**National Institutes of Health (NIH)**

The National Institutes of Health (NIH), a part of the U.S. Department of Health and Human Services, is the nation’s medical research agency — making important discoveries that improve health and save lives.

- Causes, diagnosis, prevention, and cure of human diseases
- Processes of human growth and development
- Biological effects of environmental contaminants
- Understanding of mental, addictive, and physical disorders
- Provide information in medicine and health
- Institutes
  - National Institute on Aging (NIA)
  - National Institute on Alcohol Abuse and Alcoholism (NIAAA)
  - National Institute of Allergy and Infectious Diseases (NIAID)
  - National Institute of Arthritis and Musculoskeletal & Skin Diseases (NIAMS)
  - National Institute of Biomedical Imaging & Bioengineering (NIBIB)
  - National Cancer Institute (NCI)
  - National Institute of Child Health & Human Development (NICHD)
  - National Institute on Deafness & Other Communication Disorders (NIDCD)
  - National Institute of Dental & Craniofacial Research (NIDCR)
  - National Institute of Diabetes & Digestive & Kidney Disorders (NIDDK)
  - National Institute on Drug Abuse (NIDA)
  - National Institute of Environmental Health Sciences (NIEHS)
  - National Eye Institute (NEI)
  - National Institute of General Medical Sciences (NIGMS)
  - National Heart, Lung, and Blood Institute (NHLBI)
  - National Human Genome Research Institute (NHGRI)
  - National Institute of Mental Health (NIMH)
  - National Institute on Minority Health & Disparities (NIMHD)
  - National Institute of Neurological Disorders & Stroke (NINDS)
  - National Institute of Nursing Research (NINR)
- Centers
  - National Library of Medicine (NLM)
  - Clinical Center (CC)
  - Center for Information Technology (CIT)
  - Center for Scientific Review (CSR)
  - Fogarty International Center (FIC)
  - National Center for Advancing Translational Sciences (NCATS)
  - National Center for Complementary and Integrative Health (NCCIH)
