*Would you be willing to give up **one** of these things once a month to help a Tech student?*
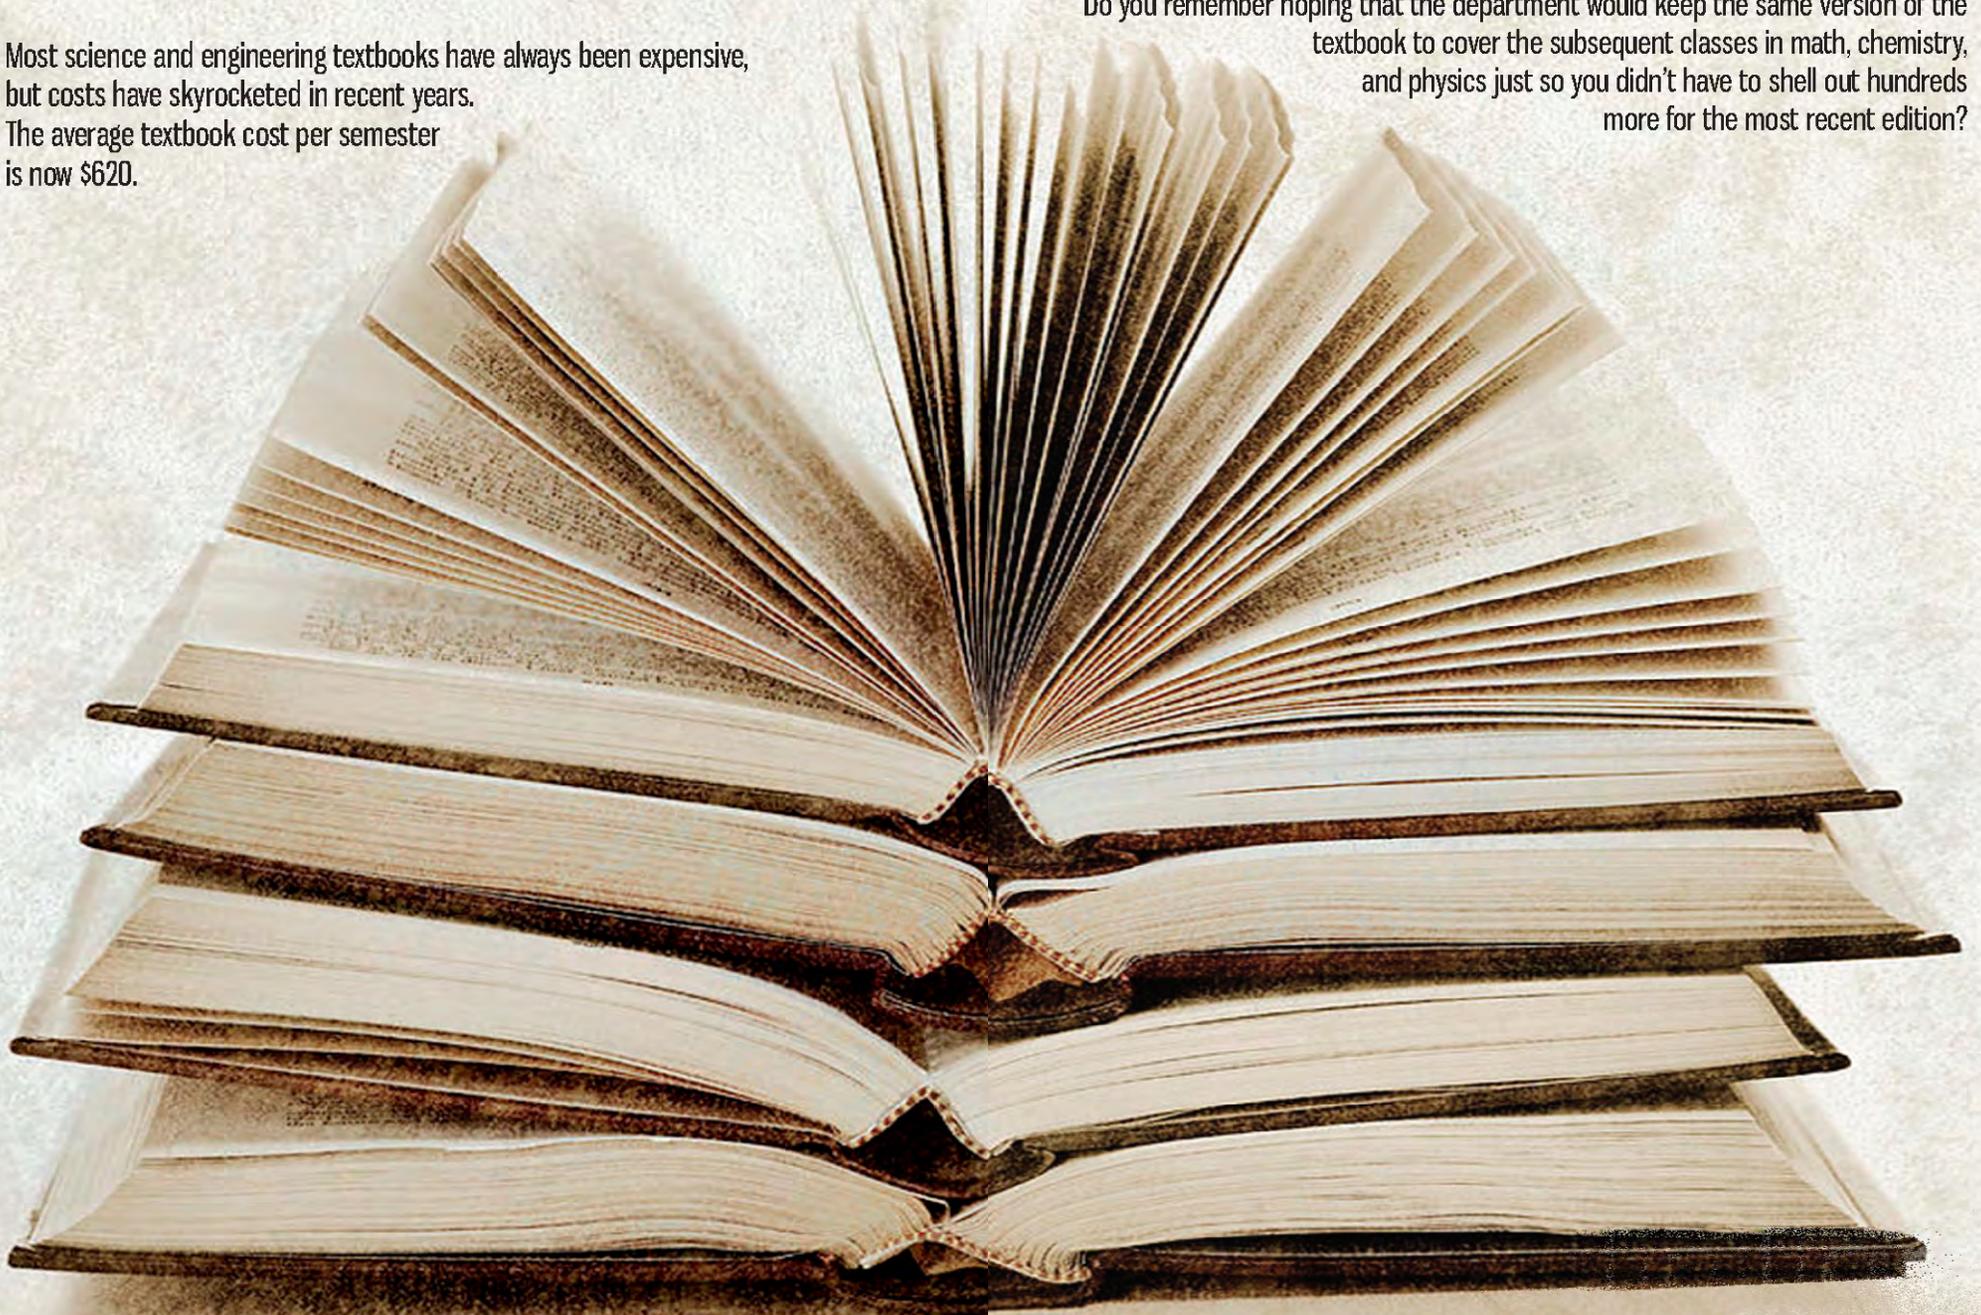

NEW MEXICO TECH
STUDENT TEXTBOOK FUND

Did you experience sticker shock when you bought your first set of college textbooks?

Do you remember paying your tuition and fees and then realizing that you still had to find money for your textbooks?
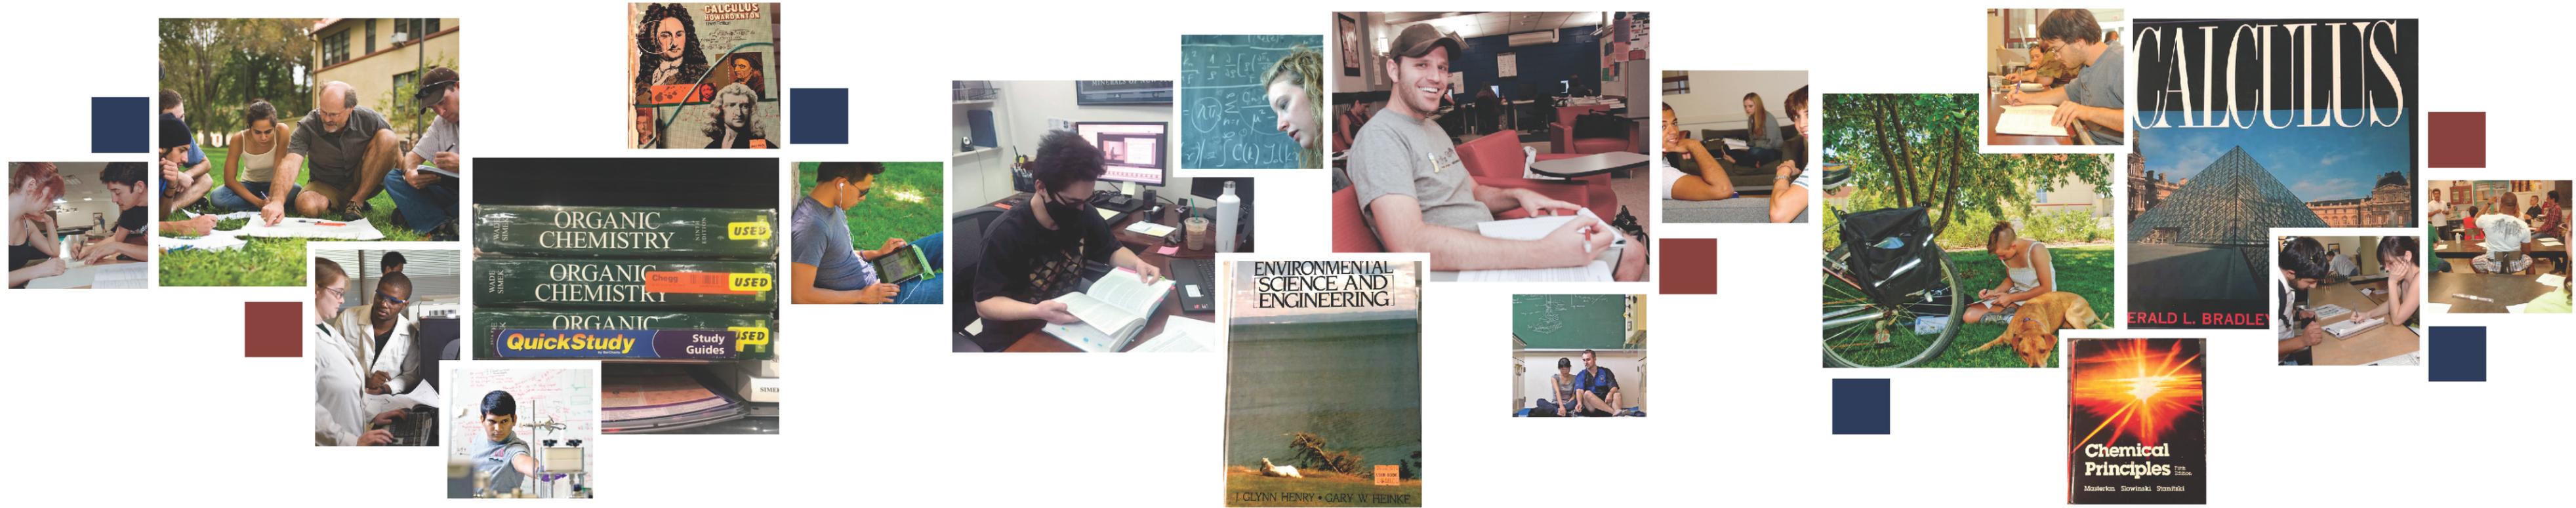

Most science and engineering textbooks have always been expensive, but costs have skyrocketed in recent years. The average textbook cost per semester is now $620.

Do you remember looking through the used textbooks in the hopes of finding one that was pristine and without someone else's notes, highlights and crumbs?

Do you remember hoping that the department would keep the same version of the textbook to cover the subsequent classes in math, chemistry, and physics just so you didn't have to shell out hundreds more for the most recent edition?
