The President’s Golf Tournament benefits students in good standing who are in need of financial assistance. Dr. Stephen G. Wells continues the 23 year old tradition that has helped more than 350 students complete their education at New Mexico Tech.

Maria Ruiz Maya

Over the past two years, I have had the privilege of receiving financial aid from the President’s Tuition Assistance Fund. This aid has significantly helped me to continue my college education while also pursuing internships and research opportunities. I am an international student from Mexico working towards a bachelor’s degree in Mechanical Engineering. I also work part-time at the Department of Budget and Analysis. Without this fund, I would not be able to focus my time on my studies, and it would be more difficult to maintain a good academic standing. It has also greatly alleviated my family’s financial burden. My parents live in Mexico, and our economy has been unstable. The Mexican Peso’s value has been continuously devalued against the U.S. dollar, making it even harder for my parents to pay for my expenses. I feel truly honored and am incredibly grateful for this assistance. I want to thank the donors of the program for your help and generosity!

Jeff Lapierre

I graduated from NMT in 2015 with a PhD in Physics and dissertation in Atmospheric Physics. My research involved observational studies of lightning physics as part of the Langmuir Laboratory for Atmospheric Research. NMT provided a great environment so that I could effectively launch my academic career. However, throughout my degree, my adviser’s funding was not consistent. Much of my graduate funding came from multiple sources (i.e., teaching and other research projects). During the last semester of my PhD, my adviser’s funding finally ran out and there were no other funding sources available to me. Luckily, the President’s Tuition Assistance fund was able to help me out so that I could finish my degree without worrying about funding. This was at a crucial time in my degree when I was in the heat of completing my dissertation and getting ready to defend my research.

I am now a postdoc at the University of Virginia in the Environmental Sciences department. My research focuses on better understanding the production of nitrogen oxides due to lightning (LNOx). Know that by donating to the President’s Tuition Assistance fund, you are helping further our understanding of the world.

Thank you for contributing to the President’s Golf Tournament. You are making a difference to the future!
You can further contribute to this life-changing cause by donating online at www.nmt.edu/advancement
