Students of exceptional ability, as demonstrated in a master's degree program or in previous courses, may pursue a program leading to the doctoral degree. Although the master's degree is not a requirement for the Ph.D. degree, the experience gained in writing a master's thesis or independent study project is valuable.

Simple Requisites

Subplan
Up to 30 hours from a master's degree, excluding thesis and S/U courses, may be included.

48 hours of coursework approved by the student's advisory committee, including:

Preliminary Exam preparation
Type
Completion Requirement

Preliminary Exam preparation

The following courses may be taken in order to prepare for the PhD Preliminary Exam:
MATH4010 Numerical Methods I **Numerical Methods I**

MATH4011 Numerical Linear Algebra **Numerical Linear Algebra**

MATH4035 Complex Analysis **Complex Analysis**

MATH4037 Systems of ODE's **Systems of Ordinary Differential Equations**

MATH4038 Partial Differential Equations **Partial Differential Equations**

MATH4071 Intro to Analysis **Intro to Analysis**

MATH4083 Mathematical Statistics **Mathematical Statistics**

MATH4086 Intro to Stochastic Processes **Intro to Stochastic Processes**

Additional Comments:

5000-level MATH courses (30 credit hours)
Type
Completion Requirement

Complete all of the following courses

Complete ALL of the following Courses:
- MATH5030 - Mathematical Modeling
- MATH5032 - Perturbation Methods

Three courses from the following list

Complete at least 3 of the following courses:
- MATH5011 - Numerical Methods for Partial Differential Equations
- MATH5018 - Convex Optimization for Nonlinear Programing
- MATH5035 - Methods of Mathematical Physics
- MATH5038 - Wave Phenomena
- MATH5039 - Fluid Dynamics
- MATH5041 - Statistical Machine Learning
- MATH5077 - Functional Analysis
- MATH5082 - Linear Statistics Models with Applications

Three or more of the remaining classes are to be additional core classes from the list above or courses from:

Complete at least 3 of the following courses:
- MATH5009 - Graduate Internship
- MATH5010 - Computational Fluid Dynamics
- MATH5012 - Numerical Methods for Wave Propagation
- MATH5019 - Inverse Problems
- MATH5020 - Applied Multivariate Analysis
- MATH5031 - Topics in Ordinary Differential Equations
- MATH5033 - Partial Differential Equations
- MATH5036 - Methods of Mathematical Physics
- MATH5037 - Bifurcation Theory
- MATH5083 - Topics in Probability & Statistics
- MATH5084 - Topics in Probabilty & Statistics
- MATH5086 - Spatial Variability & Geostatistics
- MATH5087 - Analysis of Time Series & Spatial Series
- MATH5088 - Advanced Data Analysis

Additional Comments:
12 hours of upper-division or graduate-level courses from outside the math department

Dissertation (24 credit hours): MATH 5095

PhD Prelim Exam
Type
Completion Requirement

Differential Equations

Complete ALL of the following Courses:
- MATH4037 - Systems of Ordinary Differential Equations
- MATH4038 - Partial Differential Equations

Analysis

Complete ALL of the following Courses:

- MATH3072 - Basic Concepts of Analysis
- MATH4035 - Complex Analysis
- MATH4071 - Intro to Analysis

Numerical Analysis

Complete ALL of the following Courses:

- MATH4010 - Numerical Methods I
- MATH4011 - Numerical Linear Algebra

Probability & Statistics

Complete ALL of the following Courses:

- MATH4083 - Mathematical Statistics
- MATH4086 - Intro to Stochastic Processes

Additional Comments:
A student may choose any three areas listed above and must pass all three preliminary exams by the end of the student's fourth semester to continue in the program. A student who does not pass a preliminary exam after two attempts will be terminated from the PhD program.

No Requirement Level

[Learning Outcomes]

Outcome
1. Solve a significant mathematical or statistical problem

Outcome
2. Communicate a mathematical or statistical solution in writing using professional format and correct mathematical notation

Outcome
3. Communicate the results of their work in an oral presentation. The presentation should be well organized, clear, and demonstrate good understanding of the mathematical or statistical topic

PHD-ME - Ph.D. in Mineral Engineering

[Program Overview]

Program Title
Doctor of Philosophy in Mineral Engineering

Department(s)
Mineral Engineering

Program Short Title
PHD-Mineral Engineering

Degree Designation
Doctor of Philosophy

Program Type
Major

Program Description
The proposed Mineral Engineering PhD degree is a multi-disciplinary and interdisciplinary program. Some level of flexibility is allowed to meet the focused research area of the student. However, the student's graduate committee, the department chair, and the dean of graduate studies must approve all courses.

Program Information & Policies
Only applicants with a closely related MS degree are considered for admission to the PhD program.

Simple Requisites

Subplan

1. Required credits - A student with a closely related Master of Science degree must complete at least 12 credits of graduate level courses, plus one seminar credit (ME 5072), and 24 credit hours of dissertation (ME 5095). Courses from other departments can be accepted with the approval of the research committee.
2. Formation of Research Committee – The student must form their research committee during the first year.
3. Qualifying exam – The qualifying exam determines if the student is prepared and has sufficient background in their research area. It is recommended that the student take and pass the qualifying exam during the first year, where the student will be given a published paper in their area of study to be analyzed and critiqued. The research committee will decide whether the student is prepared to move on to the next step. The committee may recommend specific courses to be taken as either deficiency or to prepare the student to do research in the chosen field of study. If the student fails the exam, they may retake it only once. If the student fails the second exam, they will be terminated from the program. The student may appeal for another opportunity to remain in the program.
4. Candidacy Exam – Following passing the qualifying exam, the student must present a detailed proposal for their research work. An oral presentation to the research committee must be presented after passing the qualifying exam. The presentation is open to the public. The candidate must pass the exam to advance to Candidacy.

Additional requirements include the New Mexico Institute of Mining and Technology Graduate Program requirements.

No Requirement Level

[Learning Outcomes]

Outcome
1. Be able to effectively and proficiently communicate in written text, with well-organized and professional-style reports and publications, as well as oral communication, capable of compiling, organizing, and presenting research and related information in oral form to peers, professionals.

Outcome
2. Be able to contribute to the development of scientific knowledge by producing and publishing high level scientific articles in journals and reputable conferences.

Outcome
3. Be able to identify industrial and scientific problems and conduct research and development to address these problems or provide high level science founded solutions.

Outcome
4. Understand professional codes-of-ethics and know what is expected of them as they enter the professional environment.

PHD-MENG - Ph.D. in Mechanical Engineering

[Program Overview]

Program Title
Doctor of Philosophy in Mechanical Engineering

Department(s)
Mechanical Engineering

Program Short Title
PhD-Mechanical Engineering

Degree Designation
Doctor of Philosophy

Program Description
The prospective doctoral candidate should develop a strong background in energetics, intelligent systems, and fundamental aspects of mechanical engineering. Candidates will also develop the ability to integrate aspects of these fields and apply them to cutting-edge research.

Specific programs of study are developed by the student and their advisory committee, subject to the requirements listed below:

Simple Requisites

Subplan

A student is required to take 66-credit hours of graduate courses beyond the Bachelor's degree (or equivalent), including 42-credit hours of coursework and 24-credit hours of dissertation research:

Student's with Bachelor's Degrees in Mechanical Engineering
Type
Completion Requirement

Energetics Core Segment & Intelligent Systems Core Segment

Earn at least 12 credits from the following:
- Intelligent Systems and Mechatronics
- Energetic Systems and Explosives Engineering

Fundamental Engineering and Science Core Segment

Earn at least 9 credits from the following:
- Fluid and Thermal Sciences
- Solid Mechanics

Additional Comments:
18 credit hours of elective courses with at least 6 credit hours from 500-level courses, as approved by the graduate advisory committee, with a maximum of 6 credit hours of Directed Study (MENG 5081) which must be graded.

3 credit hours of Graduate Seminar (MENG 5085)

24 credit hours minimum of Dissertation Research

Student with a Master's degree in Mechanical Engineering (or closely related discipline) must complete the following minimal requirements of 42-credit hours beyond the Master's degree, including 18-credit hours of coursework and 24-credit hours of dissertation research:

Students with Master's Degrees in Mechanical Engineering Requirements
Type
Completion Requirement

Energetic Core Systems & Intelligent Core Systems

Earn at least 9 credits from the following:
- Intelligent Systems and Mechatronics
- Energetic Systems and Explosives Engineering

Fundamental Engineering and Science Core Segment

Earn at least 3 credits from the following:
- Fluid and Thermal Sciences
- Solid Mechanics

Additional Comments:
3 credit hours of additional coursework, as approved by the graduate advisory committee, with a maximum of 3 credit hours of Directed Study (MENG 5081) ,which must be graded.

3 credit hours of graduate seminar (MENG 5085)

24 credits minimum of Dissertation Research

Qualifying Examination
Type
Completion Requirement

Qualifying Examination:

Core competency in mechanical engineering fundamentals must be demonstrated. The qualifying exam will also assess a student's ability to rationally approach novel problems and apply engineering analytical tools. The student will take written exams in three of the following topic areas as selected by the student with approval of the academic advisor.

Exam Topic Areas

- Control theory
- Dynamics
- Thermodynamics
- Fluid dynamics

- Heat transfer
- Mechanics of Materials
- Structural analysis

The exam questions will be written and graded by department faculty members. These exams will be used to evaluate the student's knowledge of mechanical engineering topics at the undergraduate level and their ability to a) apply advanced knowledge of mathematics, science, and engineering, b) identify, formulate, and solve engineering problems.

The exam will be offered the week before the start of each fall and spring semester. The exam must be first taken before the beginning of the 3rd semester and is subject to the following:

Students must take exams from three selected topics at the first exam attempt.

A student who does not pass a topic exam may retake that topic exam (or another topic exam with advisor approval) at the next offering; they do not need to retake exams that they have passed.

A student who has not passed exams in three topics by the completion of their second exam attempt does not advance, and will leave the program. The student will be able to pursue a M.S. or M.E. in Mechanical Engineering subject to those degree requirements.

Additional Comments:

Candidacy Examination
Type
Completion Requirement

Candidacy Examination:

Written dissertation proposal in New Mexico Tech thesis template format

Presentation of written proposal and oral exam on the proposal and related IES coursework

Must be taken no fewer than 12 months after passing the qualifying exam

Three possible outcomes:

1. **Pass**: Student advances to Candidacy
2. **Pass with conditions**: Six months window to correct minor deficiencies; student advances to Candidacy only after the Graduate Advisory Committee determines deficiencies have been corrected.
3. **Fail**: Student does not advance to Candidacy and will leave the program.

Additional Comments:

Publication of Research
Type
Completion Requirement

Publication of Research:

The student must demonstrate dissemination of research results by publishing at least one article in a peer-reviewed science or engineering journal.

Additional Comments:

Dissertation & Defense
Type
Completion Requirement

Dissertation & Defense:

Written Dissertation

Oral presentation with public and private (committee only) question and answer discussion time. Defense must take place no fewer than 12 months after passing the Candidacy Examination

Possible Outcomes: Pass with conditions: Student must correct minor deficiencies. Note that the deficiencies should be minor and not require a second defense.

Fail: Student has not satisfactorily presented/defended their dissertation and leaves the program.

Additional Comments:
If a PhD student would like to earn an MS while completing PhD requirements, they may initiate the process by petitioning the department. The student may complete an MS in Mechanical Engineering with any associated Specialization by completing the MS requirements and Thesis and Thesis defense as stated in the catalog. All coursework may count toward both the MS and PhD degrees. Up to 6 credits of MENG 5095 may be used in lieu of MENG 5091 to complete the MS degree, which may not be double counted toward the PhD degree.

No Requirement Level

[Learning Outcomes]

Outcome
1. An ability to apply advanced knowledge of mathematics, science, and engineering

Outcome
2. An ability to identify, formulate, and solve engineering problems

Outcome
3. An ability to design, document, and conduct experiments, as well as to analyze and interpret data

Outcome
4. An ability to analyze requirements, propose design, and evaluate practical realization of an engineering system

Outcome
5. An ability to communicate effectively

Outcome
6. An understanding of professional and ethical responsibility

Outcome
7. The broad education necessary to understand the impact of engineering solutions in a global and societal context

Outcome
8. A recognition of the need for, and an ability to engage in life-long learning

Outcome
9. A knowledge of contemporary (within the profession) issues

Outcome
10. An ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.

PHD-PETR - PHD-PETR*Do not use*

[Program Overview]

Program Short Title
PHD-PETR*Do not use*

Degree Designation
Doctor of Philosophy

PHD-PETR - Ph.D. in Petroleum Engineering

[Program Overview]

Program Title
PHD--PETR

Department(s)
Petroleum Engineering

Program Short Title
PHD-Petroleum Engineering

Degree Designation
Doctor of Philosophy

Program Type
Major

Program Description
In order to be admitted to the Ph.D. program, a student must meet the requirements as set forth by the Graduate Program and have completed an M.S. degree with thesis.

Simple Requisites

Subplan

In order to be admitted to the Ph.D. program, a student must meet the requirements as set forth by the Graduate Program and have completed an M.S. degree with thesis.

A minimum of 60 credit hours past the master's degree is required. New Mexico Tech courses taken to satisfy this requirement must have content different from courses applied to previous degrees. In addition to the department administered preliminary examination, the student is required to successfully complete a candidacy examination and a defense of the dissertation administered by the student's advisory committee. (See the **Petroleum Engineering Graduate Programs** page for more detailed information.)

Doctor of Philosophy in Petroleum Engineering
Type
Completion Requirement

The 60-credit requirements should be distributed as follows:

- Minimum 30 credits regular* courses and Directed Study (581).
- Minimum 12 credits of regular* 5000-level petroleum engineering courses.
- Maximum 9 credits of Directed Study (PETR 5081); maximum 6 credits from the same professor.
- Minimum 6 credits from outside of petroleum engineering in either engineering, engineering management, or science disciplines. Students with degrees in disciplines other than Petroleum engineering may take an additional 6 credits of petroleum engineering courses instead.
- Minimum 24 credits and maximum 30 credits of Dissertation (PETR 5095).
- Registration in Graduate Seminar (PETR 5070) is required.

* Courses are considered regular only if a course title and scheduled meeting time are specified and the course is open to all qualified students.

Credit requirements

Additional Comments:

No Requirement Level

[Learning Outcomes]

Outcome
1. Demonstrate competence in undergraduate fundamentals in petroleum engineering

Outcome
2. Learn advanced concepts in two of the three areas of Drilling and completions, production, and reservoir engineering/evaluation

Outcome
3. Learn to formulate and complete a research project and document results in a thesis (for thesis option only)

Outcome
4. Learn additional knowledge in one specific area and document work in an independent study report (for independent study option only)

Outcome
5. Effectively communicate

Outcome
6. Apply analytical methods, critical thinking, and creativity toward research (for PhD program only)

PHD-PHYSICS - Ph.D. in Physics

[Program Overview]

Program Title
Doctor of Philosophy in Physics

Department(s)
Physics

Program Short Title
Ph.D.-Physics

Degree Designation
Doctor of Philosophy

Optional Specialization/Concentration(s)
Dissertation in Astrophysics, Dissertation in Atmospheric Physics, Dissertation in Instrumentation, Dissertation in Mathematical Physics

Program Description
Students of exceptional ability as demonstrated in previous courses in physics and mathematics may pursue a program leading to the doctoral degree. Our department offers the following five doctoral paths (with requirements for each specified in the next sections.)
• Doctor of Philosophy in Physics with Dissertation in Astrophysics
• Doctor of Philosophy in Physics with Dissertation in Atmospheric Physics
• Doctor of Philosophy in Physics with Dissertation in Instrumentation
• Doctor of Philosophy in Physics with Dissertation in Mathematical Physics
• Doctor of Philosophy in Physics

Doctor of Philosophy in Physics (no dissertation area specified)

In addition to the degree requirements specified, (12) credit hours of graduate physics or appropriate related fields, approved by the student's advisory committee, should be completed in his/her field of specialization.

Simple Requisites

Subplan

In addition to the general doctoral degree requirements, the following course requirements apply to all curricula:

- PHYS 5001 – Intro to Research and Scientific Communication (2 cr) (must take in first two semesters)
- PHYS 5002 – Intro to Research and Scientific Communication (2 cr) (must take in first two semesters)
- PHYS 5005 Advanced Dynamics (3 cr)
- PHYS 5008 – Statistical Mechanics (3 cr)
- PHYS 5009 – Methods of Theoretical Physics (3 cr)
- PHYS 5010 – Electromagnetism (3 cr)
- PHYS 5018 – Quantum Mechanics (3 cr)
- PHYS 4025 – Astrophysics III: Plasma Astrophysics (3 cr)
    - OR PHYS 5026 – Fluid Dynamics (3 cr)
    - OR PHYS 5027 – Geophysical Fluid Dynamics (3 cr)
- PHYS 5079 – Graduate-Faculty Seminar (1 cr) (must be taken for the first four semesters)
- 9 credit hours in mathematics beyond that required of an undergraduate physics major.

While the listed courses are the simplest route to achieving this credit, a student may petition their committee and the department chair with proposed substitute course work or other prior experience demonstrating equivalent competence in any of these areas. Further, New Mexico. Tech students who took one of the listed courses as part of a prior degree program at Tech and passed it with a grade of B- or higher are not required to retake the course.

No Requirement Level

[Learning Outcomes]

Outcome
1. Students will master the fundamental knowledge of physics, including (a) Mechanics, Thermodynamics, and Statistical Physics; (b) Electricity, magnetism, and optics; and (c) Quantum mechanics, atomic and nuclear physics.

Outcome
2. Students will apply physical, mathematical, statistical, and computing skills to a problem in their area of specialization.

Outcome
3. Students will communicate scientific results in written, oral, and graphical form to experts and the public.

Outcome
4. Students will become independent learners and researchers.

PM-CYBS - P.M. in Transdisciplinary Cybersecurity

[Program Overview]

Program Title
Professional Master in Transdisciplinary Cybersecurity

Department(s)
Cybersecurity (program)

Program Short Title
PM-Trans Cybersecurity

Degree Designation
Professional Master

Simple Requisites

Subplan
The PMTC program requires a minimum of 30 graded graduate credits.

Students in the PMTC program must take all of the required core courses, a minimum of six credits of technical electives from the approved list, and at least six additional credits in the following cybersecurity areas: cybersecurity policy, psychology of cybersecurity, cybersecurity data science, or cybersecurity technical electives.

Note: other cybersecurity courses may be substituted for the approved list only with prior written approval from the advisor and the program chair, which must be filed with the Center for Graduate Studies prior to taking the course.

Professional Master in Transdisciplinary Cybersecurity Requirements
Type
Completion Requirement

Core Courses Requirements (18 credits)

Complete ALL of the following Courses:

- CYBS5002 - Cybersecurity Ethics and Law
- CYBS5003 - Cybersecurity Policy
- CYBS5004 - Psychology of Cybersecurity
- CYBS5005 - Data Science for Cybersecurity
- CYBS5009 - Cybersecurity Risk Analysis & Management
- CYBS5061 - Foundations of Cybersecurity

Technical Electives Requirements

Earn at least 6 credits from the following:

- CYBS5041 - Advanced Cryptography
- CYBS5054 - Computer Network Security
- CYBS5057 - Hardware-Based Network Security
- CYBS5063 - Access Control and System Security
- CYBS5064 - Secure Systems Administration
- CYBS5014 - Computer Security & Incident Response
- CYBS5015 - Reverse Engineering Malware
- EE5060 - Electronic Warfare
- EE5065 - Position, Navigation,Timing

Additional Comments:

- 6 credits of cybersecurity area courses

No Requirement Level

[Learning Outcomes]

Outcome
1. Communicate effectively both orally and in writing to a variety of audiences.

Outcome
2. Analyze and evaluate the cybersecurity needs of an organization to conduct a cybersecurity risk assessment.

Outcome
3. Design operational and strategic cybersecurity approaches and policies.

Outcome
4. Understand and appreciate the legal, ethical, technical, and psychological environment impacting individuals and business organizations to determine the implications and risks associated with cybersecurity decisions.

Outcome
5. Carry out research that demonstrates critical thinking by analyzing situations, integrating acquired knowledge, and developing solutions to real world cybersecurity challenges.

PM-HYD - P.M. in Hydrology

[Program Overview]

Program Title
Professional Master of Hydrology

Department(s)
E&ES, E&ES Dept/ Earth Science

Program Short Title
PM-Hydrology

Degree Designation
Professional Master

Program Description
The Professional Master of Hydrology degree is aimed at working professionals or students who wish to increase their qualifications in the hydrologic sciences. The Professional Master Program in Hydrology covers fundamentals of atmospheric, surface, and subsurface hydrology while leaving the flexibility to focus on related areas of particular individual interest.

Program Information & Policies
This coursework-only degree requires a minimum of 30 credit hours of graduate level and upper division coursework. All students must take:

- GEOL 4040 (3 cr)

- Twenty-one credits of graduate classes in Hydrology. Examples of available distance education course include: HYDR 5007, HYDR 5010, HYDR 5011, HYDR 5013, HYDR 5014, HYDR 5016, HYDR 5034, HYDR 5046, HYDR 5047, HYDR 5050, and HYDR 5060.
- Six credits of elective classes outside of the Hydrology Program. Examples of available distance education elective classes include: MGT 4062, MGT 4072, GEOL 5012, MATH 5086, TCOM 5005, and TCOM 5075.

[Learning Outcomes]

Outcome
1. Demonstrate adequate expertise and skills to embark on a career as a professional hydrologist.

Outcome
2. Use the scientific method to organize and conduct research.

Outcome
3. Demonstrate knowledge of the information resources available in the Earth Sciences such as scientific journals and geologic databases.

Outcome
4. Collect original data using field and laboratory techniques; interpret data using computer models, statistics, and other methods; and assess the significance of their findings within the context of the discipline.

Outcome
5. Effectively disseminate technical findings and conclusions by means of written reports and oral presentations.

Outcome
6. Use maps, graphs, three dimensional diagrams, earth imagery, and other graphics to summarize findings and display them to a range of different audiences.

Outcome
7. Demonstrate a ready knowledge of the basic, important facts and laws that describe the behavior of water, solutes, and contaminants in the environment.

All Courses

ACCT2110 - Principles of Accounting I

General

Course Title
Principles of Accounting I

Academic Level (Course Level)
Undergraduate

Course Description
An introduction to financial accounting concepts emphasizing the analysis of business transactions in accordance with generally accepted accounting principles (GAAP), the effect of these transactions on the financial statements, financial analysis, and the interrelationships of the financial statements.No prerequisites required.

Equivalent Courses: Previous & Current Courses
ACCT201

Grade Modes
Audit, Pass/Fail, Standard Letter

Credit Hrs

Credit Hrs:
3

No Requirements

ACCT2120 - Principles of Accounting II

General

Course Title
Principles of Accounting II

Academic Level (Course Level)
Undergraduate

Course Description
An introduction to the use of accounting information in the management decision making processes of planning, implementing, and controlling business activities. In addition, the course will discuss the accumulation and classification of costs as well as demonstrate the difference between costing systems.

Equivalent Courses: Previous & Current Courses
ACCT202

Grade Modes
Audit, Pass/Fail, Standard Letter

AE4012 - Aerospace Systems

General
Course Title
Aerospace Systems

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
The course explores formulation, development and implementation of a comprehensive approach to the design, analysis, and life-cycle cost management of highly complex, often adaptive systems. An appreciation for the strength of integrated, multidisciplinary skills, within a structured framework for concept development is a desired outcome of the course. A number of case studies are examined as leading examples for completion of a final class project in systems conceptualization and development management.

AE4016 - Aircraft Flight Dynamics & Control

General

Course Title
Aircraft Flight Dynamics &Ctrl

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
The application of aerodynamic surfaces to determine the trajectory and the attitude of flight vehicles involves knowledge of the forces and moments applied to the vehicle from the surrounding media in subsonic, transonic and supersonic flow regimes. Methods of either specifying, or estimating the performance parameters of a flight vehicle, operating in a particular velocity range are introduced, including the critical factors in determining the size, shape and placement of control surfaces, and the forces or torques required to reliably and accurately position such surfaces in desired states. Time-domain methods are taught for simulating flight vehicles and synthesizing robust, stable control schemes.

AE4017 - Aerospace Propulsion

General

Course Title
Aerospace Propulsion

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
Aerospace propulsion can be classified into four categories: propeller, jet, ramjet and rocket propulsion. Among them gas turbine engines and jet propulsion are the essentials for modern aircraft. In this course, the fundamentals of different propulsion systems will be first introduced. Then the course focus will be on gas turbine engines. The material can be divided into four parts: (1) review of thermodynamics and compressible flow; (2) one-dimensional gas dynamics analysis of gas engine performance; (3) analysis and performance of air breathing propulsion system; and (4) the analysis and design of gas turbine engine components, e.g. inlets, nozzles, turbomachinery (compressors, turbines, turbofan, turbopropeller) and combustors. Further, the fundamentals of ramjet and rocket propulsion will also be discussed in this course.

Course Title
Structural Dynam Aerospace Eng

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
This course explores structural dynamic topics covering a broad range of aerospace applications. Vibration of single and multi-degree-of-freedom systems is reviewed in the context of modeling the aerospace structural systems. Essential structural elements – bars, beams, and plates are addressed in the dynamics of continuous systems section. Structural response to transient, shock, and random loads is discussed and practical aspects of dynamic testing are presented.

General

Course Title
Compressible Fluid Flow

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
An introductory study of compressible fluid flow and gas dynamics. The course covers one-dimensional flows including isentropic flow, normal shockwaves, Fanno flow, and Rayleigh flow. Oblique shock waves and expansion fans are discussed including applications to high-speed aerodynamics. One-dimensional unsteady flow is taught, including a detailed study of wave diagrams for various problems including shock tubes and as models for explosions. Applications of compressible flow are discussed including wind tunnels, aerodynamics, and explosives. An understanding of simple refractive imaging techniques is imparted to allow analysis of compressible flows from flow visualizations.

Course Title
g:Intro to Cultural Anthropolo

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
An introduction to the science of anthropology and its terminology, theory, practice, and subject matter. The course begins with a history of anthropology and then goes into methodology of archaeology. Then, using the discoveries of archaeologists, the course presents a history of humanity from hominids to the early civilizations. The course concludes with a study of cultural anthropology; the study of human beings; and their social and cultural institutions, beliefs, and practices around the world, creating a study of adaptations to common problems.

Course Description
This survey course will explore the architecture, sculpture, ceramics, paintings, drawings, and glass objects from the 14th century to the modern era. While focused primarily on the art of the Western civilizations, this course will also provide insights into the works of other major cultures in order to provide alternate views of art and history. Emphasis will be placed on the relationship of artworks to political, social, spiritual, intellectual, and cultural movements that affect and are affected by their creation and development.

ARTH3072 - g:Issues in Art History

General
Course Title
g:Issues in Art History

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
Issues, topics, or specific periods in the visual arts. May incorporate an interdisciplinary approach. Topics may include, among others, Visual and Other Arts; Modern Art; Art and Science; Atomic Art; Literature inspired by Art; Modern Art, Sci Fi, and Film. May be repeated for credit when topic or issue changes. Assignments include creative options.

ARTS1710 - Introduction to Printmaking

General

Course Title
g:Intro to Print Making

Academic Level (Course Level)
Undergraduate

Course Description
This course provides direct experience of exploring basic printmaking processes, including relief, intaglio, and monoprint processes, as well as the investigation of materials/media, tools, techniques, history, and concepts of printmaking. Emphasis is given to solving problems through thematic development while producing a portfolio of prints.

ARTS2127 - Digital Interface Design

General

Course Title
g:Digital Interface Design

Academic Level (Course Level)
Undergraduate

Course Description
Good interface design is visually compelling, intuitive, and efficient while prioritizing user expectations and experience. In this course, students will design and develop digital interface wireframes and interactive prototypes while gaining the foundational knowledge needed to research and strategize screen-based experiences. In this course, students will work through the concept, iteration, wireframing, and prototyping stages used in the design and development of digital interfaces. They will research, develop, and apply graphic design, interactive, and usability processes; they will complete the semester with a fully realized, working digital product. Along with creative practice, students will be introduced to the fields of user interface/user experience design (UI/UX design), to which digital interface design is associated. This course, along with others in the program will serve to continue their growth in technical proficiency.

BIOL4019 - Ecotoxicology

General

Course Title
Ecotoxicology

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
Prerequisites: BIOL 3041 or BIOL 3043; BIOL 3044, CHEM 3033; or Consent of the Instructor. Normally offered: Even Spring. A survey of the effects of naturally occurring and anthropogenic contaminants and toxic compounds on a range of organismal and ecosystem functions. Historical examples and modern case studies across the breadth of biological diversity (microbes to mammals) are used to better understand human influence on the “chemosphere” and how organisms are challenged by, and have adapted to, changing chemical environments. The history of environmental pollution and modern statistical techniques to evaluate environmental chemical data will also be covered.

Ecosystem Biology

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
Prerequisite: Graduate–level standing in Biology or Biotechnology, or Consent of Instructor and Advisor. An approach to ecology that treats organisms and the physical environment as an integrated system. Focus on abiotic feedbacks between plant and microbial function including decomposition, greenhouse gas flux, and major biogeochemical cycles. Potentially strenuous field work is a component of the course. Laboratory analysis of field samples are part of projects that develop quantitative skills using student-collected data. Shares lecture with Ecosystem Biology BIOL 4002 with additional expectations for graduate credit that include: organizing data collection and group work sessions for undergraduates (4000- level students) and leading manuscript preparation for final group assignments.

BIOT5076 - Drug Delivery

General

Course Title
Drug Delivery

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
Focus is on current development in drug delivery techniques, with only a brief discussion of common clinical techniques. The first portion of the class focuses on various delivery mechanisms and the tools needed to validate successful targeted drug delivery (both in vitro, in vivo and diagnostic tools). The second part of the course focuses on current developments in drug delivery based on published research articles. Students will read, digest, and critically analyze scientific work from leading research laboratories. Students will also gain valuable communication tools, as each student will present an article of interest to the class. Finally, the third part of the course focuses on important Materials characterization methods such as biological sample prep, SEM, TEM, DSC, flow Cytometry, Fluorescence Microscopy, ELISA Assays. Same as MTLS 5076. Shares lecture with ChE 4076 with additional expectations for graduate credit.

BIOT5078 - Principles of Drug Design

General
Course Title
Principles of Drug Design

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
Principles in Drug Design course provides an overview of the multilayered and multidisciplinary processes involved in starting from a druggable-problem and ending with a novel clinically-used drug. This includes molecular or phenotypic target identification, compound design (including computational, combinatorial chemistry and structure-based drug design methods), drug synthesis, development of model assays, discovery of a lead, optimization of the lead, identification of mode of action, kinetics of molecular targeting, prodrug design and drug development from this in vitro analysis via preclinical studies to clinical studies and introduction of new drugs into clinical practice. Regulations pertaining to each of these steps will be discussed.

BMST4095 - Biomedical Research & Design: Science

General

Course Title
Biomedical research & Design

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
Prerequisite: BMST 3000 and BMST 3001. Students participate in novel, topical research and design projects that are related to ongoing research interests of the faculty. Students will collaborate as a team to solve authentic problems that are inherently interdisciplinary with Biomedical Science implications. This is part of a 2 semester course. In this course, students participate in an original science investigation. Students will be mentored but are expected to manage the project, write papers, present, and communicate their results to the professional community. Project topics will vary each semester depending on the Instructor. Shares lecture with BMST 5093, with additional expectations for graduate credit.

CE4015 - Green Building

General

Course Title
Green Building

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
Green building is an emerging interdisciplinary field at the intersection of environmental, civil, and construction engineering as well as architecture. This course takes an engineering approach to evaluating green building techniques and materials, their environmental impacts, and their economics. We examine the built environment from inside to out in looking at minimizing environmental impacts. Energy use and efficiency are key concerns. The course will help prepare the students to take the Leadership in Energy and Environmental Design accreditation exam—an important program and credential in this field. (shares lectures with CEE 5015 with additional expectations for graduate credit)

CE4016 - Non-Destructive Testing & Structural Health Monitoring

General

Course Title
NDT & SHM

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
This course will cover two aspects of existing structures: investigating in situ conditions and monitoring changes in those conditions over time. Structural health monitoring (SHM) topics include: monitoring strategies, long and short term SHM, sensor types (vibration, temperature, strain), error and uncertainty propagation, interpreting and presenting monitoring results, and case studies of SHM projects. Many aspects of SHM utilize nondestructive testing and evaluation. We will also cover the methods, use, and analysis of data from nondestructive test methods, including ultrasonic, rebound, electrical, magnetic, radar, and visual methods, through a number of case studies and discussions. CEE5004 - Reinforced Masonry and Timber

General
Course Title
Reinforced Masonry and Timber

Academic Level (Course Level)
Graduate

Course Description
Reinforced masonry design topics covered include: the properties and performance of Masonry Materials; design criteria and methods in reinforced masonry; and design examples including reinforced masonry walls, masonry columns and pilasters, and rectangular beams. Timber topics covered include: design of beams, columns, trusses, and diaphragms in wood; design of glue laminated beams; design of wood connections; use of timber design codes and the International Building Code (IBC). (cross-listed with CE 4010; additional course expectations for graduate credit)

CEE5005 - Infrastructure

General

Course Title
Infrastructure

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
Infrastructure systems have been deteriorating at an alarming rate and resources available for their rehabilitation or replacement have been limited. This course considers the current challenges to managing infrastructure. It focuses on current issues and through case studies addresses: the social, economic and political importance of infrastructure, the ASCE Report Card and its purposes, planning approaches economic and other strategies for comparing infrastructure alternatives, sustainability, risk, and resilience). (cross-listed with CE 4003; additional course expectations for graduate credit)

CEE5009 - Adv Des of Concrete Structures

General

Course Title
Adv Des of Concrete Structures

Academic Level (Course Level)
Graduate

Course Description
This course will cover two aspects of existing structures: investigating in situ conditions and monitoring changes in those conditions over time. Structural health monitoring (SHM) topics include: monitoring strategies, long and short term SHM, sensor types (vibration, temperature, strain), error and uncertainty propagation, interpreting

When Offered
Spring

and presenting monitoring results, and case studies of SHM projects. Many aspects of SHM utilize nondestructive testing and evaluation. We will also cover the methods, use, and analysis of data from nondestructive test methods, including ultrasonic, rebound, electrical, magnetic, radar, and visual methods, through a number of case studies and discussions. (shares lectures with CE 4009 with additional expectations for graduate credit)

CEE5010 - Advanced Water Chemistry

General

Course Title
Advanced Water Chemistry

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
Advanced study of physical and organic chemistry as applicable to natural water bodies and water and wastewater treatment. Chemical cycles, equilibrium chemistry, chemical thermodynamics, reaction kinetics, precipitation and dissolution, oxidation and reduction, colloidal and surface chemistry, complexation phenomena, electroneutrality, mass balances, and transport and fate of chemical species. Relevance of these topics to water quality control are discussed.

CEE5013 - Air Resources Engineering

General
Course Title
Air Resources Engineering

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
Sources, behavior, and fate of gaseous and particulate air pollutants. Principles of meteorology and atmospheric diffusion in relation to modeling pollutant transport and dispersion. Design of air pollution control equipment for removal of gases and particles from air streams. Unit operations examined include cyclones, electrostatic precipitators, fabric filters, wet scrubbers, incinerators, biofiltration, adsorbers, and absorbers. In the laboratory section, students will develop an air permit, and complete projects using dispersion modeling and air pollution engineering software. Graduate students complete an additional project and a classroom presentation. Shares lecture with ENVE 4013, with additional expectations for graduate credit.

CEE5014 - Energy & Environment

General
Course Title
Energy & Environment

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
This course takes an engineering approach to evaluating energy systems and their environmental impacts. Particular attention is focused upon multimedia environmental impacts to land, water, air, and climate -- all energy sources. In the beginning, students review the fundamental principles of energy, heat, work, power and efficiency. The students apply these concepts of physic, chemistry, thermodynamics, heat transfer, and economics in evaluating various energy systems. Student evaluate major energy resources including advanced fossil-fuel, renewables, energy efficiency and conservation techniques, and nuclear power systems. The course also explores the full gamut of energy end uses as well -- electrical, space heating and cooling, transportation, and lighting. The course emphasizes group project work and includes a special project for graduate credit. Shares lecture with ENVE 4014, with additional expectations for graduation credit.

CEE5015 - Green Building

General

Course Title
Green Building

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
Green building is an emerging interdisciplinary field at the intersection of environmental, civil, and construction engineering as well as architecture. This course takes an engineering approach to evaluating green building techniques and materials, their environmental impacts, and their economics. We examine the built environment from inside to out in looking at minimizing environmental impacts. Energy use and efficiency are key concerns. The course will help prepare the students to take the Leadership in Energy and Environmental Design accreditation exam—an important program and credential in this field. (shares lectures with CE 4015 with additional expectations for graduate credit)

CH E1010 - Intro to Chemical Engineering

General
Course Title
Intro to Chemical Engineering

Academic Level (Course Level)
Undergraduate

Course Description
Students will gain fundamental engineering skills that apply to all engineering disciplines through problem and cooperative based learning exercises and attain a clear understanding of what chemical engineers practice versus other engineering disciplines, in both traditional and contemporary work environments and careers. This course will introduce engineering calculations such as material

and energy balances, cost analysis, and engineering software programs. The lab focuses on firsthand experience of engineering design, calculations, and simulations using Chem CAD, Lab VIEW, and Excel. Additionally, data acquisition and analysis will be introduced. Small teams will design, build, and test a system, resulting in a written report, oral presentation, and design competition.

CH E4065 - Catalyst Charactrzn Techniques

General

Course Title
Catalyst Charactrzn Techniques

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
The course provides an overview of techniques used to characterize catalytic materials including data analysis and linking physical and chemical properties to catalytic activity at the laboratory and process level. Topics include x-ray methods, neutron scattering methods, physical adsorption, chemical adsorption, temperature programmed techniques, photoelectron spectroscopy, vibrational spectroscopy, and electron microscopy.

CH E4074 - Polymer Processing & Character

General

Course Title
Polymer Processing & Character

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
The basics of rheology, calorimetry and mechanical testing are covered. A specific polymer is used (e.g., an epoxy) throughout the course and the processing of this polymer is covered. Students are expected to acquire a working knowledge of the instrumentation and analysis tools used in the course. These include rheometers, calorimeters, and mechanical testing. The primary analysis tool is Kaleidagraph software.

CH E4075 - Explosives Surety

General

Course Title
Explosives Surety

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
An introduction to explosives and other energetic materials. The basic chemical compositions, properties and environmental effects of commercial, military, and improvised (terrorist) explosives and some pyrotechnics will be compared. The basic physics of shock waves and detonation. Explosive effects, blast detection, tagging and environmental issues. Case studies or recent bombings will be used to describe a variety of terrorist approaches. Safety in handling of explosive materials and classifications for transportation and storage. (Same as EXPL 4014.)

CH E4076 - Drug Delivery Techniques

General

Course Title
Drug Delivery Techniques

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
Focus is on current developments in drug delivery techniques, with only a brief discussion of common clinical techniques. The first portion of the class focuses on various delivery mechanisms and the tools needed to validate successful targeted drug delivery (both in vitro, in vivo and diagnostic tools). The second part of the course focuses on current developments in drug delivery based on published research articles. Students will read, digest, and critically analyze scientific work from leading research laboratories. Students will also gain valuable communication tools, as each student will present an article of interest to the class. Finally, the third part of the course focuses on important Materials characterization methods such as biological sample prep, SEM, TEM, DSC, Flow Cytometry, Fluorescence Microscopy, ELISA Assays. Shares lecture with MTLS 576 with additional expectations for graduate credit.

CH E4081 - Modeling in Advanced Materials

General

Course Title
Modeling in Advanced Materials

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
Overview of several contemporary research topics pertaining to nanomaterials for energy, environment and electronics. Lectures are focused on general modeling approaches to characterize the nanomaterials, which can have a significant impact on our quality of life. Relevant physical concepts, computational methods, and simulations on parallel computers are also introduced. Special attention are given to point out how methods learned during this course are applied in current frontier research in nano Materials for various applications. Along with the lectures, the course also includes in- class implementation workshops of some of the computational methods using relevant software packages.

Course Description
An overview of the fundamental concepts in chemistry. Topics will include a discussion of the classification of matter, the fundamental laws of chemical combination, the atomic theory and chemical bonding. The stoichiometry of chemical reactions will be presented. Several types of chemical reactions will be discussed, including precipitation reactions, oxidation-reduction reactions and acid-base reactions. Topics in organic and biochemistry will also be considered. Lectures will include numerous examples and demonstrations of chemical principles. Extensive laboratory exercises will further illustrate concepts discussed during the lecture hours.

Prerequisite: CHEM 1225 passed with grade C- or better

Complete ALL of the following Courses:
- CHEM1225 - General Chemistry II

Additional Comments:

No Requirement Level

CHEM3011 - Quantitative Analysis

General

Course Title
Quantitative Analysis

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
Fundamental theory and techniques in traditional chemical analysis. Emphasizes sampling and separation methods, measurement, statistics, volumetric and gravimetric analysis, equilibrium and pH studies, basic electrochemical techniques, and introduction to instrumentation.

When Offered
Fall

Equivalent Courses: Previous & Current Courses
CHEM311

Grade Modes
Audit, Pass/Fail, Standard Letter

CHEM3031 - Physical Chemistry I

General

Course Title
Physical Chemistry I

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
Study of the fundamental principles of thermodynamics applied to equilibria, physical states, electromotive force, solution phenomena, and reaction kinetics. Study of physical state properties.

When Offered
Fall

Equivalent Courses: Previous & Current Courses
CHEM331

Grade Modes
Audit, Pass/Fail, Standard Letter

CHEM3041 - Survey of Biochemistry

General

Course Title
Survey of Biochemistry

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
Foundational course in biochemistry. Topics include the chemical basis of life; organizational complexity of biological systems; structure, nomenclature, and reactions of biomolecules (carbohydrates, lipids, proteins, nucleic acids, and enzymes); and an overview of metabolic pathways, regulatory mechanisms, and driving forces.

When Offered

CHEM3043 - Descriptive Inorganic Chemistry

General

Course Title
Descriptive Inorganic Chem

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
Introduction to inorganic chemistry with a focus on fundamentals of atomic/ molecular structure and descriptive inorganic chemistry. The course explores the structures and geometries of small molecules, including their symmetry, as well as bonding theories for both inorganic molecules and the solid state. Survey of main group and transition metal chemistry.

CHEM5055 - Research Proposal Writing

General
Course Title
Research Proposal Writing

Academic Level (Course Level)
Graduate

Course Description
Students will develop an original research proposal required for their candidacy examination. The written research proposal should involve a topic, which is distinct from the student's dissertation research problem. As a partial fulfillment of CHEM 5055, students are required to present a 45-minute public seminar on the original proposal. Proposal seminar will not satisfy the graduate seminar requirement (CHEM 5029/5030). Following the seminar, the student will defend the proposal to his or her dissertation or thesis committee. CHEM 5055 will be offered in Fall and Spring semesters. Students are recommended to consult the graduate handbook for details.

Graduate, Undergraduate

Course Description
Prerequisites: COMM 1130 or consent of instructor and advisor. Theory and practice of ethical and professional speech communication. Researching, writing, and presenting professional presentations. Designing and using effective visuals, including posters and electronic presentation aids. Conducting group presentations and discussions about ethical and cross-curriculum issues in historical, cultural, and workplace context.

COMM5080 - Thesis & Dissertation Boot Camp

General

Course Title
Thesis&Dissert Boot Camp

Academic Level (Course Level)
Graduate

Course Description
Boot Camp is a weeklong, intensive course on thesis-writing. Students receive short workshops on time-management and project planning, strategies for overcoming writer's block, peer review, and graduate school thesis requirements (e.g., formatting, copyright, etc.). Additionally, students spend 5-6 hours a day in aree writing environment and have opportunities for feedback from the Instructor or available writing consultants.

CSE113 - Introduction to Programming

General

Course Title
Introduction to Programming

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
The course is designed to introduce problem solving and programming in C to Computer Science majors and those interested in applications of the language that involve dynamic structures and memory management. Topics include algorithm development; top-down design; modular programming; debugging; testing; control structures including selection, iteration and recursion; number systems; data representation; data types including arrays, strings, pointers and dynamic structures involving memory management. Concepts implemented through extensive programming using good programming style. (Same as IT 113.)

CSE117 - Data Structures in Python

General

Course Title
Data Structures in Python

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
Using objects, lists, tuples, and dictionaries to implement data structures such as trees and graphs. Algorithms for sorting, searching, and other fundamental operations. Introduction to mathematical foundations for analysis of iterative and recursive algorithms and for basic correctness proofs. The math skills used in the algorithm analysis (e.g., series, inductive proofs) will be included in the course. Implementation of selected algorithms for different applications (e.g., data science, cybersecurity) using sound programming methodologies. (same as IT 117)

CSE3021 - Internet and Web Programming

General
Course Title
Internet and Web Programming

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
This course has a practical emphasis on the design and techniques for developing internet-based applications, mainly focusing on web programming. Topics include HTML, client-side scripting language (JavaScript), server-side programming (e.g., Servlets, JSP, and J2EE), and XML/web services (e.g., Java and .NET). This course will also cover some important topics needed for internet-based application development, such as Internet architectures, basic

object-oriented programming (OOP) concepts, and web security. Course work includes substantial programming homework and team-based projects. (Same as IT 3021.)

CSE3024 - Principles of Programming Languages

General
Course Title
Princ of Programming Language

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
Introduction to low (micro/macro) and high level languages (L/HLLs) -- features and positions within the computer system, definition of HLLs of syntax and semantics. Data types, control structures, concurrency, declarations, procedures. Recursion and recursive definitions. Procedural and data abstraction. Critique of major programming languages features and design issues (e.g., power, efficiency, security, modularity, readability, etc). Examples from major realms of current programming languages -- imperative (block structured, object oriented), declarative (function, logic) paradigms.

CSE3025 - Principles of Operating Systems

General
Course Title
Princ. of Operating Systems

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
This course provides an introduction to the fundamentals of operating systems and their components. Topics include processes and threads, process scheduling, process synchronization, deadlocks, memory management, file systems, storage systems, I/O systems, security and protection, and introduction to distributed systems. Each student is expected to design and implement components of a small operating system.

CSE3053 - Introduction to Computer Networks

General

Course Title
Introduct to Computer Networks

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
Introduction to computer networking, the ISOOSI protocol stack, LAN, MAN, and WAN. Physical layer: transmission media (wireline and wireless); data signaling, modulation, and coding; multiplexing. Fiber optics networking technology: protocols & examples. Data link Layer: error/flow control— protocols design issues; MAC protocols for channel access and allocation. Wireless technology and protocols standards — IEEE 802.11 physical layer and MAC sublayer protocols. Network layer: subnet switching (CS/DG/VC) & routing protocols (Non/Adaptive); Congestion Control and QoS protocols. ISO vs. (TCP-UDP)/IP the Internet protocol stacks. Internet relays and protocols, e.g., routers, gateways, etc. Introduction to network security. Application layer protocols, E.G., DNS, E-mail, etc. (Same as IT 3053.)

CSE3082 - Ethical and Social Issues in Computing and Information Technologies

General

Course Title
Ethical/Social Issues Comp/IT

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
In this class, students will examine ethical and social questions regarding computing and information technologies. The course challenges students to think about connections among digital technologies, the responsibilities of information technology professionals, and social justice as they study topics such as social media, military applications of digital media, gendered technologies, and access to information technologies. In addition to learning the basics of research ethics and social responsibility, students will examine real-world debates regarding subjects like big data, computer code, and digital networks, and they will analyze the legal, political, and social stakes of information technologies. (Same as IT 3082and PHIL 382) This course may be used to satisfy 3 credit hours of the General Education Area 5 requirements.

CSE4052 - Introduction Sensor Networks

General

Course Title
Introduction Sensor Networks

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
Introduction to sensory technology with special focus on wireless sensor networks (WSNs) applications, topologies, deployment, sensed data manipulation, mobile ad-hoc wireless communication, security. Low power consumption and data rates WSNs protocols (e.g., ZigBee/IEEE808.15.4). Students will get familiar with sensor nodes' hardware (motes and sensor boards) and programming (Tiny OS and ZigBee application objects) via a set of practical lab/field experiments that covers the design, implementation, deployment, and data collection/analysis of some actual WSNs data/vent acquisition systems (e.g., environment monitoring, remote asynchronous event detection–forest fire, border intrusion, tsunami, earthquake, volcanic activities, etc).

CSE4053 - Advances in Computer Networks & Internet

General

Course Title
Advances Comp Network&Internet

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
In depth coverage of layering of protocols' stacks (ISOOSI and TCP/IP) and computer networks architectures, modern examples of LANs, MANs, WANs protocols/architectures. Recent developments in Fiber optics technology — protocols and architectures. High speed "all-fiber-optics" networks. Internetworking: global addresses/names and translation, virtual networks and tunnels, routing, subnetworks switching protocols, IPv6, multicasting. Mobile IP. End-to-end protocols, TCP and UDP. Advances in congestion control and resource allocation. Client-server models & applications. The QoS mechanism integrated/differentiated), ATM QoS. Network security: information and link security, encryption, internetworking security, IPsec, firewalls, VPN, wireless security. Analysis of networks protocols. (Same as IT 4053.)

CSE5032 - Fault-Tolerant Computing

General

Course Title
Fault-Tolerant Computing

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
Techniques for design of fault-tolerant digital devices with on-line self-error-detection and self-error-correction. Fault-tolerant PLAs, gate arrays, and computer memories. Fault-tolerant computer architectures. Application of error-detecting and error-correcting codes for design of reliable devices with self-error detection/correction. Design of self-checking checkers. Combining on-line and off-line error-detecting techniques. Reliability analysis of fault-tolerant devices. Self-error detection/correction for multiprocessors.

CSE5041 - Advanced Cryptography

General

Course Title
Advanced Cryptography

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
This course provides an overview of modern cryptographic theory and techniques, mainly focusing on their application into real systems. Topics include number theory, probability and information theory, computation complexity, symmetric and asymmetric cryptosystems, one-way functions, block and stream ciphers, Kerberos authentication systems, public key infrastructure (PKI), secure socket layer/transport layer security (SSL/TLS), and cryptographic protocols/ applications in many real systems. Shares lecture with CSE 4041, with additional expectations for graduate credit

CSE5046 - Theory of Computation

General

Course Title
Theory of Computation

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
Effective computability of functions and sets in terms of Turing machines and other computational models. Universal machines and examples of unsolvable problems. The Church-Turing thesis and formal proofs of the equivalence of Turing machines, systems of recursion equations, and other models of computation. Mathematical properties of the classes of recursive functions. Recursive and recursively enumerable sets.

CSE5051 - Advanced Parallel Processing

General

Course Title
Adv. Parallel Processing

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
This course focuses on the application of models of parallel computation, parallel algorithms, synchronization, parallel languages, parallel performance analysis, and parallel debugging to large problems and complex systems. Topics include: integrating data and shared memory parallelism, multilevel domain decompositions, portability, and scalability. Student will parallelize and analyze the performance of a complex system or application.

CSE5054 - Computer Network Security

General

Course Title
Computer Network Security

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
This course will explore each layer of the internet protocol stack, focusing on security deficiencies, and remedies to those security deficiencies, and will involve extensive lab exercises using the Deter Lab shared testbed (accessed via the Internet to enable distance education participants). It will study computer network security architecture and security mechanisms to protect against sophisticated adversarial attacks. This course reviews cryptographic primitives that underlie most network security mechanisms, then applies this understanding to network services proving authentication for data and transaction integrity and availability, and encryption for confidentiality. It also covers the integration of security services into network applications and utilities including secure mail, secure web services, secure wireless, and investigates system security issues such as for firewalls and intrusion detections systems.

CSE5057 - Hardware-Based Network Security

General
Course Title
Hardware-based Network Securit

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
This course will cover networking protocols, cryptography, and network security from the hardware implementation perspective. Topics include security of ND, NAT, IPSEC and other specialized IPv6 protocols in support of IoT functionality. The focus will be on implementation of security policy enforcement mechanisms in IPv6 network protocols in a Field Programmable Gate Array (FPGA) platform to protect an IoT application against sophisticated adversaries. Lab exercises using a FPGA platform will enable investigation of hardware-based security technologies such as the use of Physically Unclonable Functions that are not otherwise accessible from software.

CSE5061 - Foundations of Information Security

General
Course Title
Foundtns of Informatn Security

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
This course will explore the ideas, literature, and worked examples that established the foundations of information security. The course introduces the concept of the Information Domain as the fundamental primitive that is the axis for introducing the policy requirements of Confidentially, Integrity and Availability that motivate the need for Information Security. The concept of the reference monitor is the organizing principle for the course. The examination of foundational literature starts with appears and ideas that first appeared in the mid 1960's and spans the time of tremendous creativity up through the following four decades.

CSE5064 - Secure Systems Administration

General

Course Title
Secure Systems Administration

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
This course is primarily a Laboratory based course. The intention of the course is to give the students an experience of administering an IT system for a hypothetical business with the IT system experiencing increasingly aggressively sophisticated cyber-attacks. They are expected to build a business plan for the hypothetical business, a policy-based IT protection plan that they then implement on the host machines and networks in the laboratory. Simultaneously the adversary builds an exploitation plan that attempts to defeat the business's IT protection implementation and is able to achieve his/her exploitation objectives. The adversary has access to any/all exploit technology available, but there is a moderating factor of cost associated with the exploitation technology. The defenders have access to protection technology, but again there is a mitigating cost factor associated with the protection technology . The objective of the class is to experience and learn the capabilities an effectiveness of both defensive and exploitative technology with an appreciation of the need for policy and planning that directs, supports, and constrains the actions of both sets of actors. (This course cannot be offered via Distance Education.)

General

Course Title
Data Science for Cybersecurity

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
Data assembly, exploration, analysis, visualization, and inference. Python libraries such as NumPy, Pandas, and scikit-learn. Students are expected to explore problems related to cybersecurity threats, risks, and incidents that are important for businesses to become safer and less vulnerable to cyberattacks. Students must communicate and present their findings and results. Every student must complete at least one hands-on project. Prior knowledge of probability and statistics at the undergraduate level is assumed. Assumes experience with programming; experience with Python is recommended.

CYBS5006 - Cyber Physical System Security

General

Course Title
Cyber Physical System Security

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
In this course we investigate security threats and countermeasures for cyber physical systems (CPS). Many of our critical infrastructure is built around CPS and as such they become targets for security attacks. The course will focus on attacks that target confidentiality, integrity and/or availability of CPS and how to mitigate them. Sample topics include but are not limited to network attacks, wireless/GPS exploitation, jamming and spoofing, and risk identification and management.

CYBS5009 - Cybersecurity Risk Analysis & Management

General

Course Title
Cybersecurity Risk Analy & Mgt

Academic Level (Course Level)
Graduate

Course Description
This course covers cybersecurity risk analysis and management for information systems. Topics include: threat modeling and analysis; quantitative and qualitative risk assessment; vulnerabilities, threats, witted adversaries, exploits, and mitigations; asset and inventory management; impact analysis, business continuity planning, and disaster recovery planning. Emphasis is placed in risk management analysis and its implications on IT infrastructures and compliance. Students will demonstrate effective application of the three pillars of confidentiality, integrity, and availability using threat modeling, risk assessment and mitigation as a basis for cybersecurity risk management planning in various simulated or real environments.

CYBS5014 - Computer Security & Incident Response

General

Course Title
Comp Sec & Incident Response

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
This course covers what computer security incidents are and how to respond to an incident. Computer security incident case studies serve as the backbone of the course allowing students to analyze these case studies and determine how they were handled through process and technical analysis. Topics covered are data sources for incident detection and response, incident data analysis and incident remediation. Analysis areas covered are network event analysis, malware analysis and computer forensics for computer security incidents.

This course will explore each layer of the internet protocol stack, focusing on security deficiencies, and remedies to those security deficiencies, and will involve extensive lab exercises using the Deter Lab shared testbed (accessed via the Internet to enable distance education participants). It will study computer network security architecture and security mechanisms to protect against sophisticated adversarial attacks. This course reviews cryptographic primitives that underlie most network security mechanisms, then applies this understanding to network services proving authentication for data and transaction integrity and availability, and encryption for confidentiality. It also covers the integration of security services into network applications and utilities including secure mail, secure web services, secure wireless, and investigates system security issues such as for firewalls and intrusion detections systems. (Same as CSE 554.)

CYBS5057 - Hardware-Based Network Security

General

Course Title
Hardware-Based Network Securit

Academic Level (Course Level)
Graduate

Course Description
This course will cover networking protocols, cryptography, and network security from the hardware implementation perspective. Topics include security of ND, NAT, IPSEC and other specialized IPv6 protocols in support of IoT functionality. The focus will be on implementation of security policy enforcement mechanisms in IPv6 network protocols in a Field Programmable Gate Array (FPGA) platform to protect an IoT application against sophisticated adversaries. Lab exercises using a FPGA platform will enable investigation of hardware-based security technologies such as the use of Physically Unclonable Functions that are not otherwise accessible from software. (Same as CSE 557.)

CYBS5061 - Foundations of Cybersecurity

General

Course Title
Foundations of Cybersecurity

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
This course will explore the ideas, literature, and worked examples that established the foundations of information security. The course introduces the concept of the Information Domain as the fundamental primitive that is the axis for introducing the policy requirements of Confidentiality, Integrity and Availability that motivate the need for Information Security. The concept of the 225 reference monitor is the organizing principle for the course. The examination of foundational literature starts with papers and ideas that first appeared in the mid 1960's and spans the time of tremendous creativity up through the following four decades. (Same as CSE 561.)

CYBS5064 - Secure Systems Administration

General

Course Title
Secure Systems Administration

Academic Level (Course Level)
Graduate

Course Description
This course is primarily a Laboratory based course. The intention of the course is to give the students an experience of administering an IT system for a hypothetical business with the IT system experiencing increasingly aggressively sophisticated cyber-attacks. They are expected to build abusiness plan for the hypothetical business, a policy-based IT protection plan that they then implement on the host machines and networks in the laboratory. Simultaneously the adversary builds an exploitation plan that attempts to defeat the business's IT protection implementation and is able to achieve his/her exploitation objectives. The adversary has access to any/all exploit technology available, but there is a moderating factor of cost associated with the exploitation technology. The defenders have access to protection technology, but again there is a mitigating cost factor associated with the protection technology. The objective of the class is to experience and learn the capabilities an effectiveness of both defensive andexploitative technology with an appreciation of the need for policy and planning that directs, supports, and constrains the actions of both sets of actors. This course is not offered via Distance Education. (Same as CSE 564.)

Course Description
The course is designed to generate a student's general understanding of education theory. In this course, students will focus on understanding learner development, differences and how those impact student learning and achievement. Students will research different styles and modalities of learning, as well as instructional practice and strategies that support differing types of learning. During this time, students will also examine the impact the learning environment plays in overall student achievement.

Course Title
Effective Reading for Div Lear

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
Prerequisites/Co-requisites: EDUC 340 or departmental waiver. This course teaches key strategies to differentiate instruction in reading as a response to the needs of all learners including those differing in experience, readiness, interests, educational experiences, ability, language, culture, gender, and mode of learning. Course competencies reflect the national and state standards for secondary literacy instruction. Explicit reading instruction using research-based methods will provide guidance for education students to practice different instructional techniques for learning experiences that are accessible for the diverse needs of learners which include a Response Through Intervention (RTI), Students with Disabilities (SWD, and English Language Learners (ELL). The emphasis for differentiation will be reading in the secondary classroom in various content areas. Field observations in local classrooms is a key component of this course where students will reflect on student learning and classroom environment in their discipline.

Assessments and Measurement

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
Prerequisites/Co-requisites: PSYC 1110 or EDUC 340 or departmental waiver. Evaluation and data-driven curriculum revision. Educational and psychological tests and measurement. Classroom management as it relates to differentiated instruction. Field observation assignments that takestudents to local district classrooms. (Cross-listed as PSYC 405.)

EDUC5006 - Teaching and Assessing Reading

General

Course Title
Teaching and Assessing Reading

Academic Level (Course Level)
Graduate

Course Description
Prerequisites/Co-requisites: EDUC 3040 or EDUC 3042 or departmental waiver. This course will provide a research-informed knowledge base for teaching reading and applying it by practicing with sample lessons from the text. Instruction begins with an introduction to both English and Spanish language structure and moves through the stages of reading acquisition beginning with early literacy, decoding and word recognition, and through the essential components that lead to fluency and comprehension in literary and informational texts. The structure of an effective reading assessment system designed for the progression of reading and how to create a diagnostic plan from the results will be an integral part of this course.

Supervised Field Experience

Academic Level (Course Level)
Graduate

Course Description
Prerequisites/Co-requisites: EDUC 501 and EDUC 503 or departmental waiver. Consent of a public school principal and permission from program coordinator or department chair. This course will apply the theories from all previous coursework to student teaching/Alternative Licensure (ALP) teaching in a local public school. Students will experience all aspects of teaching via supervised field experience. Students are required to meet In TASC/NM teacher competencies through a minimum of 16 weeks of structured student teaching in an approved educational setting (grades 7-12). They must also assume all required teacher duties as appropriate including; lesson planning, assessment, individualized instruction, parent-teacherconferences, IEP/grade-level/ department meetings, professional development, etc.

Course Title
Capstone Design I

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
Student design teams begin an academic year long capstone design project under the supervision of a faculty advisor. Topics include: team building, design requirements and documentation, detailed planning, identification of project needs and establishment of goals leading toward the successful completion of the project, periodic design reviews and reports, applications of engineering skills, project management and formal presentations. Successful completion of the project requires the application of electronics, applied physics, numerical computation, signal processing, other electrical engineering techniques to real world engineering problems, and related topics.

Course Description
Fundamentals of the multi-disciplinary field of robotics. Emphasis is placed on understanding how to model and control robotic manipulators while providing an appreciation of the importance of sensing to robotic applications. Topics include: forward, inverse, and motion kinematics; dynamic modeling; position, velocity, and force control.

EE5051 - Discrete-Time Signals

General

Course Title
Discrete-Time Signals

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
The fast-Fourier transform and its computer implementation; spectral estimation; analytic signals; multi-dimensional signal processing; digital filters. Signal detection and estimation, Kalman Filters, linear predictive coding, and adaptive filters. Project(s) include the design and implementation of a Kalman filter for GPS data processing and LPC for speech recognition.

EE5060 - Electronic Warfare

General

Course Title
Electronic Warfare

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
Explores the various aspects of Electronic Warfare (EW) from the standpoint of both the user and the attacker. The course begins with a definition of terms such as Electronic Support (ES), Electronic Protection (EP), Electronic Attack(EA), and Electronic Counter-Counter Measures (ECCM). The primary emphasis is on the impact of EW techniques on radar and communication systems.

EMGT5003 - Information Systems in Technology Organizations

General

Course Title
Info Systems in Tech Org

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
The role of information systems in the decision processes of data- and technology-intensive organizations. Topics include methodology for database design; models for business processes and workflows; approaches for data analytics and prediction; and ethical and social impacts of information systems. The course involves some hands-on experience with systems such as Oracle or a similar industry-standard DBMS (Data Base Management System). This course shares lectures with MGMT 4003, with additional requirements for graduate credits, such as term paper.

EMGT5004 - Engineering Statistics

General

Course Title
Engineering Statistics

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
This course is designed to provide engineering managers with a basic foundation for data-driven decision making. Decisions by modern engineering managers increasingly require a range of statistical skills including gathering and describing data, designing samples and experiments, drawing statistical inferences and conclusions, evaluating the confidence of conclusions, developing regression models for anticipating future behavior, and use of statistical quality control and six Sigma to drive process improvement. All of these important capabilities must be utilized by a technical manager to make informed decisions.

g:Ecotopia Science & Literatur

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
Prerequisite: ENGL 1120 or consent of Instructor and Advisor. Utopian Literature, whether Paradise myths or novels set on an idyllic island or in the future, chronicles human aspirations for a better society. Ecotopia—a neologism coined in 1968– combines utopian desires for better relationships between humans with more recent desires and need for a better relationship with the environment. The course provides a review of utopian literature throughout history and focuses on contemporary science fiction novels and developments in architecture, technology, science, and alternative social structures. Shares lecture with ENGL 524, with additional expectations for graduate credit.

General

Course Title
g:Technical Writing

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
Prerequisites: ENGL 1110 and 1120 or the equivalent passed with a grade C or better and at least junior standing. This course emphasizes clear, accurate, and precise communication and presentation of scientific and technical information to a variety of audiences, for a variety of purposes. Students will be taught how to effectively analyze the components of writing situations and appropriately conduct research; write content in a professional, yet accessible style; incorporate visuals; and organize and format documents. The course culminates with a substantial technical research report and oral presentation. In addition, students work on writing documents including memos, proposals, short reports, and instructions.

Course Title
Ecotopia: Science & Literature

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
Prerequisite: Graduate Standing or consent of Instructor and Advisor. Utopian Literature, whether Paradise myths or novels set on an idyllic island or in the future, chronicles human aspirations for a better society. Ecotopia—a neologism coined in 1968– combines utopian desires for better relationships between humans with more recent desires and need for a better relationship with the environment. The course provides a review of utopian literature throughout history and focuses on contemporary science fiction novels and developments in architecture, technology, science, and alternative social structures. Shares lecture with ENGL 324, with additional expectations for graduate credit. Shares lecture with (400-level version) with additional expectations and assignments for graduate credit.

ENVE4014 - Energy & Environment

General

Course Title
Energy & Environment

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
This course takes an engineering approach to evaluating energy systems and their environmental impacts. Particular attention is focused upon multimedia environmental impacts to land, water, air, and climate -- all energy sources. In the beginning, students review the fundamental principles of energy, heat, work, power and efficiency. The students apply these concepts of physic, chemistry, thermodynamics, heat transfer, and economics in evaluating various energy systems. Student evaluate major energy resources including advanced fossil-fuel, renewables, energy efficiency and conservation techniques, and nuclear power systems. The course also explores the full gamut of energy end uses as well -- electrical, space heating and cooling, transportation, and lighting. The course emphasizes group project work and includes a special project for graduate credit. Shares lecture with ENVE 514, with additional expectations for graduation credit.

General

Course Title
Intro to Engineering Design

Academic Level (Course Level)
Undergraduate

Course Description
Students will be introduced to the profession of engineering and gain fundamental engineering skills with an emphasis on engineering design and problem solving. Topics include problem definition, presentation of a solution, the engineering design process, working in a team environment, engineering graphics by hand and in SolidWorks, graphical solutions, and simple modeling in Microsoft Excel. Students will learn the process of designing, building, modeling, and optimizing a system through a semester-long project.

ES3032 - Electrical Engineering

General
Course Title
Electrical Engineering

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
Introduction to the fundamentals of electronics and circuits for applications (e.g., instrumentation, control systems and power systems) encountered by engineers. Techniques for analysis to determine voltages, currents and power are based on Kirchhoff's Laws, and include mesh and nodal analysis. Devices considered are resistors, inductors, capacitors, independent sources, dependent sources, diodes, operational amplifiers, digital-to-analog converters and analog-to-digital converters. Circuits addressed will contain constant (DC) sources, switched sources and sinusoidal (AC) sources, for which appropriate techniques will be developed and applied to determine responses in voltage, current and power.

GEOC5046 - Contaminant Hydrology

General

Course Title
Contaminant Hydrology

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
The physics, chemistry, and biology of inorganic, organic, and microbial contaminants in groundwater and surface water systems. Mechanisms by which contaminants are introduced. Transport and transformations of contaminants in surface waters, the vadose zone, and the saturated zones. Movement, capillary trapping, and solubility of relatively immiscible organic liquids. Contaminant isolation and remediation techniques. (Same as HYDR 5046.)

GEOC5048 - Crustal Fluids

General

Course Title
Crustal Fluids

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
This course is an advanced geochemistry class covering physicochemical properties of hydrothermal fluids, phase diagrams, melts, fluid-melt immiscibility, stable and radiogenic isotopes applied to crustal fluids. This course integrates lectures on the basic principles in geochemistry and thermodynamics with applied examples of published research articles presented by students relevant to a broad range of crustal fluids (i.e, hydrothermal ore-forming fluids, geothermal fluids, metamorphic fluids, basinal brines and sedimentary formation waters and melts). Workshops focus on practical skills such as using the GEM-Selektor geochemical modeling software for simulating fluid chemistry and fluid-rock reaction and learning about fluid inclusion microthermometry and

Raman spectroscopy, which provide measurements of physical and chemical properties of crustal fluids. The featured debate focuses on a relevant topic in geochemistry fostering debate and presentation skills.

GEOL1110 - Physical Geology

General

Course Title
Physical Geology

Academic Level (Course Level)
Undergraduate

Course Description
Physical Geology is an introduction to our dynamic Earth introducing students to the materials that make up Earth (rocks and minerals) and the processes that create and modify the features of our planet. The course will help students learn how mountains are formed, how volcanoes erupt, where earthquakes occur, and how water, wind, and ice can shape the landscape. Students will also develop a basic understanding of the ways humans have altered the planet including our impact on natural resources and global climate change.

General
Course Title
Geological Disasters

Academic Level (Course Level)
Undergraduate

Course Description
This course will incorporate an overview of the geological processes that result in natural disasters and the input humans have on the amplification or mitigation of these natural disasters. We will examine past catastrophes and discuss the probability of such disasters occurring again. Hazards investigated will include, but not be limited to earthquakes, volcanoes, tsunami, hurricanes, floods, landslides, and astronomical events such as meteor and comet collisions with Earth. We will investigate the data obtained from recent disasters and explore the costs in human and economic terms.

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
GEOL 2330: Sedimentology, Stratigraphy, and Structural Geology for Petroleum Engineers Description: Overview of sedimentology, stratigraphy, and structural geology, emphasizing material relevant to petroleum engineers and other petroleum industry careers. Topics include: sediment types, sediment transport, deposition, diagenesis and lithification, controls on porosity and permeability; fault and fold types and classification; structural controls on sedimentary deposition; basic structural and stratigraphic traps; fault-zone structure and fluid flow; and elements of low-temperature geochronology. SLOs. By the end of this course, students will be able to describe or explain: 1) Sedimentary rocks, textures, structures and classifications; their resource potential, controls on porosity and permeability, and the geological history needed for formation of oil and gas 2) Geologic contact types, introductory structural geology, including 3D geometry of lines and planes as used in geology, basic geologic map interpretation, cross-section construction, classifications of faults and folds, architecture and development of extensional and contractional orogens, structural controls on sedimentary basins, effects of faulting on permeability and porosity 3) Processes required for existence of petroleum systems, basic types of conventional hydrocarbon traps, 4)The basis of isotopic dating methods and basics of their application.

GEOL3040 - Global Climate Change Origins & Impacts

General

Course Title
Glbl Climate Chnge Orig & Impa

Academic Level (Course Level)
Undergraduate

Course Description
Offered spring semesters, even-numbered yearsThis course covers the radiation budget of the Earth and how it interacts with greenhouse gases in the atmospheres to regulate global temperature. Students will obtain a basic understanding of the atmospheric dynamics of the Earth and how it is affected by interactions with the oceans, cryosphere, biosphere and lithosphere. They will learn about geologic records of past climates , the history of human modifications of the atmosphere and projections for future climate. Current and

future impacts of climate changes in human society and natural ecosystems will be evacuated. Alternative strategies for both mitigation of climate change and adaptation to its effects will be presented.

Equivalent Courses: Previous & Current Courses

GEOL3053 - Structural Geology

General
Course Title
Structural Geology

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
Offered fall semestersFundamentals of structural geology: geometry, kinematics, mechanics, and evolution of faults, folds and shear zones; geological map analysis, use of stereonets, and cross section construction; fault- and fold-control of contemporaneous sediment deposition; rocks formed in faults and shear zones, shear-sense indicators; fluid flow and fault zones; material types and constitutive relations (elastic, brittle, viscous, plastic); introduction to experimental rock mechanics; fundamentals of stress and strain; crystal plasticity and deformation mechanisms; stress fields in Earth's crust. Up to 2 required weekend field trips.

GEOL3080 - Igneous & Metamorphic Petrology

General

Course Title
Igneous&Metamorphic Petrology

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
Origin, occurrence, identification and description of igneous and metamorphic rocks. Topics covered include fractional crystallization and melting processes, physical and chemical properties of magmas, granitic batholiths, metamorphic facies and their key mineral assemblages, metamorphic rock fabrics, and qualitative determination of P-T-t paths recorded by metamorphic rocks. Binary and ternary phase diagrams will be introduced and used. Examination and identification of igneous and metamorphic rocks and minerals and their salient textures in thin section and hand samples.

GEOL4001 - Advanced Computational Methods for Geoscientists

General

Course Title
Adv Comp Meth for Geoscientist

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
Offered on demandAn advanced course on modern computational methods, techniques, and best practices for organization, manipulation, analysis, and plotting data of various origins. The course begins with a brief review of basic tools in python, including data manipulation, input/output, and plotting. This is followed by use of advanced python packages towards Geoscience applications. The course then moves into linux command line tools, version control with github, advanced map making and plotting with the Generic Mapping Toolkit (GMT). Additional topics may include website design, high performance computing, and an overview of available open-source software within the Earth Sciences. Shares lectures and labs with GEOL 5001, GEOP 5001, and GEOC 5001, with additional expectations for graduate credit.

Complete ALL of the following Courses:

- PHYS1320 - Calculus-based Physics II

AND

Prerequisites: Complete a 1000 level GEOL course and associated lab; upper-class level standing

Additional Comments:

No Requirement Level

GEOL4049 - Astrobiology

General

Course Title
Astrobiology

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
Offered spring semester, even-numbered yearsAn in–depth and interdisciplinary study of astrobiology, including interactions between living and non-living systems at multiple scales: stellar, planetary, meso, and microscopic. Addresses fundamental questions regarding the origin of life, and the possible extent and distribution of life in the universe. Combines principles of astrophysics, geosciences, planetary science, chemistry, and biology. Innovative interactive exercises and projects working in interdisciplinary groups and individually. Shares lecture with GEOL 5049, with additional expectations for graduate credit. (Same as BIOL 4049/5049)

GEOL4061 - Reservoir and Caprock Analysis

General

Course Title
Reservoir and Caprock Analysis

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
Offered on demandThe class focuses on the role of sedimentary and structural heterogeneities in controlling porosity, permeability, and fluid flow in the subsurface. Topics include controls on conventional and unconventional reservoir quality and performance, evaluating caprock integrity, and the influence of faults and fracture networks on fluid flow. Applications to petroleum geology, petroleum engineering, carbon sequestration, and hydrology. There is a

mandatory field trip associated with the class, which involves camping and moderately strenuous hiking on uneven ground. Shares lecture with GEOL 5061, with additional expectations for graduate credit.

Graduate, Undergraduate

Course Description
This class deals with quantitative remote sensing for determination of the components of the energy balance (net radiation, latent and sensible heat fluxes, soil heat flux) and soil moisture, hyperspectral and multispectral image processing, radar and microwave imagery. In addition, advanced applications for geology, geophysics and geochemistry will be discussed. Shares lecture/lab with GEOL 4036, with additional expectations for graduate credit. (Same as HYDR 5036)

GEOL5038 - GIS with Geoscience Applic

General

Course Title
GIS with Geoscience Applic

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
Advanced topics in geographic information systems (GIS) with a focus on applications in environmental sciences. Emphasis on theoretical aspects and practical applications of GIS science and technology and its integration with remote sensing data and field measurements. Computing exercises and programming projects utilizing GIS software. Discussion of GIS integration with environmental modeling. Shares lecture with ENVS 4038, with additional expectations for graduate credit. (Same as HYDR 5038)

GEOL5045 - Petroleum Exploration Geophysics

General

Course Title
Petroleum Exploration Geophysi

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
An introductory course on seismic refraction and reflection imaging of the subsurface, with applications for petroleum, crustal and environmental problems. This course covers methods of data acquisition, processing, and interpretation. Topics include: survey geometries, data editing techniques, amplitude recovery, (bandpass) filtering, deconvolution, velocity analysis and migration, well log to seismic ties, contour maps, time-to-depth conversion. Designed for students with a range of Earth science and engineering backgrounds. Shares lecture with GEOL 4045 with additional expectations for graduate credit.

GEOL5048 - Crustal Fluids

General

Course Title
Crustal Fluids

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
This course is an advanced geochemistry class covering physicochemical properties of hydrothermal fluids, phase diagrams, melts, fluid-melt immiscibility, stable and radiogenic isotopes applied to crustal fluids. This course integrates lectures on the basic principles in geochemistry and thermodynamics with applied examples of published research articles presented by students relevant to a broad range of crustal fluids (i.e, hydrothermal ore-forming fluids, geothermal fluids, metamorphic fluids, basinal brines and sedimentary formation waters and melts). Workshops focus on practical skills such as using the GEM-Selektor geochemical modeling software for simulating fluid chemistry and fluid-rock reaction and learning about fluid inclusion microthermometry and Raman spectroscopy, which provide measurements of physical and chemical properties of crustal fluids. The featured debate focuses on a relevant topic in geochemistry fostering debate and presentation skills.

GEOL5049 - Astrobiology

General

Course Title
Astrobiology

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
An in-depth and interdisciplinary study of astrobiology, including between living and non-living systems at multiple scales: stellar, planetary, meso, and microscopic. Addresses fundamental questions regarding the origin of life, and the possible extent and distribution of life in the universe. Combines principals of astrophysics and astronomy, geosciences and planetary science, chemistry and bioscience. Innovative interactive exercises and projects working in interdisciplinary groups and individually. Shares lecture with GEOL/BIOL 4049 (astrobiology), with additional expectations for graduate credit. Same as GEOC 5049.

GEOL5061 - Reservoir and Caprock Analysis

General
Course Title
Reservoir and Caprock Analysis

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
The class focuses on the role of sedimentary and structural heterogeneities in controlling porosity, permeability, and fluid flow in the subsurface. Topics include controls on conventional and unconventional reservoir quality and performance, evaluating caprock integrity, and the influence of faults and fracture networks on fluid flow. Applications to petroleum geology, petroleum engineering, carbon sequestration, and hydrology. There is a mandatory field trip associated with the class, which involves camping and moderately strenuous hiking on uneven ground. Shares lecture with GEOL 4061, with additional expectations for graduate credit.

GEOP5001 - Advanced Computational Methods for Geoscientists

General

Course Title
Adv Comp Methd for Geoscintsts

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
An advanced course on modern computational methods, techniques, and best practices for organization, manipulation, analysis, and plotting data of various origins. The course begins with a brief review of basic tools in Python, including data manipulation, input/output, and plotting. This is followed by use of advanced Python packages towards Geoscience applications. The course then moves into linux command line tools, version control with github, advanced map making and plotting with the Generic Mapping Toolkit (GMT). Additional topics may include website design, high performance computing, and an overview of available open-source software within the Earth Sciences. Shares lectures and labs with GEOL 4001, GEOL 5001, GEOP 5001, and GEOC 5001, with additional expectations for graduate students.

GNDR2040 - g:Science & Gender

General

Course Title
g:Science & Gender

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
This course introduces students to the complex interplay between science, technology, and gender, with special attention to intersections with sexuality, race, and ethnicity. We analyze the concepts of “sex” and “gender” by critically investigating the nature/nurture debates about sex differences. The course further prompts students to think more broadly about gender in science and technology in discussions over bias, values, and scientific objectivity. Throughout the course, we also survey different critical approaches to biomedicine such as women’s health, LGBTQ health, breast cancer, HIV/AIDS, and reproductive health.

HUMN2003 - Creative Thinking and Practice

General
Course Title
Creative Thinking and Practice

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
In this course, students learn how cultivating their creativity can enhance their ability to imagine new applications of scientific principles and technologies, design new experiences and products, develop innovative solutions to complex multidisciplinary problems, or engage in exciting work in industries such as film or software development. Students study examples of how creative ideas and designs have transformed society and industries. Students familiarize themselves with principles of creativity and creative practice, learning how to apply these principles to their training in their majors. Lastly, students learn brainstorming techniques and strategies to spark their creative, outside-the-box thinking, maximizing their capability to imagine innovative solutions to wicked problems and unexpected applications of emerging media and technologies.

HUMN2170 - Latin American Food and Culture

General
Course Title
g:Latin American Food & Cultur

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
Offered: Every other Fall. This course studies the relationship between food and culture in Latin America. Students will learn to appreciate Latin American food, and to express your appreciation for this food in conversation and in writing. Students will learn how culinary practices change throughout history, from the agrarian societies of Latin America prior to the Spanish conquest to the urban, industrialized societies of the present. You will also learn to think critically about how the foods people produce and consume relate to other aspects of their lives, including issues related to (but not limited to) social class, gender relations, ethnic identity, and political and religious beliefs.

HUMN2180 - Latin American Popular Music

General
Course Title
g:Latin American Popular Music

Academic Level (Course Level)
Undergraduate

Course Description
Offered: Every other fall. This course examines some of the major forms of Latin American music, from early twentieth century genres such as tango and samba to contemporary genres such as cumbia, reggaeton, and funk. Students learn to identify key artists, songs, and albums; to narrate the histories of the different genres; and to recognize and appreciate each genre's formal qualities, including melodic, harmonic, and rhythmic elements. They also relate songs from each genre to their immediate significant historical, sociopolitical, cultural, and technological contexts. Finally, students develop a general understanding of how Latin American popular music circulates in the globalized societies of the twenty-first century.

HUMN2410 - g:Hackers, Politics, & Culture

General
Course Title
g:Hackers, Politics &Culture

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
Pre-requisite: ENGL 1110 or Consent of Instructor. In this course, students study the interwoven history of computer hacking, politics, and culture. Students examine how both the practices of computer hacking and hacker culture have evolved. They learn how legal and political institutions have responded to the growing phenomena of computer hacking and cyberwarfare as well as how hacktivists and online activists have used digital technologies to push for political and social change. Students will also explore pop culture's growing interest in computer hacking and, more significantly, how works of pop culture and science fiction have directly influenced hacks and hackers throughout the history of computing. In the process, students will research and produce case studies of hacks or hacktivist actions, considering their objectives, actions, tools, and impacts.[Cross-listed with SOSC 204]

HUMN3009 - g:Song and Society

General

Course Title
g:Song and Society

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
Prerequisites: ENGL 1120 or consent of Instructor and Advisor. This course is a dialogue about music, specifically song, and its role in the development of human society. According to a theory proposed by Dr. Daniel Levitin there are 6 categories of song which helped form our human society; Friendship, Joy, Comfort, Knowledge, Religion, and Love. These will serve as the basis for the class. Within the context of these categories there can be many sub-divisions to be explored. Students may suggest new divisions and choose songs within those divisions. The class will include lectures, discussions, and student participation. Each student will make a personal song selection for each category, then discuss and defend their choice in class and in their final essay. (Same as MUSC 309)

HYDR5011 - Groundwater Hydrology

General
Course Title
Groundwater Hydrology

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
Study of the occurrence, movement, and chemical and isotopic composition of groundwater. Hydrogeologic properties. Groundwater recharge and stream/aquifer interaction, flow net and hydrograph analysis. Groundwater exploration using geologic and geophysical methods. Groundwater in different geological, climate, and physiographic regimes. Characterization of groundwater using stable isotopes and major ion analysis. Physics of flow to wells, steady-state and transient solutions to well hydraulics equations, image well theory, responses of aquifers to perturbations. Role of groundwater in contaminant migration and heat transfer. Shares lecture with GEOL 4011, with additional expectations for graduate credit.

HYDR5013 - Watershed Dynamics & Ecohydrology

General

Course Title
Watershed Dynamics & Ecohydro

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
Processes governing hydrological flow rates and pathways through watershed systems: Hillslope runoff production and in-channel flood routing. Emphasis on physical mechanisms and their treatment in models, as well as observations made in the field. Interactions between terrestrial plants and water, nutrients, and light resources in semiarid ecosystems and riparian zones. Vegetation induced flow roughness, ecohydrological processes and dynamics, and simple numerical models. Shares lecture with GEOL 4013, with additional expectations for graduate credit.

HYDR5015 - Geomicrobiology

General

Course Title
Geomicrobiology

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
This course will explore the basis for interactions between the microorganisms and the geosphere. Topics include redox geochemistry, microbial metabolism and the diversity of microbial lifestyles, microbe mineral interactions, contaminant degradation and bioremediation, microbial paleobiology, and the co-evolution of life and the Earth. The course will include a mandatory weekend field trip. Shares lectures with GEOL 4015, with additional expectations for graduate credit. Cross listed with GEOB 5015, GEOC 5015, BIOT 5015.

HYDR5020 - Data-Driven Modeling for Science & Engineering

General

Course Title
Data-Driven Modeling Sci&Eng

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
Statistical learning techniques and data assimilation for science and engineering applications. Focus is on the practical applications and the understanding of the assumptions underlying techniques, allowing students to learn the basics of useful tools for data-driven modeling and revisit their theoretical and practical underpinnings as needed. Topics may include supervised and unsupervised learning, regression, classification, importance sampling, ensemble forecasting, and Kalman Filtering. The codes R and Python will be used. HYDR5034 - Introduction to Remote Sensing

General

Course Title
Introduction to Remote Sensing

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
Introduction to the theory and practical use of remotely sensed satellite images. Principles of radiation physics; sensor systems; data acquisition; image analysis; classification schemes. Remote sensing applications to atmospheric sciences, hydrology, mineral and oil exploration, natural hazards monitoring, and land and resources management. Become familiar with ERDAS Imagine remote sensing software. Laboratory exercises using ERDAS Imagine deal primarily with computer analysis of remotely sensed images with some field exercises. Shares lecture/lab with GEOL 4034, with additional expectations for graduate credit. (Same as GEOL/GEOP 5034)

HYDR5055 - Rock Fracture in Geology Settings

General

Course Title
Rock Fracture in Geol Settings

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
Rock fracture and elasticity, focused on understanding elastic, brittle and fracture deformation of rocks in a range of geologic settings, ranging from the deep brittle crust to the laboratory to aquifers to hydrocarbon reservoirs. Topics to be covered include stress and strain, elasticity, brittle rock failure, extensional and shear fracture, poroelasticity, hydraulic fracture, fluid transport in faulted and unfaulted rocks.

HYDR5056 - Fluids in Faults & Shear Zones

General

Course Title
Fluids in Faults & Shear Zones

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
This course explores what makes natural behavior ‘complex’ rather than simple. Phenomena examined include earthquakes, ants, forest fires, traffic jams, epidemics, flocking and non-linear wave behavior. Students learn what complex behavior is by short, hands-on modeling exercises in Python or other scientific scripting language. Instruction will be done in a hybrid, synchronous format. Access to a computer with Python or other common scripting language is necessary.

HYDR5058 - Environmental Tracers in Hydrology

General

Course Title
Environmental Tracers in Hydro

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
Environmental and artificial tracers in hydrology. Environmental tracer topics may include: atomic structure and abundances of environmental isotopes. Stable isotope fractionation. Mass spectrometry. Applications of the stable isotopes of hydrogen, oxygen, and carbon to meteorology and hydrology. Radioactive decay and radionuclide production. Applications of tritium, 3He, 14C, 36Cl , and other radionuclides. Application of Cl, Br, and CFCs to hydrologic problems; and carbon, nitrogen, and phosphorus isotopes for nutrient cycling in soils and freshwater systems. Artificial tracer topics may include: fluorescent and salt tracers, drifting particles, and dissolved gas tracers. Planning and execution of tracer experiments and the analysis and interpretation of tracer data with solute transport equations, convolution integral methods, and end-member mixing analysis.

Graduate, Undergraduate

Course Description
This course provides the introductory overview of software engineering, concentrating on large-scale software system design and implementation. Topics include software life cycle, UML-based design language, design tools and techniques, design documentation, software testing, secure software construction, and software project management. Course work includes a team-based project. (Same as CSE 3026.)

IT3028 - Secure Software Construction

General

Course Title
Secure Software Construction

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
Formal methods and practical techniques for the specification, design, implementation, and validation of computer software. Current software engineering and management practices, with emphasis on ensuring software reliability, safety, and security. Course work includes a team project to develop a sizeable, real-world application software. (Same as CSE 3028.)

IT3053 - Introduct to Computer Networks

General

Course Title
Introduct to Computer Networks

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
Introduction to computer networking, the ISOOSI protocol stack, LAN, MAN, and WAN. Physical layer: transmission media (wireline and wireless); data signaling, modulation, and coding; multiplexing. Fiber optics networking technology: protocols & examples. Data link Layer: error/flow control— protocols design issues; MAC protocols for channel access and allocation. Wireless technology and protocols standards — IEEE 802.11 physical layer and MAC sublayer protocols. Network layer: subnet switching (CS/DG/VC) & routing protocols (Non/Adaptive); Congestion Control and QoS protocols. ISO vs. (TCP-UDP)/IP the Internet protocol stacks. Internet relays and protocols, e.g., routers, gateways, etc. Introduction to network security. Application layer protocols, E.G., DNS, E-mail, etc. (Same as CSE 3053.)

IT3082 - Ethics of Computing and IT

General

Course Title
Ethics of Computing and IT

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
In this class, students will examine ethical and social questions regarding computing and information technologies. The course challenges students to think about connections among digital technologies, the responsibilities of information technology professionals, and social justice as they study topics such as social media, military applications of digital media, gendered technologies, and access to information technologies. In addition to learning the basics of research ethics and social responsibility, students will examine real-world debates regarding subjects like big data, computer code, and digital networks, and they will analyze the legal, political, and social stakes of information technologies. (Same as CSE 3082and

When Offered
Spring

PHIL 3082). This course may be used to satisfy 3 credit hours of the General Education Area 5 requirements.

IT4041 - Cryptography & Applications

General
Course Title
Cryptography & Applications

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
This course provides an introductory overview of modern cryptographic theory and techniques, mainly focusing on their application into real systems. Topics include number theory, probability and information theory, computational complexity, symmetric and asymmetric cryptosystems, one-way functions, block and stream ciphers, Kerberos authentication systems, public key infrastructure (PKI), secure socket layer/transport layer security (SSL/TLS), and cryptographic protocols/applications in many real systems. (Same as CSE 4041.)

IT4081 - Senior IT Design Project

General

Course Title
Senior IT Design Project

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
In this capstone course for IT majors, students begin a two-semester practical research project designed to integrate coursework in computer science and business management in order to identify, analyze, and implement a solution to a practical information technology problem posed by a public, nonprofit, or business organization. The first semester is focused on characterizing the problem(s), identifying technical requirements, articulating the feasibility of and business case for a practical solution, and establishing project goals. Regular meetings with faculty and client, a final report, and an oral presentation are required.

MATH1230 - Trigonometry

General

Course Title
Trigonometry

Academic Level (Course Level)
Undergraduate

Course Description
A study of plane trigonometry including the definitions of the fundamental trig functions using right angle triangle and unit circle approaches. Trig functions of any real number will be evaluated and the functions graphed along with their transformations. Trigonometric identities will be developed and demonstrated including multiple angle identities and identities developed from them. Inverse Trigonometric functions will be developed and used to solve trigonometric equations. Trigonometric applications will be solved using right angle trigonometry and the laws of sines and cosines. Trigonometric methods will be applied to complex numbers and the use of 2D vectors and vector dot products.

Fulfill ALL of the following requirements:

Prerequisite Courses

Complete ALL of the following Courses:

- MATH2532 - Calculus III
- MATH3035 - Ordinary Differential Equation
- MATH2420 - Applied Linear Algebra

Each of the above courses passed with a C- or higher.

Additional Comments:

No Requirement Level

MATH3037 - Engineering Mathematics

General

Course Title
Engineering Mathematics

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
Selected topics from linear algebra are discussed, including vectors, matrices, determinants, Gaussian elimination, vector spaces and basis as well as Eigenvalues, eigenvectors and diagonalization of matrices. Of particular interest will be linear algebra techniques which are utilized of solving systems of (linear) algebraic equations and solving systems of coupled ordinary differential equations using Laplace transforms and linear algebra tools.

MATH3082 - Probability and Statistics

General

Course Title
Probability and Statistics

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
Exploratory data analysis, random variables, estimation and hypothesis testing, linear regression and analysis of variance, basic concepts of discrete and continuous probability distributions, bivariate probability distribution functions, expected values, moment generating function and weak law of large numbers. Uses of the central limit theorem and its applications. This course provides an introduction to probability theory and statistical inference. The theory of probability is the primary mathematical tool used in statistical inference and therefore this course will concentrate heavily on probability and statistics. The course has been designed for computer science and engineering students; however, it is broad enough for students from outside these disciplines.

MATH3082L - Probability and Statistics Lab

General

Course Title
Probability and Statistics Lab

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
Entering data, descriptive statistics, graphing data, cross tabulation, hypothesis testing, and calculation of probabilities from different probability distributions. Each lab introduces a problem, provides some scientific background, suggests investigations for the data, and provides a summary of the theory used in the investigations.

MATH3083 - Introduction to Biostatistics

General

Course Title
Introduction to Biostatistics

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
This course covers the fundamental statistical concepts related to the practice of public health: descriptive statistics, design of biological research studies, probability, sampling, statistical distributions, confidence intervals, hypothesis testing, comparison of means and proportions, chi-squared tests, one-way & two-way ANOVA, simple and multiple linear regression, Fisher's Exact test and Mantel Hansel test for comparing several 2x2 tables. The course also uses the R statistical software and includes many applications of statistics to health sciences and medical studies, emphasizing concepts and interpretation of results. Optional topics: principal components and factor analysis.

Prerequisite Requirements
Type
Prerequisite

Prerequisites: MATH 4010 or MATH 4015, passed with a C– or better

Complete ANY of the following Courses:
- MATH4010 - Numerical Methods I
- MATH4015 - OR: Linear Programming

Or consent of instructor and advisor.

Additional Comments:

No Requirement Level

MATH5019 - Inverse Problems

General
Course Title
Inverse Problems

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
Theory and practice of the various techniques of inverting geophysical data to obtain models. Primary emphasis is on the understanding and use of linear inverse techniques. (Same as GEOP 529.)

Equivalent Courses: Previous & Current Courses
MATH519

Grade Modes
Audit, Pass/Fail, Standard Letter

MATH5020 - Applied Multivariate Analysis

General
Course Title
Applied Multivariate Analysis

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
Multivariate normal distribution and tests assessing multivariate normality. Estimation and hypotheses testing regarding the parameters of multivariate normal populations. Principal component analysis, factor analysis, canonical correlations analysis, classification and discriminant analysis, cluster analysis, multivariate linear models, and multivariate analysis of variance and covariance. Applications in science and engineering.

- MATH4083 - Mathematical Statistics

Additional Comments:

No Requirement Level

MATH5030 - Mathematical Modeling

General
Course Title
Mathematical Modeling

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
Introduction to the process of developing, analyzing, and refining mathematical models. Deterministic and probabilistic models considered for both discrete and continuous problems. Applications to a variety of fields. Shares lectures with MATH 4030, with additional work for the graduate level (MATH 5030 students will complete an additional term project). Cross-listed as MATH 4030

MATH5082 - Linear Statistics Models with Applications

General

Course Title
Linear Stat Models w/ Apps

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
An in-depth study of regression and analysis of variance models. Topics include multiple regressions and model building, analysis of residuals, analysis of variance as regression analysis, generalized linear models, generalized linear mixed models, nonlinear models, multi-factor models with equal and unequal sample sizes, random and fixed effects models, randomized complete block designs, and analysis of covariance. The statistical packages SAS and Minitab will be used for data analysis.

ME4035 - Rock Slope Engineering

General

Course Title
Rock Slope Engineering

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
Field exploration and presentation of geologic data pertaining to rock slope engineering. Shear strength of rock discontinuities. Structural analyses and application of stereonets and stereographic projection. Basic mechanics and modes of slope failure. Plane, wedge, and toppling failure analyses. Effect of groundwater. Improvement of slope stability by drainage and support. Monitoring. Computer applications. Shares lecture with ME 5035, with additional expectations for graduate credit.

MENG110 - Introduction to Mechanical Engineering

General

Course Title
Intro. to Mechanical Eng.

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
A broad overview of mechanical engineering, including an introduction to mechatronics, explosives, thermal and fluid sciences, solid and structural mechanics. An introduction to basic engineering problem solving techniques and engineering tools. Students will engage in a semester-long team design project where they use modern engineering tools including basic computer drafting and computations to address mechanical engineering problems.

General

Course Title
Sophomore Design&Measurements

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
Fundamentals of mechanical engineering design and instrumentation. This course introduces basic engineering measurement techniques and approaches, including analog to digital conversion, binary numbers, logic gates, sensors and data processing. Mat lab programming will be introduced and used to collect and analyze experimental data. Data analysis will include calculation of statistical quantities and methodologies for graphing results. Elements of linear algebra such as vectors, matrices, determinants, eigenvalue problems and solution of systems of linear algebraic equations will be discussed and practiced in Mat lab. A semester-long design project will implement instrumentation, programming, and analysis topics. Laboratory experiments will include Mat lab programming, programming of data acquisition systems, application of a range of mechanical engineering instrumentation techniques, and basic design principles.

Course Title
Numerical Methods & Analysis

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
This course presents applied numerical methods and analysis for mechanical engineering students with a focus on implementing solutions using C, Mat lab or Python programming. This course focuses on implementation of basic numerical methods to solve systems of equations, ordinary differential equations, and partial differential equations. Mechanical engineering problems will be used to frame the implementation of the numerical techniques to demonstrate optimization of engineering design and analysis of experimental data. Presentation of numerical results will be discussed including graphing philosophy, numerical errors, a comparison with analytical solutions. Topics include numerical error and accuracy, finite difference methods, integration, regression, initial value problems, discrete Fourier transforms, root finding, and optimization.

Course Title
Fluid & Thermal Systems

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
A capstone course in the thermal-fluid sciences of Mechanical Engineering. The course combines the basic concepts and analysis techniques that were developed throughout the fundamental undergraduate thermodynamics, fluid dynamics, and heat transfer courses, to perform in depth analysis and design of complete thermal-fluid systems. Topics will include analysis and design of piping systems, heat exchangers, and pump systems, and their incorporation into complete systems such as refrigeration and power cycles. Advanced dimensional analysis, mathematical relationships, and computational analysis will be used to solve problems.

Course Description
Experimental analysis of fluid flow, heat transfer and thermodynamic systems. Experimental techniques common to the fluid-thermal sciences fields will be used in hands-on laboratory experiments. Techniques include wind tunnel measurements, pitot-static systems, temperature measurement, flow visualization, pump power, and use of data acquisition systems. A final project including the application of measurement techniques and use of experimental facilities in the field of fluid and thermal sciences is required for each laboratory group. Laboratory reports are presented.

MENG5013 - Impact Dynamics

General

Course Title
Impact Dynamics

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
A specialized but very important branch of engineering mechanics deals with the collision of multiple bodies throughout a broad range of relative velocities. The physical phenomenon during impact and subsequent response of each of the bodies is dependent on the mechanical Material properties of each, the impact velocities, and the relative size and orientation of each of the bodies. Impact response is most easily categorized based on the impact velocity (relative approach velocity of two bodies), ranging from elastic response with little change in temperature at low velocities, through plastic deformation and/or fracture at higher velocities, to physical state changes of bodies or a portion of a body at hyper-velocity impacts (>1 km/sec).

Graduate

Course Description
An introduction to tensor analysis, analysis of stress, balance laws, infinitesimal and finite theories of motion, strain and rotation tensors, compatibility equations, constitutive equations, Materials symmetry, uniqueness of the solution, solution of two-dimensional elasticity problems. Airy stress function, application of complex variable technique in elasticity, three-dimensional elasticity problems, energy methods, bending theory of plates. (Same as ME 515)

Equivalent Courses: Previous & Current Courses

MENG5043 - Control System Design

General

Course Title
Control System Design

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
This course provides an introduction to the analysis and design of advanced control systems. The frequency domain analysis, root locus analysis, design process, PID controller and compensator design will be emphasized. Fundamental limitations of feedback will be discussed and advanced PID design techniques will be presented. Model-based techniques such as pole placement will be discussed for the SISO case. Throughout the course we will emphasize the concepts of robust control, including tradeoffs between sensitivity and performance.

MENG5051 - Optimal Control Systems

General

Course Title
Optimal Control Systems

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
Formulation of stochastic dynamic systems models, combined with optimal full-state and reduced-state estimators are introduced. Various cost functionals are defined and used to design real-time control algorithms that produce specific desired system responses. Mathematical measures of control robustness are defined which allow the student to gain an appreciation for predicting and measuring system stability margins under sub-optimal conditions.

MENG5056 - Compressible Fluid Flow

General

Course Title
Compressible Fluid Flow

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
An introductory study of compressible fluid flow and gas dynamics. The course covers one-dimensional flows including isentropic flow, normal shockwaves, Fanno flow, and Rayleigh flow. Oblique shock waves and expansion fans are discussed including applications to high-speed aerodynamics. One-dimensional unsteady flow is taught, including a detailed study of wave diagrams for various problems including shock tubes and as models for explosions. Applications of compressible flow are discussed including wind tunnels, aerodynamics, and explosives. An understanding of simple refractive imaging techniques is imparted to allow analysis of compressible flows from flow visualizations.

General

Course Title
Digital Image Processing

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
This class will provide an introduction to digital image processing, beginning with a discussion of imaging systems and storage of digital images then progressing to image filtering, segmentation, correlations, and applications in mechanical and aerospace engineering. Basic image manipulation including subtraction, addition, dilation, and smoothing will be covered using binary images. Grayscale images will then be used to discuss histogram manipulation, edge detection routines, and filtering, including Fourier-based techniques. Image correlation will be covered, including its applications for fluid-dynamic measurement systems like Particle Image Velocimetry (PIV) and Digital Image Correlation (DIC). Color theory will be presented including conversion of images between color schemes including RGB and HSI. Additional applications for machine vision and scene reconstruction will be discussed. The course will use MATLAB to perform all image manipulations; all students are expected to have working knowledge of MATLAB and undergraduate-level programming skills

MENG5071 - Haptic Systems, Teleoperation, & Virtual Reality

General

Course Title
Haptic Sys, Teleoperation, VR

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
Haptic and virtual-reality interfaces are designed with the sensing, control, and actuation capabilities of both humans and robots in mind. This course provides a practical introduction to select aspects of these capabilities. Mathematical formulations fundamental to the course will be derived. Students' ability to comprehend and synthesize the often dense and technical content of research papers will be improved through frequent reading and discussion assignments. Students will design computer algorithms throughout the semester that will culminate in a final programming project.

MENG5072 - Sensor Technology

General

Course Title
Sensor Technology

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
The operating principles and properties of sensors/transducers for the measurement of physical quantities in the mechanical domain, as well as the associated interface circuits. Focus is on commercially available sensors, but where appropriate, recent trends toward miniaturization, integration, and higher quality performance will be addressed.

MENG5074 - Electric Measurements of Non-Electric Quantities

General

Course Title
Elec Measure Non-Elect Quant

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
This course is particularly reliant on advances in scientific knowledge. Establishment of units and scales of measurement, their development, realization, maintenance and dissemination, as well as the performance of traceable measurements. Hence, this course serves a key factor of modern manufacture through automation, which both enhances productivity and ensures consistent quality. The demand for improved and assured quality means ever better instrumentation. Focus on the course will be on measurement science, design principles for instrument systems, electrical measurements of thermal quantities, electrical measurements of mechanical quantities, electrical measurements of optical quantities, and electrical measurements of chemical quantities.

MENG5075 - Advanced Engineering Mathematics

General

Course Title
Adv Engineering Math

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
A comprehensive study of applied mathematics. Vector analysis, tensors and Eigenvalue problems. Analytical solutions to linear ordinary and partial differential equations. Separation of variables, boundary value problems, and Laplace and Fourier transforms. Numerical analysis of non-linear ordinary and partial differential equations with emphasis on engineering applications. Complex Analysis; complex numbers, Cauchy-Riemann equations and conformal mapping.

MENG5076 - Biomedical Mechatronics

General

Course Title
Biomedical Mechatronics

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
This course will give students direct experience with computational tools used to create simulations of human movement. Lectures and labs cover animation of movement; kinematic models of joints; forward dynamic simulation; computational models of muscles, tendons, and ligaments; creation of models from medical images; control of dynamic simulations; collision detection and contact models. The course is intended as an introduction to medical device design for graduate engineering students because the class will have a significant design and prototyping emphasis.

Course Title
Nondest Eval & Stru Health Mon

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
This multi-disciplinary course introduces key physical concepts in elasticity, Material science, acoustics, optics, and electromagnetics applied to system condition monitoring, Material characterization, structural damage detection and failure prevention. A broad spectrum of nondestructive evaluation (NDE) methods and emerging structural health monitoring (SHM) technologies is discussed including ultrasonic inspection, vibration monitoring, acoustic emission, radiography, eddy currents, electrical and magnetic testing. Examples of practical NDE/SHM applications in scientific research and industrial practice are presented.

General

Course Title
Smart Materials and Structures

Academic Level (Course Level)
Graduate

Course Description
The Smart Materials and Structures course will focus on basic concepts and applications in several types of smart materials and structural systems. First, this class introduces smart materials and structural systems and applications in various fields. Then, it provides theoretical backgrounds of smart materials through modeling mechanical and electrical systems and mathematical representations of smart materials. Second, building upon the basic concepts of smart materials, lectures regarding three representative smart materials (i.e., piezoelectric materials, shape memory alloys, and electroactive polymer materials) are given. Last, state-of-the-art smart materials and structural systems are introduced and discussed in the class.

Course Description
The course is an introduction to the important concepts in materials science and engineering with a goal of building the foundations for all other courses related to materials. The course introduces the perspectives needed to think about materials in other areas of engineering and the physical sciences. The structure, properties, and processing of metals, ceramics, polymers, and composite materials are discussed. Topics covered include atomic bonding, crystal structures and symmetry, metal alloys, strength, microstructures, glasses, defects, diffusion, elasticity, fracture, and phase diagrams.

MTLS4020 - Biomedical Materials

General

Course Title
Biomedical Materials

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
This course covers the application of Materials in medical devices. Mechanical properties of hard and soft tissues are reviewed. Applications of biomaterials in orthopedics are discussed with emphasis on problems of material-tissue interactions. Other biomedical Materials are covered with applications in skin transplants, eye surgery, pacemakers, tissue engineering, and neural prostheses. Host responses are surveyed including adaptation, inflammation, coagulation, foreign body effects, and changes in tissue and organ functions. Methods for biological and clinical testing are highlighted. Regulatory, ethical and business issues are discussed. Shares lecture with MTLS 5020 with additional expectations for graduate credit.

MTLS4074 - Polymer Processing & Character

General

Course Title
Polymer Processing & Character

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
The basics of rheology, calorimetry and mechanical testing are covered. A specific polymer is used (e.g., an epoxy) throughout the course and the processing of this polymer is covered. Students are expected to acquire a working knowledge of the instrumentation and analysis tools used in the course. These include rheometers, calorimeters, and mechanical testing. The primary analysis tool is Kaleidagraph software.

MTLS5015 - Glasses & Other Complex Fluids

General

Course Title
Glasses & Other Complex Fluids

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
Complex fluids span the range between the traditional Newtonian fluid (where shear stress is proportional to strain rate) and linear response solids (where shear stress is proportional to strain). In all cases, non-trivial relaxation mechanisms introduce a range of relaxation times and extreme temperature sensitivity in the a Materials' properties. Glasses are the most dramatic examples of this class of Materials although all polymeric Materials show complex behavior under temperature and time scales in typical applications. This course introduces the techniques used to quantify the thermal and temporal response of common complex fluids focusing primarily on rheometry and calorimetry. In addition, theories linking evolving microstructures are employed to explain the observed macroscopic responses.

Course Description
This course covers the application of Materials in medical devices. Mechanical properties of hard and soft tissues are reviewed. Applications of bioMaterials in orthopedics are discussed with emphasis on problems of material-tissue interactions. Other biomedical Materials are covered with applications in skin transplants, eye surgery, pacemakers, tissue engineering, and neural prostheses. Host responses are surveyed including adaptation, inflammation, coagulation, foreign body effects, and changes in tissue and organ functions. Methods for biological and clinical testing are highlighted. Regulatory, ethical and business issues are discussed. Shares lecture with MTLS 4020 with additional expectations for graduate credit.

MTLS5030 - Design & Analysis of Experiment

General

Course Title
Design & Analysis of Experimen

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
Methods of statistics and modeling important to many problems in Materials science and engineering including Six Sigma. Examples are chosen from a number of actual experiences. Safety considerations and experiment design including analysis of risk, how risks may be integrated, and how formal procedures should be established. The use of information sources, such as Materials safety data sheets (MSDS). Shares lectures with MTLS 4030, but is graded separately, and additional work is required at the graduate level.

MTLS5034 - Phase Equilibria in Materials Systems

General

Course Title
Phase Equilibria Materials Sys

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
The theoretical and practical aspects of phase equilibria of metal and ceramic multicomponent systems will be examined in detail. The thermodynamics and experimental methods of determining phase equilibria of these systems will be

studied. Particular emphasis to Gibbs phase rule, the construction and interpretation of phase diagrams, and the importance of nonequilibrium in metals and ceramics will be investigated. Thermodynamic calculations related to phase stability and phase diagram prediction will be performed using the modeling software, Thermo-Calc.

Metallurgical Phase Trans

Academic Level (Course Level)
Graduate

Course Description
Thermodynamic considerations, phase diagrams, and atomic diffusion are reviewed. Principles of crystal interfaces and microstructure are studied, including grain boundaries, interfaces, influence of interfaces and strain energy on microstructure and kinetics. Solidification of single-component and multicomponent systems is discussed with applications to ingots, castings, and welding. Diffusional and diffusionless phase transformations in metals and their alloys are discussed. Knowledge of the core thermodynamic concepts underlying materials behavior, as well as the structure of various engineering materials is required.

MTLS5036 - Material Applications of Density Functional Theory

General

Course Title
Material App of DFT

Academic Level (Course Level)
Graduate

Course Description
The course is an introduction to materials modeling using the quantum theory of materials and first-principles computational techniques. Specifically, the use of density functional theory will be explored to solve an approximated version of the Schrodinger equation in order to obtain materials properties of metals and their alloys. The course will explore theoretical aspects of density functional theory including the clamped nuclei approximation, the exclusion principles, and the mean-field approximation. The Hartree-Fock and Kohn-Sham equations are studied. All course material will be strongly coupled to hands-on computations using Vienna ab-initio Simulation Package

Course Title
Electrochemical Tech & Process

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
.This course is an overview of the growing field of electrochemistry, and the many electrochemical techniques and processes. The lectures and assignments will review the theory and the science of batteries, electroplating, fuel cells, electrocatalysis, electro-refining, corrosion, bioelectrochemistry, and organic electrosynthesis. In addition to the applications, the electrochemical techniques will also be introduced, including open circuit potentials, linear polarization, potentiodynamic polarization, cyclic voltammetry, zeta potentials, electrochemical impedance spectroscopy, and photoelectrochemistry.

MTLS5076 - Drug Delivery Techniques

General

Course Title
Drug Delivery Techniques

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
Focus is on current developments in drug delivery techniques, with only a brief discussion of common clinical techniques. The first portion of the class focuses on various delivery mechanisms and the tools needed to validate successful targeted drug delivery (both in vitro, in vivo and diagnostic tools). The second part of the course focuses on current developments in drug delivery based on published research articles. Students will read, digest, and critically analyze scientific work from leading research laboratories. Students will also gain valuable communication tools, as each student will present an article of interest to the class. Finally, the third part of the course focuses on important Materials characterization methods such as biological sample prep, SEM, TEM, DSC, Flow Cytometry, Fluorescence Microscopy, ELISA Assays. Same as BIOT 576. Shares lecture with Ch E 476, with additional expectations for graduate credit.

Course Title
g:Song and Society

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
Prerequisites: ENGL 1120 or consent of Instructor and Advisor. This course is a dialogue about music, specifically song, and its role in the development of human society. According to a theory proposed by Dr. Daniel Levitin there are 6 categories of song which helped form our human society; Friendship, Joy, Comfort, Knowledge, Religion, and Love. These will serve as the basis for the class. Within the context of these categories there can be many sub-divisions to be explored. Students may suggest new divisions and choose songs within those

divisions. The class will include lectures, discussions, and student participation. Each student will make a personal song selection for each category, then discuss and defend their choice in class and in their final essay. (Same as HUMA 309)

PCOM5003 - Applied Research Methods

General

Course Title
Applied Research Methods

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
This practice-based seminar gives students a thorough background in Humanities research methods including quantitative, qualitative, mixed methods, and user experience research. Students will create and perform pilot studies and will become familiar with the Institutional Review Board (IRB) submission and approval process for performing university-sanctioned research. Students will understand how to apply research methods and how to design and interpret studies that collect relevant, accurate, and useful data.

PCOM5004 - g: Media, Communication, & Public Engagement

General

Course Title
g:Media, Comm & Publ Engagemen

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
Normally offered: Fall semesters. This practice-based course trains students to communicate and engage with the public effectively in a variety of print and online genres and media. Students will learn: how to communicate concepts from STEM fields to stakeholders such as policymakers and diverse publics; the basics of content strategy and content auditing; to revise and reuse content for different channels such as websites and social media; and how to listen to diverse audiences online and offline, developing skills in branding and audience analysis.

PCOM5005 - Ethical and Social Issues in Public Engagement

General

Course Title
Ethical/Soc Issues in Pub Enga

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
Pre-req: Graduate standing or consent of Instructor. This seminar examines how values influence STEM research as well as the ethics and politics of STEM communication and policy. Students will gain practical skills in ethics relevant to their professional work, analyzing how research, design, communication, and policy decisions may incorporate, or fail to incorporate, diverse stakeholders' interests. The course explores barriers and power relationships that can prevent certain groups from enjoying the full benefits of scientific and technological change. Assignments will challenge students to operate as public-responsible researchers or communicators and ask them to consider how products and policies can challenge inequality and promote the common good. Shares lectures with PHIL 4042, but has additional expectations for graduate credit.

PCOM5006 - Communication, Product, and Experience Design

General

Course Title
Comm, Product & Experience Des

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
This course teaches students the principles and practices of experience and information design. Students examine design case studies. They develop and test research-based multidisciplinary, iterative design projects. Through these projects, students learn how to synthesize the principles of design thinking, functionality, aesthetics, usability, and accessibility to meet the needs of users and organizations

- PETR4046 - Improved Petroleum Recovery

or consent of instructor and advisor

Additional Comments:

No Requirement Level

PETR4050 - Well Performance

General

Course Title
Well Performance

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
Diffusivity equation and solutions for slightly compressible liquids; dimensionless variables; type curves; applications of solutions to buildup, drawdown, multi-rate, interference, pulse and deliverability tests; extensions to multiphase flow; analysis of hydraulically fractured wells, production data analysis, rate normalized pressure analysis.

PETR4071 - Capstone Design I

General

Course Title
Capstone Design I

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
Prerequisites: PETR 3070, 4045Corequisite: PETR 4024 Offered fall semesterTeam oriented design project where students apply engineering principles and specifically petroleum engineering knowledge to develop and optimize practical options to a real world problem. This first semester focuses on data acquisition and uncertainty quantification, developing a project management plan, analyzing the information; culminating in a proposed project.

PHIL1146 - g:Ethics & Values in STEM

General

Course Title
g:Ethics & Values in STEM

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
In this course, students learn about professional research ethics and the social responsibilities of scientists and engineers. They also examine the diverse roles for values throughout research and development in STEM, including judgments about funding, methodology, communication, and public engagement. The course introduces students to pressing questions about justice, equality, and democracy related to the responsibilities for technological development by surveying issues in areas such as computer science, environmental justice, global ethics, health equity, and military ethics.

PHIL2040 - g:Science and Gender

General

Course Title
g:Science and Gender

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
Pre-requisites: none. This course introduces students to the complex interplay between science, technology, and gender, with special attention to intersections with sexuality, race, and ethnicity. We analyze the concepts of “sex” and “gender” by critically investigating the nature/nurture debates about sex differences. The course further prompts students to think more broadly about gender in science and technology in discussions over bias, values, and scientific objectivity. Throughout the course, we also survey different critical approaches to biomedicine such as women’s health, LGBTQ health, breast cancer, HIV/AIDS, and reproductive health. (cross-listed with GNDR 2040)

Academic Level (Course Level)
Undergraduate

Course Description
Prerequisite: ENGL 1120 or consent of the Instructor and Advisor. In this class, students will examine ethical and social questions regarding computing and information technologies. The course challenges students to think about connections among digital technologies, the responsibilities of information technology professionals, and social justice as they study topics such as social media, military applications of digital media, gendered technologies, and access to information technologies. In addition to learning the basics of research ethics and social responsibility, students will examine real-world debates regarding subjects like big data, computer code, and digital networks, and they will analyze the legal, political, and social stakes of information technologies. (Same as CSE 382 and IT 382.) This course may be used to satisfy 3 credit hours of the General Education Area 5 requirements.

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
Pre-req: ENGL 1120 or consent of Instructor. Offered: every other year. This seminar examines how values influence STEM research as well as the ethics and politics of STEM communication and policy. Students will gain practical skills in ethics relevant to their professional work, analyzing how research, design, communication, and policy decisions may incorporate, or fail to incorporate, diverse stakeholders' interests. The course explores barriers and power relationships that can prevent certain groups from enjoying the full benefits of scientific and technological change. Assignments will challenge students to operate as public-responsible researchers or communicators and ask them to consider how products and policies can challenge inequality and promote the common good.

Course Description
This course will provide an introduction to a programming language and basic algorithms that can be used to solve introductory physics problems (e.g. statics, relative motion, projectile motion) with a computer. Most of the problems will be deterministic in nature and will have analytical solutions that the students will be able to use to verify their numerical solutions. The course will also cover topics related to data analysis and visualization.

Course Title
Intro Resrch & Scientific Comm

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
This course involves beginning graduate students in a modest project, usually related to ongoing research in the department, and provides a background in scientific communication. The research portion emphasizes independent work by the student, but is supervised by a faculty member. Possible projects include data analysis, software development, theoretical modeling, a literature survey, and design and/or construction of research or teaching equipment. The communication portion incorporates the research topic into several written and oral assignments, including conference abstracts, proposals, oral and poster presentations, and peer-reviewed research papers.

PHYS5062 - Stellar Astrophysics

General

Course Title
Stellar Astrophysics

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
This course covers in-depth the physics of stars, their structure and evolution. Topics include energy generation and transport, nucleosynthesis, equations of state, stellar modeling, asteroseismology, and stellar pulsation and rotation — all studied in the context of the evolution of a star. There are detailed discussions and derivations of the various stages in star formation and evolution, and the end states of stars (e.g. white dwarfs, planetary nebulae, black holes). The course stresses current refereed literature and has occasional guest speakers on various topics.

PHYS5080 - Internship

General

Course Title
Internship

Academic Level (Course Level)
Graduate

Course Description
Internship to be conducted at a national lab, technical company, or observatory/ research center (including those on campus) working on instrumentation design, integration and testing on a project NOT associated with the student's dissertation project. The internship can occur in the US or an international lab/ business. The purpose is to increase the student's breadth of experience, work in a team environment on topics outside their project area, and potentially develop new professional contacts. The internship needs to be approved by the student's committee before it begins. It is suggested that roughly two credits be offered per month of internship duration.

POLS4070 - g:Policy Science

General

Course Title
g:Policy Science

Academic Level (Course Level)
Undergraduate

Course Description
Prerequisites: ENGL 1120 or consent of Instructor. It reviews a worldwide policy movement emerging in response to the increasingly complex problems of the decision in the modern era. In the United States, the movement takes various institutional forms, including think tanks, offices of planning and evaluation, and university-based programs in public policy. This program integrates several fields of knowledge to improve policy decisions: integrate knowledge about policy decision and decision process from any discipline or other sources into the understanding of the policysciences, and become professional in the sense of one who has acquired knowledge and skills critical to society and accepts responsibility to use them in the common interest.

Course Description
Prerequisites: ENGL 1120 or consent of Instructor. This seminar-based course provides an overview of selected topics in science and technology policy. Students will gain an understanding of the challenges, tensions, and problems within science and technology policy issues and be introduced to crafting policy-relevant documents such as op-eds, policy briefs, and longer research reports. Themes may include the proper role of experts in policy-making, the regulation of risky technologies, comparisons of democratic and expert-led decision-making, resilient environmental policy, generative justice, sustainability, forecasting and managing technological change, public and private steering of R&D funding, strategies for stimulating innovation and technological transitions, intellectual property, science and technology-based entrepreneurship, and regional and national innovation systems.

POLS5070 - Policy Science

General

Course Title
Policy Science

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
Prerequisites: Graduate Standing or consent of Instructor. It reviews a worldwide policy movement emerging in response to the increasingly complex problems of the decision in the modern era. In the United States, the movement takes various institutional forms, including think tanks, offices of planning and evaluation, and university-based programs in public policy. This program integrates several fields of knowledge to improve policy decisions: integrate knowledge about policy decision and decision process from any discipline or other sources into the understanding of the policysciences, and become professional in the sense of one who has acquired knowledge and skills critical to society and accepts responsibility to use them in the common interest.

PSYC3042 - g:Music and the Brain

General

Course Title
g:Music and the Brain

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
Prerequisites: PSYC 1110 or MUSC 1210 or MUSC 1130 or permission of Instructor. Normally offered: Every third semester. This course examines widespread musical behavior through both scientific and artistic perspectives. We look to the neuroscience of music perception to help explain the psychological processes that support emotional responses, composition, performance, and all the potential cognitive benefits of engaging in music. Even people who think they are bad at making music have sophisticated skills as listeners. It is a universal birthright that humans can learn the melodic, rhythmic, and harmonic patterns of their own culture's music.

Neurology

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
Pre-reqs: Consent of the Instructor based on knowledge of the fundamentals of neuroscience. An examination of the mechanisms and effects of neuropathology and the different approaches to diagnosis and treatment of neurological diseases and disorders such as pain, epilepsy, and Alzheimer's disease. Shares lectures with PSYC 4010 and BIOL 5010, with additional expectations for graduate credit. *Offered: Spring of odd years.

SOSC0132 - Creation of the Universe

General

Course Title
Creation of the Universe

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
How did we get here? Where did we come from? How were the earth, moon and sun created? From ancient tribes to modern civilization, the human race has tried to answer these questions. This course examines the myths and scientific theories of the origin of the universe. The course first covers ancient myths, progresses to modern religion and culminates with our current understanding of the Big Bang and related scientific theories. Other myths, such as the great flood, which common to many cultures, are examined. The course focuses on how science and culture interact by examining how our concept of creation has evolved.

SOSC1110 - Introduction to Science and Technology Studies

General

Course Title
g: Intro to Sci & Tech Studies

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
The aim of this course is to challenge commonly accepted beliefs regarding technoscience, including the presumption that the “best” technology always wins and the notion that science is never political. Through an examination of historical and contemporary examples, students will explore the cultural, organizational, economic, and political drivers and consequences of scientific R&D and technological change.

SOSC1220 - g:Full Steam Ahead Part 2

General

Course Title
g:Full Steam Ahead Part 2

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
This course examines the development of contemporary technologies, including the personal computer, nuclear energy, jet engines, chemical plants, genetic engineering, and the automobile, in order to uncover the social, political, and ethical facets of science and engineering. By learning how historical events, pervasive ideas, business and regulatory cultures, economics, and other social stuff both drive and constrain technological development, students will acquire thinking skills necessary for being not only thoughtful technical professionals but also responsible citizens. This course is offered to the members of the Learning and Living Community and fulfills a General Education Core requirement.

SOSC1220L - g:Full Steam Ahead Part 2 Lab

General

Course Title
g:Full Steam Ahead Part 2 Lab

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
This lab accompanies the Full STEAM Ahead class and gives students the opportunity to explore class concepts by analyzing technological solutions to a contemporary public problem in a hands-on, collaborative environment. Students will not only diagnose the issues facing a current scientific and technical undertaking but also propose how it could be redesigned to better account for the cultural and political complexities of social reality. By the end of the semester, groups of students will produce and present a research poster on their chosen topics by analyzing technological solutions to a contemporary public problem in a hands-on, collaborative environment.

SOSC2110 - Understanding Techno-scientific Controversy

General

Course Title
g:Understand Technosci Controv

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
This science and technology studies course challenges students to think more carefully and critically about tech- nonscientific environmental problems and controversies, such as climate change, vaccine hesitancy, genetic engineering, pharmaceutical drugs, and nuclear energy. Students will examine the cognitive, cultural, economic, ethical, political, and communicative roots of disagreement, learning to recognize that these issues are not solved by presenting a “balanced view” of both sides or by simply informing “ignorant” opponents. Students will apply these thinking skills in order to develop more productive and empathic solutions to tenacious and highly polarized public conflicts. (Same as PHIL 2110).

SOSC2123 - Civilizational Collapse and its Prevention

General

Course Title
g:Civilizational Collapse

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
Pre-requisite: ENGL 1120. The goal of this course is to critically examine the resilience and frailties of human civilization. How have previous societies failed or succeeded to organize themselves within socio-ecological limits? What positive lessons can be drawn from earlier human settlements regarding the political, cultural, economic, and technological factors generative of social instability? In addition to researching potential answers to these questions, students will explore and evaluate contemporary perspectives and proposals regarding how to make human societies more socially, politically, and ecologically resilient.

SOSC3100 - Contemporary Latin America

General

Course Title
g:Contemporary Latin America

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
Offered: Every other Spring. This course offers an overview of contemporary life in Latin America. Course readings and lectures focus on the economic, political, and cultural foundations of present-day life in the region, covering topics such as the extraction and protection of its vast natural resources; economic inequality and Latin America's place in the global economy; liberalism and populism in Latin American politics; and Indigenous, feminist, and LGBTQ+ political movements; and the impact of global economic, political, and public health crises on Latin America. Assignments train students to carry out basic research in the social sciences. Students develop their conceptual vocabularies, formulate research questions, and propose solutions to key issues in contemporary Latin American life.

SOSC3120 - Biodiversity, Nature, and Society

General

Course Title
g:Biodiversity, Nature, Societ

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
Pre-requisite: ENGL 1120. Despite the tendency of media portrayals to present environmental problems as scientifically unquestionable and as already resolved by "the facts," global environmental crises like biodiversity change are incredibly complex, uncertain, and inevitably political. That is what makes them so difficult to resolve. This research-based course challenges students to explore the science and culture of the "biodiversity crisis", honestly engaging with questions about the limits of scientific research, the line between data and scientific storytelling, the proper role of people in nature and science in a democracy, and the potential to better reconcile human societies with the needs of non-human species.

Course Title
g:User Experience Research

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
Pre-requisite: Junior standing or above, or approval of Instructor. This class is a project-based survey of qualitative user research. Students will learn about and apply human subject research methodologies in order to extract insights from users about creating better, more human-centered technologies, which may include apps, user interfaces, devices, architectural spaces, and/or services. Assignments will require that students combine research data and theory in order to analyze designs with regard to their ergonomics, intuitiveness, visceral "feel", attractiveness, and broader user narrative. Students will conduct small-scale qualitative studies, including usability studies, field observation, and interviews, and practice turning the results into concrete deliverables, such as personas, storyboards, paper/digital prototypes, and oral/written reports.

STCH5016 - Engineering for Educators: Drones & Biomimicry

General
Course Title
Engr for Educ:Drones/Biomimic

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
During the millions of years of evolution, nature has developed processes, objects, materials, and functions to increase efficiency. Through biomimicry and inspiration from this treasure trove, engineers and biologists have become interested in learning from biological insights. Sometimes looking at nature provides us the best answers for the development and optimization of different types of engineering systems including drones. Nature always has effective solutions for many complex tasks in different aerospace systems, such as energy, locomotion, navigation, control, sensing, and design. The growing science of biomimicry focuses on what engineers can learn quite a lot about efficient solutions for aerospace systems that nature has spent millions of years refining. As an example, one of the interesting aspects of avian flight dynamics is how natural flyers, such as birds and insects, can deform their shape to optimize their flight in different flight modes. Therefore, the concept of morphing structures for aerial vehicles can be originated from the observation of birds as they fly. This course discusses the knowledge learned and inspired by nature and biological systems to solve concrete drone engineering problems. Open-source software called XFLR5, FlapSim and WakeSimm, and OpenSim will be introduced and used for modeling, analysis, and simulation of bioinspired drone concepts.

Course Description
This course is designed to help you learn the skills you will need to develop, research, write and present professional documents in multiple contexts. All technical and professional documents are action-oriented, and we will consider the ways that content, style, organization, format, visuals, and medium help readers to take efficient and effective action. In addition, this course provides you with an overview of research and citation practices in various fields, with particular attention given to the sciences and science education, and an overview of ethical practices when conducting a study with human subjects. Through the instruction and assignments in this course, you will learn to improve your communication skills and improve the communication skills of your students

TCOM1130 - g:Visual Communication & Graphic Design

General

Course Title
g:Visual Comm and Graph Design

Academic Level (Course Level)
Undergraduate

Course Description
This course supports students' personal and professional development by exploring the principles and practices of visual communication and graphic design. Students learn best practices for creating human-centered, ethical, appealing, and effective visual communication—from presentations and data displays to signage, posters, and tutorials for research, education, and industry. Working individually and in groups, students create various small graphic and communication design projects that aspire to make a difference. By the end of the course, students showcase their work in a professional online portfolio.

TCOM3030 - Risk, Crisis, & Non-Profit Communication

General

Course Title
g:Risk, Crisis, Non-Profit Com

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
Prerequisite: ENGL 1120 or consent of instructor and advisor. Environmental, geopolitical, societal, economic, and technological risks and crises can affect corporations, industry, non-profit organizations, governments, science and education, anywhere in the world. While many of these threats cannot be stopped, their likelihood and impacts can be reduced through communication. In this active-learning, problem-based class, students follow and critically analyze situations of risk and crisis in for-profit and non-for-profit organizations. They learn how to develop and implement risk and crisis communication plans. Students apply their knowledge and skills in a risk or crisis communication project for a for-profit or non-for-profit client of their choice and develop a portfolio of their work.

TCOM4007 - Social Justice and Language

General

Course Title
g:Social Justice and Language

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
Prerequisites of ENGL 1120 or consent of Instructor. The goal of this course is to look at existing social structures and environments with a critical eye focused on maintaining equity for all participants. We will discuss oppression, justice and how language and communication often play a role in these issues. We will read from the Technical and Professional Communication literature on Social Justice. We will reflect in writing and through group discussion on our own positionality and biases and privilege. We will take action in the form of research, service (virtual or face to face) and try for advocacy, not just awareness of social issues. Your participation and respect for others are vital components of this course.

g:Storytelling with Data

Academic Level (Course Level)
Graduate, Undergraduate

Course Description
Prerequisite: ENGL 1120 or Consent of Instructor and Advisor. Data visualization tells compelling human-centered stories with data. It supports communicating, understanding, and decision-making. In this course, students become acquainted with storytelling and the development, approaches, methods, and techniques of data visualization. Students learn best practices for creating data displays—graphs, charts, illustrations, maps, interactive displays, and other data visuals—for industry, research, education, and the media. They analyze case studies on how data is visualized in these contexts and they are able to follow practitioners in action. By the course's end, students design and build their own data visualization projects.
