Your 9608 Telephone

The IP Office supports the 9608 telephone.

The phone supports 24 programmable call appearance/feature buttons. The labels for these are displayed in the main display and can be controlled by the adjacent buttons.

Functions can be assigned to the phone's call appearance/feature buttons by your system administrator or by yourself using self-administration. However, you cannot replace call appearance buttons set by your system administrator. There are features that the system administrator can set that are not available to you to assign.

Set a Callback
If your call to an internal user is not answered, or if the status of the user is set to Do Not Disturb, you can press CallBack and end the call attempt. When the user ends their current or next call, or disables their DND status, the system calls you. When you answer, the system automatically makes another call attempt to the internal user.
