The Intelligent Energetic Systems Engineering (INTENSE) REU at New Mexico Tech engages students in unique research related to:

- robotics • smart materials • control systems
- explosives • shock physics • aerodynamics
- propulsion • high-speed fluid and solid mechanics

Student participants will conduct original research in NMT laboratories, working alongside faculty mentors and graduate student researchers.

Group “Toolbox Development Activities” will develop participants’ engineering “toolbox” in:

- research methods • experiment planning
- data analysis • technical communication

Participants will tour national research facilities at:

- Sandia National Laboratories • Kirtland Air Force Base

Students with a background in all Science and Engineering fields who have completed at least 3 semesters of college courses are encouraged to apply. Students from underrepresented minority groups in STEM fields are also encouraged to apply.

**Program Specifics:**

- 9-week experience: June 10 - August 2, 2019
- $4,500 stipend to each participant
- On-campus housing in Socorro, NM, provided
- Meal plan for on-campus dining hall included
- Travel costs reimbursed up to $600
- US citizenship or permanent residency required
- Applications accepted: Dec. 1, 2018 - Feb. 14, 2019
