Letter of Addendum

TO: All Offerors

FROM: Meradeth Montoya, Associate Director of Purchasing

DATE: 3/17/2026

RE: RFB Number: RFB26030023 - Amendment No. 1
Commodity: LIDAR/GNSS (68077)

Q1. Item 2 states Mobile LiDAR and includes an option for handheld. I assume this refers to a handheld system rather than a traditional vehicle mounted system, as the listed weight appears too low for a vehicle mounted configuration. Can this include additional kits? For example, a handheld system that can also utilize a backpack battery extension or optional vehicle mount kit.

A1. The mobile LiDAR and any added wearables must be usable while crawling through spaces less than approximately 1 meter (3 feet) in diameter for extended periods. Systems may include compatible accessory kits provided they do not interfere with this operational requirement.

*****Additionally, all items shall be delivered FOB Destination to NCKRI Headquarters in Carlsbad, New Mexico.**

ALL OFFERORS ARE REQUIRED TO CONFIRM THE RECEIPT OF THIS AMENDMENT IN THEIR RESPONSE.
ALL OTHER TERMS AND CONDITIONS OF THE RFP REMAIN UNCHANGED.
