...from these honored
souls, we will ask
devotion to that cause
for which they fell...
Dedication

IN RECOGNITION OF THEIR INITIATIVE, THEIR EFFORTS AND THEIR ABILITY, THIS BOOK IS RESPECTFULLY DEDICATED TO THE MEMBERS OF THE STAFF OF THE 1925 PORPHYRY, THE FIRST ANNUAL OF THE NEW MEXICO SCHOOL OF MINES.
Our Thanks

to Mrs. Ruby Griffith and Miss Betty Gianerna for their cheerful and prompt assistance on numerous critical occasions; to Dr. William G. Camp for perfect cooperation and unfailing encouragement; to Professor C. C. Crawford for valuable advice, ideas and suggestions; to Mr. Hugh Thompson, Editor of the Socorro Chieftain, for his willingness to supply printing information; and to Don Golding, Bob Harcus, Ned Stewart, and Dick Chenot for valuable assistance.
I join with the editors of THE PORPHYRY and all other students in bespeaking a progressively influential future for the School of Mines and increasingly successful careers for its graduates.

AND A-RIPIN'

AND A-ROPPIN'
The Student Council

Student body business affairs are handled by the capable and duly elected members of the Student Council, four of whom are Seniors, three Juniors, two Sophomores, and one a Freshman.

The Student Council apportions student funds to the best advantage of the student body as a whole and supervises the arrangements for and the execution of the traditional student social and cultural activities.

Joe Horton
President

Cooney Mining Club

The A.I.M.E. Affiliated Student Society of the New Mexico School of Mines is the Cooney Mining Club. Again this organization has taken the initiative in arranging field trips, talks by men of recognized professional attainment, and movies on technical subjects. This club, the oldest extra-curricular organization on the campus, by its very purpose is assured of a long and active life.

Jack Reinhardt
President
The Engineers Club

The Engineers Club, reactivated after a dormancy of several years, is composed of Juniors and Seniors who have merited scholastic recognition. Students in liberal arts educational institutions may not find their college work difficult, but every student of any reputable engineering school will agree that the student who has earned an average of B or better over a period of at least two years is deserving of some special recognition. Membership in the Engineers Club is dependent upon these qualifications.

Robert Zwicky
President

The Photography Club

One of the newer organizations on the campus is the Photography Club, which is probably the busiest club of all. The dark room in Brown Hall is in almost constant use, and the photographic work of this book is the result of the industry of members of this valuable association.

Joel Kobelin
President
Two years without athletic competition have reduced the membership of the "M" Club to seven, four of whom are Seniors.

The Rifle Club

The Rifle Club, formerly known as the Porphyry Rifle Club, is also in the throes of reactivation. A tremendous forward step was taken and a greatly stimulated existence was assured with the affiliation of the club with the National Rifle Association. Facilities include several excellent outdoor range locations as well as the privilege of using the Armory indoor rifle range.

Christmas Party
This club is of particular interest to embryonic stone-cutters and polishers, and to those interested in that phase of mineralogy known as gemology. Lack of a suitable workshop has limited the activity and stunted the growth of the club, which is potentially the largest most attractive.

"M" Day

Thanksgiving
The "M" Miracle

During State Fair Week and for the second time within a year, the people of Albuquerque awoke one morning to view the enigma of an "M" occupying the position where the University "U" normally graces one of the foothills east of the city.

Speculation as to the possible implications of the miracle led some to search the scriptures for supernatural explanation of the phenomenon. Old-timers, wise in the recollection and experience of less ordered times, glanced casually at the new aspect of the landscape and were heard to mumble petulantly something about "inmates breaking out of that Socorro asylum again."

Parade
For the second consecutive year, the New Mexico School of Mines is not represented in intercollegiate athletic competition. To many of us who years ago adopted the school as our own, this is a source of great sorrow.

With the cessation of intercollegiate competition, the school lost much of the wonderful spirit for which it was noted and which made its undermanned teams feared throughout the far Southwest.

The Senior Class leaves to the school this unattained objective, viz., that the New Mexico School of Mines shall again take her place in intercollegiate athletics with the limited representation which the small student body and high scholastic standards dictate.

Remember, the essential purpose of such competition is not the glory of victories on the athletic field but rather the development of loyalty, courage, school spirit, pride and initiative in our student body.
Record of the 1945-46 basketball team:

The Alumni Association of the New Mexico School of Mines

E. C. ANDERSON, '17, President
G. T. HARLEY, '33, Vice President
MARTIN SPEARE, '31, Secretary

The Alumni Association of the New Mexico School of Mines was organized May 18, 1923. The first officers were: Ward F. Hamm, '23, President; T. B. Everheart, '10, Vice President; Cecil Rowe, '21, Secretary-Treasurer. There were about 65 living members at the time of formal organization.

Now there are about 460 living members of the Alumni Association, widely scattered and in many cases difficult to contact. It was only through the important assistance of Adolph S. Walter, former Professor of Mining and Metallurgy, and William W. Long, Assistant Professor of Mining Engineering, that the compiling of the following membership list was possible.
